# TABLE OF CONTENTS

|                                                                                                                                                                   |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| ICPHM'23 Benchmark Vibration Dataset Applicable in Machine Learning for Systems' Health Monitoring.....                                                           | 1   |
| <i>Nastaran Enshaei, Haizhou Chen, Farnoosh Naderkhani, Jing Lin, Soroush Shahsafi, San Giliyana, Mehrnaz Mirzaei, Steven Li, Christian Hansen, Jason W. Rupe</i> |     |
| MALSTM-MCN Ensemble Learning-Based Planetary Gearbox Fault Diagnosis Method.....                                                                                  | 9   |
| <i>Hye J. Oh, Jinoh Yoo, Tae H. Kim, Minjung Kim, Hyeongmin Kim</i>                                                                                               |     |
| Inter-Class Metric Learning Based Depth-Wise Convolutional Neural Network for Gear Fault Diagnosis.....                                                           | 15  |
| <i>Yong C. Kim, Seungyun Lee, Sang K. Lee, Bongmo Kim, Jiwon Lee, Jinwook Lee, Byeng D. Youn</i>                                                                  |     |
| Proposed Model for NEOM City Based on Internet of Things (IoT) and MLC at ED System.....                                                                          | 23  |
| <i>Hassan Hijry</i>                                                                                                                                               |     |
| Self, Semi and Fully Supervised Learning for Autoencoders using Ternary Classification .....                                                                      | 33  |
| <i>Lavinus-Ioan Gliga, Jeroen Zegers, Carlos T. Gomez, Pieter Bovijn</i>                                                                                          |     |
| Multi-Class Neural Additive Models: An Interpretable Supervised Learning Method for Gearbox Degradation Detection.....                                            | 41  |
| <i>Charles-Maxime Gauriat, Yannick Pencolé, Pauline Ribot, Gregory Brouillet</i>                                                                                  |     |
| An Industrial IoT Approach to Enable Remote Asset Health Monitoring for Short Line Railroad Operators .....                                                       | 49  |
| <i>Wyatt Pena, Arsh Nadkarni, Christopher Curti, Gabriela Galvan, Jonathan Barket, Charles Miner</i>                                                              |     |
| A Distributed Hybrid Fault-Tolerant Cooperative Control for Multi-Agent Systems with Actuator Faults and Disturbances.....                                        | 58  |
| <i>Ailin Barzegar, Afshin Rahimi, Hamed Kharrati</i>                                                                                                              |     |
| Remaining Useful Life Estimation for Lithium-Ion Batteries using Physics-Informed Neural Networks .....                                                           | 67  |
| <i>Karkulali Pugalenth, Hyunseok Park, Shaista Hussain, Nagarajan Raghavan</i>                                                                                    |     |
| A Meta-Model-Based Life Consumption Monitoring Method for Efficient Decision-Making of PSSs.....                                                                  | 74  |
| <i>Chao Huang, Siqi Bu, Shu W. Kong, Hiu H. Lee</i>                                                                                                               |     |
| Fault Detection and Isolation of Cyber-Physical System Under Cyber-Attack using Bayesian Network.....                                                             | 84  |
| <i>Monika Tanwar, Nagarajan Raghavan, Pradeep K. Dammala</i>                                                                                                      |     |
| Deployment and Maintenance of Digital Twin in a Secure Industrial Environment .....                                                                               | 93  |
| <i>Muhammad Hassan, Niclas Björsell</i>                                                                                                                           |     |
| Empowering Smartness in Robotics Through Digital Twin Design: A Reference Methodology .....                                                                       | 100 |
| <i>Suad A. Omran, Concetta Semeraro</i>                                                                                                                           |     |

