2023 14th International Conference on Reliability, Maintainability and Safety (ICRMS) **ICRMS 2023**

Table of Contents

Message from the Conference	xxxix
Message from the Program Chair	xl
Steering Committee	xlii
Program Committee	xliii
Organizing Committee	xlvi
Reviewers	xlvi
Sponsors	xlvi

Session A: High Quality Development

Research on Mission Chain Scheduling Methods for UAV Swarms Using Intelligent Algorithms	1
<i>Minze Xu (Beihang University, China), Zhongzheng Cao (Beihang University, China), Hui Tang (Beihang University, China), Lizhi Wang (Beihang University, China), Linghao Kong (Beihang University, China), Xiaohui Wang (Beihang University, China), and Xiaohong Wang (Beihang University, China)</i>	
Status Quo and Enlightenment of Quality and Reliability Management in Foreign Satellite Navigation Systems	10
<i>Dongliang Liu (China Aerospace Standardization Institute, China), Zixia Zheng (China Aerospace Standardization Institute, China), Song Zhang (China Aerospace Standardization Institute, China), and Yalong Wang (China Aerospace Standardization Institute, China)</i>	
Penalized Blind Kriging Model with Mixed Quantitative and Qualitative Factors Under Different Penalty Functions	N/A
<i>Dahao Chen (National University of Defense Technology Changsha, China; Unit 92957 of the PLA Zhoushan, China), Zhijun Cheng (National University of Defense Technology Changsha, China), Zhengqiang Pan (National University of Defense Technology Changsha, China), Yan Lu (Unit 32677 of the PLA Harbin, China), Yanlin Wang (National University of Defense Technology Changsha, China), and Zichen Wang (National University of Defense Technology Changsha, China)</i>	

Product Testability Testing and Evaluation Implementation Methods	22
<i>Tianjiao Yang (China Astronautics Standards Institute, China), Huichao Han (China Astronautics Standards Institute, China), Haibo Mi (China Astronautics Standards Institute, China), Zhaoxuan Wang (China Astronautics Standards Institute, China), and Yiting Wang (China Astronautics Standards Institute, China)</i>	
Index System for Evaluating Helicopters' General Quality Characteristics Under Digital Conditions	27
<i>Hongbin Zhang (Army Aviation Institute, China), Jiexiang Wang (Army Aviation Institute, China), and Xingguo Weng (Army Aviation Institute, China)</i>	
Literature-Based Knowledge Discovery of Quality Problem	32
<i>Guocai Liu (China Astronautics Standards Institute, China) and Yihong Zhao (China Astronautics Standards Institute, China)</i>	
Foreign Material Exclusion Management in Nuclear Power Plant	36
<i>Shuang Zhang (Suzhou Nuclear Power Research Institute, China), Yang Li (Suzhou Nuclear Power Research Institute, China), and Shuaifei Guo (Suzhou Nuclear Power Research Institute, China)</i>	
Design and Practice of Enterprise Quality Diagnosis Method	42
<i>Rui Lai (Academy of Aerospace Standardization and Product Assurance, China), Jianguo Dong (Academy of Aerospace Standardization and Product Assurance, China), and Junqing Wang (Academy of Aerospace Standardization and Product Assurance, China)</i>	
Flink-Stream-Computing-Driven Parallel Particle Filter for the Predictive Maintenance of Industrial Facilities	47
<i>Jianming Shi (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, China), Wei Wang (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, China), and Gong Wang (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, China)</i>	
Research on Application of Lean Product Assurance System in Aerospace	55
<i>Lei Shijie (Xi'an Aerospace Precision Electromechanical Research Institute, Xi'an, China), Peng Chuanyang (Xi'an Aerospace Precision Electromechanical Research Institute, Xi'an, China), Xu Ning (Xi'an Aerospace Precision Electromechanical Research Institute, Xi'an, China), and Zhu Yuting (China Elect Technol Grp Corp. 20th Res Inst Xi'an, China)</i>	
Digital Quality Management Method for Space Launch Testing	60
<i>Zhonghai Guo (Xichang Satellite Launch Center, China), Xinglong Ran (Xichang Satellite Launch Center, China), and Yuhang Ren (Xichang Satellite Launch Center, China)</i>	
Process Quality Control Method for Spacecraft Digital System Design Using Model-Based Systems Engineering	65
<i>Dong Han (China Academy of Space Technology), Kun Peng (China Academy of Space Technology), Long Ji (China Academy of Space Technology), and Xia Liu (China Academy of Space Technology)</i>	

Research on Certificate Mode of Aerospace Standard Fasteners Production Process	76
<i>Linlin Cao (China Astronautics Standards Institute, China), Zhongwei Zhang (China Astronautics Standards Institute, China), Xiaoyu Liu (China Astronautics Standards Institute, China), Zhirui Ren (China Astronautics Standards Institute, China), and Liu Kai (China Astronautics Standards Institute, China)</i>	
Analysis of Quality Inspection and Reliability Evaluation Methods for TSV Silicon Interposers	79
<i>Yingying Liu (China Academy of Aerospace Standardization and Product Assurance, China), Yu Fu (China Academy of Aerospace Standardization and Product Assurance, China), Likang Zhang (China Academy of Aerospace Standardization and Product Assurance, China), Zhihui Wang (China Academy of Aerospace Standardization and Product Assurance, China), Ke Shi (China Academy of Aerospace Standardization and Product Assurance, China), Pei Liu (China Academy of Aerospace Standardization and Product Assurance, China), and Zhipeng Mei (Xi'an Microelectronic Technology, China)</i>	
Research on the Supportability Evaluation Parameter Set of Complex Systems Integrating Uncertainty and Efficiency	84
<i>Wenshu Xie (Center of ILS, China Academy of Launch Vehicle Technology, China), Lixiang Gu (Center of ILS, China Academy of Launch Vehicle Technology, China), and Kai Wu (Center of ILS, China Academy of Launch Vehicle Technology, China)</i>	
Quality Assurance Technology Based on Reliability Physics	90
<i>Yu Tian (China Astronautics Standards Institute, China), Zhe Xu (China Astronautics Standards Institute, China), Xiaodong Yi (China Astronautics Standards Institute, China), Yanbo Li (China Astronautics Standards Institute, China), and Erming Rui (China Astronautics Standards Institute, China)</i>	
Requirement Analysis Technology for Maintainability Design of Aircraft Based on Maintenance Scenarios	95
<i>Dongni Dong (China Aero-Polytechnology Establishment, AVIC, China), Zhiyu Jia (China Aero-Polytechnology Establishment, AVIC, China), Yan Zhou (China Aero-Polytechnology Establishment, AVIC, China), and Keyi Wang (China Aero-Polytechnology Establishment, AVIC, China)</i>	
Reliability Improvement Method for Precision Micro and Special Motors Based on Response Surface Methodology	101
<i>Hongwu Xu (Aerospace Product Engineering Research Institute, China Academy of Aerospace Standardization and Product Assurance, China), Liping Fu (China Aerospace Science and Technology Corporation, China), Gang Xiang (National Key Lab on Aerospace Intelligent Control, Beijing Aerospace Automatic Control Institute, China), Yu Peng (National Key Laboratory on Aerospace Intelligent Control, Beijing Aerospace Automatic Control Institute, China), Weidi Pan (Engineering Technology Department, Guizhou Aerospace Linquan Motor Control Ltd., China), and Heyuan Wu (Engineering Technology Department, Guizhou Aerospace Linquan Motor Control Ltd., China)</i>	

