PROCEEDINGS OF SPIE

Fourth International Conference on Sensors and Information Technology (ICSI 2024)

Lijun Wu
Zhongpan Qiu
Editors

5–7 January 2024
Xiamen, China

Organized by
Fuzhou University (China)

Sponsored by
Fujian Normal University (China)
Xiamen University (China)
AEIC Academic Exchange Information Centre (China)

Published by
SPIE

Volume 13107
Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 13107

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Fourth International Conference on Sensors and Information Technology (ICSI 2024)*, edited by Lijun Wu, Zhongpan Qiu, Proc. of SPIE 13107, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xiii *Conference Committee*

Part One

MULTI-SENSOR APPLICATION AND IMAGE FUSION ANALYSIS

13107 02 **An adaptive censoring CFAR detector in non-homogeneous environments** [13107-140]

13107 03 **The comprehensive evaluation of air purifier performance based on the entropy weight-TOPSIS model** [13107-75]

13107 04 **Study on the influence of air purifier placement on indoor pollutants** [13107-81]

13107 05 **Demonstration of a silver-based hydrogen sulfide gas sensor with high performance** [13107-57]

13107 06 **Simulation implementation of intelligent track-to-track association algorithm for multi-sensor network** [13107-148]

13107 07 **Sensor bonding surface parting parameter analysis and experiment** [13107-15]

13107 08 **Multi-information fusion graph convolutional networks for aspect-based sentiment analysis** [13107-95]

13107 09 **Research on spacecraft anomaly detection method based on neural networks** [13107-125]

13107 0A **Multi-focus image fusion method based on multi-scale deep supervision** [13107-90]

13107 0B **Attentional mechanisms for multiscale aggregate U-Net brain tumor image segmentation** [13107-36]

13107 0C **A multi-encoder model for automatic code comment generation** [13107-119]

13107 0D **Mixed prediction model of agricultural CO_2 emissions based on machine learning** [13107-5]

13107 0E **Flexible MEMS temperature sensors based on Inkjet printing technology** [13107-139]

13107 0F **Design and research of fiber Bragg temperature sensor with tubular package** [13107-64]

13107 0G **Research on unmanned multi-sensor cooperative control** [13107-118]

13107 0H **Design and realization of an interface circuit for a consumption sensor** [13107-154]

13107 0I **Privacy-preserving asynchronous information fusion method for AC and DC screen branch circuit sensors** [13107-30]

13107 0J **Detection of defects on metal surfaces based on PoolFormer auto-encoder** [13107-98]

13107 0K **Research on image classification based on fusion of global features and local features** [13107-54]

13107 0L **Research on power grid comprehensive intelligent warning system based on multi-source data fusion** [13107-158]

13107 0M **Research on compensation calibration method of dissolved oxygen sensor based on fluorescence quenching** [13107-84]

13107 0N **Revisiting an anomaly in voltage transformer and sharing operational and maintenance insights** [13107-109]

13107 0O **Research on the characteristics of MEMS thermal conductive gas sensors in different driving modes** [13107-147]

13107 0P **Automotive fire alarm system based on multi-sensor fusion** [13107-89]

13107 0Q **Research on image restoration combining lightweight transformer and dense feature inference** [13107-50]

13107 0R **Research progress of giant magnetoresistive isolator** [13107-48]

13107 0S **Uncertainty evaluation of radiosonde sensor calibration results** [13107-39]

13107 0T **Detection method for toxic and harmful gas content in enclosed spaces based on fiber optic SPR gas sensors** [13107-137]

13107 0U **FRET-based fiber-optic fluorescent biosensor for the detection of alpha-fetoprotein** [13107-60]

13107 0V **Effect of FBG spectral parameter matching on performance of dual-grating demodulation sensors** [13107-56]

13107 0W **Application of sensors for civil aircraft inerting system performance flight test** [13107-14]

13107 0X **Evolutionary formation of stable clusters in wireless sensor networks** [13107-68]

13107 0Y **Intelligent generation algorithm for fusion model based on massive multi-source heterogeneous data** [13107-146]

