2024 Prognostics and System Health Management Conference (PHM) **PHM 2024**

Table of Contents

Message from the General Chair xiv
Organizing Committee xv
Reviewers xvi
Sponsors xviii

2024 Prognostics and System Health Management Conference (PHM)

Research on Electrical Activity and Synchronization Behavior of Electromagnetic Coupled FHN Neural Networks 1. Yuancheng Jing (Guangxi Normal University, China) and Yanhua Xian (Guangxi Normal University, China)
Incipient Cracks Characterization Based on Jensen-Shannon Divergence and Wasserstein Distance .8 Xiaoxia Zhang (Harbin Engineering University, China), Chao Wang (Harbin Engineering University, China), Xusheng Hu (Harbin Engineering University, China), and Claude Delpha (Université Paris Saclay, France)
Multimodal Learning for Supporting Evidence Base Medicine .14 Jinan Fiaidhi (Lakehead University, Canada) and Sabah Mohammed (Lakehead University, Canada)
Storm-Based Scheduling Method for Streaming Computing Engine .20 Ruixuan Zhao (Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Chuyi Chen (Chinese Academy of Sciences, China), Jingxiao Ge (Chinese Academy of Sciences, China), Ying Qiao (Chinese Academy of Sciences, China), and Hongan Wang (Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)
 Prediction for Remaining Useful Life of Lithium-ion Batteries Based on NGO-VMD and LSTM 29 Wantong Xu (Dalian University of Technology, China), Yingshun Li (Dalian University of Technology, China), and Bin Yang (Dalian University of Technology, China)
Variational Residual Model for Machinery Condition Monitoring Under Complex Degradation Processes 34 Yulang Liu (Xi'an Jiaotong University, China), Jinglong Chen (Xi'an Jiaotong University, China), and Shuilong He (Guilin University of Electronic Technology, China)

Online Health Monitoring and Incipient Fault Detection for Large Wind Turbine Based on a Data-Driven Method .38 Xusheng Hu (Harbin Engineering University, China), Xiaohang Jin (Zhejiang University of Technology, China), Xiao Yang (Harbin Engineering University, China), Xiaodong Xing (Harbin Engineering University, China), Xiaoxia Zhang (Harbin Engineering University, China), and Zihao Kang (Harbin Engineering University, China)
Enhanced Incipient Cracks Classification in High Noise Environments Using PCA-SVM Model 44
Xiaoxia Zhang (Harbin Engineering University, China), Chao Wang (Harbin Engineering University, China), Xusheng Hu (Harbin Engineering University, China), Chunhuan Guo (Harbin Engineering University, China), Guantong Wang (Harbin Engineering University, China), and Qinglang Zhou (Harbin Engineering University, China)
Interpretable Graph Hyperinsulinemia Detection Model with Orthogonal Array Optimization .50 Nevena Rankovic (Tilburg University, The Netherlands), Dragica Rankovic (Faculty of Applied Sciences Nis, Serbia), and Igor Lukic (University of Kragujevac, Serbia)
Design of a Marine Litter Collection Apparatus Utilizing Wave and Wind Energy .59 Yang Liu (Zhejiang Ocean University, China) and Xiaomin Shi (Zhejiang Ocean University, China)
Research on Implementation Approaches for Delay Queue .63 Yanyun Cao (Dalian Neusoft University of Information, China), Bo Wu (Dalian Neusoft University of Information, China), and Xinxin Shao (Dalian Neusoft University of Information, China)
Status Assessment Method of Armored Vehicle Engine Oil and Fluid System Based on ARO-SVM .68
A Data-Driven GRU-GPR Method for Predicting the Remaining Useful Life of Lithium-ion Battery .72 Zezhong Wang (Hong Kong Industrial Artificial Intelligence and Robotics Centre, China), Jinhui Huang (Hong Kong Industrial Artificial Intelligence and Robotics Centre, China), Zekai Wu (Hong Kong Industrial Artificial Intelligence and Robotics Centre, China), Joanna A. Chen (Hong Kong Industrial Artificial Intelligence and Robotics Centre, China), Ming Ge (Hong Kong Productivity Council, China), and
Edmond Lai (Hong Kong Productivity Council, China) Summary of Fault Prediction Algorithms for Fire Control System <u>80</u> Yingshun Li (Beijing Institute of Petrochemical Technology, China), Hongji Ji (Beijing Institute of Petrochemical Technology, China), Heng Zhao (Beijing Institute of Petrochemical Technology, China), and Ang Yu (Beijing Institute of Petrochemical Technology, China)
 Study on the Influence and Prediction of Voltage Decay Trend of Fuel Cell with Different Current in Dynamic Cycle Condition .84 Xiaohui Liu (Beijing University of Posts and Telecommunications, China), Jianhua Chen (Beijing University of Posts and Telecommunications, China), Yian Wei (Beijing University of Posts and Telecommunications, China), Shengjie Liu (Beijing University of Posts and Telecommunications, China), and Yilin Zhou (Beijing University of Posts and Telecommunications, China)

