**Volume 13083**

Proceedings of SPIE 0277-786X, V. 13083

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *SPIE Future Sensing Technologies 2024*, edited by Osamu Matoba, Joseph A. Shaw, Christopher R. Valenta, Proc. of SPIE 13083, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Conference Committee*

---

## **SESSION 1      IMAGE PROCESSING**

---

- 13083 03      **High accuracy object detection by an optical neural network implementation** [13083-2]
- 13083 04      **Evaluation of quantum image processing in CUDA-based simulation** [13083-3]

---

## **SESSION 2      POLARIZATION-BASED SENSORS**

---

- 13083 05      **Optical-rotation-encoded snapshot multispectral imager** [13083-5]
- 13083 06      **Compact snapshot hyperspectral imaging instrument in the visible/near-infrared spectral band using CMOS sensor with integrated 4-directional wire grid polarizer array** [13083-6]
- 13083 07      **Using oscilloscope to measure optical fiber length** [13083-7]
- 13083 08      **Toward polarization-enhanced water quality remote sensing measurements from UAVs**  
[13083-8]

---

## **SESSION 3      SATELLITE REMOTE SENSING**

---

- 13083 0B      **Harnessing multisatellite remote sensing data and machine learning for flood risk assessment in Nam Ngum River Basin, Lao PDR** [13083-11]
- 13083 0C      **Deformation monitoring around dam and reservoir in Indian Himalayas using SBAS-InSAR method** [13083-12]

---

## **SESSION 4      SPECTRAL IMAGING**

---

- 13083 0E      **Hyperspectral imaging-based approach for recycling space waste** [13083-14]
- 13083 0G      **Multispectral data fusion from high energy arcing fault experiments** [13083-16]

---

**SESSION 5      SENSOR CALIBRATION & CHARACTERIZATION**

---

- 13083 0H      **Fast drawing method of circular patterns based on Gaussian circles for camera calibration**  
[13083-17]
- 13083 0I      **Non-destructive reflectance measurement technique for anti-reflective coating during  
ophthalmic lens manufacturing** [13083-18]

---

**SESSION 6      ACTIVE SYSTEMS**

---

- 13083 0J      **Development of a highly-sensitive interferometer for laser ultrasonic testing of minute defects in  
metal materials (Keynote Paper)** [13083-19]
- 13083 0M      **Prototype and analysis of solid state beam steering using spatial light modulator for LIDAR**  
[13083-22]
- 13083 0N      **Enhanced FMCW depth sensing** [13083-23]
- 13083 0O      **Analyzing Laguerre-Gaussian beams for optical communication resilience in adverse weather  
conditions** [13083-24]

---

**SESSION 7      BIO SENSORS I**

---

- 13083 0P      **Exploring metal-molecule-metal nanoparticles (MMNP) configuration for introducing specificity  
in SPR biosensors** [13083-25]
- 13083 0Q      **Optical fiber tactile sensor with bioinspired whisker transducer** [13083-26]

---

**SESSION 8      BIO SENSORS II**

---

- 13083 0R      **Optical fiber force myography sensor for assessing lower limb movements** [13083-28]

---

**SESSION 9      SENSING FROM UAVS & ROBOTIC VEHICLES**

---

- 13083 0W      **Landing site selection for UAV in unknown environment using surface inclination** [13083-35]

---

**SESSION 10      COMPONENT TECHNOLOGY**

---

- 13083 0Z      **En route to a practical ring-resonator thermometer with an uncertainty of 1 mK** [13083-37]

- 13083 11 **A concept for a large-scale non-contact strain measurement system using nanostructures** [13083-39]
- 13083 12 **MXene-based fibre optic Fabry-Perot interferometer for heavy metal detection** [13083-41]

---

#### POSTER SESSION

- 13083 14 **Assessment of heat islands and renewable energy sources in the north-east planning region of Bulgaria by remote sensing** [13083-43]
- 13083 15 **Research on high-precision calibration device for dual-axis tilt sensor** [13083-44]
- 13083 16 **Full geometric information measuring model of 3D gear based on laser scanning techniques** [13083-45]
- 13083 17 **Analyzing DSIAC ATR algorithm development database utilizing transfer learning** [13083-46]
- 13083 19 **Survey of urbanization status in developing countries using optical/SAR satellite data** [13083-48]
- 13083 1A **Study of the impact of COVID-19 on Tokyo's 23 wards using Suomi-NPP nighttime light satellite images** [13083-49]
- 13083 1D **Non-linearity analysis of a spectroradiometer** [13083-52]
- 13083 1H **Postfire forest disturbances and initial regrowth using direction angle** [13083-58]
- 13083 1I **Application of Sentinel-2 MSI optical data for snow cover monitoring in the Vitosha mountain region of Bulgaria** [13083-59]
- 13083 1J **Appropriate handling of fluorescence spectra for accurate spectral overlap (J) values in Förster energy transfer (FRET) calculations** [13083-60]
- 13083 1K **Optimization of computational parameters in fluorescence imaging based on transport of intensity equation in white noise** [13083-61]
- 13083 1N **Cross-linked perovskite/polymer composites with sodium borate for highly stable and efficient wide bandgap photodetectors** [13083-65]

---

#### DIGITAL POSTER SESSION

- 13083 1O **How down-sampling affects supervised-learning-based image super-resolutions** [13083-4]
- 13083 1P **Image quality assessment of thermal images for Maritime surveillance applications** [13083-54]
- 13083 1Q **Analysis of optical flow methods for estimating UAV velocity in low-features environment** [13083-55]