Anomaly Detection with Universal Representation of Modal Testing Response Data	105
<i>Chao Jiang (Research Institute of Physical and Chemical Engineering of Nuclear Industry, China), Haoyu Wang (Tianjin University, China), Xuan Han (Research Institute of Physical and Chemical Engineering of Nuclear Industry, China), Liang Yu (State Key Laboratory of Mechanical System and Vibration Shanghai Jiao Tong University, China), and Yingjun Deng (Tianjin University, China)</i>	
Foreign Aerospace Improvement Maturity Model System to Aerospace Enterprises Quality Management System Evaluation and Improvement Work Inspiration	111
<i>Di Zhang (China Academy of Aerospace Standardization and Product Assurance, China) and Jianguo Dong (China Academy of Aerospace Standardization and Product Assurance, China)</i>	
Weakness Analysis and Control Method of Launch Vehicle Based on "1+3+5" Principle	118
<i>Hua Zhang (Aerospace System Engineering, China), Teng Xu (Aerospace System Engineering, China), Xiang Zhang (Aerospace System Engineering, China), Kaixiang Gong (Aerospace System Engineering, China), and Yekai Gao (Aerospace System Engineering, China)</i>	
Optimization of "One-Station" Aircraft Carrier Ground Crew Allocation	123
<i>Guang Liu (China State Shipbuilding Corporation, Ltd., China) and Yulin Zhang (Harbin Engineering University, China)</i>	
Research and Design of Reduced-Scale Model of Skin-Stringer Structure	130
<i>Jingbo Gai (Harbin Engineering University, China), Fei Ye (Harbin Engineering University, China), Qi Deng (Harbin Engineering University, China), Minghe Sun (Harbin Engineering University, China), and Chunsheng Hong (Harbin Engineering University, China)</i>	
Reliability Estimation Based on a Weibull Distributions	138
<i>Qiaoqiao Kang (Shandong University, China), Yuzhe Lin (Shandong University, China), and Jifang Tao (Shandong University, China)</i>	
Availability Improvement Technology of BeiDou Navigation Satellite	142
<i>Haitao Zhao (Beijing Institute of Spacecraft System Engineering, China), Mengyang Jia (China Academy of Space Technology, China), Xiao Xiong (Beijing Institute of Spacecraft System Engineering, China), Hui Yang (Beijing Institute of Spacecraft System Engineering, China), Junwu Zhai (Beijing Institute of Spacecraft System Engineering, China), and Lifang Yuan (Beijing Institute of Spacecraft System Engineering, China)</i>	
Risk-Based Importance-Degree Evaluation Method for Aerospace Products	149
<i>Jian Li (China Astronautics Standards Institute, China) and Pengfei He (China Astronautics Standards Institute, China)</i>	
Hybrid Particle Swarm Optimization for Type 2 Assembly Line Balancing	N/A
<i>Yongsheng Chao (Xinjiang University, China), Xiuxiu Chen (Xinjiang University, China), and Shuai Chen (Xinjiang University, China)</i>	
Dynamic Reliability Evaluation in Individual Monitoring Considering Multivariate and Multiple Failure Modes	N/A
<i>Junling Wang (Beihang University, China), Xiaobing Ma (Beihang University, China), Yongbo Zhang (Beihang University, China), and Cheng Peng (Beihang University, China)</i>	

Software System Testing Technology for Ship Information Systems Based on Performance Experiments	171
<i>Jiantao Zhang (Equipment Support Brigade of the Naval Equipment Department, China), Lingling Feng (China Institute of marine technology&economy CIMTEC, China), Shuochen Wu (China Institute of marine technology&economy CIMTEC, China), and Xiaotong Fang (China Institute of marine technology&economy CIMTEC, China)</i>	
Intermittent Fault Diagnosis Method Based on Graph Attention Network	N/A
<i>Junyou Shi (Beihang University, China), Yufei Ding (Beihang University, China), and Yilei Hou (Beihang University, China)</i>	
Research on the Construction and Service of a General Quality Characteristic Data Resource Catalog	180
<i>Rui Li (Beihang University, China) and Guangyan Zhao (Beihang University, China)</i>	
Reliability Model of Ion Thrusters Considering Competing Failure	185
<i>Jing Li (Science and Technology on Vacuum Technology and Physics Laboratory; Key Laboratory of Space, Electric Propulsion Technology of Gansu Province; Lanzhou Institute of Physics, China), Hai Geng (Science and Technology on Vacuum Technology and Physics Laboratory; Key Laboratory of Space, Electric Propulsion Technology of Gansu Province; Lanzhou Institute of Physics, China), Chenchen Wu (Science and Technology on Vacuum Technology and Physics Laboratory; Key Laboratory of Space, Electric Propulsion Technology of Gansu Province; Lanzhou Institute of Physics, China), Zitong Wang (Science and Technology on Vacuum Technology and Physics Laboratory; Key Laboratory of Space, Electric Propulsion Technology of Gansu Province; Lanzhou Institute of Physics, China), Xinfeng Sun (Science and Technology on Vacuum Technology and Physics Laboratory; Key Laboratory of Space, Electric Propulsion Technology of Gansu Province; Lanzhou Institute of Physics, China), Yanxu Pu (Science and Technology on Vacuum Technology and Physics Laboratory; Key Laboratory of Space, Electric Propulsion Technology of Gansu Province; Lanzhou Institute of Physics, China), and Hao Chen (Science and Technology on Vacuum Technology and Physics Laboratory; Key Laboratory of Space, Electric Propulsion Technology of Gansu Province; Lanzhou Institute of Physics, China)</i>	
Integrated Production Scheduling Based on Manufacturing System Resilience	193
<i>Xiao Han (Aerospace Science and Industry Defense Technology Research Testing Center, China), Anqi Zhang (Aerospace Science and Industry Defense Technology Research Testing Center, China), Beina Du (Aerospace Science and Industry Defense Technology Research Testing Center, China), and Shengpeng Zhang (Aerospace Science and Industry Defense Technology Research Testing Center, China)</i>	
Research on Sustainment Evaluation Technology for Ship Systems Based on Maturity Model	200
<i>Yuhan Liu (China Aerospace Standardization Research Institute, China), Baidong Jin (China Aerospace Standardization Research Institute, China), Jiaqun Wang (Wuhan 2nd Ship Design and Research Institute, China), and Pengwei Hu (China Aerospace Standardization Research Institute, China)</i>	