A Review of PHM Research on Weapons and Mechanical Equipment 90 Fansen Kong (Beijing Institute of Petrochemical Technology, China), Yingshun Li (Beijing Institute of Petrochemical Technology, China), Chengsong Li (Beijing Institute of Petrochemical Technology, China), and Shiming Liu (Beijing Institute of Petrochemical Technology, China)
Overview of Vehicle Chassis Fault Prediction 94. Yingshun Li (Beijing Institute of Petrochemical Technology, China), Heng Zhao (Beijing Institute of Petrochemical Technology, China), Ang Yu (Beijing Institute of Petrochemical Technology, China), and Hongji Ji (Beijing Institute of Petrochemical Technology, China)
Bearing Fault Severity Assessment Method Based on Spectrum Energy Variation .98 Sen Li (Xi'an Jiaotong University, China), Zhihua Song (Xi'an Jiaotong University, China), Yiyang Wei (Xi'an Jiaotong University, China), and Ming Zhao (Xi'an Jiaotong University, China)
Research and Analysis of Commonly Used Node.js Framework .104 Bo Wu (Dalian Neusoft University of Information, China), Yanyun Cao (Dalian Neusoft University of Information, China), and Xinning Liu (Dalian Neusoft University of Information, China)
Prediction of Crankshaft Bearing Wear Degree Based on ICEEMDAN-ZOA-GRU .108 Yingshun Li (Beijing Institue of Petrochemical Technology, China), Shiming Liu (Beijing Institue of Petrochemical Technology, China), Ang Yu (Beijing Institue of Petrochemical Technology, China), and Debiao Wang (Shenyang Shunyi Technology Co. Ltd, China)
Design of the Fault Diagnosis and Maintenance Decision Support System for the Scientific Experiment Cabinets of Space Station .113 Yue Liu (Chinese Academy of Sciences, China), Zhenxiang Li (Chinese Academy of Sciences, China), Lu Zhang (Chinese Academy of Sciences, China), Ke Wang (Chinese Academy of Sciences, China), and Hongyong Fu (Chinese Academy of Sciences, China)
 Fault Impact Extraction for Planetary Gearbox Using Motor Current .118 Dexin Chen (Xi'an Jiaotong University, China), Xiaolong Han (Xi'an Jiaotong University, China), Linjiao Wu (Xi'an Jiaotong University, China), Sen Li (Xi'an Jiaotong University, China), Shudong Ou (Xi'an Jiaotong University, China), and Ming Zhao (Xi'an Jiaotong University, China)
A Review of Fault Diagnosis Methods of Hidden Markov Model in Integrated Transmission Devices .123 Yingshun Li (Beijing Institute of Petrochemical Technology, China), Shurong Li (Beijing Institute of Petrochemical Technology, China), Fansen Kong (Beijing Institute of Petrochemical Technology, China), and Qiuping Zhang (Beijing Institute of Petrochemical Technology, China)
A Developed Design of Power Generating Tiles .127 Omar D Mohammed (Prince Mohammad bin Fahd University PMU, Saudi Arabia), Semat Alzaher (Prince Mohammad bin Fahd University PMU, Saudi Arabia), Isha Bubshait (Prince Mohammad bin Fahd University PMU, Saudi Arabia), Reem Alhussain (Prince Mohammad bin Fahd University PMU, Saudi Arabia), Kawther Almenayan (Prince Mohammad bin Fahd University PMU, Saudi Arabia), and Reyouf AlQahtani (Prince Mohammad bin Fahd University PMU, Saudi Arabia)

