PROCEEDINGS OF SPIE

Behavior and Mechanics of Multifunctional Materials XVIII

Aimy Wissa Mariantonieta Gutierrez Soto Russell W. Mailen Editors

27–28 March 2024 Long Beach, California, United States

Sponsored and Published by SPIE

Volume 12947

Proceedings of SPIE 0277-786X, V. 12947

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in Behavior and Mechanics of Multifunctional Materials XVIII, edited by Aimy Wissa, Mariantonieta Gutierrez Soto, Russell W. Mailen, Proc. of SPIE 12947, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510672000 ISBN: 9781510672017 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

SESSION 1	MECHANICS OF MULTIFUNCTIONAL MATERIALS
12947 04	Investigation of damages in impacted thick composite panels by NDI methods [12947-3]
12947 05	A ferroelectric phase field study of nanoindentation contact mechanics [12947-4]
SESSION 2	
12947 06	Non-destructive three-dimensional observation of dynamic behavior inside microparticle composite rubbers using dynamic x-ray CT [12947-7]
12947 07	Multifractal analysis of heat transport in DLA structures [12947-8]
12947 08	Novel solutions for structural protections: retrofitting impact-vulnerable structures with non-Newtonian polymers (Invited Paper) [12947-9]
12947 09	Electromechanical characterization and computational analysis of the corona-enabled electrostatic printed flexible strain sensors [12947-6]
SESSION 3	ADAPTIVE MULTIFUNCTIONAL MATERIALS

- 12947 0A Mechano-optoelectronic and micromechanical properties of conjugated polymeric thin films with nano-structured lamellae [12947-11]
- 12947 OC Self-folding behavior of bilayer films actuated by liquid crystal elastomers [12947-13]
- 12947 0D Improvement of the power generation efficiency of magnetostrictive vibration generators using multiple magnetic circuits [12947-14]
- 12947 OE Realization and experimental validation of multimaterial 4D-printed self-actuating structures with two morphing phases [12947-15]

SESSION 4 PROGRAMMABLE MULTIFUNCTIONAL MATERIALS

- 12947 OF Robust control of friction-driven reconfigurable adaptive structures [12947-16]
- 12947 0G Magnetostrictive materials for tunable fluid pumps [12947-17]
- 12947 01 Tunable and broadband low-frequency noise control via multifunctional polyborosiloxane thin membrane gels [12947-19]
