**Volume 13021**

Proceedings of SPIE 0277-786X, V. 13021

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Fabrication and Testing VIII*, edited by Eric Ruch, Reinhard Völkel, Proc. of SPIE 13021, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## OPTICAL FABRICATION AND TESTING I

---

- 13021 02     **Design and manufacturing of the CHIME spectrometer unit** [13021-1]
- 13021 03     **Manufacture and verification of M6C mirrors the pre-focal stations of the ESO-Extremely Large Telescope** [13021-2]
- 13021 04     **Hyperpolished off-axis optics using nanoparticle slurries: concept and first results** [13021-4]

---

## OPTICAL FABRICATION AND TESTING II

---

- 13021 05     **Design and manufacturing of a metallic telescope for ground-based quantum communication** [13021-6]
- 13021 06     **Active alignment technique of an off-axis beam expander** [13021-7]
- 13021 07     **Design and fabrication of aspheric Fresnel-type lenses for solar energy by using a 3D printer** [13021-8]
- 13021 08     **Design and fabrication of an off-axis Fresnel-type reflector by using 3D printing** [13021-9]

---

## OPTICAL FABRICATION AND TESTING III

---

- 13021 09     **Coating stress compensation and temporal evolution studies for ion beam sputtered thin films** [13021-11]
- 13021 0A     **Effect of the skew ray error on corneal topography using a cone topographer** [13021-13]
- 13021 0B     **Design of a planar off-axis null-screen for characterization of a concave surface used in a seismic isolation device** [13021-14]
- 13021 0C     **Different refracted wavefront approaches propagated through an achromat separated doublet** [13021-15]

---

**OPTICAL FABRICATION AND TESTING IV**

---

- 13021 OD      **Optical testing of a high numerical aperture spherical mirror [13021-16]**
- 13021 OE      **Development of an interferometric test bench for the manufacturing of the ELT secondary mirror [13021-17]**
- 13021 OF      **Development of a 18 point active supporting tool for the metrology of the ELT M2 secondary mirror [13021-18]**
- 13021 OG      **Extension of an optical coordinate measurement machine with a tactile probe, for combined measurement of optical surfaces and mechanical reference features [13021-19]**

---

**OPTICAL FABRICATION AND TESTING V**

---

- 13021 OH      **Design, simulation, and verification of a radially supported 60 inch meniscus mirror in a horizontal line of sight [13021-20]**
- 13021 OI      **Deep ultraviolet spectral photometry investigation of optical components under vacuum and nitrogen purge conditions [13021-24]**

---

**OPTICAL FABRICATION AND TESTING VI**

---

- 13021 OJ      **Performance of UV-molded versus injection molded maskless microlens arrays for multi-aperture projection [13021-25]**

---

**POSTER SESSION**

---

- 13021 OK      **Fabrication of diffraction gratings using sol-gel method and imprinting method [13021-23]**
- 13021 OL      **Development of a long cone corneal topographer to evaluate corneas without symmetry of revolution [13021-31]**
- 13021 OM      **Precision inspection of micro-components surfaces by moiré interferometry [13021-32]**
- 13021 ON      **Null-screen based corneal topography using a smartphone [13021-33]**

---

**DIGITAL POSTER SESSION**

---

- 13021 OO      **Realization of a cost-effective 3D-printed lens for aberration correction for visible spectrum imaging [13021-35]**