13107 0Z **Layout optimization of bionic lateral line sensor array based on Bayesian estimation** [13107-131]

13107 10 **Pressure sensor signal processing system for UHPLC pump** [13107-51]

13107 11 **Location scheme of strain sensor for transmission gear** [13107-121]

13107 12 **Flexible contact and non-contact dual-mode capacitive sensor for sensing and assembling flexible, intelligent medical monitoring systems for wireless transmission of medical data** [13107-149]

13107 13 **Smartphone-sensor-signal-based tool construction and data analysis** [13107-12]

13107 14 **Intelligent shoe cabinet system based on multiple sensors** [13107-22]

13107 15 **Development and research of intelligent cleaning device for high safety mining gas concentration meter sensor** [13107-87]

INSTRUMENT PERFORMANCE DETECTION AND SYSTEM DESIGN OPTIMIZATION

13107 16 **The energy percentage variations of EEG different frequency bands under +Gz acceleration** [13107-25]

13107 17 **Research on ultrasonic visualization of defects in reinforced concrete beams based on amplitude method** [13107-152]

13107 18 **Structural damage detection pre-training in time series** [13107-157]

13107 19 **Design of new bus system for intelligent instrument based on edge computing** [13107-9]

13107 1A **Color prediction model for 3D printing based on multi-layer BP neural network** [13107-99]

13107 1B **Research on cloud-native monitoring system based on Prometheus** [13107-130]

13107 1C **Research on airport runway foreign object debris detection technology based on improved YOLOv7** [13107-58]

13107 1D **Research progress on online monitoring technology of composite insulator string status of overhead lines** [13107-153]

13107 1E **Improved detection of building settlement debris based on deep learning** [13107-162]

13107 1F **Research on concrete cracks based on damage theory and FBG sensing technology** [13107-143]

13107 1G **Predictive modeling of nitrogen content in winter wheat plants based on LASSO feature screening and UAV imagery** [13107-70]

13107 1H **Study on imaging quality of intrapulse intermittent modulation jamming technology based on metasurface** [13107-100]

13107 1I **A new method for non-cooperative signal parameter estimation** [13107-69]

13107 1J **High-speed railway concrete slab crack detection based on image semantic segmentation method** [13107-93]

13107 1K **Detection method of surface damage of concrete bridge based on improved YOLOv8** [13107-133]

13107 1L **Localization system for leakage points in mine drainage pipelines** [13107-44]

13107 1M **Design and implementation of robot depalletizing system based on 3D vision** [13107-37]

13107 1N **Design and modeling of a fingertip force sensing system without tactile interference** [13107-17]

13107 1O **Design and application of quality early warning system based on PLC and iFIX learning** [13107-91]

13107 1P **Design and experimental study of a novel piezoelectric accelerometer** [13107-129]

13107 1Q **Design and FPGA implementation of digital AGC in sonar receivers** [13107-103]

13107 1R **Research on predictive deception jamming technology of pulse system pseudo-code phase modulation fuze** [13107-66]

13107 1S **J peaks detection for ballistocardiography based on autocorrelation and dual-threshold** [13107-163]

13107 1T **Rocket engines thrust parameters prediction based on long short-term memory attention model with Bayesian optimization** [13107-96]

13107 1U **Joint discrete wavelet transform and improved Savitzky-Golay filtering for noise reduction of PPG signals** [13107-106]

13107 1V **Image acquisition system based on microprocessor** [13107-101]

13107 1W **Binary variational autoencoder for perceptual vibration hashing** [13107-41]

13107 1X **DAA-ViT: deformable attention affine-consistent vision transformer for face anti-spoofing** [13107-28]

13107 1Y **The bearing fault diagnosis method of VMD-KELM based on parameter adaptive optimization** [13107-29]

13107 1Z **Research on the monitoring and alarm devices for smoking in student dormitories** [13107-74]

13107 20 **A method for accurately finding the detecting acoustic signal of the active sonar** [13107-88]

13107 21 **A new method for establishing ballistic range spatial benchmark system using total station** [13107-43]

13107 22 **Distributed φ-OTDR signal classification based on VMD and SVM** [13107-4]

