PROCEEDINGS OF SPIE

International Conference on Computer Graphics, Artificial Intelligence, and Data Processing (ICCAID 2023)

Haiwu Li
Harris Wu
Editors

1–3 December 2023
Qingdao, China

Organized by
GuangXi Minzu University (China)

Sponsored by
Hohai University (China)
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 13105
Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 13105

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Computer Graphics, Artificial Intelligence, and Data Processing (ICCAID 2023)*, edited by Haiwu Li, Harris Wu, Proc. of SPIE 13105, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xiii *Conference Committee*

Part One

COMPUTER AIDED DESIGN AND IMAGE ANALYSIS

13105 02 **Garbage image classification robotic arm based on deep learning** [13105-41]

13105 03 **UAV aerial image segmentation method based on improved U-Net** [13105-151]

13105 04 **SV-HaRF: a scene representation method for sparse image view synthesis** [13105-146]

13105 05 **Design and implementation of heuristic hybrid rendering** [13105-63]

13105 06 **A multi-exposure image fusion method based on histogram matching and convolutional neural network** [13105-129]

13105 07 **Image retrieval of colored spun fabrics based on decoupled feature** [13105-57]

13105 08 **Design of a digital landscape planning system based on visualization technology** [13105-66]

13105 09 **Improving object detection algorithm for unmanned aerial vehicle aerial images based on YOLOv8** [13105-21]

13105 0A **Research on Chinese painting patterns generation method based on denoising diffusion probability model** [13105-70]

13105 0B **Aging smart seat design based on Python** [13105-109]

13105 0C **Leaf image segmentation based on DeepLabV3+ and channel attention mechanism** [13105-187]

13105 0D **EfficientNet-based diabetic retinopathy image classification** [13105-96]

13105 0E **Optimization design of computer information processing systems in the big data perspective** [13105-93]

13105 0F **Multi-EfficientNet ensemble-based brain tumor MRI images classification** [13105-34]

13105 0G **SStyleGAN: a StyleGAN model for generating symmetrical lace images** [13105-149]

13105 0H **Research on fault diagnosis of photovoltaic panels based on deep learning image recognition technology** [13105-188]

13105 0I **Preprocessing of traffic sign images based on improved histogram equalization and bilinear interpolation** [13105-87]

13105 0J **Infrared image segmentation technology for electrical equipment based on genetic algorithm and fuzzy C-Class mean** [13105-92]

13105 0K **Medical image segmentation based on adaptive threshold prediction and feature fusion** [13105-80]

13105 0L **A novel chaotic image encryption scheme based on 3D configurations of pixel arrays** [13105-163]

13105 0M **ALU-Net: an attention-based mechanism lightweight U-Net for multimodal brain tumor segmentation** [13105-150]

13105 0N **Image stitching based on scanned images of super large format artworks** [13105-138]

13105 0O **Deep learning-based image recognition for power line inspection** [13105-130]

13105 0P **Image copyright protection system based on blockchain and binarization ORB algorithm** [13105-47]

13105 0Q **Optimal design of heliostat field based on improved particle swarm optimization algorithm** [13105-6]

13105 0R **Analysis of external factors influencing the calibration of binocular cameras** [13105-155]

13105 0S **Darkroom image enhancement algorithm based on SSR adaptive adjustment** [13105-88]

13105 0T **An image style transfer model based on convolutional neural network (CNN)** [13105-115]

13105 0U **Super-resolution knowledge-distillation-based low-resolution steel defect images classification** [13105-42]

13105 0V **Maize leaf disease image classification based on ResNet18 image classification model** [13105-154]

13105 0W **Spatio-temporal cycle consistency registration for thoracic CT images** [13105-49]

13105 0X **Spatial structure inter-correlation-based brain images registration** [13105-36]

13105 0Y **Multimodal research on nonlinear editing of images based on visual perception** [13105-108]

13105 0Z **An image quality evaluation assessment based on natural scene statistics** [13105-23]

13105 10 **Extracting semantic information of cycling lane based on street view image** [13105-85]

13105 11 **Fish image classification based on MobileNet** [13105-30]

INTELLIGENT TARGET RECOGNITION AND DETECTION TECHNOLOGY

13105 12 **Target rotation region detection based on semantic segmentation** [13105-127]

13105 13 **Colorectal white light filter object detection based on improved YOLOv5** [13105-79]