Design and Application of a Model-Based Intelligent Production System for Aerospace Servo Products	204
<i>Xian Zhang (Beijing Institute of Precision Mechatronics and Controls, China), Yujing Qiao (Beijing Institute of Precision Mechatronics and Controls, China), and Peiwen Li (Beijing Institute of Precision Mechatronics and Controls, China)</i>	
Research on Data-Driven Aviation-Product Service-Quality Evaluation Method	212
<i>Jiake Li (China Aero Polytechnology Establishment, China), Xinyu Li (China Aero Polytechnology Establishment, China), and Huizhi Qi (China Aero Polytechnology Establishment, China)</i>	
A Dual-Branch Intelligent Fault Diagnosis Method Based on Spatial Variable Scale Pooling for Inter-Class Incomplete Data	219
<i>Fei Chen (Shenzhen Technology University, China), Binbin Xu (Shenzhen Technology University, China), Di Wu (Shenzhen Technology University, China), Zheng Yang (Jilin University, China), Longbo He (Shenzhen Technology University, China), Xin Zhou (Shenzhen Technology University, China), Boquan Ma (Shenzhen Technology University, China), and Xiaobing Li (Guangdong Provincial Key Laboratory of Electronic Information Products Reliability Technology, China)</i>	
Quantitative Safety Analysis Method for Complex Equipment System Based on FRAM	227
<i>Ximing Luo (Beihang University, China), Yongfeng Jing (Beihang University, China), and Jian Jiao (Beihang University, China)</i>	
Solar-Array Attenuation Analysis Method for Solar Synchronous Orbit Satellites	232
<i>Xiao Xiong (Beijing Institute of Spacecraft System Engineering, China), Meng Zhang (Beijing Institute of Spacecraft System Engineering, China), Haitao Zhao (Beijing Institute of Spacecraft System Engineering, China), Di Jin (Beijing Institute of Spacecraft System Engineering, China), and Mengyang Jia (Institute of Telecommunication and Navigation Satellites, China Academy of Space Technology, China)</i>	
System Resilience Assessment Based on FRAM and DBN	238
<i>Yuan Yuan (Beihang University, China), Jian Yang (Beihang University, China), Tingdi Zhao (Beihang University, China), and Zongcheng Wu (Beihang University, China)</i>	
Fault Information Mining in Avionics Components Based on Unstructured Data	243
<i>Zhenwei Zhou (China Electronic Product Reliability and Environmental Testing Institute, China), Junbin Liu (China Electronic Product Reliability and Environmental Testing Institute, China), Shilie He (China Electronic Product Reliability and Environmental Testing Institute, China), and He Li (XD University, China)</i>	
Feature Extraction Modeling of Gearbox Based on SAE and Transfer Learning	248
<i>Dongteng Long (China Astronautics Standards Institute, China), Jiahe Liu (China Astronautics Standards Institute, China), Tianlong Han (China Astronautics Standards Institute, China), and Hailong Cheng (China Astronautics Standards Institute, China)</i>	

Research and Practice on the De-modeling Work Mode of Aerospace General Products	254
<i>Jia Cui (Institute of Product Engineering China Academy of Aerospace Standardization and Product Assurance, China), Yan Zhang (Institute of Product Engineering China Academy of Aerospace Standardization and Product Assurance, China), Yuming Yin (Institute of Product Engineering China Academy of Aerospace Standardization and Product Assurance, China), and Qinghua Guan (Institute of Product Engineering China Academy of Aerospace Standardization and Product Assurance)</i>	
Exploration of Systems Engineering Fault Management Verification and Validation	259
<i>Yizhao Li (Reliability China Astronautics Standards Institute, China), Xiaopeng Li (Reliability China Astronautics Standards Institute, China), Wenming Zhou (Reliability China Astronautics Standards Institute, China), and Sha Qin (Reliability China Astronautics Standards Institute, China)</i>	
Reliability Assessment Method for Key Equipment of Nonhomogeneous Poisson Process Machinery Based on Gauss-Newton Method	265
<i>Donggui Tan (Xinjiang University, China), Yiping Yuan (Xinjiang University, China), and Panpan Fan (Xinjiang University, China)</i>	
Case Study of Bearing Fault Diagnosis Based on Vibration Signal and Fault Injection	272
<i>Lantao Yu (Beijing Institute of Spacecraft Environment Engineering Beijing, China), Hao Wang (Beijing Institute of Spacecraft Environment Engineering Beijing, China), Shouqing Huang (Beijing Institute of Spacecraft Environment Engineering Beijing, China), Zhenwei Guo (China Academy of Space Technology, China), and Zhaolin Zhang (Beijing Institute of Spacecraft Environment Engineering Beijing, China)</i>	
An Adaptive Kriging-Based Reliability Method for Stress-Strength-Type Composite Structures.....	N/A
<i>Kewei Ye (Beihang University, China), Han Wang (Beihang University, China), Xiaobing Ma (Beihang University, China), and Yu Zhao (Beihang University, China)</i>	

Session B: Digital and Intelligent Systems

Root-Cause Analysis of Momentum Wheel Fault Based on Counterfactual Reasoning	284
<i>Siya Chen (National University of Defense Technology Changsha, China), Guang Jin (National University of Defense Technology Changsha, China), and Chunhui Ji (National University of Defense Technology Changsha, China)</i>	
Text Preprocessing of Quality Regulations Based on Chinese Word Segmentation	288
<i>Fang Zhu (China Academy of Aerospace Standardization and Product Assurance, China), Jiang Lin (Beijing Petrochemical Engineering Co. LTD., China), and Shuhan Jiao (Institute of Quality Management, China Academy of Aerospace Standardization and Product Assurance, China)</i>	
d-Mps Updating Method for Multistate Network in the Resilience Process	N/A
<i>Tao Liu (Xihua University, PR China), Yun Huang (National University of Defense Technology, PR China), Junfu Zhang (Xihua University, PR China), and Guanghan Bai (National University of Defense Technology, PR China)</i>	

