Table of Contents

A Novel Dual Inlet Tangential Vortex Drop Shaft: An Analytical and Numerical Study	1
Angle Effects of LIDAR Measurements on a Flat Surface and in High-Velocity Spillway Flows	11
Anti Vortex Device to Operate Pump Intakes Below the Minimum Submergence	20
Effect of Deficient Tailwater on the Performance of Slotted Roller Bucket of Indira Sagar Dam, Madhya Pradesh	29
Energy Dissipation and Flow Regime Downstream of Trapezoidal Piano Key Weirs	37
Experimental and Numerical Investigation on Critical Submergence for Square Water Intakes	46
Feasibility Assessment of the Application of Delft3D Model to Simulate Flow over a Spillway in a Dam: Study Case of Hampaturi Dam in Bolivia	56
Hydraulic Behavior of Spill Channel of Polavaram Dam Spillway without Left Embankment	66
Hydrodynamic Behavior of Stilling Basins with Deflectors to Reduce Supersaturation of Total Dissolved Gases: Analysis of Yacyretá and Jorge Cepernic Dams	75
Investigation of Energy Attenuation, Flow Resistance and Impending Motion of Downstream Bed Material in Rock Ramps	84
Model Studies for Desilting Basin for Teesta-VI H.E. Project, Sikkim – A Case Study	93
Non-Intrusive Measurements of Air-Water Flow Properties in Supercritical Flows Down Grass-Lined Spillways	101
Numerical and Experimental Study on Energy Dissipation in Hydraulic Jump: A Comparison Between Horizontal and Sloping Rough Channel Bed	110
Physical and Numerical Model Studies for Hydraulic Design of Stilling Basin as an Energy Dissipator of a Spillway - A Case Study	120

Prediction of Discharge Coefficient of Circular Side Orifice Through Machine Learning Technique	130
Preliminary Evaluation and Design of a New Energy Dissipation Stilling Basin via Numerical and Experimental Modeling	140
Recent Challenges in Design of Spillway – An Indian Scenario	150
Stilling Basins Using Wedge-Shaped Baffle Blocks	160
Submerged Flow Regimes Downstream of a Weir at Multiple Slopes	170
Surface Velocities and Free-Surface Aeration in a Converging Smooth Chute During a Major Flood Event	180
2-D Simulation of Flow Structures Over Dunes for Flow Characteristics Estimation	190
A Numerical Investigation on Residual Energy of Labyrinth Weirs	201
An Experimental Study on Scour at Zero Degree Confluent Channels	209
Bank Scour Protection Using Spur Dyke in a Meandering Channel Under Low Flow Velocity	218
Bed Load Computation for Gravel Particles in Gravel-Silt Mixture	228
Calculating Local Pier Scour in Coarse-Bed Streams	236
CFD-Based Modeling for Computing Discharge Coefficient of an Ogee Spillway	246
Designing Smooth Mixed-Geometry Canal Transition	256
Effect of Diameter and Inlet-Depth on Hydro-Suction Performance of a Suction Pipe	265
Effect of Sinuosity Variation on Flow Characteristics of Sand Mined Sinuous Channel Using Numerical Modeling	273
Estimation of Discharging Capacity and Assessing the Performance of Overflow Spillway With Full and Partial Operation of Gates Using Numerical Modelling	279
Estimation of Maximum Scour Depth and Scour Pattern Around Submerged Spur-Dike	287

Experimental Evaluation of Drag Force on Different Shapes of Pontoons at Different Water Stream Velocities at Specified Loads and Submergence	297
Experimental Optimization of a Gravel Trap in a Gallery	307
Experimental Study on Three-Dimensional Velocity near Piano Key Weirs	316
Flow Over Orifice Spillway: Physical and Numerical Study for Spillway Profile Design of Hydroelectric Project	326
Hydraulic Performance of Piano Key Weir with Linear and Curvilinear Profiles of Outlet Key	335
Hydrodynamics of Permeable Horseshoe Obstacle in Fluvial Environment: A Physical Modelling	345
Importance of Risk and Hazard Assessment of River Projects in India	355
Introduction and Investigation of a Large-Scale Piano Key Weir Fabricated Via Rapid Prototyping	364
Investigation on Near Bed Flow Features Over a Water-Worked Gravel Bed	371
Jet Scour in Cohesive and Non-Cohesive Soil	381
Laws of Turbulence and the Estimation of Turbulent Kinetic Energy Budget for Flow Through a Degraded Channel-Bed	391
Local Scour Downstream of Type-A Trapezoidal Piano Key Weir	401
Near-Full-Scale Physical Modelling and Open-Channel Flow Velocity in a Fish-Friendly Culvert with Full-Height Sidewall Baffles	411
Numerical Modeling for Optimization of the Aspect Ratio of Submerged Vanes for the Purpose of Sediment Deflection in Rivers	421
Numerical Modelling of Scour and Flow Field for Two Different Arrangements of Piers Using SSIIM Model	431
Numerical Simulation of Air Entrainment in Stepped Spillways	442
Performance Testing of Acoustic Doppler Current Profiler Used for Stream Flow Measurement	449

Physical and Numerical Model Studies of Hirakud Dam Additional Spillway –A Case Study	458
Plunge Pool Rock Scour Assessment by Fluid-Solid Coupling	468
Porous Concrete Slabs Underlain by Polypropylene Fabric for Restoration of Beaches	478
Predicting Density-Driven Exchange Flows Through the West Crack Breach of the Great Salt Lake Causeway with CFD and ANN	488
Predicting Riverbed Deformation During Floods for a Sustainable Design of Headworks Structures	497
Preliminary Analysis of the Effect of Worked Wood Piles in Straight Channels	507
Reynolds Stress Modelling of Supercritical Flow in a Narrow Channel	515
River Aggradation-Degradation Under Sand Mining: Experimental and Numerical Studies	525
Scour Downstream of a Broad Crested Drowned Weir	535
Scour Geometry and Dune Formation Characteristics around Customized Structure in Channels	544
SPH Simulation of Non-Aerated Flow Over Smooth Invert, Converging Spillways	553