13105 14 **Detection methods for foreign objects in transmission tower poles based on improved YoLov4-tiny** [13105-19]

13105 15 **Infrared small target detection method based on full-direction dilation Gaussian filtering and local background estimation** [13105-50]

13105 16 **Multi-scale and attention training of uncalibrated photometric stereo networks** [13105-77]

13105 17 **Structured light three-dimensional reconstruction method based on GFU-Net network** [13105-113]

13105 18 **Automatic translation system from Classical Chinese to Modern Chinese based on large language models** [13105-119]

13105 19 **Large scale landslide susceptibility assessment based on machine-learning methods** [13105-24]

13105 1A **A multi-scale de-hazing network combining attention mechanisms** [13105-121]

13105 1B **Research on AGV interactive real-time simulation system combined with machine vision** [13105-71]

13105 1C **Application of 3D laser scanning technology in virtual reconstruction of existing building restoration** [13105-97]

13105 1D **Analysis and prediction of tennis players' match performance with sentiment analysis** [13105-14]

13105 1E **Ship target detection method based on improved YOLOv8** [13105-124]

13105 1F **Deep learning based ship trajectory prediction with AIS** [13105-20]

13105 1G **Tracking-based optical measurement method using circular coded marks points** [13105-173]

13105 1H **Research on traffic flow prediction method based on deep learning** [13105-90]

13105 1I **Bispectrum analysis and feature extraction of short-term HRV signals preceding onset of paroxysmal atrial fibrillation** [13105-110]

13105 1J **Temperature prediction of subcritical extraction vessel based on Informer** [13105-32]

13105 1K **Detection of pass rate of high vertical sand barrier of reed based on K-means clustering** [13105-22]

13105 1L **Experimental design of road traffic flow monitoring based on high-resolution remote sensing images** [13105-139]

13105 1M **A network model based on scrap metal classification and grading** [13105-76]

13105 1N **A study on the personalized learning path recommendation of intelligent learning system based on user behavior characteristic analysis** [13105-43]

13105 1O **YOLOV8 farm tomato detection based on attention mechanism and enhanced feature pyramid network** [13105-180]

13105 1P **Multi-person tracking based on spatial location constraint and occlusion awareness** [13105-74]

13105 1Q **A target-oriented method for dividing the effective region of laser interference** [13105-103]

13105 1R **Estimating the light distribution within Chinese bayberry tree canopy based on a three-dimensional structural model** [13105-120]

13105 1S **Bearing surface defect detection based on context-aware saliency** [13105-111]

13105 1T **Diffusion model for adversarial attack against NLP models** [13105-8]

13105 1U **Machine learning based blueberry detection method by CIE-YOLOv5** [13105-132]

13105 1V **Research on 3D reconstruction measurement method of workpieces based on binocular line structured light** [13105-52]

13105 1W **Research on pedestrian detection based on lightweight YOLOv8** [13105-501]

13105 1X **Object detection of pulmonary nodules based on fast R-CNN and CBAM** [13105-27]

13105 1Y **A hybrid MODWT-PSO-SVM model for time series forecasting** [13105-131]

13105 1Z **An improved super-resolution method for remote sensing based on generative adversarial network** [13105-141]

13105 20 **Hidden danger identification of slope based on improved semi-supervised GAN** [13105-178]

13105 21 **Cow face identification based on CNN by using channel attention module and spatial attention module** [13105-25]

13105 22 **A component recognition model based on improved attention mechanism and YOLOv3** [13105-9]

13105 23 **Oracle recognition based on improved YOLOv7** [13105-179]

13105 24 **Research on improved YOLOv5 electric vehicle helmet recognition algorithm** [13105-7]

13105 25 **A method for expanding sampling area boundary based on on-machine measurement** [13105-172]

13105 26 **Luggage falling-off recognition based on combined motion model in surveillance video** [13105-170]

13105 27 **Ensemble deep learning based tire classification with CNNs and ViTs** [13105-144]

13105 28 **Text classification method based on improved long short term memory network** [13105-192]

13105 29 **Shale porosity and pyrite intelligent identification based on improved Unet neural network** [13105-84]

13105 2A **Mobile-CANet: a new high-precision and lightweight method for rice pest classification** [13105-123]

13105 2B **Research on the application of intelligent Chinese herbal medicine identification technology** [13105-142]