13107 23 **Research on key technologies of aseptic tubing transfer system based on STM32** [13107-156]

13107 24 **Fault diagnosis method for bearings based on shock pulse method and multipoint optimal minimum entropy deconvolution adjusted** [13107-34]

13107 25 **Bearing fault diagnosis based on improved maximum correlation kurtosis deconvolution and improved empirical wavelet transform signal processing** [13107-117]

13107 26 **Simulation analysis of platform screen door control system in rail transit** [13107-18]

13107 27 **A VCSEL-based temperature-adaptive FBG demodulation system** [13107-112]

Part Two

INTELLIGENT COMMUNICATION TECHNOLOGY AND SOFTWARE SECURITY

13107 28 **Research on layout of wireless sensor networks in shield tunnels** [13107-7]

13107 29 **Target positioning based on AIS data and optical remote sensing image fusion** [13107-10]

13107 2A **Enhanced Q-learning algorithm with eligibility traces for safe path planning of unmanned surface vehicles in dynamic unknown environment** [13107-55]

13107 2B **Direction-of-arrival estimation for wideband non-stationary signal based on phase modulation** [13107-132]

13107 2C **Android malware detection based on multi-feature fusion and deep learning** [13107-11]

13107 2D **Research on deep-learning-based techniques for advanced persistent threat malware detection and attribution** [13107-20]

13107 2E **Error probability analysis for free space optical-underwater wireless optical communication systems with multi-aperture relaying** [13107-97]

13107 2F **Indoor location strategy based on the fusion of RSSI and RTT based on multilayer perceptron** [13107-150]

13107 2G **A compression method for object detection network for edge devices** [13107-128]

13107 2H **Collaborative recommendation for user spatial activities in mobile environments** [13107-110]

13107 2I **Non-line-of-sight ultra-wideband signal recognition using DWT-CNN** [13107-47]

13107 2J **Extended Kalman filter fusion model for localization** [13107-142]

13107 2K **An SDN-assisted carrier-grade network address translation service framework for 5G core networks** [13107-71]

13107 2L **Path planning of intelligent radar anti-jamming matrix based on Q-learning algorithm** [13107-40]

13107 2M **Research on cognitive jamming decision making method of multifunctional radar based on PPO** [13107-13]

13107 2N **Research on GNSS adjacent frequency interference test of mobile terminal** [13107-85]

13107 2O **Fabrication and application research of fiber Bragg grating** [13107-136]

13107 2P **Measurement and analysis of broadband error in DC current transformers** [13107-123]

13107 2Q **Research on security and value-added service technology of dynamic QR code** [13107-67]

13107 2R **Lightweight architecture of space information-centric network based on satellite-borne THz communication** [13107-120]

13107 2S **Method on anomaly detection methods for data security throughout the entire lifecycle of industrial internet** [13107-159]

13107 2T **Design of network terminal data security protection system in cloud computing environment** [13107-135]

13107 2U **Design of adaptive fast cyclic redundancy check aided successive cancellation list decoding algorithm** [13107-61]

13107 2V **Research on an intelligent device based on wireless communication to avoid errors in climbing electric towers** [13107-138]

13107 2W **Design and implementation of a secure wireless data acquisition system for substation monitoring** [13107-105]

13107 2X **Multi-state monitoring system of optical fiber sensor network for process control** [13107-38]

13107 2Y **Discovering causal relationships in mixed-type non-Euclidean data with applications to fault diagnosis** [13107-3]

13107 2Z **Blockchain for knowledge-driven wireless network security** [13107-78]

13107 30 **Localization algorithm of three-dimensional position and velocity for moving target in multistatic radar system** [13107-26]

13107 31 **Adaptive modulation and power control algorithm optimization in carrier communication** [13107-82]

13107 32 **Indoor pedestrian fusion localization algorithm based on unscented Kalman filter for UWB/PDR** [13107-8]

13107 33 **Multi-target DOA estimation based on single vector hydrophone** [13107-102]

13107 34 **Research on transformer deformation monitoring based on distributed optical fiber sensing technology** [13107-155]

