Volume 13011

Proceedings of SPIE 0277-786X, V. 13011

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Data Science for Photonics and Biophotonics*, edited by Thomas Bocklitz, Proc. of SPIE 13011, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

PREPROCESSING AND STANDARDIZATION OF SPECTRAL DATA AND ITS AUTOMATION

- 13011 02 **Enhancing silicon nitride waveguide performance: optimization of sidewall roughness for low-loss applications through resist reflowing via tree-based modeling of relevant processing parameters** [13011-3]
- 13011 03 **Revealing surface refractive index dynamics in comb-like plasmonic optical fiber biosensors** [13011-4]
- 13011 04 **Spike detection algorithms for Raman spectroscopy: a comparative study** [13011-5]

CHEMOMETRICS AND DATA PIPELINES FOR PHOTONIC DATA AND ITS APPLICATIONS

- 13011 05 **Automatic optimization of spectral classifiers' hyperparameters for pathogen identification through evolutionary techniques** [13011-8]
- 13011 06 **Active learning concept for materials process optimization of non-fullerene organic photovoltaic using small datasets** [13011-9]
- 13011 07 **A comprehensive pipeline to integrate preprocessing and machine learning techniques for accurate classification in Raman spectroscopy** [13011-10]
- 13011 08 **Fusion and integration pipelines for optical and chemical imaging data for clinical interpretation in ex vivo diagnosis (Invited Paper)** [13011-11]

MACHINE LEARNING AND ITS APPLICATIONS IN PHOTONIC DATA

- 13011 09 **Noninvasive in vivo monitoring of plasma volume and hematocrit using the FRD-PVOH device: from cozy to cold** [13011-13]
- 13011 0A **Machine learning feature extraction for predicting the ageing of olive oil** [13011-14]

**INVERSE MODELLING OF PHOTONIC MEASUREMENT PROCESSES AND FAIR DATA MANAGEMENT
OF PHOTONIC DATA**

- 13011 0B **Explainable machine learning for the multiclass classification of diffuse reflectance spectroscopy signals in orthopaedic applications** [13011-21]
- 13011 0C **Advanced holographical and physics inspired deep learning approaches for image transmission through multimode optical fiber** [13011-22]

POSTER SESSION

- 13011 0D **Preliminary evaluation of an automated autoencoder-UNet pipeline for chemical image segmentation and compression with reference to serial ground truth pathology** [13011-18]
- 13011 0E **Entropy-based spatial heterogeneity analysis in pathological images for diagnostic applications** [13011-24]
- 13011 0F **Using Shapley additive explanations saliency for interpretation of multiclass classification of PDX spectral data with deep neural networks** [13011-25]

DIGITAL POSTER SESSION

- 13011 0G **AI-driven perovskite solar cells optimization** [13011-27]
- 13011 0H **Machine learning for metasurfaces broadband absorber design** [13011-28]