13105 2C **A new method to analyze visual efficiency in interactive web environment** [13105-31]

Part Two

13105 2D **Multi-feature word embedding based named entity recognition in classical Chinese texts** [13105-17]

13105 2E **Text sentiment analysis based on LLaMA models** [13105-157]

13105 2F **Canny-based palm vein recognition algorithm** [13105-40]

13105 2G **Research on knowledge extraction and linking methods for electric power policy documents based on knowledge graph** [13105-185]

13105 2H **Accurate DNS server fingerprinting based on borderline behavior analysis** [13105-38]

13105 2I **Multiscale structure aware semantic GCN for occluded human pose estimation** [13105-56]

13105 2J **Research on traffic object recognition based on multi-sensor fusion** [13105-3]

13105 2K **A silent speech reconstruction method based on Res-Conformer model** [13105-35]

13105 2L **Knowledge distillation-based point cloud registration method** [13105-162]

13105 2M **Research on network public opinion text classification method based on machine learning** [13105-165]

13105 2N **Exploration of group activity recognition methods and system implementation** [13105-125]

13105 2O **Self-supervised boundary offline reinforcement learning** [13105-37]

13105 2P **Comparative study of deep learning models for action recognition based on skeleton data** [13105-13]

13105 2Q **License plate recognition algorithm based on multi-frame information fusion** [13105-181]

13105 2R **A method for microscopic hyperspectral image mosaic based on RGB image layer feature localization and mosaicing** [13105-118]

13105 2S **Deep learning transmission line defect recognition based on improved Yolov5** [13105-75]

13105 2T **Research on electric power aerial work recognition model based on deep learning** [13105-116]

13105 2U **An improved human pose estimation model based on DEKR** [13105-46]

13105 2V **Visual object tracking for mobile robots based on SAM-TRACK** [13105-167]

13105 2W **Application of improved MobileNetV3 in agricultural disease and pest recognition** [13105-15]

13105 2X **Research on vector fonts generation based on hierarchical decoupling model** [13105-16]

13105 2Y **Chinese named entity recognition with fusion of attention and whole word masking** [13105-54]

ROBOT MODELING AND INTELLIGENT MEASUREMENT AND CONTROL

13105 2Z **Path planning for robots utilizing the enhanced A* and improved dynamic window approach algorithm** [13105-51]

13105 30 **A review of face recognition technology based on deep learning** [13105-99]

13105 31 **High risk section identification of transmission lines based on historical warning data** [13105-59]

13105 32 **Transmission equipment defect identification algorithm based on the VIT large model architecture** [13105-122]

13105 33 **Covariance matrix adaptation MAP-Elites for video game level generation** [13105-106]

13105 34 **Visual coordination planning and simulation of ancient city street landscape and surrounding environment** [13105-86]

13105 35 **Gait stability control technology for intelligent detection robot of electric power hardware** [13105-190]

13105 36 **An accurate location method for intelligent warehouse materials based on RFID technology and machine vision** [13105-159]

13105 37 **Key recognition techniques for student portraits under artificial intelligence** [13105-117]

13105 38 **Weakly supervised steel surface defect detection via vision transformer with background suppression** [13105-148]

13105 39 **VProtoNet: vision transformer-driven prototypical networks for enhanced interpretability in chest x-ray diagnostics** [13105-10]

13105 3A **Extraction and measurement of pipeline welds based on 3D reconstruction** [13105-33]

13105 3B **Cross-section analysis method of ice-covered power lines for UAV blasting de-icing** [13105-39]

13105 3C **Research on intelligent warning mechanism of accurate personnel positioning system based on fuzzy neural network** [13105-69]

13105 3D **Research on decision system for driverless vehicles in uncertain environments** [13105-83]

13105 3E **Identification of illegal behaviors of sand trucks based on improved YOLO V5S** [13105-55]

13105 3F **Construction of information control platform for cross-sea cable-stayed bridge construction based on digital twin technology** [13105-62]

13105 3G **Application of machine-vision-based foreign object recognition in conveyor protection** [13105-137]

13105 3H **Infrared-radar multimodal target detection algorithm combining position prior information** [13105-53]

13105 3I **A deep reinforcement learning method for multi-heterogeneous robot systems based on global status** [13105-48]