Early Recognition of Abnormal Capacity Degradation of Lithium-ion Battery Based on Interpretable Deep Machine Learning	N/A
<i>Ziyi Zhou (Beihang University, China, China), Cong Wang (Beihang University, China, China), and Yunxia Chen (Beihang University, China)</i>	
Lightweight Recognition Method of Maintenance Object Based on Deep Learning	305
<i>Jingcheng Du (National University of Defense Technology, China), Xu Luo (National University of Defense Technology, China), Tao Yu (National University of Defense Technology, China), and Zhenyu Wu (National University of Defense Technology, China)</i>	
A Novel Condition-Aware Mixture of Convolutional Experts Model-Based Method for Fault Diagnosis Under Variable Working Conditions	N/A
<i>Weiqiang Jia (Research Institute of Interdisciplinary Innovation Zhejiang Lab, P.R.China), Tong Liu (Research Institute of Interdisciplinary Innovation Zhejiang Lab, P.R.China), Wei Hua (Research Institute of Interdisciplinary Innovation Zhejiang Lab, P.R.China), Aijia Zhang (Research Institute of Interdisciplinary Innovation Zhejiang Lab, P.R.China), Hong Zhu (Nanjing Research Institute of Electronics, P.R.China), Jian Qin (Nanjing Research Institute of Electronics, P.R.China), and Shuang Pan (Nanjing Research Institute of Electronics, P.R.China)</i>	
Influence of Paraffin Shielding on the Fast Neutron Environmental Adaptability of a Complementary Metal-Oxide-Semiconductor Image Sensor	318
<i>Xiang Zhang (Aerospace System Engineering Shanghai, China), Hua Zhang (Aerospace System Engineering Shanghai, China), Zhiming Zhao (Aerospace System Engineering Shanghai, China), Hongtao Zhou (Aerospace System Engineering Shanghai, China), and Yiwei Qian (Aerospace System Engineering Shanghai, China)</i>	
Optimal Order-Replacement Policy for a Repairable System with Imperfect Maintenance	N/A
<i>Wenjie Dong (Nanjing University of Aeronautics and Astronautics, China), Shuowei Deng (Nanjing University of Aeronautics and Astronautics, China), and Naiming Xie (Nanjing University of Aeronautics and Astronautics, China)</i>	
Improved Root Cause Analysis Based on Quality Function Deployment—Decision-Making Trial and Evaluation Laboratory for Complex System Faults	328
<i>Luwen Yuan (Naval University of Engineering, China), Peng Dong (Naval University of Engineering, China), Weimin Ye (Naval University of Engineering, China), and Jianjun Yang (Guangzhou CEPREI Tengrui Information Technology Co., Ltd, China)</i>	
Reliability Design Verification of High Performance Broadband Radiofrequency Information Processing Microsystems	334
<i>Zhen Huang (No. 38 Research Institute of China Electronic Technology Group Corporation, Anhui) and Feng Lu (Beijing Microelectronics Technology Institute, China)</i>	
A Fault Analysis Method Based on Multiple Sliding Windows with Long Short-Term Memory and Convolutional Neural Networks	N/A
<i>Kai Wu (China Academy of Launch Vehicle Technology, China), Zhipeng Li (Shandong Aerospace Electronics Research Institute, China), Yiming Zhao (China Academy of Launch Vehicle Technology, China), and Changlin Qia (China Academy of Launch Vehicle Technology, China)</i>	

Trust State Monitoring of Human-Machine Co-Driving Based on EEG Signals in Intelligent Driving Scenarios	344
<i>Wenyan Cao (Beihang University, China), Rencheng Zheng (Beihang University, China), Song Ding (Beihang University, China), Jiayue Wu (Beihang University, China), Jie Cheng (Beihang University, China), Jiacheng Liu (Beihang University, China), and Xing Pan (Beihang University, China)</i>	
Aircraft Reliability Reallocation Technology Based on Differential Evolutionary Algorithm	N/A
<i>Zhenwei Zhou (China Electronic Product Reliability and Environmental Testing Institute, China), Shilie He (China Electronic Product Reliability and Environmental Testing Institute, China), Han Ge (Nankai University, China), and Yuan-Hua Ni (Nankai University, China)</i>	
Reliability Design and Application of Large Complex Spacecraft Network System	358
<i>Zhenhao Zhao (Beijing Institute of Spacecraft System Engineering, China Academy of Space Technology, China), Zhao Yin (Beijing Institute of Spacecraft System Engineering, China Academy of Space Technology, China), Yanchao Gao (Beijing Institute of Spacecraft System Engineering, China Academy of Space Technology, China), Jinlu Yang (Beijing Institute of Spacecraft System Engineering, China Academy of Space Technology, China), and Yanwei Liu (Beijing Institute of Spacecraft System Engineering, China Academy of Space Technology, China)</i>	
Human Reliability Modeling Method of Phased-Mission Systems Considering the Cumulative Effects of Performance Shaping Factors	362
<i>Zengkai Wang (Beijing Institute of Electronic System Engineering, China), Wei Zhao (First Military Representative Office of Air Force Equipment Department in Beijing, China), You Bian (First Military Representative Office of Air Force Equipment Department in Beijing, China), Yanbin Yuan (Beijing Institute of Electronic System Engineering, China), Jiangpan Chen (Beijing Institute of Electronic System Engineering, China), Yi Liu (Beijing Institute of Electronic System Engineering, China), and Limin Sun (Beijing Institute of Electronic System Engineering, China)</i>	
Reliability Evaluation Method for Telemetry, Tracking and Command Communication of Space Station on Multi-Mission Arcs	371
<i>Yusheng Yi (Beijing Institute of Spacecraft System Engineering, China Academy of Space Technology, China), Gaojie Fan (Beijing Institute of Spacecraft System Engineering, China Academy of Space Technology, China), Zhao Cheng (Beijing Institute of Spacecraft System Engineering, China Academy of Space Technology, China), Xin Qi (Beijing Institute of Spacecraft System Engineering, China Academy of Space Technology, China), Ke Zhu (Beijing Institute of Spacecraft System Engineering, China Academy of Space Technology, China), Shuqi Zhang (Beijing Institute of Spacecraft System Engineering, China Academy of Space Technology, China), and Le Ying (Beijing Institute of Spacecraft System Engineering, China Academy of Space Technology, China)</i>	
Reliability Analysis of Phased-Mission Systems Using Bayesian Networks	377
<i>Yu Ding (Beihang University, China), Qin Zhao (Beihang University, China), and Zhixing Wei (Beihang University, China)</i>	

Application Research of Security Analysis Technology Based on Event Chain	388
<i>Lei Peng (Marine Design & Research Institute of China, China), Dejuan Chen (Marine Design & Research Institute of China, China), and Tingfeng Gu (Marine Design & Research Institute of China, China)</i>	
Evolutionary Game Analysis of Human-Computer Interaction Based on System Dynamics and Fuzzy Inference	396
<i>Xin Lu (Beihang University, China), Jianbin Guo (Beihang University, China), Shengkui Zeng (Beihang University, China), and Haiyang Che (Beihang University, China)</i>	
Risk Assessment of Human-Machine Systems Based on Hybrid Causal Logic Model and Cognitive Reliability and Error Analysis Method	402
<i>Yingzhi Zhao (Beihang University, China), Haiyang Che (Beihang University, China), Jianbin Guo (Beihang University, China), and Shengkui Zeng (Beihang University, China)</i>	
User-Centered Household Appliances Reliability Design: Using Household Water Treatment System as an Example	410
<i>Shuqi Lyu (Amway (China) R&D Co., Limited, China) and Guodao Wang (Amway (China) R&D Co., Limited, China)</i>	
Research on Fault Diagnosis and Propagation Path Identification Method for Intelligent Instrument System Based on Deep Learning and Granger Causality Analysis	415
<i>Chengcheng Wang (China University of Petroleum, China; Institute of Instrumentation Technology and Economy institute (ITEL), China), Jinjiang Wang (China University of Petroleum, China), and Kai Wang (China University of Petroleum, China; Institute of Instrumentation Technology and Economy institute (ITEL), China)</i>	
Research on System Reliability Model Considering Resource Sharing and Reconfiguration Strategy	421
<i>Yao Huimei (Beihang University, China) and Zhao Guangyan (Beihang University, China)</i>	
Reliability Evaluation of Integrated Modular Avionics Based on Multi- State System with Performance Sharing Mechanism	427
<i>Gengshuo Hu (Beihang University, China), Jian Jiao (Beihang University, China), Langxiao Hu (Beihang University, China), and Yongfeng Jing (Beihang University, China)</i>	
Application of Non-Parametric Estimation Method in Reliability Estimation	433
<i>Jinjing Wang (China Astronautics Standards Institute, China) and Xiaoning Wang (China Astronautics Standards Institute, China)</i>	
Research on the Construction of Digital Twin for Frontline Maintenance Support of Aviation Equipment	437
<i>Lijie Cui (Air Force Engineering University, China), Xiao Xu (Air Force Engineering University, China), Xiaoyue Xie (Air Force Engineering University, China), and Ze Li (Xijing University, China)</i>	
Reliability Evaluation Method for Lateral Stability of Deep-Water Drilling Wellhead	446
<i>Yuting Zhang (Beihang University, China), Yihao Zhang (Beihang University, China), Jiming Wang (System Engineering Research Institute, China), Tongfei Li (Beihang University, China), and Meiyu Yang (Beihang University, China)</i>	

