PROCEEDINGS OF SPIE

Computational Optics 2024

Daniel G. Smith Andreas Erdmann Editors

10–11 April 2024 Strasbourg, France

Sponsored by SPIE

Cosponsored by Nikon Research Corp of America (United States) ASML Netherlands B.V. (Netherlands) Carl Zeiss GmbH (Germany)

Cooperating Organisations Photonics 21 (Germany) EOS—European Optical Society

Published by SPIE

Volume 13023

Proceedings of SPIE 0277-786X, V. 13023

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in *Computational Optics* 2024, edited by Daniel G. Smith, Andreas Erdmann, Proc. of SPIE 13023, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510673649 ISBN: 9781510673656 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

COMPUTATIONAL IMAGING AND STUDENT PRESENTATIONS

- 13023 02 Impact of transmitter wavefront errors and pointing jitter on intersatellite free space optical communications [13023-3]
- 13023 03 Simulation of solid-state lasers with temperature and wavelength dependent absorption and emission [13023-4]

AI, OPTIMIZATION, AND STUDENT PRESENTATIONS

- 13023 04 **3D EUV mask simulator based on physics-informed neural networks: effects of polarization and** illumination (Invited Paper) [13023-5]
- 13023 05 Characterization of scattering systems using multiplane neural networks [13023-6]

METASURFACES AND STUDENT PRESENTATIONS

- 13023 06 Local full-wave methods for accurate modelling of large area metasurfaces (Invited Paper) [13023-13]
- 13023 07 Optical metasurfaces with two-photon lithography: design considerations for beam steering applications [13023-14]
- 13023 08 Modeling of centimeter-scale metasurfaces in imaging systems [13023-15]
- Advances in modeling and optimization for two-photon lithography [13023-16]

AI AND DESIGN

13023 0A	Enhancing three-dimensional beam shaping accuracy through cascaded spatial light modulators using diffractive neural networks (Best Student Paper Award) [13023-19]
13023 OB	Quality-diversity driven robust evolutionary optimization of optical designs [13023-21]

MODELLING TECHNIQUES I

13023 0C Ray-wave dual descriptions of classical light and birefringence: a path integral story [13023-23]

MODELLING TECHNIQUES II

13023 0D Analytical treatment of the field discontinuities within the Fourier space methods in the grating diffraction theory [13023-26]

POSTER SESSION

- 13023 OE Shifted coded aperture design for single pixel imaging systems [13023-29]
- 13023 OF Efficient gradient computation in optical system optimization [13023-33]
- 13023 0G Coded aperture design for temporal compressive imaging in a color-polarized video [13023-34]

DIGITAL POSTER SESSION

- 13023 0H A review: modeling and optimizing diffractive optical elements for enhanced pollutant detection in LiDAR systems [13023-37]
- 13023 0I Innovating education: MLA-based AR/VR display for learning purpose [13023-38]
- 13023 0J Reviewing Al-enabled microscopes for diagnostic purposes [13023-39]
- 13023 0K Resource potential analysis of the industry using space monitoring and mathematical apparatus for discrete orthogonal transformations [13023-41]
- 13023 OL Space monitoring using earth remote sensing technologies and stochastic geometry to analyze emergency situations [13023-42]
- 13023 0M Revolutionizing optical wireless communication with silicon-based spin-encoded metalens [13023-44]