13105 3J **Research on outdoor instrument cleaning and reading robot based on wireless positioning** [13105-44]

13105 3K **Construction of flight test business model based on XBOM** [13105-91]

13105 3L **Research on the shortest path problem of single source based on Q-learning** [13105-186]

13105 3M **Burst point of projectile instance segmentation method based on improved SOLOv2** [13105-153]

13105 3N **Production layout optimization of intelligent manufacturing based on twin checkerboard model** [13105-65]

13105 3O **Intelligent traffic management system model based on LSTM-TOPSIS-Dijkstra** [13105-133]

13105 3P **Indoor positioning based on channel state information and deep learning domain adaptation** [13105-11]

13105 3Q **Real-time arbitrarily-shaped scene text spotting with weakly supervised points** [13105-140]

13105 3R **Research on resume screening methods in corporate internet recruitment based on machine learning** [13105-168]

13105 3S **Research on bearing fault diagnosis under mixed working condition based on Vision Transformer hybrid model** [13105-100]

13105 3T **Fault location estimation of power grid using graph attention networks** [13105-182]

13105 3U **Based on machine learning analysis of the role of new energy vehicles in reducing traffic carbon emissions** [13105-114]

13105 3V **A question answer chatbot using term frequency-inverse document frequency and Markov chain** [13105-89]

13105 3W **Research on federal learning techniques for target detection in industrial field images** [13105-101]

COMPUTATIONAL STATISTICS AND BIG DATA APPLICATION

13105 3X **A computational optimization method for measuring and extracting correlation information between variables: taking the evaluation index system as an example** [13105-156]

13105 3Y **Privacy-preserving IoT system based on blockchain and proxy re-encryption** [13105-64]

13105 3Z **Research on small and medium target detection algorithm for unmanned aerial vehicles based on faster R-CNN** [13105-5]

13105 40 **A reference vector-interpolation-based multi-objective evolutionary algorithm** [13105-166]

13105 41 **River and canal sudden water pollution tracing based on the Metropolis-Hastings algorithm** [13105-175]

13105 42 **A firmware upgrade solution based on hardware unique ID and SM4 cryptographic algorithm** [13105-184]

13105 43 **A novel firmware secure transmission scheme based on SM2 threshold key agreement algorithm** [13105-98]

13105 44 **Application research of the improved Apriori algorithm based on frequent itemsets in intelligent greenhouses** [13105-145]

13105 45 **A two-dimensional numerical model of water quality for the Jiao(ling) River Estuary** [13105-158]

13105 46 **A novel data augmentation method for person re-identification** [13105-161]

13105 47 **Improved SDD-1 query optimization algorithm** [13105-28]

13105 48 **Study on the accuracy and stability of elevator inclination angle measurement: application of angle measurement based on smartphone sensor data processing** [13105-67]

13105 49 **A federated learning scheme based on personalized differential privacy and secret sharing** [13105-94]

13105 4A **A robust positioning algorithm of crosshair center based on grayscale weighting** [13105-68]

13105 4B **Analysis and application of intelligent management of server rooms incorporating digital twin technology** [13105-143]

13105 4C **Fusion diagnostics based on blockchain technology** [13105-18]

13105 4D **Application of support vector machines for categorizing biological and medical data** [13105-189]

13105 4E **A computer image feature extraction algorithm based on distributed K-means algorithm** [13105-171]

13105 4F **Iterated greedy algorithm applied to the navigation lock arrangement problem** [13105-72]

13105 4G **A discrete dual convolution operation** [13105-78]

13105 4H **A style classification algorithm for ink painting based on deep network feature aggregation** [13105-126]

13105 4I **Research on assembly sequence planning method based on artificial neural networks** [13105-152]

13105 4J **Improved small object detection algorithm based on YOLOv5** [13105-105]

13105 4K **Modeling the cost in human-assisted data acquisition processes** [13105-102]

13105 4L **A lightweight skew detection algorithm for spray code characters** [13105-169]

13105 4M **Pipeline data calibration for the construction of three-dimensional underground pipeline system** [13105-26]

13105 4N **Solving TSP problem based on discrete snake optimization algorithm** [13105-29]

13105 4O **Research on remote sensing target detection algorithm with improved YOLOv3** [13105-134]

13105 4P **A spatiotemporal RDF stream model for effective representation of temporal and spatial data** [13105-4]