Model-Based Safety Analysis for Aero-Engine Digital Control System	452
<i>Tongfei Li (Beihang University, China), Yuting Zhang (Beihang University, China), Meiyu Yang (Beihang University, China), Ying Li (Beihang University, China), Min Huang (Beihang University, China), and Yihao Zhang (Beihang University, China)</i>	
Multi-Stage Mission Reliability Modeling and Evaluation Method of System of Systems Based on Kill Chain Network	458
<i>Jingmeng Zhao (China Institute of Marine Technology & Economy, China), Xiaotong Fang (China Institute of Marine Technology & Economy, China), Fei Li (China Institute of Marine Technology & Economy, China), Lingling Feng (China Institute of Marine Technology & Economy, China), Shuochen Wu (China Institute of Marine Technology & Economy, China), and Yali Xu (China Institute of Marine Technology & Economy, China)</i>	
Modeling and Reliability Assessment of Multi-Coupled Tactical Internet	464
<i>Wenjie Xu (Beihang University, China), Guoqing Zha (Beihang University, China), Zhong Zhang (China North Vehicle Research Institute, China), and Xing Pan (Beihang University, China)</i>	
Reflection of the Six Properties Collaborative work Based on MBSE	471
<i>Caixia Li (Beijing Institute of Aerospace System Engineering, China), Fanlong Zeng (Fifth Electronics Institute, Ministry of Information Technology, China), Shuren Liu (Beijing Institute of Aerospace System Engineering, China), Zhenwu Liang (Beijing Institute of Aerospace System Engineering, China), and Limin Mao (Fourth Military Representative Office of Military Representative Bureau of Equipment Department of Aerospace System Department, China)</i>	
High-Speed Fault Prognosis Approach and System of Industrial Intelligent Instruments	476
<i>Jialu Wang (Chongqing University, China) and Ke Zhang (Chongqing University, China)</i>	

Session C: Industry Product Reliability

Military Software Fault Analysis Method Based on Improved SFMEA	480
<i>Xiaojuan Meng (Information engineering Research Institute China Aerospace Academy of Systems Science and Engineering, China), Dong Huang (Hubei Xingfa Chemicals Group Co., Ltd., China), and Ziming Dong (Information engineering Research Institute China Aerospace Academy of Systems Science and Engineering, China)</i>	
Availability Analysis of Floating Nuclear Power Plant	486
<i>Yan Wu (China Nuclear Power Research Institute Co., Ltd, China), Ye Liu (China Nuclear Power Research Institute Co., Ltd, China), and Hai-Ying Xi (China Nuclear Power Research Institute Co., Ltd, China)</i>	

Health Assessment Method for Core Components of Switching Quantity Interface Circuit Based on Active Excitation Test	490
<i>Peiyang Xu (Beihang University, China), Long Jia (Beihang University Beijing, China), Jian Ma (Beihang University, China), Chang Chen (Beijing Aerospace Institute of Automatic Control Beijing, China), Wei Chen (Beijing Aerospace Institute of Automatic Control Beijing, China), Chunyun Lan (Beijing Aerospace Institute of Automatic Control Beijing, China), Xinyu Zou (University Beijing, China), and Tianhao Li (University Beijing, China)</i>	
Advancements in Ohmic Contact Electrodes for Gallium Nitride Power Devices	N/A
<i>Ruiyi Yang (The 24th Research Institute of China Electronics Technology Group Corporation Chongqing, P.R.China), Zhaoxi Wu (The 24th Research Institute of China Electronics Technology Group Corporation Chongqing, P.R.China), and Jianrong Cai (The 24th Research Institute of China Electronics Technology Group Corporation Chongqing, P.R.China)</i>	
Evaluation and Optimal Design of Metal Indoor Corrosion Tests Based on Equivalence Degree of Corrosion Mechanism	501
<i>Haodi Ji (Beihang University, China), Xiaobing Ma (Beihang University, China), Yikun Cai (Beihang University, China), and Han Wang (Beihang University, China)</i>	
Quality Supervision Method for Aerospace Projects	508
<i>Shuhan Jiao (CASI, China), Fang Zhu (CASI, China), Di Zhang (CASI, China), Jiang Lin (Beijing Petrochemical Engineering CO., LTD, China), and Rui Lai (CASI, China)</i>	
Short-Circuit Behavior of 1200 V SiC MOSFETs at Different DC Power Supply Voltages	514
<i>Yuxuan Zhang (Xidian University, China), Yibo Zhang (Xidian University, China), Yingzhe Shen (Xidian University, China), Jingyu Li (Xidian University, China), Hao Yuan (Xidian University, China), Xiaoyan Tang (Xidian University, China), Qingwen Song (Xidian University, China), and Yuming Zhang (Xidian University, China)</i>	
Analysis of Current Trends of Comprehensive Support for Missiles' Solid Propellant-Based Power System	519
<i>Xuan Zhang (The 41st Institute of the Sixth Academy China Aerospace Science & Industry Corp., China), Wenhai Zhang (The 41st Institute of the Sixth Academy China Aerospace Science & Industry Corp., China), Jiexin Weng (The 41st Institute of the Sixth Academy China Aerospace Science & Industry Corp., China), Gang Bai (The 41st Institute of the Sixth Academy China Aerospace Science & Industry Corp., China), Huimin Zhang (The 41st Institute of the Sixth Academy China Aerospace Science & Industry Corp., China), and Lei Wang (The 41st Institute of the Sixth Academy China Aerospace Science & Industry Corp., China)</i>	
Study of the Thermal Fatigue Reliability of CQFP Solder Joints	N/A
<i>Tao Lu (Reliability Research and Analysis Center Ceprei Laboratory, China), Yabing Zou (Center Ceprei Laboratory, China), Guanghui He (Center Ceprei Laboratory, China), Xiao He (Center Ceprei Laboratory, China), and Hui Xiao (Center Ceprei Laboratory, China)</i>	

A Rapid Analysis Method for VME Bus Transaction Function in Open-Source IP Cores Based on Signal Transition Graph Model	526
<i>Xiangfen Wang (Beihang University, China), Xilong Wang (Beihang University, China), Jinyong Yao (Beihang University, China), and Runjia Xing (AVIC CIMM, China)</i>	
Fault Diagnosis in a 10 kV Transmission Line Using a One-Dimensional Convolutional Neural Network Embedded with a Mish Activation Function	533