 Vibration Reduction of a Tile Structure Using Tuned Mass Damper	
Research on the Application of Acoustic Emission Guided Wave Technology in Radioactive Environment 137 Shan Gao (China Institute of Atomic Energy, China), Zhongyuan Yang (China Institute of Atomic Energy, China), Yandong Yu (Jiangyin Hongteng Machinery Co., Ltd., China), Feng Gao (China Institute of Atomic Energy, China), Tianyu Hou (China Institute of Atomic Energy, China), Atomic Energy, China), Tianyu Hou (China Institute of Atomic Energy, China)	
Advanced Diagnosis of Bearings Under Variable Working Conditions Using CEEMDAN Decomposition of Electrical Signals	
Compound Fault Diagnosis of Planetary Gearbox Using Capsule Network with Multi-Scale Convolutional Neural Network	
Multi-Scale Attention Convolution Subdomain Adaption Network for Cross-Domain Fault Diagnosis of Machine 153 Zongliang Xie (Xi'an Jiaotong University, China) and Jinglong Chen 153 (Xi'an Jiaotong University, China) 153	
Diagnostics and Prognostics for Retrofitted Systems: A Comprehensive Approach for Enhanced System Health Assessment	
Reliability Analysis of T0 Chopper Based on Fuzzy Fault Tree	

A Surrogate Model-Based Method for Multipurpose Overload Robot's Healthy Status Prediction 171
Xi Zhang (Huazhong University of Science and Technology, China;
Lappeenranta University of Technology, Finland), Jie Liu (Huazhong
University of Science and Technology, China), Fang Zhao (Huazhong
University of Science and Technology, China), Youmin Hu (Huazhong University of Science and Technology, China: HUST Wuri Pessarch
Institute. China). Huapeno Wu (Lappeenranta University of Technology.
Finland), Bo Wu (Huazhong University of Science and Technology,
China), and Tielin Shi (Huazhong University of Science and Technology, China)
A Continuous Learning Method for Bearing Fault Diagnosis Based on Dynamic Multi-Teacher Knowledge Distillation
Gezhi Liu (Capital Normal University, China) and Lifeng Wu (Capital Normal University, China)
Study on the Influence of Tunnel Illumination on Drivers' Physiological Indexes
Mengmeng Duan (Anhui Sanlian University, China), Peiyou Xue (Anhui Sanlian University, China), and Huiqing Jin (Anhui Sanlian University,
China)
Electric Railway Vehicle Pocket Sliding Entrance System Fault Classification Using AI Algorithms
Hyo-Seok Oh (Korea National University of Transportation, Republic of
Korea), Kyung-Sik Kim (Korea National University of Transportation, Republic of Korea), Chul-Su Kim (Korea National University of
Transportation. Republic of Korea), and Iae-Moon Kim (Korea National
University of Transportation, Republic of Korea)
Research and Application of Key Technology of Distribution Grid Project Management Based
Research and Application of Key Technology of Distribution Grid Project Management Based on Project Center Qige Hu (NARI Group (State Grid Electric Power Research Institute)
Research and Application of Key Technology of Distribution Grid Project Management Based on Project Center

