SPIE

Volume 12891

Proceedings of SPIE 0277-786X, V. 12891

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Silicon Photonics XIX*, edited by Graham T. Reed, Andrew P. Knights, Proc. of SPIE 12891, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510670426

ISBN: 9781510670433 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

OPTICAL COMPUTING AND OPTICAL PROCESSING

- 12891 02 **Scalable heterogeneously integrated silicon photonics technology platform and its applications (Invited Paper)** [12891-1]
- 12891 03 **Optical nonlinearities in silicon under extreme intensities in the optical communication (C-band) spectrum** [12891-2]
- 12891 04 **An efficient optical-based binary neural network hardware accelerator for harsh environments** [12891-3]

WAVEGUIDE DEVICES AND APPLICATIONS I

- 12891 05 **Silicon photonics with ultra-broadband operation from 1.2 to 2.4 μm wavelength** [12891-6]
- 12891 06 **Design of 1×16 optical phased array in 45-nm SOI CMOS** [12891-7]

QUANTUM PHOTONICS AND NANO-SCALE PROCESSING

- 12891 07 **Integrated quantum photonics with single color centers in silicon (Invited Paper)** [12891-9]
- 12891 08 **High-quality silicon single-photon source for practical quantum network** [12891-11]
- 12891 09 **All-silicon quantum light source** [12891-12]
- 12891 0A **Logic designs with millimeter wave optoelectronic CMOS transistors: novel high-efficiency local-interconnect optical waveguides, nonlinear optical, and microwave computing** [12891-13]

ACTIVE INTEGRATION I

- 12891 0B **Recent progress in heterogeneous integration on the silicon nitride platform using micro-transfer printing (Invited Paper)** [12891-14]

- 12891 0C **Tunable heterogeneous III-V-on-silicon-nitride mode-locked laser** [12891-24]
- 12891 0D **Control approaches for operating point stabilization of microring resonator modulators under fast perturbations** [12891-17]
- 12891 0E **Microlens integration on photonic integrated circuits: a platform for achieving relaxed packaging tolerances and hybrid integration of external functionality** [12891-27]

WAVEGUIDE DEVICES AND APPLICATIONS II

- 12891 0F **Athermal silicon optical circuit using half-etched core and silicone** [12891-19]
- 12891 0G **Power-efficient thermo-optic phase shifters with cavity-SOI** [12891-20]
- 12891 0H **A wideband silicon photonic duplexer constructed from a deep photonic network of custom Mach-Zehnder interferometers** [12891-22]

ACTIVE INTEGRATION II

- 12891 0I **A vertical-junction carrier-injection micro-ring modulator fabricated in AIM Photonics' quantum FLEX platform** [12891-16]

EMERGING DEVICES AND NOVEL PROCESSING

- 12891 0J **Hybrid silicon photonics for terahertz applications (Invited Paper)** [12891-28]
- 12891 0K **The influence of Ag/n-Si nanoparticles resonance on the photo-response in the mid-infrared region** [12891-31]

INTEGRATED DETECTORS AND SENSORS

- 12891 0L **Waveguide-coupled germanium lateral uni-traveling-carrier photodetector for coherent applications at 130 Gbaud and beyond** [12891-37]
- 12891 0M **High detection efficiency silicon avalanche photodiode for LiDAR** [12891-39]

POSTER SESSION

- 12891 0N **Thermally-controlled transparency in multi-ring cascaded filters** [12891-21]

- 12891 OO **Photonic micro-ring resonator design and analysis using machine learning techniques**
[12891-40]
- 12891 OP **On-chip electro-optic modulator based on left-handed photonic crystals** [12891-42]
- 12891 OQ **Investigation of optical bi-stability in micro-ring resonator structures** [12891-43]
- 12891 OR **Experimental demonstration of a broadband, ultra-compact, and fabrication-tolerant silicon photonic 10% power tap** [12891-46]
- 12891 OS **Optimizing photonic devices under fabrication variations with deep photonic networks**
[12891-47]
- 12891 OT **Automated measurement flow for PDK development in a 300 mm silicon photonics foundry**
[12891-48]
- 12891 OU **High sensitivity meta-surface plasmonic sensor** [12891-49]