Yu Ding (Beihang University, China) and Tianhao Li (Beihang University, China)	

Contact Fatigue Strength Reliability Assessment of Transmission Gears Considering Assembly Uncertainty	1104
<i>Wenjuan Li (Beihang University, China), Cheng Qian (Beihang University, China), Hexiang Wang (Beihang University, China), Shengxing Wei (Beihang University, China), Dezhen Yang (Beihang University, China), Bo Sun (Beihang University, China), Yi Ren (Beihang University, China), and Zili Wang (Beihang University, China)</i>	
Renewal- Equation-Based Method to Estimate the Probability Distribution of Maintenance Cost Under the Imperfect Maintenance Model	N/A
<i>Tianjin Cheng (Aerospace Information Research Institute Chinese Academy of Sciences, China), Hui Feng (Aerospace Information Research Institute Chinese Academy of Sciences, China), Yajun Zhao (Unit 91515 PLA, China), Yanchu Yang (Aerospace Information Research Institute Chinese Academy of Sciences, China), and Xiang Ma (Aerospace Information Research Institute Chinese Academy of Sciences, China)</i>	
Sensor Fault Diagnosis of a Permanent Magnet Synchronous Motor Drive System Based on Improved LDBO-BP	N/A
<i>Longfei Li (Chongqing Jiaotong University, China), Honglin Luo (Chongqing Jiaotong University, China), Li Feng (Chongqing Jiaotong University, China), Kenan Du (Chongqing Jiaotong University, China), and Rui Yang (Chongqing Yudian Quality Inspection CO., Ltd, China)</i>	
Safety Analysis and Evaluation Methods for On-Orbit Servicing Spacecraft Missions	1126
<i>Ge Yu (Shanghai Aerospace System Engineering, China), Yanxin Zhang (Shanghai Aerospace System Engineering, China), Zheng Chen (Shanghai Aerospace System Engineering, China), Zhiming Zhao (Shanghai Aerospace System Engineering, China), and Zhexiao Ye (Shanghai Aerospace System Engineering, China)</i>	
Overview of NASA's Model-Based Systems Engineering	1130
<i>Jiaqi You (China Academy of Aerospace Standardization and Product, China) and Siming Hu (China Academy of Aerospace Standardization and Product, China)</i>	
Analysis of Life-Cycle Reliability and Component Importance of Propeller Pitch Control System Using Bayesian Network	1135
<i>Ran Xia (China Academy of Aerospace Aerodynamics, Second Research Institute, China), Bingbing Liu (China Academy of Aerospace Aerodynamics, Second Research Institute, China), and Jingbo Yu (China Academy of Aerospace Aerodynamics, Second Research Institute, China)</i>	
Factorial Design Approach for Importance Analysis of System Reliability	1141
<i>Xiaoyue Wu (National University of Defense Technology, China)</i>	
Dynamic Response of Aviation Spline Pair with Misalignment Fault	N/A
<i>Shangji Li (Hebei University of Technology, China; National University of Defense Technology, China), Zhengwei Fan (National University of Defense Technology, China), Shufeng Zhang (National University of Defense Technology, China), Yu Jiang (National University of Defense Technology, China), Hao Zhang (Hebei University of Technology, China), and Xun Chen (National University of Defense Technology, China)</i>	

Advancements in Chip Thermal Reliability Design Technology Utilizing Embedded Microchannels	N/A
<i>Yuanyuan Xiong (China Astronautics Standards Institute (CASI), China), Pei Liu (China Astronautics Standards Institute (CASI), China), Wanyue Fu (China Astronautics Standards Institute (CASI), China), Binbin Jiao (Institute of Microelectronics The Chinese Academy of Sciences, China), and Erming Rui (China Astronautics Standards Institute (CASI), China)</i>	
Safety Risk Assessment Method for Accidental Explosion of Aircraft in Flight	1161
<i>Yali Xu (China Institute of Marine Technology & Economy CIMTEC, China), Wei Lu (Department Shanghai 708 Research Institute), and Lingling Feng (Chinese Institute of Marine Technology and Economy CIMTEC, China)</i>	
Failure Case Analyses of Aerospace Fasteners	1165
<i>Zhirui Ren (CASI, China), Kai Liu (CASI, China), Zhongwei Zhang (CASI, China), and Linlin Cao (CASI, China)</i>	
Research on Elastic Wave Numerical Simulation Method of Thermal Protection Structures	1171
<i>Zhaopeng Xue (China Astronautics Standards Institute, China), Haibo Mi (China Astronautics Standards Institute, China), Huichao Han (China Astronautics Standards Institute, China), Zhaoxuan Wang (China Astronautics Standards Institute, China), Yiting Wang (China Astronautics Standards Institute, China), and Tianjiao Yang (China Astronautics Standards Institute, China)</i>	
Research Progress on the Cumulative Radiation Effect of InGaAs Infrared Detectors	1176
<i>Qiang Jiao (China Astronautics Standards Institute (CASI), China), Fupin Liu (China Astronautics Standards Institute (CASI), China), Erming Rui (China Astronautics Standards Institute (CASI), China), Bin Wang (University of the Chinese Academy of Sciences, China), Zhiwen Tian (China Astronautics Standards Institute (CASI), China), Dong Zhou (Xinjiang Technical Institute of Physics and Chemistry Urumqi, China), Dan Zhang (Xinjiang Technical Institute of Physics and Chemistry Urumqi, China), and Qi Guo (Xinjiang Technical Institute of Physics and Chemistry Urumqi, China)</i>	
Failure Mode and Effects Analysis of Heat Pipes for Microreactors	1183
<i>Wei Wang (Department of Reactor Core Design, China), Binbin Zhang (Department of Reactor Core Design, China), Ge Shao (Department of Reactor Core Design, China), and Wuhan Zhang (Department of Reactor Core Design, China)</i>	
Equivalent Conversion Method for the Reliability Evaluation Data of Aerospace Products	1187
<i>Yanrong Liu (China Academy of Aerospace Standardization and Product Assurance, China), Jinzhu Li (China Academy of Aerospace Standardization and Product Assurance, China), Wei Wang (China Academy of Aerospace Standardization and Product Assurance, China), Rui Zhang (China Academy of Aerospace Standardization and Product Assurance, China), Runing Song (China Academy of Aerospace Standardization and Product Assurance, China), and Xiaojun Zhang (China Academy of Aerospace Standardization and Product Assurance, China)</i>	