Research and Application of Key Technology of Distribution Grid Project Management Based on Project Center 193 Qige Hu (NARI Group (State Grid Electric Power Research Institute) 60, Ltd., China), Zhiqi Wang (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Jinghe Sun (NARI Group (State Grid Electric Power Research Institute) Grid Electric Power Research Institute) Co., Ltd., China), Anhong He (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Yunlong Zhao (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Leilei Jia (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Xuejun Zhou
Research and Application of Key Technology of Distribution Grid Project Management Based on Project Center
Research and Application of Key Technology of Distribution Grid Project Management Based on Project Center
Research and Application of Key Technology of Distribution Grid Project Management Based on Project Center
Research and Application of Key Technology of Distribution Grid Project Management Based 193 Qige Hu (NARI Group (State Grid Electric Power Research Institute) 193 Co., Ltd., China), Zhiqi Wang (NARI Group (State Grid Electric Power 193 Research Institute) Co., Ltd., China), Jinghe Sun (NARI Group (State 193 Grid Electric Power Research Institute) Co., Ltd., China), Jinghe Sun (NARI Group (State 193 Grid Electric Power Research Institute) Co., Ltd., China), Anhong He (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Yunlong Zhao (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Leilei Jia (NARI Group (State Grid 193 Electric Power Research Institute) Co., Ltd., China), Xuejun Zhou (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Pei Li (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), and Yuhang Li (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), and Yuhang Li (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China) Data Generation and Prototype Learning Based Open-Set Fault Diagnosis for Rotating Machinery 202
 Research and Application of Key Technology of Distribution Grid Project Management Based on Project Center
Research and Application of Key Technology of Distribution Grid Project Management Based on Project Center 193 <i>Qige Hu (NARI Group (State Grid Electric Power Research Institute)</i> 60, Ltd., China), Zhiqi Wang (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Jinghe Sun (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Jinghe Sun (NARI Group (State Grid Electric Power Grid Electric Power Research Institute) Co., Ltd., China), Anhong He (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Yunlong Zhao (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Leilei Jia (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Xuejun Zhou (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Pei Li (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Pei Li (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Pei Li (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China) Data Generation and Prototype Learning Based Open-Set Fault Diagnosis for Rotating 202 Yunjia Dong (Harbin Institute of Technology, China), Yuqing Li (Harbin Institute of 202
 Research and Application of Key Technology of Distribution Grid Project Management Based on Project Center
Research and Application of Key Technology of Distribution Grid Project Management Based on Project Center 193 Qige Hu (NARI Group (State Grid Electric Power Research Institute) 60, Ltd., China), Zhiqi Wang (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Jinghe Sun (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Anhong He (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Yunlong Zhao (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Yunlong Zhao (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Leilei Jia (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Xuejun Zhou (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Pei Li (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Pei Li (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Pei Li (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China) Data Generation and Prototype Learning Based Open-Set Fault Diagnosis for Rotating Machinery 202 Yunjia Dong (Harbin Institute of Technology, China), Yuqing Li (Harbin Institute of Technology, China), Minqiang Xu (Harbin Institute of Technology, China), and Rixin Wang (Harbin Institute of Technology, China), and Rixin Wang (Harbin Institute of Technology, China) 209
 Research and Application of Key Technology of Distribution Grid Project Management Based on Project Center
Research and Application of Key Technology of Distribution Grid Project Management Based on Project Center 193 Qige Hu (NARI Group (State Grid Electric Power Research Institute) 60, Ltd., China), Zhiqi Wang (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Jinghe Sun (NARI Group (State 67 Grid Electric Power Research Institute) Co., Ltd., China), Anhong He (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Yunlong Zhao (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Leilei Jia (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Xuejun Zhou (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Pei Li (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Pei Li (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Pei Li (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), and Yuhang Li (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China) Data Generation and Prototype Learning Based Open-Set Fault Diagnosis for Rotating 202 Yunjia Dong (Harbin Institute of Technology, China), Yuqing Li (Harbin Institute of Technology, China), Minqiang Xu (Harbin Institute of Technology, China), and Rixin Wang (Harbin Institute of Technology, China) 209 Baudouin Naline (Université Paris-Saclay, France), Nicolas Ravot
Research and Application of Key Technology of Distribution Grid Project Management Based on Project Center 193 Qige Hu (NARI Group (State Grid Electric Power Research Institute) 60, Ltd., China), Zhiqi Wang (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Jinghe Sun (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Jinghe Sun (NARI Group (State Grid Electric Power Grid Electric Power Research Institute) Co., Ltd., China), Anhong He (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Yunlong Zhao (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Leilei Jia (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), Xuejun Zhou (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China), and Yuhang Li (NARI Group (State Grid Electric Power Research Institute) Co., Ltd., China) Data Generation and Prototype Learning Based Open-Set Fault Diagnosis for Rotating 202 Yunjia Dong (Harbin Institute of Technology, China), Yuqing Li (Harbin 1nstitute of Technology, China), Minqiang Xu (Harbin Institute of Technology, China), and Rixin Wang (Harbin Institute of Technology, China) 209 Baudouin Naline (Université Paris-Saclay, France), Nicolas Ravot 209 Baudouin Naline (Université Paris-Saclay, France), Wafa Ben Hassen (Université Paris-Sacl

