PROCEEDINGS OF SPIE

Applications of Digital Image Processing XLVII

Andrew G. Tescher Touradj Ebrahimi Editors

19–22 August 2024 San Diego, California, United States

Sponsored and Published by SPIE

Volume 13137

Proceedings of SPIE 0277-786X, V. 13137

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in Applications of Digital Image Processing XLVII, edited by Andrew G. Tescher, Touradj Ebrahimi, Proc. of SPIE 13137, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510679344 ISBN: 9781510679351 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii Conference Committee

MEDICAL IMAGING

- 13137 02 Telemicroscopy system applied to digital microscopy with a low-cost automated microscope [13137-1]
- 13137 03 BetaVAEClassifier versus PCAEClassifier: investigating variational autoencoder and classification for accurate identification of white lesions in multiple sclerosis brain MRIs [13137-2]
- 13137 04 Comparative analysis of white matter lesion segmentation in multiple sclerosis patients' MRIs: evaluating the results of FCNN architecture and CVIPtools software on compressed image data [13137-3]
- 13137 05 Comparison of performance of two deep learning models for classification of skin lesions using image resampling technique for data augmentation [13137-4]
- 13137 06 Comparative analysis of deep learning models for brain tumor classification in MRI images using enhanced preprocessing techniques [13137-5]

IMAGING SECURITY I

- 13137 07 Media revision history tracking via asset decomposition and serialization [13137-6]
- 13137 08 Combating the use of AI in image manipulation [13137-7]
- 13137 09 Secure communication based on chaotic spherical 3D attractors [13137-8]

IMAGING SECURITY II

- 13137 0A Improving perturbation-based explanation methods with application to face recognition [13137-9]
- 13137 OB JPEG Trust: an international standard facilitating the assessment of trustworthiness of digital media assets [13137-10]
- 13137 OC Fake images: how much do they matter? Towards building quantitative modeling of misinformative images [13137-11]

IMAGING SYSTEMS I

- 13137 0D Enhancing mosquito identification and tracking with object detection and citizen-science smartphone imagery [13137-12]
- 13137 OE Detection of the vegetation index using biophysical parameters using UAVs [13137-13]
- 13137 OF Scheduling algorithms on heterogeneous architecture for efficient vision systems [13137-14]
- 13137 0G Comparative evaluation of two algorithmic methods to enhance autonomous vehicle vision through de-raining imagery techniques [13137-15]

IMAGING SYSTEMS II

- 13137 OH Food recognition and segmentation using embedded hardware [13137-16]
- 13137 01 Digit classification using biologically plausible neuromorphic vision [13137-17]

AI-BASED IMAGING

- 13137 OK Automated retinal disorders classification: leveraging digital image enhancement techniques and deep learning on OCT images [13137-19]
- 13137 OL Land cover classification of satellite images using deep learning [13137-21]
- 13137 OM On the impact of learning-based image compression on computer vision tasks [13137-22]
- 13137 ON NN-based decision predictor of picture resolution change for video coding [13137-24]

IMAGING PERFORMANCE ASSESSMENT I

- 13137 00 Forward error correction for low-latency transmission of JPEG XS video streams [13137-25]
- 13137 OP Benchmarking conventional and learning-based objective image quality metrics on compression artifacts [13137-28]
- 13137 0Q Low-latency immersive content streaming over 5G networks using JPEG XS [13137-29]

IMAGING PERFORMANCE ASSESSMENT II

- 13137 OR On evaluating quality of experience in mixed immersive communication scenarios [13137-30]
- 13137 0S On the performance of learning-based image compression as source coding for JPEG DNA [13137-31]
- 13137 0T Towards immersive multimedia over 5G mobile networks [13137-32]

VIDEO ASICS FOR DATA CENTER

- 13137 0U Adaptive hardware acceleration architecture for ASIC transcoding [13137-33]
- 13137 0V AV1/AVM development at Google [13137-34]
- 13137 OW Benchmarking hardware and software encoder quality and performance [13137-35]
- 13137 0X Cross codec encoding parameter prediction for convex hull-based ABR encoding [13137-36]
- 13137 0Y LIVE: latent image and video encoding [13137-23]
- 13137 0Z Al-based content-aware encoding at scale utilizing hardware resources in video ASICs for data center [13137-38]
- 13137 10 Hardware accelerators for Al-based video enhancement and optimization in video ASICs for data center [13137-20]

IMAGING TECHNOLOGY

13137 11	Storing images and point clouds on DNA support with fountain codes [13137-39]
13137 13	Origins of the zigzag scan in transform-based picture coding [13137-41]
13137 15	Discrete cosine-sine transform and fast 16-point integer cosine-sine transform low-complexity for video coding [13137-55]
13137 16	Fast integer cosine transform of order-8 for high-speed video coding [13137-56]
13137 17	Advanced transform coding methods for next-generation video coding beyond AV1 [13137-43]
13137 18	Latent channel energy in learned image codecs [13137-52]

- 13137 1A Fast 16-point integer sine and cosine transforms type IV low-complexity for video coding [13137-54]
- 13137 1B Online-learned graph transforms for adaptive block size intra-predictive coding [13137-57]

POSTER SESSION

13137 1C	Bibliometric review: characterizing wine grapes through image processing [13137-44]
13137 1D	Three-dimensional scene reconstruction and Kalman filter [13137-46]
13137 1E	A simple neural network algorithm to register 3D point clouds [13137-47]
13137 1F	Breast abnormalities segmentation using neural networks for feature extraction followed by unsupervised anomaly detection [13137-48]
13137 1G	Structure recognition on mammography images using neural network and feature selection [13137-49]
13137 1H	Classification of breast cancer abnormalities using mixed machine learning and deep learning methods [13137-50]
	DIGITAL POSTER SESSION

13137 11 Neural networks in 3D printing error detection [13137-51]
