

PROCEEDINGS OF SPIE

2024 International Conference on Optoelectronic Information and Optical Engineering (OIOE 2024)

**Harith Ahmad
Ming Jiang**
Editors

**8–10 March 2024
Kunming, China**

Organized by
Shandong University (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 13182

Proceedings of SPIE 0277-786X, V. 13182

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *2024 International Conference on Optoelectronic Information and Optical Engineering (OI/OE 2024)*, edited by Harith Ahmad, Ming Jiang, Proc. of SPIE 13182, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

OPTICAL FIBER COMMUNICATION AND IMAGING DETECTION TECHNOLOGY

13182 02	Transmission properties of autofocusing Airy beam carrying a new kind of power-exponent vortex phase in ocean turbulence [13182-46]
13182 03	Signal matching with modified edit distance based on aperiodic coding [13182-83]
13182 04	Selectable output of solitons and self-accelerating pulses via spectral phase modulation and filtering of Airyprime pulses [13182-89]
13182 05	Analysis of analog correlated multiple sampling noise reduction in low noise CMOS image sensor [13182-90]
13182 06	All-fiber mobile Doppler wind lidar for combined measurement of the wind field and precise distance to hard targets [13182-21]
13182 07	Short-wave infrared and visible image fusion based on a dual-band polarization imaging sensor [13182-54]
13182 08	Super-resolution reconstruction of variable length infrared image sequences based on convolutional neural networks and pixel shuffling [13182-10]
13182 09	Application of implicit representation function to improve the detection accuracy of an infrared system [13182-73]
13182 0A	Capture performance analysis of beacon-less laser communication use dual beam scanning [13182-104]
13182 0B	Measurement of deep hole verticality by monocular vision [13182-3]
13182 0C	Effect on spin-VCSEL dynamics and bandwidth under different external control conditions [13182-85]
13182 0D	Phase synchronization algorithm for high-speed space optical communication modulation baseband signal based on FPGA [13182-6]
13182 0E	Chirped Gaussian pulse propagation within the graded-index multimode fibers in the presence of third-order dispersion and Raman effect [13182-71]
13182 0F	Three-dimensional reconstruction based on three-dimensional phase mapping using single-pixel imaging [13182-31]

13182 0G	Influence of average speckle size on measurement of in-plane displacement [13182-27]
13182 0H	A new star location method based on rectangular hole Fraunhofer diffraction [13182-105]
13182 0I	Characterizing whispering gallery mode microcavity by OFDR [13182-55]
13182 0J	Design and optimization of EAM for data center optical interconnects [13182-58]
13182 0K	Modality-inter fusion and enhancement network for dual-spectral object detection [13182-34]
13182 0L	High-speed color difference correction algorithm used for UAV panoramic video system [13182-2]
13182 0M	Applications of two-photon fluorescence lifetime and second harmonic generation imaging technologies in pathological tissue sections [13182-56]
13182 0N	Research on inspection accuracy and application strategy of infrared imaging technology in construction field [13182-4]
13182 0O	Research on fast modulation optical add-drop multiplexer in optical fiber communication [13182-20]
13182 0P	Research on rapid detection method of tower bolt looseness based on vibration signal analysis at different measurement points [13182-76]
13182 0Q	Remote sensing image denoising algorithm based on improved Transformer network [13182-101]
13182 0R	Research on the wavelength intersection union fusion selection method for near-infrared spectroscopy analysis of apple sugar degree [13182-106]
13182 0S	Propagation characteristics of the singular Laguerre-Gaussian beams modulated by the Airy pulses in free space [13182-78]
13182 0T	High-precision air gap thickness measurement based on spectral reflectometry [13182-103]
13182 0U	Calibration of the reflectivity-related error of the indirect time-of-flight imaging systems [13182-86]
13182 0V	Parameter optimization of fiber broadband amplifier based on genetic algorithm [13182-61]

OPTOELECTRONIC INSTRUMENTATION SIMULATION AND SENSING MEASUREMENT AND CONTROL

13182 0W	A modified metal polarimetric BRDF model for rendering [13182-24]
13182 0X	Simultaneous 3D small-angle laser measurement based on PZT feedback compensation [13182-70]

13182 0Y	Characterization of thin-film lithium niobate modulators at 298 K and 38.5 K [13182-74]
13182 0Z	Calibration of the water track laser Doppler velocimeter based on pitch-independent laser Doppler velocimeter [13182-17]
13182 10	Experimental study of CW CO₂ lasers with wavelength tuning [13182-67]
13182 11	Low repetition frequency ytterbium-doped mode-locked fibre lasers [13182-13]
13182 12	Analysis of distributed strain of optical fiber winding structure using BOTDA [13182-57]
13182 13	Optimization of PbS colloidal quantum dots-based near-infrared photodetectors using pentacene [13182-79]
13182 14	Colorimetric characterization of digital camera for the ocean surface imaging using a two-step training method [13182-81]
13182 15	Interplay between transient interfacial photocurrent and surface nonlinear photocurrent in graphene/MoS₂ heterostructure [13182-69]
13182 16	Vector magnetic field sensing characteristics of magnetic fluid coated side-polished eccentric-core fiber structure [13182-41]
13182 17	Quantitative measurement of interlaminar stress in CFRP laminates using fiber Bragg Gratings [13182-65]
13182 18	Development of fiber-optic triaxial force sensor for guidewire tip [13182-8]
13182 19	Spike-based all-optical fast XOR operation in a VCSEL under dual-polarization optical injections [13182-16]
13182 1A	Application of group delay estimation for optical transmitter authentication using bispectrum algorithm [13182-77]
13182 1B	SPR-based fiber optic biosensor for the detection of HER2 [13182-63]
13182 1C	Research on large-bandwidth balanced homodyne detector for quantum detection [13182-82]
13182 1D	A temperature adaptability improvement method of optoelectronic oscillator based on optical delay system [13182-87]
13182 1E	Fiber-optical biosensor for antibiotic susceptibility testing [13182-48]
13182 1F	Simulation and demodulation of an airway pressure sensor based on Fabry-Perot interference [13182-33]
13182 1G	2.1µm tunable multi-wavelength holmium fiber laser [13182-29]

