Sponsored and Published by
SPIE

Volume 13026

Proceedings of SPIE 0277-786X, V. 13026

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Next-Generation Spectroscopic Technologies XVI*, edited by Richard A. Crocombe, Luisa T. M. Profeta, Steven M. Barnett, Proc. of SPIE 13026, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 NEW SPECTROSCOPIC TECHNOLOGIES I

- 13026 03 **TeraFETs spectrometer** [13026-2]
- 13026 04 **Multi-octave coherent mid-infrared supercontinuum generation out to 11 μ m via intra-pulse difference frequency generation in ZGP** [13026-3]
- 13026 05 **UV-VIS chip-scale spectropolarimeter** [13026-4]
- 13026 06 **Optical properties of thin film novel chalcogenide materials and optical design for trace-gas sensing** [13026-5]

SESSION 2 NEW SPECTROSCOPIC TECHNOLOGIES II

- 13026 07 **Evaluation of compact spectroscopic sensors in the NIR wavelength range for quality control and material analysis (Invited Paper)** [13026-6]
- 13026 09 **Quantum dots for selected environmental analysis applications** [13026-9]

SESSION 3 NEW SPECTROSCOPIC TECHNOLOGIES III

- 13026 0B **A Sagnac-Fourier spectrometer** [13026-12]
- 13026 0C **Snapshot active detection of target chemicals using spatial heterodyne spectroscopy** [13026-13]

SESSION 4 NEW SPECTROSCOPIC APPLICATIONS I

- 13026 0E **Graphene, a two-dimensional (2D) nano-material, for chemical speciation in the field** [13026-17]

SESSION 5 NEW SPECTROSCOPIC APPLICATIONS II

- 13026 0F **Multipass Raman spectroscopy applied to qualitative and quantitative combustion gas diagnostic** [13026-18]
- 13026 0G **Natural gas and hydrogen-enriched natural gas composition measurements by industrial-grade Raman spectroscopy** [13026-19]
- 13026 0H **Artificial intelligence (and related topics, e.g., machine learning, deep learning, artificial neural networks or ANNs) as applied to the teaching and to the practice of analytical spectrochemistry** [13026-20]

SESSION 6 NEXT-GENERATION AND CBRNE SENSING: JOINT SESSION WITH CONFERENCES 13026 AND 13056

- 13026 0I **Integrated Raman sensor smart robot for swift and remote on-site forensic analysis** [13026-23]
- 13026 0J **Real-time particle analysis of explosives compounds using single-particle mass spectrometry** [13026-24]

POSTER SESSION

- 13026 0K **Non-destructive thickness measurement of the individual layers of end-of-life photovoltaic modules to enable optimized layer separation** [13026-16]
- 13026 0L **Detection of polymer residues on the glass surface of recycled EoL photovoltaic modules using near-infrared hyper-spectral imaging** [13026-30]

DIGITAL POSTER SESSION

- 13026 0M **Mapping the growth of supercontinuum applications in modern spectroscopy** [13026-25]
