# TABLE OF CONTENTS

|                                                                                                           |    |
|-----------------------------------------------------------------------------------------------------------|----|
| A Patent Data Meta-Path Based Technological Risk Prediction Method (SCA) .....                            | 1  |
| <i>J. Zhang, W. Liu, Y. Yang, F. Ye</i>                                                                   |    |
| Low-Light Image Enhancement Based on Retinex Reflectance Compensation .....                               | 7  |
| <i>Z. Zhang, W. Wang, W. Yang, N. Ma, M. Sun, X. Wang, L. Ruan, R. Yi</i>                                 |    |
| External Knowledge Network Based Patent Event Extraction Model (SCA) .....                                | 13 |
| <i>F. Ye, W. Liu, Y. Zhang, J. Zhang</i>                                                                  |    |
| Comparing Machine Learning and Feature Selection Approaches for Automated Bug Report Assignment .....     | 19 |
| <i>F.Y. Omeo, J. Anvik</i>                                                                                |    |
| Why the Professor Can't Teach .....                                                                       | 20 |
| <i>P. Kamthan, N. Shahmir</i>                                                                             |    |
| MDASC: Advanced Dual-Layered Code Cloning Technique for Identifying Reused Malicious Code .....           | 21 |
| <i>Y. Glani, L. Ping, L. Ke</i>                                                                           |    |
| Automatically Identifying Planning Comments in Bug Reports .....                                          | 27 |
| <i>S. Devaiya, J. Anvik</i>                                                                               |    |
| Fault Injection with Enhanced Observability for Resilient Cloud-Edge Computing.....                       | 30 |
| <i>J. Ruan, X. Yang, Y. Fan</i>                                                                           |    |
| Code Reachability Visualization Based on Probabilistic Model Checking .....                               | 36 |
| <i>H. Nakagawa, S. Sumita, S. Saito</i>                                                                   |    |
| Validating Secure Cloud Communication Mechanisms of Graphene with CSP-Based Modeling .....                | 42 |
| <i>J. Liu, Z. Hou, H. Zhu</i>                                                                             |    |
| Neo4j's BFS and DFS Evaluation in GDS and APOC Libraries with SPL Feature Models .....                    | 48 |
| <i>H. Shatnawi, J. Saquer</i>                                                                             |    |
| STGAN-CR: A Swin Transformer-Enhanced GAN Framework for Effective Cloud Removal in Satellite Imagery..... | 51 |
| <i>H. Zhu, Z. Wang, M. Xu, J. Jiang, J. Zhang, H. Fan, Q. Liu, B. Du</i>                                  |    |
| A Two-Stage Map-Matching Method for Sparse Trajectories with Small-Scale Ground Truth Data.....           | 57 |
| <i>J. Si, Y. Xing, L. Li, B. Tu</i>                                                                       |    |
| Digital Twin System for River Network Based on Graph Neural Network.....                                  | 63 |
| <i>Z. Jin, F. Ye, P. Zhang</i>                                                                            |    |
| AI-Enabled Software Engineer: A Taxonomy of Challenges and Success Factors .....                          | 69 |
| <i>M. Shameem, M. Niazi, M. Nadeem, A. Kumar</i>                                                          |    |
| Sentence-Level Representation Learning for English-Assisted Teaching System .....                         | 72 |
| <i>L. Li</i>                                                                                              |    |
| Improving Event Detection Via Trigger Word Expansion.....                                                 | 78 |
| <i>Q. Zhou, S. Huang, C. Yu, D. Li, J. Chen, S. Liu</i>                                                   |    |