Resilience of Urban Rail Network Under Large Passenger Flow	1192
<i>Qinghua Yan (Chang'an university, China), Ning Wang (Chang'an university, China), and Ziyang Jin (Chang'an university, China)</i>	
Model-Based Functional Hazard Analysis for Safety Requirements of Complex Systems	1198
<i>Langxiao Hu (School of Reliability and Systems Engineering, BUAA, China), Jian Jiao (School of Reliability and Systems Engineering, BUAA, China), and Gengshuo Hu (School of Reliability and Systems Engineering, BUAA, China)</i>	
Framework of Fatigue Crack Growth Life Monitoring for Nickel-Based Superalloy GH4169 Based on Thermodynamic Entropy Generation	1204
<i>Shuyang Xia (Beihang university), Shuiting Ding (Beihang university), Zhenlei Li (Beihang University), Shaochen Bao (Beihang University), Bolin Li (Beihang University), Liangliang Zuo (Beihang University), and Guo Li (Beihang University; Tianmushan Laboratory, China)</i>	
Maintenance Strategy of the Airborne System Based on the Markov Decision Process	1210
<i>Bingqian Chen (Nanjing University of Aeronautics and Astronautics, China) and Zhong Lu (Nanjing University of Aeronautics and Astronautics, China)</i>	
Remaining Useful Life Prediction Based On Causal Inference And Deep Learning	1215
<i>Jiayi Wang (Department of Control Science & Engineering, Tongji University, China), Yiming Li (Department of Control Science & Engineering, Tongji University, China), Jia Xu (Department of Control Science & Engineering, Tongji University, China), Li Li (Department of Control Science & Engineering, Tongji University, China), Qingyun Yu (Department of Control Science & Engineering, Tongji University, China), Hui Zhao (Department of Control Science & Engineering, Tongji University, China), and Wei Gong (Department of Control Science & Engineering, Tongji University, China)</i>	
GCPAT-Based Fault Diagnosis Method for Asynchronous Motors	1221
<i>Dong Xu (No. 92942 Troops of PLA, China), Jine Huang (No. 92942 Troops of PLA, China), Yanlei Wang (No. 92942 Troops of PLA, China), Hongwei Cheng (No. 92942 Troops of PLA, China), and Xiaobin Li (No. 92942 Troops of PLA, China)</i>	
SysML-Based Failure Mode and Effect Analysis for Percutaneous Left Ventricular Assist Devices	N/A
<i>Yu Li (Beihang University, China), Wenjin Zhang (Beihang University, China), Xinman Wu (Beihang University, China), and Dong Zhou (Beihang University, China)</i>	
Health State Recognition Technology for Complex Equipment Based on Mass Distance Entropy ..	1235
<i>Rui Zhang (China Astronautics Standards Institute, China), Dongteng Long (China Astronautics Standards Institute, China), Jinchao Zhang (China Astronautics Standards Institute, China), Jinzhu Li (China Astronautics Standards Institute, China), and Jun Chen (Southwest Computer Co., Ltd., China)</i>	

Literature Review of Adaptive Processing Methods	N/A
<i>Chuanhai Chen (Jilin University, China), Sicong Yu (Jilin University, China), Zhe Yuan (Jilin University, China), Zhifeng Liu (Jilin University, China), Jinyan Guo (Jilin University, China), Liang Zhang (Jilin University, China), and Bangcheng Zhang (Changchun University Of Technology, China)</i>	
Short-Term Traffic Flow Prediction of MEA-LSTM Model Based on Chaotic Characteristics Analysis	N/A
<i>Bo Gao (Chang'an University, China), Zixuan Zhang (Chang'an University, China), Yan Li (Chang'an University, China), and Xuejun Ma (Beijing Transportation Technology Highway Survey and Design Institute, China)</i>	
Optimal Tolerance Design for Compressor Blades Subject to Combined Operational and Geometrical Uncertainties	N/A
<i>Zizhao Yuan (Fudan University, China), Gang Sun (Fudan University, China), Jun Tao (Fudan University, China), and Yufeng Huang (Fudan University, China)</i>	
Effect of Residual Stress After Reflow Soldering of Ball Grid Array Mixed Solder Joint on Thermal Cycling Reliability	1267
<i>Fangzhou Chen (China Electronic Product Reliability and Environmental Testing, China), Jiahao Liu (China Electronic Product Reliability and Environmental Testing, China), Jianyu Wu (China Electronic Product Reliability and Environmental Testing, China), Hao Zhao (China Electronic Product Reliability and Environmental Testing, China), Hui Xiao (China Electronic Product Reliability and Environmental Testing, China), and Tao Lu (China Electronic Product Reliability and Environmental Testing, China)</i>	
Fault Prediction of Control Moment Gyro with Lempel–Ziv Index Based on Wavelet Entropy	1271
<i>Dan Xu (Beihang University, China), Mingzhe Li (Beihang University, China), and Kuan Zhang (Beijing Aerospace Control Center, China)</i>	
Prediction Model for Skid Resistance of Asphalt Pavement Based on Accelerated Abrasion Test	1277
<i>Congcong Zhang (Chang'an University, China), Yamin Liu (Chang'an University, China), and Chenguang Gao (Chang'an University, China)</i>	
Fault Diagnosis with a Mixed Deep Learning Model	N/A
<i>Jingyu Liu (Beihang University, China), Jianping Zhang (Beihang University, China), and Jie Liu (Beihang University, China)</i>	
Fault Diagnosis of Rolling Bearing Based on Multidimensional Feature Extraction and Optimized LSSVM Algorithm	1291
<i>Wei Liu (Beijing Institute of Technology, China), Huina Mu (Beijing Institute of Technology, China), Shijie Wei (Chongqing University, China), and Hongmei Yan (Beijing SunWise Space Technology Ltd., China)</i>	
Research on Warranty Period Extension Strategy of Gas Turbine Considering Imperfect Maintenance and Maintenance Time	1298
<i>Jine Huang (Naval Research Institute, China), Pengpeng Liu (Naval Research Institute, China), and Jiguang Tan (Harbin Engineering University, China)</i>	

Bivariate Reliability and Remaining Useful Life Prediction Model Based on Inverse Gaussian Processes and Frank Copula	N/A
<i>Rentong Chen (Beihang University, P.R. China), Dingding Zhao (Shanghai Marine Equipment Research Institute; National Engineering Research Center of Special Equipment and Power System for Ship and Marine Engineering, P.R. China), Chao Zhang (Beihang University, P.R. China), Shaoping Wang (Beihang University, P.R. China), and Jiahui Sun (Shanghai Marine Equipment Research Institute, P.R. China)</i>	
Research on Cross-Condition and Cross-Equipment Intelligent Fault Diagnosis Method Based on Adversarial Transfer Learning	1313
<i>Hang Lin (National University of Defense Technology, China), Haifeng Hu (National University of Defense Technology, China), Yongmin Yang (National University of Defense Technology, China), Fen Wei (National University of Defense Technology, China), Fengjiao Guan (National University of Defense Technology, China), Zifang Bian (National University of Defense Technology, China), and Minghao Pan (National University of Defense Technology, China)</i>	
Life Assessment of Grounding Material Incorporating Corrosion Environmental Factors	1318
<i>Ziguang Ji (Beihang University, China), Yikun Cai (Sichuan University, China), Bingxin Yan (Beihang University, China), and Xiaobing Ma (Beihang University, China)</i>	
Fault Diagnosis of Unmanned Aerial Vehicle Based on the Slime Mold Algorithm Under Imbalanced Data Conditions	1323
<i>Xinman Wu (Beihang University, China), Wenjin Zhang (Beihang University, China), Yu Li (Beihang University, China), and Mingliang Suo (Beihang University, China)</i>	
Design and Simulation Analysis of 1.2 kV SiC JBS Diodes with High Performance and Avalanche Capability	1329
<i>Leilei Xu (Xidian University Xi'an, China), Yancong Liu (Xidian University Xi'an, China), Xiaoyan Tang (Xidian University Xi'an, China), Hao Yuan (Xidian University Xi'an, China), Xuanjie Wang (Xidian University Xi'an, China), Fengzhen Zou (Xidian University Xi'an, China), Qingwen Song (Xidian University Xi'an, China), and Yuming Zhang (Xidian University Xi'an, China)</i>	
Research on Reliability Design and Analysis Method of Network Cutting Separation Mechanism.	1334
<i>Xiaoyun Zeng (Beijing Institute of Technology, China), Huina Mu (Beijing Institute of Technology, China), Xiaogang Li (Beijing Institute of Technology, China), Han Zhao (Beijing Institute of Technology, China), and Wentao Ma (Beijing Institute of Technology, China)</i>	
Survivability-Oriented Equipment SoS Damage Mode and Effects Analysis Based on Multi-Source Heterogeneous Information Fusion	N/A
<i>Hengte Du (Beihang University, China), Xing Pan (Beihang University, China), and Zimeng Yin (China Academy of Launch Vehicle Technology, China)</i>	

