

PROCEEDINGS OF SPIE

Fifth International Conference on Geology, Mapping, and Remote Sensing (ICGMRS 2024)

Yinhe Luo
Yi Wang
Editors

12–14 April 2024
Wuhan, China

Organized by
China University of Geosciences (China)

Sponsored by
AEIC Academic Exchange Information Centre (China)

Volume 13223

Proceedings of SPIE 0277-786X, V. 13223

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fifth International Conference on Geology, Mapping, and Remote Sensing (ICGMRS 2024)*, edited by Yinhe Luo, Yi Wang, Proc. of SPIE 13223, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510681712

ISBN: 9781510681729 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

INTEGRATED RESEARCH ON GEOSPATIAL CHARACTERISTICS AND HAZARDS

13223 02	Research on the mechanism of rainfall-induced landslide and debris flow movement: a case study of Mudanjiang City [13223-119]
13223 03	Spatial distribution characteristics of Ji'nan rock mass, North China Block [13223-102]
13223 04	Research on geological hazard risk assessment based on machine learning [13223-101]
13223 05	Remote sensing-based characterization of spatial and temporal variability of drought in MU Us Sandy and analysis of climatic factors [13223-49]
13223 06	Analysis of seismic response capability of Shandong gravity network [13223-77]
13223 07	Geological characteristics and main controlling factors of the tight sandstone in the Lianggaoshan formation of the Jurassic in the Sichuan Basin [13223-50]
13223 08	Research on the mountain grassland aboveground biomass satellite remote sensing aspect-oriented modeling method [13223-24]
13223 09	Aerial photography assessment method for comprehensive vegetation cover modeling in grasslands oriented towards satellite remote sensing [13223-23]
13223 0A	Mine geological environment evaluation based on AHP-EWM-TOPSIS model [13223-44]
13223 0B	Application of 3D model of UAV tilt photography in landslide geological disaster monitoring [13223-114]
13223 0C	Spatial-temporal change analysis of gross primary productivity of Xilingol grassland based on remote sensing technology [13223-106]
13223 0D	Carbon emission estimation of land cover change in Shenyang city based on remote sensing image [13223-103]
13223 0E	Water quality nitrogen and phosphorus inversion in small sample scene [13223-70]
13223 0F	Research on the rational staggered distance between joint mining faces in close distance coal seams [13223-45]
13223 0G	Spatial and temporal characteristics of meteorological drought and its relationship with circulation indices in Shanxi Province, China [13223-40]

13223 OH	Identification method of regional soil erosion characteristics based on drone low altitude remote sensing technology [13223-105]
13223 OI	Characteristics of urban surface heat field differentiation and analysis of influencing factors [13223-61]
13223 OJ	Fractal dimension calculation of spatial morphology in Dali traditional Bai villages based on GIS [13223-65]
13223 OK	Study on landscape and hydrological dynamics of water network in Shenyang [13223-7]
13223 OL	Evaluation of geologic hazards susceptibility along high-voltage transmission lines in Chongqing, China [13223-8]
13223 OM	Analysis and evaluation of spatio-temporal characteristics of urban thermal environment supported by local climate zone division [13223-53]
13223 ON	Application of multifracture horizontal well stimulation in tight geological reservoir [13223-48]
13223 OO	Application of gravity and magnetic prospecting in medium and deep geothermal exploration in Rizhao section of Yishu fault zone [13223-35]
13223 OP	Typhoon disaster risk assessment based on attentional convolution module [13223-27]
13223 OQ	Spatial and temporal distribution characteristics and evaluation of historical earthquake disasters in Gansu Province from 1949 to 2020 [13223-37]
13223 OR	Analysis of steel plant segmentation and temperature distribution changes in Tangshan City [13223-38]
13223 OS	Crop classification method using multifeature optimal selection combined with an ensemble learning model: a case study of the Sanjiang Plain [13223-93]
13223 OT	Research on drawing the distribution envelope of green tide in the Yellow Sea based on satellite remote sensing [13223-52]
13223 OU	Study on influencing factors and mechanism of deformation and instability of shear rock landslide: a case study of Taotaoya landslide [13223-109]
13223 OV	Practical study of geological survey theory and method in mineral exploration [13223-25]
13223 OW	Deformation monitoring before and after landslide [13223-57]
13223 OX	Study on the deformation of pit induced by leakage on diaphragm wall under complicated geological conditions [13223-29]
13223 OY	Performance evaluation of uplink waveforms for 6G [13223-81]

INTELLIGENT ENVIRONMENTAL MONITORING AND IMAGE ANALYSIS

13223 0Z	Research on GPR spectral characteristics of urban underground loose body [13223-15]
13223 10	Research on water ecology monitoring and water environment health assessment of reservoir for drinking water sources in south China subtropical region [13223-58]
13223 11	Integrated geological engineering modeling technology for medium basic volcanic gas reservoirs and its application in X23 block [13223-66]
13223 12	Estimation of solar energy potential on urban building rooftops based on drone photogrammetry: a case study of Wuhan University of Technology Nanhu New Campus [13223-79]
13223 13	Comparative study on point cloud filtering algorithm in constructing mining subsidence model [13223-88]
13223 14	Deep learning based local climate zone classification using multispectral and Sentinel 1 images [13223-90]
13223 15	Numerical experimental research on assimilation of cloud-free radiances from fengyun-3D microwave sounding observations over land surface [13223-14]
13223 16	Research on muddy shoreline detection based on U-net [13223-2]
13223 17	Study on application of push-type soil landslide control based on numerical simulation technology [13223-85]
13223 18	Remote sensing image recognition and monitoring methods for wetland resources in lake areas [13223-11]
13223 19	Numerical simulation study of Zhayeba temple dangerous rock mass based on rockfall [13223-99]
13223 1A	The application of drone tilt photogrammetry in campus 3D solid modelling [13223-118]
13223 1B	Factor-driven impact analysis based on the Standardized Precipitation Index [13223-69]
13223 1C	Image-based balanced and hierarchical relation learning for few-shot wild animal object detection [13223-89]
13223 1D	Application of SPEI index in drought evolution in southwest China [13223-36]
13223 1E	SARLMN: 3D reconstruction for urban buildings from a single SAR image based on latent matching [13223-108]
13223 1F	Random forest-based vacancy filling of MCD43A3V061 Antarctic albedo product [13223-10]
13223 1G	Quantifying the heatwave magnitude over the Tibetan Plateau from 1979 to 2022 with the comprehensive heatwave index [13223-56]