|                                                                                                                                                                                            |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Lessons Learned and Practical Solutions for Equipment Health Management in the Chemical Industry.....                                                                                      | 108 |
| <i>Simone Smeraldo, Stefan Bendisch, Hristo Hriskov, Sabina Haager, Andreas Ubl, Arnau S. Noguera, Bastian Siemandel, Thomas Morgenstern, Philipp Warter, Axel Busboom, Maria Prandini</i> |     |
| Generating Troubleshooting Trees for Industrial Equipment using Large Language Models (LLM) .....                                                                                          | 116 |
| <i>Lasitha Vidyaratne, Xian Y. Lee, Aman Kumar, Tsubasa Watanabe, Ahmed Farahat, Chetan Gupta</i>                                                                                          |     |
| Chipless Passive RFID Sensor for Structural Health Monitoring.....                                                                                                                         | 126 |
| <i>Yamini D. Kotriwar, Yiming Deng</i>                                                                                                                                                     |     |
| Development of a Prognostic Health Monitoring System to Enable Predictive Maintenance in an Electric Two-Wheeler Vehicle .....                                                             | 132 |
| <i>Manickaraj Subramanian, Krishnamoorthy Venkitasamy, Ankit Arora</i>                                                                                                                     |     |
| Classification of Rotor Imbalance in Trains using Airborne Sound with Real-World Data .....                                                                                                | 138 |
| <i>Matthias Kreuzer, David Schmidt, Simon Wokusch, Walter Kellermann</i>                                                                                                                   |     |
| Component-Level Wind Farm Maintenance Considering Seasonal Uncertainties .....                                                                                                             | 146 |
| <i>Han Zhang, Zhigang Tian, Mingjian Zuo</i>                                                                                                                                               |     |
| FaultyVoltaMan: Ensemble Learning Model for Accurate Fault Detection and Classification of PV-Integrated Systems.....                                                                      | 152 |
| <i>Ashkan Safari, Hamed Kharrati, Afshin Rahimi</i>                                                                                                                                        |     |
| An Integrated Framework of Fourier Transform and Transformer for Rotating Machinery Fault Diagnosis.....                                                                                   | 161 |
| <i>Xiaopeng Liu, Jiale Liu, Bingxiang Sun, Weige Zhang</i>                                                                                                                                 |     |
| Deep Sparse Representation Classification for Aeroengine Inter-Shaft Bearing Fault Diagnosis.....                                                                                          | 167 |
| <i>Renhe Yao, Hongkai Jiang, Yunpeng Liu, Xin Wang, Haidong Shao, Wenxin Jiang</i>                                                                                                         |     |
| Bi-LSTM Autoencoder SCADA Based Unsupervised Anomaly Detection in Real Wind Farm Data .....                                                                                                | 174 |
| <i>Bassel Chokr, Nizar Chatti, Abderafi Charki, Thierry Lemenand, Mohammad Hammoud</i>                                                                                                     |     |
| Image Registration Based Automated Lesion Correspondence Pipeline for Longitudinal CT Data .....                                                                                           | 184 |
| <i>Subrata Mukherjee, Thibaud Coroller, Craig Wang, Ravi K. Samala, Tingting Hu, Didem Gokcay, Nicholas Petrick, Berkman Sahiner, Qian Cao</i>                                             |     |
| Comparison of Optimizers for Fault Isolation and Diagnostics of Control Rod Drives.....                                                                                                    | 193 |
| <i>Ark Ifeanyi, Jamie Coble</i>                                                                                                                                                            |     |
| Enhance Efficiency: Integrating Prognostic and Health Management with Business Intelligence .....                                                                                          | 205 |
| <i>Concetta Semeraro, Khalid F. Jarrar, Mohammad B. Saleh, Abdulla K. Alhammadi, Rawnaq F. H. Ababneh, Abdul H. Alami</i>                                                                  |     |
| Power Quality Improvement Through a Model Predictive Droop-Based Grid-Forming Inverter Control.....                                                                                        | 212 |
| <i>Daniel O. Williams, Zhaojun S. Li, Xiaochuan Luo, Tamer F. Megahed</i>                                                                                                                  |     |
| Eight Questions on the Evolution and Impact of Extended Reality Technologies in Engineering Systems Performance Evaluation .....                                                           | 217 |
| <i>Richard Z. Li, Tyreece Cherival, Rocco Cassandro, Yu Hou</i>                                                                                                                            |     |

|                                                                                                                                                                                 |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Evaluation of Accuracy for Automated Method of Predicting Capacity Loss in Li-Ion Batteries .....                                                                               | 223 |