13107 35 **Transmission line icing thickness detection based on distributed optical fiber sensing and Φ-OTDR** [13107-145]

13107 36 **Analysis of heart rate variability (HRV) in different postures based on millimeter wave radar** [13107-83]

13107 37 **Method for denoising lidar point cloud data of an isolation switch** [13107-21]

13107 38 **Research and implementation of a track axle counting monitoring system based on fiber optic sensors** [13107-160]

13107 39 **Three-dimensional positioning algorithm for converter station patrol inspection based on multi-sensor filtering** [13107-27]

ARTIFICIAL INTELLIGENCE AND INFORMATION RECOGNITION TECHNOLOGY

13107 3A **Wind turbine blade fault detection and identification based on improved YOLOv5s** [13107-33]

13107 3B **An automatic robot for mine inspection and rescue based on multi-sensor fusion** [13107-144]

13107 3C **A lightweight method for 3D human pose and shape regression** [13107-49]

13107 3D **An improved proximal policy optimization algorithm for autonomous driving decision-making** [13107-107]

13107 3E **3D reconstruction based on pose transformation of human joints** [13107-42]

13107 3F **Research on running posture recognition based on bone node detection** [13107-35]

13107 3G **Research on 3D weld bevel recognition and reconstruction based on laser vision** [13107-46]

13107 3H **3D vision-based weld seam extraction method** [13107-53]

13107 3I **Research on vision-based multi-task environment perception algorithm for intelligent driving** [13107-32]

13107 3J **Optimization of extreme position landmarks identification algorithm for driver fatigue state** [13107-126]

13107 3K **Research on human activity recognition method based on wearable sensors** [13107-134]

13107 3L **Implementation method of collaborative unmanned aerial vehicle simulation system for large language model construction** [13107-161]

13107 3M **High resolution moving targets imaging algorithm of FMCW SAR** [13107-65]

13107 3N **Research on transmission line pin loosening state identification and early warning technology based on flexible sensing technology** [13107-151]

13107 3O **Three-dimensional imaging algorithm based on azimuth resampling for high-speed diving forward-looking linear array SAR** [13107-2]

13107 3P **Research on the development of electromagnetic spectrum map generation technology** [13107-94]

13107 3Q **Research on ensemble learning algorithm for fall detection** [13107-108]

13107 3R **Pothole road detection and identification based on transfer learning** [13107-31]

13107 3S **Grey Wolf optimization supported vector regression prediction model based on variational mode decomposition** [13107-113]

13107 3T **Nonlinear moving target tracking based on LightGBM model** [13107-59]

13107 3U **A two-stage intelligent condition monitoring method for electromagnets in high-voltage circuit breakers** [13107-92]

13107 3V **The improved variable step size least mean squares algorithm for speech enhancement** [13107-124]

13107 3W **An improved BSDIFF algorithm in automotive OTA upgrade** [13107-86]

13107 3X **High-voltage substation intelligent perception resilience technology research** [13107-45]

13107 3Y **Design of intelligent medical fracture splint with pressure detection and cloud database** [13107-16]

13107 3Z **Research on informed-RRT* algorithm for multi-strategy optimization in mobile robot path planning** [13107-76]

13107 40 **Research on emotion management for elderly based on speech signal analysis technology** [13107-111]

13107 41 **Image inpainting for irregular holes based on generative adversarial networks** [13107-62]

13107 42 **Research on the application of Internet of Things-based particle size identification fire detectors in high-speed trains** [13107-104]

13107 43 **Artificial intelligence scheduling and task planning for collaborative operations of remote-controlled submarines and manned submarines** [13107-77]

13107 44 **Research on automatic exposure control technology for infrared focal plane detectors** [13107-72]

13107 45 **An improved method for eliminating the outlier values in small sample** [13107-80]

13107 46 **Improved semantic application to perception and execution for Internet of Things** [13107-127]

13107 47 **A magnetic field control method for automated guided vehicle based on spatial distribution of magnetic fields** [13107-19]

13107 48 **Wearable self-powered sensors enabled body joint motion capture for IoT-based smart healthcare** [13107-73]