A Novel Fault Diagnosis Model Based on ISSA-VMD and CNN-BiLSTM
3D Reconstruction of Aircraft Engine Damaged Blades Based on Monocular Vision
Machine Learning Techniques for Vibration-Based Condition Monitoring–A Review
Fitness Assessment of AI-Based Systems 235 Michael Borth (TNO, The Netherlands), Julio de Oliveira Filho (TNO, 245 The Netherlands), and Chris van der Ploeg (TNO, The Netherlands) 245
Estimating Constraint Parameter in 3D Models of Specimens Based on Curve Shape Similarity
Ping Ding (Chongqing Technology and Business University, China), Liang Qu (Chongqing Technology and Business University, China), and Peng Ye (Chongqing Technology and Business University, China)
Estimating Constraint Parameter in 3D Models of Specimens Based on T-Stress and Fully Plastic Analysis
Analysis of Vibration Fault Diagnosis Methods for Aeroengine
Experimental Study on Partial Wear of TBM Disc Cutter
Research on SDN Load Balancing and Failure Handling Based on Dynamic Decision
Oxygen Excess Ratio Regulation for PEMFC Air Supply Systems Using Unscented Kalman Filter and Full-State Feedback Control
Fault Prediction of DC-DC Devices Based on Deep Belief Network

A Data-Driven Lifetime Prediction Method for Thermally Aged SiC MOSFET Applications .281 Wenfa Kang (Aalborg University, Denmark), Sen Tan (Aalborg University, Denmark), Juan C. Vasquez (Aalborg University, Denmark), Josep M. Guerrero (Aalborg University, Denmark; Catalan Institution for Research and Advanced Studies (ICREA), Spain; Technical University of Catalonia (UPC), Spain), Tobias Hertle (HS Elektronik Systeme GmbH), Thomas Gietzold (HS Elektronik Systeme GmbH), Andrew Benn (Electronic Control and Motor Systems (ECMS)), and Baoze Wei (Aalborg University, Denmark)
Cable Online Fault Diagnosis Technology Based on ZCZ Spread Spectrum Sequence .287 Hao Xu (Nanjing University of Aeronautics and Astronautics, China), Shanshui Yang (Nanjing University of Aeronautics and Astronautics, China), Li Wang (Nanjing University of Aeronautics and Astronautics, China), Hongzhen Chen (Nanjing University of Aeronautics and Astronautics, China), Ziyue He (Nanjing University of Aeronautics and Astronautics, China), and Yucheng Chen (Nanjing University of Aeronautics and Astronautics, China)
 Remaining Useful Life Prediction of Aero-Engine Based on Multi-Scale Channel Enhanced BiLSTM 293 Yikun Liu (Harbin Institute of Technology, China), Lin Lin (Harbin Institute of Technology, China), Song Fu (Harbin Institute of Technology, China), Song Fu (Harbin Institute of Technology, China), Feng Guo (Harbin Institute of Technology, China), Shiwei Suo (Harbin Institute of Technology, China), and Sihao Zhang (Harbin Institute of Technology, China)
Machine Learning Approach for Classification of Faults in Cable via Compressed Sensing Time-Domain Reflectometry 300 Hanane Slimani (Universite Paris-Saclay, France), Yosra Gargouri (Universite Paris-Saclay, France), Fred Maurice Ngole Mboula (Universite Paris-Saclay, France), and Nicolas Ravot (Universite Paris-Saclay, France)
 From Fragments to Futures: Construction of Synthetic Run-to-Failure Trajectories for Fault State Prognostics 306 Sagar Jose (University of Technology Tarbes Occitanie Pyrénées (UTTOP), France), Ryad Zemouri (IREQ Hydro-Québec Research Institute, Canada), Khanh T.P Nguyen (University of Technology Tarbes Occitanie Pyrénées (UTTOP), France), Kamal Medjaher (University of Technology Tarbes Occitanie Pyrénées (UTTOP), France), Antoine Tahan (École de Technologie Supérieure (ÉTS), Canada), and Mélanie Lévesque (IREQ Hydro-Québec Research Institute, Canada)
Can Graph Neural Networks Outperform in Supervised Classification of Noisy Acoustic Signals? An Industrial Case Study of Hydroelectric Generator .312 Quang Hung Pham (Hydro-Quebec Research Institute, Canada), Ryad Zemouri (Hydro-Quebec Research Institute, Canada), and Yesha Shastri (University of Montreal, Canada)
RUL Estimation for Power Electronic Devices Using RNNs .319 Congrui Cai (KTH Royal Institute of Technology) and Zhonghai Lu (KTH Royal Institute of Technology)

