Volume 12953

Proceedings of SPIE 0277-786X, V. 12953

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical and EUV Nanolithography XXXVII*, edited by Martin Burkhardt, Claire van Lare, Proc. of SPIE 12953, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

IMAGING

- | | |
|----------|---|
| 12953 02 | Exploring the limits of high contrast contact imaging using split pupil exposures in high-NA EUV lithography (Invited Paper) [12953-1] |
| 12953 03 | Holistic assessment and control of total CDU [12953-2] |
| 12953 04 | High-NA benefit assessment through Zeiss AIMS EUV for tip-to-tip patterning by EUVL [12953-3] |

PATTERNING

- | | |
|----------|---|
| 12953 05 | EUV patterned gate variation reduction in next generation transistor architectures [12953-8] |
|----------|---|

EUV IMAGING

- | | |
|----------|--|
| 12953 06 | Improving EUV sub-40nm via single patterning using wavefront and pupil co-optimization [12953-10] |
| 12953 07 | Focus sensing using placement and CD variation for high NA EUV lithography [12953-11] |
| 12953 08 | Study of MEEF improvement with low-n absorber EUVL mask [12953-12] |
| 12953 09 | EUV source pole control for LCDU and CD ellipticity handling in hexagonal contact arrays [12953-13] |
| 12953 0A | EUV lithography: LER design, mask, and wafer impact [12953-15] |

STOCHASTICS CONTROL

- | | |
|----------|--|
| 12953 0B | Modeling edge placement error performance of EUV and DSA multipatterning processes [12953-17] |
| 12953 0C | EUV OPC modeling of dry photoresist system for pitch 32nm BEOL [12953-18] |

12953 0D **Hard failure prediction of ADI pattern using optical parameters and machine learning**
[12953-19]

EUV MASKS AND PATTERNING

12953 0E **Particle mobilization by EUV-induced plasma and fast electrons** [12953-21]

12953 0F **Understanding and measuring EUV mask 3D effects** [12953-23]

12953 0G **Actinic patterned mask inspection for high-NA EUV lithography** [12953-24]

12953 0H **Proposal of cap layer design combined with absorber for EUV mask** [12953-25]

EUV LITHOGRAPHY PROCESS: JOINT SESSION WITH CONFERENCES 12953 AND 12957

12953 0I **Molecular cluster impact on EUV stochasticity** [12953-49]

OVERLAY AND STITCHING

12953 0J **An experimental stitching study on the eve of high-NA EUV** [12953-27]

12953 0K **OPC and modeling solution towards 0.55NA EUV stitching** [12953-29]

12953 0L **Computational distortion prediction method considering characteristics of EUV lithography**
[12953-31]

STUDENT SESSION

12953 0M **Unraveling strength and mechanical properties of CNT-based EUV pellicle** [12953-32]

12953 0N **3D mask simulation and lithographic imaging using physics-informed neural networks**
[12953-33]

12953 0O **Best focus alignment through pitch strategies for hyper-NA EUV lithography** [12953-34]

IMAGING SYSTEMS

12953 0P **The next step in Moore's law: high-NA EUV introduction at the customer (Invited Paper)**
[12953-35]

12953 OQ	EUV optics at ZEISS: status, outlook, and future [12953-36]
12953 OR	Imaging study of phase shift spatial light modulator for digital scanner [12953-38]
12953 OS	Driving exposure accuracy and cost-of-ownership on DUV immersion and dry-NXT scanner products [12953-39]

EUV FUTURE AND ASML BEST STUDENT PAPER AWARD PRESENTATION

12953 OT	On the compatibility of free-electron lasers with EUV scanners (Invited Paper) [12953-41]
12953 OU	Exploring EUV scanner design options enabled by free electron laser sources [12953-42]
12953 OV	High-power EUV light sources (>500w) for high throughput in next-generation EUV lithography tools [12953-43]

EUV PATTERNING AND ETCH: JOINT SESSION WITH CONFERENCES 12953 AND 12958

12953 OW	Study of patterning for advanced packaging [12953-45]
12953 OX	Pushing the boundaries of random logic metal patterning with low-n EUV single exposure [12953-46]
12953 OY	2D local interconnect metal patterning exploration for CFET [12953-47]

POSTER SESSION

12953 OZ	Accelerated equipment design through a next generation damping and lifetime simulation capabilities [12953-57]
12953 10	Balancing mask manufacturability and image quality with inverse lithography: a study on variable fracture sizes [12953-58]
12953 11	A novel data-based dynamic decoupling control in wafer stage motion system for focus improvement [12953-60]
12953 12	The influence of asymmetric spectrum of DUV light on imaging performance in advanced technology nodes [12953-61]
12953 13	Development progress of Gigaphoton's LPP EUV light source for inspection systems [12953-62]
12953 14	A new stochastic EUV resist model based on a modified minimal process algorithm [12953-63]

12953 15	Inverse analysis of multilayer defects in EUV mask from the perspective of imaging performance [12953-65]
12953 16	Source optimization based on compression sensing for plasmonic lithography [12953-67]
12953 17	Photoresist process simulation to study line edge roughness [12953-69]
12953 18	Super-polished metallic freeform optics for EUV-application [12953-70]
12953 19	Towards efficient and accurate cost functions for EUVL stochastic-aware OPC correction and verification: via failure probability versus image and process variation band metrics [12953-72]
12953 1A	Genetic optimization of aperiodic multilayer masks for high and hyper-NA EUV lithography (2024 ASML-Cymer Leadership for Best Student Paper Award) [12953-74]
12953 1B	A novel solution for next-generation EUV pellicle: breathable membrane with increased transmittance [12953-76]
12953 1C	An idea of two-mask stage for high-NA EUV scanners [12953-79]
12953 1D	Metrology-class EUV light source based on quasi-continuous copper LPP [12953-80]
12953 1E	Study of ArF phase shift masks radiation damage induced scum defect [12953-86]
12953 1F	High-NA mask phase-effects studied by AIMS EUV [12953-87]
