Volume 13022

Proceedings of SPIE 0277-786X, V. 13022

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Illumination Optics VII*, edited by Tina E. Kidger, Stuart David, Thorsten Schupp, Proc. of SPIE 13022, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

NONIMAGING DESIGN

- 13022 03 **Small-scale light homogenization of fiber-output using different optical configurations** [13022-1]
- 13022 04 **Using secondary prismatic microarrays to refine the light distribution of automotive lightguide luminaires** [13022-2]
- 13022 05 **Design and fabrication of polymer lightguides for optical sensing and illumination** [13022-3]
- 13022 06 **Broadband uniform illumination optics for industrial applications** [13022-4]

LED SOURCES AND LED SYSTEM DESIGN

- 13022 08 **Advancements in multi-projection system illumination and the challenges of coherent light sources (Invited Paper)** [13022-6]
- 13022 09 **How to fill a light tube** [13022-7]
- 13022 0A **Versatile illumination module for multispectral imaging with a conventional fundus camera** [13022-8]

TRANSPORTATION SYSTEM DESIGN

- 13022 0B **Freeform beam-shaping system design with Monge-Ampère equation method (Invited Paper)** [13022-10]
- 13022 0C **Development of cost-efficient micro-optics for headlight systems: different loops of optimization leading to a glare-free and high range module** [13022-11]
- 13022 0D **Workflow for solar irradiance concentration analysis** [13022-12]
- 13022 0E **Imaging tasks in automotive illumination systems and how they are intertwined with photometrics and non-imaging optics** [13022-13]

NONIMAGING FREEFORM DESIGN

- 13022 0F **Freeform illumination lens design with a predefined exit surface (Invited Paper)** [13022-14]
- 13022 0G **Turn-mixer with spatial and angular uniformity** [13022-15]
- 13022 0H **Generating function formulation for inverse freeform design** [13022-16]

DIGITAL POSTER SESSION

- 13022 0I **Miniaturized and high efficient GaN-based blue micro-LEDs for future display applications**
[13022-9]