Remaining Useful Life Assessment of Organic Coating Based on Three-Stage Degradation Mechanism	1351
<i>Qian Chen (Beihang University, China), Xiaobing Ma (Beihang University, China), Yikun Cai (Sichuan University, China), and Yu Zhao (Beihang University, China)</i>	
Minimum Variation Estimation of Three-Parameter Weibull Distribution with Extension to Accelerated Life Test	N/A
<i>Yujie Liu (Beihang University, China), Han Wang (Beihang University, China), and Xiaobing Ma (Beihang University, China)</i>	
Fault Diagnosis Using GNN Through Adversarial Attack	1363
<i>Zihan He (Systems Engineering Beihang University, China), Jie Liu (Systems Engineering Beihang University, China), and Wen Wang (Systems Engineering Beihang University, China)</i>	
Research on Thermal-Stress Aging Behavior and Failure Mechanism of Silicone Rubber Seals for Marine Environment	1369
<i>Rui-Yuan Wang (Beihang University, China), Ying Wang (The 41st Institute of Sixth Academy of CASIC, China), Ning Li (AVIC Manufacturing Technology Institute, China), Chong-Hao Wang (Beihang University, China), and Wei-Fang Zhang (Beihang University, China)</i>	
Characteristics of Probabilistic Risk Analysis Method and Application in Launch Site System	1375
<i>Cunyan Cui (Beijing Institute of Tracking and Telecommunications Technology, China), Tengda Xin (Beijing Institute of Tracking and Telecommunications Technology, China), Jiang Tong (Beijing Institute of Tracking and Telecommunications Technology, China), and Ziteng Huang (Beijing Institute of Tracking and Telecommunications Technology, China)</i>	
Human Factor Modeling and Risk Analysis Techniques in Space Launch Missions	1380
<i>Cunyan Cui (Beijing Institute of Tracking and Telecommunications Technology, China), Jiang Tong (Beijing Institute of Tracking and Telecommunications Technology, China), Lan Mao (Beijing Institute of Tracking and Telecommunications Technology, China), Tengda Xin (Beijing Institute of Tracking and Telecommunications Technology, China), and Ziteng Huang (Beijing Institute of Tracking and Telecommunications Technology, China)</i>	
Risk Analysis of Emergency Escape Probability of Astronauts in Waiting-for-Lift-off Phase	1385
<i>Jiang Tong (Beijing Institute of Tracking and Telecommunications Technology, China), Cunyan Cui (Beijing Institute of Tracking and Telecommunications Technology, China), Qiang Yang (Beijing Institute of Tracking and Telecommunications Technology), Lan Mao (Beijing Institute of Tracking and Telecommunications Technology, China), and Tengda Xin (Beijing Institute of Tracking and Telecommunications Technology, China)</i>	
Analysis of Typical Failure Modes and Failure Mechanisms of Space Traveling Wave Tube	1390
<i>Xiaoning Wang (China Astronautics Standards Institute Beijing, China), Xiaobao Su (Aerospace Information Research Institute, Chinese Academy of Sciences Beijing, China), and Jinjing Wang (China Astronautics Standards Institute Beijing, China)</i>	

Accelerated Storage Life Evaluation Method for Degraded Products Considering Block Effects and Censored Observations	1393
<i>Wenduo Zhang (Beihang University, China), Han Wang (Beihang University, China), Bingxin Yan (Beihang University, China), and Xiaobing Ma (Beihang University, China)</i>	
Degradation Modeling and Life Prediction of Double-Nut Ball Screws Through Integrated Performance Simulation and Physics-of-Failure	N/A
<i>Chen Juan (Beihang University, China), Wu Changlin (Beihang University, China), Chen Wei (Beijing Aerospace Automatic Control Institute, China), Liu Yong (Beijing Aerospace Automatic Control Institute, China), Zeng Zhiguo (Université Paris Saclay, France), and Wei Jingkun (Beihang University, China)</i>	
Bearing Fault Diagnosis Based on Parameter-Optimized Deep Belief Network Using Dung Beetle Optimizer	N/A
<i>Jingbo Gai (Harbin Engineering University, China), Tianmeng Zhang (Harbin Engineering University, China), Xuejiao Du (Harbin Engineering University, China), and Jianhui Deng (Naval Research Institute PLA 92942, China)</i>	
Research on Reliability Growth Methods for Ship Power and Electromechanical Equipment	1416
<i>Boxiao Huang (China Institute of Marine Technology & Economy, China), Shanshan Yin (CSSC Systems Engineering Research Institute, China), Fang Han (China Institute of Marine Technology & Economy, China), and Binghui Zhou (Marine Design and Research Institute of China, China)</i>	
A Condition-Based Delay Maintenance Planning for Two-Stage Discrete Deterioration System	1421
<i>Jiantai Wang (Beihang University, China), Yi Chen (Beihang University, China), Xiaobing Ma (Beihang University, China), Yu Zhao (Beihang University, China), Ruoran Han (Beihang University, China), and Li Yang (Beihang University, China)</i>	
Model-Based Forward Design Method for Support System	1425
<i>Zhiyu Jia (China Aero-Polytechnology Establishment, China), Dongni Dong (China Aero-Polytechnology Establishment, China), Zhaoyang Zeng (China Aero-Polytechnology Establishment, China), Yang Zhou (China Aero-Polytechnology Establishment, China), and Yan Zhou (China Aero-Polytechnology Establishment, China)</i>	
Modeling Method for Testability Diagnostic Concept Based on SysML	1433
<i>Junyou Shi (Beihang University, China), Zhenyang Lv (Beihang University, China), and Yufei Ding (Beihang University, China)</i>	
Theoretical Paradigm and Empirical Study of the General Quality Problem Closed-Loop Method: Insights from an International Case of Manned Flight Quality Issues	1438
<i>Yihong Zhao (China Astronautics Standards Institute, China) and Guocai Liu (China Astronautics Standards Institute, China)</i>	
Designing a Flexible Fin Wave Propeller Based on Environmental Adaptability	1444