|                                                                                                                              |     |
|------------------------------------------------------------------------------------------------------------------------------|-----|
| Chinese Abbreviation Prediction Using Multi-Feature Fusion and Global Context(SCA) .....                                     | 84  |
| <i>D. Li, S. Huang, C. Yu, J. Chen, Q. Zhou, S. Liu</i>                                                                      |     |
| Low-Cost Irrigation System Based on Multi-Tenant and WSN Technologies(SCA).....                                              | 90  |
| <i>J. Ma, M. Li, L. Chao</i>                                                                                                 |     |
| Data-Fusion-Based Patent Valuation: Discovering the Market Need (SCA).....                                                   | 95  |
| <i>Z. Bai, Y. Zhang, S. Zhang</i>                                                                                            |     |
| How Does Project Context Matter in Enhancing the Capabilities of Code Summarization Models? .....                            | 100 |
| <i>J. Li, Y. Liu</i>                                                                                                         |     |
| Using Context and Hierarchy Features to Enhance Code Completion in Code Modification<br>Scenarios .....                      | 107 |
| <i>L. Li, M. Xing, L. Li</i>                                                                                                 |     |
| Towards Understanding the Distribution and Evolution of Code Smells: An Empirical Study on<br>Java and Python Projects ..... | 113 |
| <i>Q. Mi, T. Zhang, K. Cai, Y. Wang</i>                                                                                      |     |
| WCL-CRC: A Weakly-Supervised Contrastive Learning Framework for Few-Shot Code<br>Readability Classification.....             | 117 |
| <i>Q. Mi, Y. Xi, J. Li, Y. Zhao, S. Tang</i>                                                                                 |     |
| Build a Dataset of Query-Code Pairs Based on CodeSearchNet for Code Search .....                                             | 123 |
| <i>Y. Xu, C. Chen</i>                                                                                                        |     |
| Integrity for Interfaces and Lambda Expressions with Static Analysis .....                                                   | 129 |
| <i>I. Pinjari, M. Shin, P. Ogale</i>                                                                                         |     |
| HACS: An Enhancement Framework for Deep Code Search Benefiting from Hard Negative<br>Samples .....                           | 133 |
| <i>Q. Song, J. Liu, H. Hu</i>                                                                                                |     |
| An Interpretable Logic KBQA Method Based on Open-Source Large Language Models.....                                           | 137 |
| <i>B. Xu, R. Peng, Y. Ding, L. Fang</i>                                                                                      |     |
| Enhancing Compiler Optimization with Reinforcement Learning and Monte Carlo Tree Search .....                                | 143 |
| <i>J. Liu, J. Ren, J. Xie, J. Fang, T. Wang</i>                                                                              |     |
| Joint Extraction of Interaction Features and Attention Mechanism Fused with Entity-Relations .....                           | 149 |
| <i>L. Su, R. Yan</i>                                                                                                         |     |
| GeoExpert: Geometry Problem Solving Based on RoBERTa and Graph Attention Networks .....                                      | 155 |
| <i>X. Peng, X. Zhang, H. Zhao, L. Chen</i>                                                                                   |     |
| Model Checking for Probabilistic Timed Black-Box Systems.....                                                                | 161 |
| <i>Y. Li, J. Xu</i>                                                                                                          |     |
| Software Defect Prediction Via Code Grayscale Pixel Visualization with Fusion Attention .....                                | 167 |
| <i>S. Qiu, S. Wang, W. Rong, L. Liao, Y. Lin</i>                                                                             |     |
| An LLM-Based Multi-Stage Approach for Automated Test Case Generation from User Stories .....                                 | 172 |
| <i>Q. Zhou, J. Li, J. Sun, T. Li</i>                                                                                         |     |
| MTRNet: An Efficient Hybrid Network Model for Surface Defect Detection of Sheet Metal .....                                  | 176 |
| <i>H. Hao, S. Zhu, Y. Chen, C. Yi, H. Zhao, Y. Feng, R. Yang</i>                                                             |     |

|                                                                                                                                      |     |
|--------------------------------------------------------------------------------------------------------------------------------------|-----|
| Deep Just-In-Time Defect Prediction Based on Double-Source Input Self-Attention Mechanism .....                                      | 180 |
| <i>W. Hong, S. Guo, Y. Wu, H. Li</i>                                                                                                 |     |
| From Domain Models to Natural Language Requirement Documents: An Exploration of Requirement Missing Problems.....                    | 186 |
| <i>T. Wang, L. Zheng</i>                                                                                                             |     |
| Time-Series Based Phase-Ordering Selection for Code-Size Reduction.....                                                              | 187 |
| <i>Z.B. Peng, Y. Zhang, M. Xing, Y. Wu, C. Zhao</i>                                                                                  |     |
| RustPruner: A Program Slicing Tool for Rust Programs .....                                                                           | 193 |
| <i>Y. Hu, W. Chen, Y. Zhao, R. Zhang, L. Yin, W. Dong</i>                                                                            |     |
| SDA-FirmFuzz: Fuzz Testing IoT Device Firmwares Based on Seed Differential Analysis .....                                            | 199 |
| <i>Z. Wang, W. Lan, Z. Cui</i>                                                                                                       |     |
| Bridging the Communication Gap: Sign Language Recognition Technology for the Speech and Hearing Impaired.....                        | 205 |
| <i>S. Ganta, S. Shubbar, T.R. Timmapuram, L.P. Vangapalli, K. Jilkara, B. Baheri, H. Muhajab, A. Muhajab, K. Ghazinour, S. Miner</i> |     |
| Importance of Good Data Quality in AI Business Information Systems for IIoT Enterprises - A Data-Centric AI Approach.....            | 211 |
| <i>A. Dagnino</i>                                                                                                                    |     |
| GHermes: Application-Unaware Acceleration for Cloud Rendering and Computing with Efficient GPU Utilization .....                     | 217 |
| <i>X. Hu, Y. Gu, Z. Qi</i>                                                                                                           |     |
| An Efficient Smart Contract-Enabled Blockchain Framework for Data Sharing in Cloud Based IoT Systems.....                            | 223 |
| <i>A.U. Rehman, S. Lu</i>                                                                                                            |     |
| How Will ZNS SSDs Perform on Real Key-Value Stores? an Experimental Test of RocksDB.....                                             | 229 |
| <i>Y. Sun, P. Jin</i>                                                                                                                |     |