13182 1H	Calibration of non-amplified nucleic acid quantitative fluorometer [13182-60]
13182 1I	Research on color temperature tunable white LED with high color rendering and full spectrum [13182-36]
13182 1J	Research on temperature stability of multi-segmented Nd:YAG/Nd:GdVO₄ crystals laser [13182-26]
13182 1K	Simulation and design research on improving MPASS based on dual-wavelength detection technology [13182-95]
13182 1L	Overview of laser semi-active guidance jamming technology [13182-93]
13182 1M	Non-monotonic wavelength shift of mid-infrared quantum cascade lasers at different temperatures [13182-91]
13182 1N	Analysis and swing control of optical path scanning model of double-moving mirror swing interferometer [13182-42]
13182 1O	Research on laser vibration detection and intelligent identification of loose bolts of overhead transmission pole towers [13182-107]

INTEGRATED OPTICAL SYSTEM AND OPTICAL MATERIAL RESEARCH

13182 1P	Polymer additives for improving the selective electrophoretic deposition morphology of quantum dots [13182-5]
13182 1Q	A DUIRE algorithm for dynamic range improvement of phase-OTDR systems [13182-18]
13182 1R	Soliton-sinc pulse propagation in the presence of fourth-order dispersion and nonlinear effects [13182-88]
13182 1S	High-performance non-contact radiative cooling enabled by solar reflectance and infrared transparent porous poly (4-methyl-pentene) film [13182-43]
13182 1T	Design of an intelligent embedded optical power meter system [13182-66]
13182 1U	Theory analysis for interference fringes of the dual beam laser Doppler velocimeter [13182-19]
13182 1V	Rhombus phase unwrapping algorithm under temporal multiplexing mechanism of phase-shifting fringe [13182-64]
13182 1W	Construction and application of an optical telescope teaching experimental system [13182-15]
13182 1X	Research on the efficient preparation method of metal-enhanced fluorescent composite structure microarray chip [13182-40]

13182 1Y	Laser-induced fluorescence detection of oil film thickness in water based on convolutional neural network algorithm [13182-100]
13182 1Z	Application progress of optical system used for soft x-ray detector [13182-109]
13182 20	PAM4-based SFP56 64G SR optical module design [13182-51]
13182 21	Design of a miniaturized optical system for machine vision angular displacement sensors [13182-30]
13182 22	Remote multicolour excitation laser-induced fluorescence imaging studies [13182-68]
13182 23	Design and alignment of off-axis primary and secondary mirrors system in gravitational wave telescopes [13182-98]
13182 24	Nonlinear error compensation for 2D PSD based on SSA-BP neural network [13182-92]
13182 25	Investigation of optoelectronic characteristics of intrinsic point defects on InAs nanowires [13182-47]
13182 26	Fractional-order elliptic perfect optical vortex multiplexed holography [13182-75]
13182 27	An undersampling phase unwrapping algorithm based on Kalman motion estimation for heterodyne interferometer [13182-32]
13182 28	Young's formula for Gaussian beams: theoretical derivation and experimental verification [13182-23]
13182 29	Reflections on the application of bionic compound eyes triggered by dragonfly compound eyes [13182-45]
13182 2A	High precision uwCFBG wavelength calculation method based on correlation coefficient [13182-25]
13182 2B	Research progress and clinical application of laser Doppler blood flow measurement technology [13182-12]
13182 2C	Performance comparison of various deconvolution algorithms realizing high spatial resolution Brillouin optical time domain reflectometer [13182-97]
13182 2D	Singular Laguerre-Gaussian beams modulated by the Airy pulses in free space [13182-80]
13182 2E	A continuous broad-spectrum correlated photon source based on angle tuning of a BBO crystal [13182-94]
13182 2F	Structural non-reciprocity study of optical systems for RFOGs driven by broad-spectrum light sources [13182-50]
13182 2G	Non-collinear phase-matching method for stimulated polariton scattering based on cross-pumping [13182-99]

- 13182 2H **Improvement of micro-LED top emission through surface nanostructures and chip design**
[13182-14]
- 13182 2I **The spatiotemporal distribution characteristics of gas molecules emitted from nanopores**
studied with direct simulation Monte Carlo method [13182-44]
- 13182 2J **Point cloud denoising by reduction of ranging error in laser incidence direction** [13182-108]