 Fault Diagnosis Method of Rolling Bearing Based on MSCNN-CAM .328 Hongchao Wang (Zhengzhou University of Light Industry, China), Shuaiwei Lu (Zhengzhou University of Light Industry, China), Li Yu (ZRIME Gearing Technology Co., Ltd, China), Simin Li (ZRIME Gearing Technology Co., Ltd, China), Zhiqiang Guo (Zhengzhou University of Light Industry, China), Wenliao Du (Zhengzhou University of Light Industry, China), and Guoqing Xue (Zhengzhou University of Light Industry, China)
Fault Diagnosis of AUV Propeller Based on Interference Suppression CLSTM-CNN-Attention 334
Hongchao Wang (Zhengzhou University of Light Industry, China), Guoqing Xue (Zhengzhou University of Light Industry, China), Li Yu (ZRIME Gearing Technology Co., Ltd, China), Simin Li (ZRIME Gearing Technology Co., Ltd, China), Zhiqiang Guo (Zhengzhou University of Light Industry, China), and Wenliao Du (Zhengzhou University of Light Industry, China)
Dynamic Analysis of Overhead Transmission Line Ampacity Limit Driven by Non-Contact Sensing Data 3/1
Xiaoyan Sun (State Grid Smart Grid Research Institute Co., Ltd, China), Kaihua Jiang (State Grid Zhejiang Electric Power Co., Ltd, China), Yun Liang (State Grid Smart Grid Research Institute Co., Ltd, China), Li Huang (State Grid Smart Grid Research Institute Co., Ltd, China), and Zhifeng Zhang (State Grid Smart Grid Research Institute Co., Ltd, China)
TCAS: A Two-Channel Text Classification Model Based on Adversarial Samples .347 Jiajing Zhang (Anhui Jianzhu University, China), Kun Zou (Anhui Jianzhu University, China), Jinlan Chen (Anhui Jianzhu University, China), and Tinghuai Ma (Nanjing University of Information Science and Technology, China)
An Improved One-Step Onsite FTU Health Condition Assessment Method Using Semi-Supervised Graph Discrepancy Learning 356 Fengyuan Zhang (Huazhong University of Science and Technology, China), Jie Liu (Huazhong University of Science and Technology, China), Yitao Fei (Huazhong University of Science and Technology, China), Yuxin Li (Huazhong University of Science and Technology, China), Yujie Liu (Huazhong University of Science and Technology, China), and Hua Gao (Huazhong University of Science and Technology, China)
Structural Diagnosability Analysis of Switched and Modular Battery Packs .362 Fatemeh Hashemniya (Linkoping University, Sweden), Arvind Balachandran (Linkoping University, Sweden), Erik Frisk (Linkoping University, Sweden), and Mattias Krysander (Linkoping University, Sweden)
Machine Learning-Based Fault Diagnosis for Reactants Starvation with Severity Levels in PEMFC Under Dynamic Load Profile 370 Mukhtar Sani (Univ. Grenoble Alpes, France), Maxime Piffard (Univ. Grenoble Alpes, France), and Vincent Heiries (Univ. Grenoble Alpes, France)
A Genetic Algorithm Based Feeder-User Connection Mapping Method with Limited Meter Data in Distribution Networks .37.6
Digital Twin-Driven Condition Monitoring: Development for Ball Screw Feed Drive Systems .380 <i>Himanshu Gupta (KU Leuven, Campus Bruges, Belgium) and Pradeep Kundu</i>