13223 1H	Temperature inversion of mesoscale eddies from satellite observations in the South China Sea [13223-86]
13223 1I	Research on grid disaster risk mapping based on meteorological and geographical factors [13223-84]
13223 1J	Evaluation and prediction of light pollution based on Topsis and BP-Grey prediction model [13223-22]
13223 1K	Spatiotemporal variation and dynamic simulation of carbon storage in Qinghai Province based on PLUS and InVEST models [13223-5]
13223 1L	Prediction of soil salt content by hyperspectral model based on spectral transformation and feature optimization [13223-117]
13223 1M	A Sentinel-2-based classification algorithm of algal blooms and aquatic vegetation [13223-83]
13223 1N	SBAS-InSAR algorithm performs highway settlement monitoring to assist construction and maintenance [13223-34]
13223 1O	Research on the application of underwater survey technology in channel dredging engineering [13223-51]
13223 1P	Application and precision analysis of SBAS-InSAR technology in deformation monitoring of foundation pit [13223-115]
13223 1Q	Pine wilt disease detection method based on improved YOLOv5 [13223-92]
13223 1R	3D geographical entity quality inspection method based on visual rendering and AI intelligence technology [13223-71]
13223 1S	Numerical simulation study of CO₂ injection on fault stability [13223-39]
13223 1T	Comparative study on water extraction based on Sentinel image and UAV image [13223-112]
13223 1U	Reclassification of unknown salt diapir activity using INSAR technology [13223-32]
13223 1V	Observation of mining activity changes in the Sepon gold mine in Laos through GaoFen satellite data [13223-63]

INTELLIGENT COMMUNICATION AND REMOTE SENSING DATA FUSION

13223 1W	Research on rapid construction of BIM components for land remediation planning based on UAV real scene 3D [13223-68]
13223 1X	Establishment of a 3D terrain model based on big data [13223-91]

13223 1Y	Geological informatisation and data management: innovation and practice of integrated software [13223-100]
13223 1Z	Study on vegetation benefit of shelterbelt in three northern regions based on PIE-engine and NDVI time series data: a case study of Bayannur region [13223-73]
13223 20	Intelligent interpretation of remote sensing images of winter wheat based on farmland landscape partitioning and artificial intelligence algorithm [13223-59]
13223 21	Accuracy assessment of Mavic 3 industrial UAV based on DJI Terra and Pix4Dmapper [13223-13]
13223 22	Forest fire monitoring based on the remote sensing technology [13223-87]
13223 23	Automatic identification method of surface lithology based on remote sensing satellite data and machine learning [13223-12]
13223 24	UAV remote sensing pine tree disease detection based on lightweight CNN [13223-55]
13223 25	A balanced network for sea-land segmentation [13223-4]
13223 26	Application and analysis of traditional villages survey based on remote sensing images in Guangxi [13223-3]
13223 27	Incremental supervision-driven network for optimized contour segmentation of buildings in remote sensing [13223-47]
13223 28	Qingxiu District surface temperature changes analysis based on the remote sensing data [13223-16]
13223 29	A deep learning-based method and system for processing marine environmental data [13223-19]
13223 2A	Ground vehicle gravimetry using inertial navigation system, dead reckoning, and barometric altimeter [13223-82]
13223 2B	Geographically adaptive multispectral remote sensing water depth inversion based on BP neural network [13223-46]
13223 2C	YOLO-DCANet: seismic velocity spectrum picking method based on deformable convolution and attention mechanism [13223-60]
13223 2D	Estimation of soil organic carbon content based on ground hyperspectral remote sensing [13223-21]
13223 2E	Accuracy analysis and evaluation of GPM and TRMM satellite daily precipitation data in Gansu Province [13223-72]
13223 2F	Spatiotemporal continuous PM_{2.5} concentrations inversion based on multisource data and hybrid model [13223-31]

13223 2G	Deformation data analysis of shield tunnel based on ICEEMDAN- wavelet -NLMS joint model [13223-17]
13223 2H	Application of UAV remote sensing technology in surveying and mapping engineering measurement [13223-67]
13223 2I	Estimating the spatiotemporal pattern of river dissolved organic carbon based on multisource remote sensing data [13223-97]
13223 2J	Research on numerical generation of polar ice floe field based on surveying and mapping data [13223-20]
13223 2K	Vectorized building footprint extraction based on improved polygonal instance segmentation network [13223-78]
13223 2L	Remote sensing-based water quality assessment in Nansi Lake of Northern China [13223-30]
13223 2M	Habitat suitability analysis of rice sheath blight based on multisource data [13223-95]
13223 2N	Analysis of spatiotemporal changes in air pollution in Jiangxi based on nighttime light remote sensing [13223-42]
13223 2O	Atmospheric correction for microwave remote sensing with considering clouds and precipitation profiles [13223-111]
13223 2P	A deep neural network aided channel estimation for maritime wireless communications [13223-80]