(KU Leuven, Campus Bruges, Belgium)

The Physics-Based Mud Motor PHM Solution for Enhancing Drilling Efficiency .387 Dmitry Belov (SLB, UK) and Anton Kolyshkin (SLB, UK)
Remaining Useful Life Estimation Based on the System Trajectory in a Latent Space Representation .393 Adaiton Oliveira-Filho (École de technologie supérieure, Canada), Ryad Zemouri (Hydro-Québec, Canada), Francis Pelletier (Power Factors, Canada), and Antoine Tahan (École de technologie supérieure, Canada)
 Fault Diagnosis of AUV Propulsion System Based on Multi-Scale Dilated Convolutional Neural Network .398
Enhanced Data Augmentation for Bearing Fault Diagnosis by Using a Spectral flow Model .405 Xiaoyun Gong (Zhengzhou University of Light Industry, China), Mengxuan Hao (Zhengzhou University of Light Industry, China), Chuan Li (Chongqing Technology and Business University, China), Wenliao Du (Zhengzhou University of Light Industry, China), and Yixiang Huang (Shanghai Jiao Tong University, China)
Control Strategy for Constant Voltage Regulation of Dual Active Bridge in MC-WPT System with LCC-LCC Topology .410 Leyuan Wei (Chongqing University, China), Yan Ma (Naval Research Institute, China), Xiangyao Meng (Naval Research Institute, China), and Yue Sun (Chongqing University, China)
Enhanced Prognostics and Health Management in Automated Driving Systems: Using Graph Neural Networks to Recognize Operational Contexts .415 Peng Su (KTH Royal Institute of Technology, Sweden), Yeqi Wang (KTH Royal Institute of Technology, Sweden), Conglei Xiang (KTH Royal Institute of Technology, Sweden), Erik Wendel (KTH Royal Institute of Technology, Sweden), Madhav Mishra (Digital Systems Division at RISE Research Institutes of Sweden, Sweden), and DeJiu Chen (KTH Royal Institute of Technology, Sweden)
Performance Analysis and Comparison of Pre-Trained CNN in Bearing Fault Diagnostics .422 Xinyi Ma (Carleton University, Canada), Jie Liu (Carleton University, Canada), Hassan Mahmoud (GasTOPS Ltd., Canada), and Madhav Mishra (RISE Research Institutes of Sweden, Sweden)
Bearing Anomaly Detection Using Dynamic Loss-Guided Autoencoders 428 Hongmeng Shen (Chongqing Technology and Business University, China), Yunwei Huang (Dongguan University of Technology, China), and Chuan Li (Chongqing Technology and Business University, China)
Optimization Method for Maximum System Efficiency Under Power Allocation Conditions for One-to-two MC-WPT Systems .433 Qing Liu (Chongqing University, China), Xiangyao Meng (Naval Research Institute, China), Yan Ma (Naval Research Institute, China), and Yue Sun (Chongqing University, China)
