2024 IEEE Symposium on Visual Languages and Human-Centric Computing (VL/HCC) **VL-HCC 2024**

Table of Contents

Foreword	xii
Organising Committee	xv
Programme Committee	xvii
Keynotes	xix
Workshop Committee	xxi
Sponsors	xxii

Research Papers

Session 1: AI-Assisted Development

Let's Fix this Together: Conversational Debugging with GitHub Copilot
BISCUIT: Scaffolding LLM-Generated Code with Ephemeral UIs in Computational Notebooks 13 Ruijia Cheng (Apple), Titus Barik (Apple), Alan Leung (Apple), Fred Hohman (Apple), and Jeffrey Nichols (Apple)
 Leveraging Visual Languages to Foster User Participation in Designing Trustworthy Machine Learning Systems: A Comparative Study
Harnessing the Power of LLMs: LLM Summarization for Human-Centric DAST Reports

Developer Behaviors in Validating and Repairing LLM-Generated Code Using IDE and Eye Tracking
Ningzhi Tang (University of Notre Dame, USA), Meng Chen (University of Notre Dame, USA), Zheng Ning (University of Notre Dame, USA), Aakash Bansal (University of Notre Dame, USA), Yu Huang (Vanderbilt University, USA), Collin McMillan (University of Notre Dame, USA), and Toby Li (University of Notre Dame, USA)
Session 2: End User Programming + Education
Investigating the Usability of Coding Applications for Children: Insights from Teacher 47 Interviews 47 Mika Morgan (University of North Texas, USA), Stephanie Ludi 47 (University of North Texas, USA), Katherine Gash (University of North 47 Texas, USA), and Thien Truong (University of North Texas, USA) 47
Game Elements to Engage Students Learning the Open Source Software Contribution Process 59 Italo Santos (Northern Arizona University), Katia Romero Felizardo (Federal University of Technology, Paraná, PR, Brazil), Marco A. Gerosa (Northern Arizona University), and Igor Steinmacher (Northern Arizona University)
Physical vs. Virtual Representations Within Concreteness Fading for Primary School Computing
The Paradox of Spreadsheet Self-Efficacy: Social Incentives for Informal Knowledge Sharing in End-User Programming
Cocobo: Exploring Large Language Models as the Engine for End-User Robot Programming

Session 3: Generative AI in Development

Deceptive AI Dehumanizes: The Ethics of Misattributed Intelligence in the Design of Generative AI Interfaces	96
Michael Burgess (Independent Researcher)	
ChatGPT in Data Visualization Education: A Student Perspective	109
Nam Wook Kim (Boston College), Hyung-Kwon Ko (KAIST), Grace Myers	
(Boston College), and Benjamin Bach (Inria)	

In Situ AI Prototyping: Infusing Multimodal Prompts into Mobile Settings with MobileMaker 1	21
Savvas Petridis (Google DeepMind, USA), Michael Xieyang Liu (Google	
DeepMind, USA), Alexander J. Fiannaca (Google DeepMind, USA), Vivian	
Tsai (Google DeepMind, USA), Michael Terry (Google DeepMind, USA), and	
Carrie J. Cai (Google DeepMind, USA)	
Supporting User Critiques of AI Systems via Training Dataset Explanations: Investigating	
Critique Properties and the Impact of Presentation Style1	.34
Ariful Islam Anik (University of Manitoba, Canada) and Andrea Bunt	
(University of Manitoba, Canada)	

Session 4: Inclusive Development

Exploring the Impacts of Semi-Automated Storytelling on Programmers' Comprehension of Software Histories John Allen (Washington University in St. Louis) and Caitlin Kelleher (Washington University in St. Louis)	148
Programmer User Studies: Supporting Tools & Features Lázaro Costa (HASLab/INESC TEC, Faculty of Engineering, University of Porto, Portugal), Susana Barbosa (INESC TEC, Portugal), and Jácome Cunha (HASLab/INESC TEC, Faculty of Engineering, University of Porto, Portugal)	163
Identifying the Information Gap for Visually Impaired Students during Lecture Talks Katharina Anderer (Karlsruhe Institute of Technology, Germany), Matthias Wölfel (Karlsruhe University of Applied Sciences, Germany), and Jan Niehues (Karlsruhe Institute of Technology, Germany)	168

Session 5: New Frontiers in Visual Languages

SpecTacles: Supporting Control Flow Comprehension of Software Developers in TLA+	174
Co-Designing Web Interfaces for Code Comparison Justin Middleton (North Carolina State University), Neha Patil (North Carolina State University), and Kathryn Stolee (North Carolina State University)	187
P-Inti: Interactive Visual Representation of Programming Concepts for Learning and Instruction Shishir Halaharvi (University of Victoria), Gonzalo Gabriel Mendez (Universitat Politecnica de Valencia, Valencia, Spain), Hamid Mansoor (University of Victoria), Quinton Yong (University of Victoria), Alessandra Maciel Paz Milani (University of Victoria), Margaret-Anne Storey (University of Victoria), and Miguel Nacenta (University of Victoria)	199

ALLI/O Diagram: An Action-based Visual Programming Language for Embedded System	211
Nuntipat Narkthong (Northeastern University, USA), Chattriya	
Jariyavajee (King Mongkut's University of Technology Thonburi,	
Thailand), and Xiaolin Xu (Northeastern University, USA)	
FlexDoc: Flexible Document Adaptation through Optimizing both Content and Layout	217
Yue Jiang (Aalto University), Christof Lutteroth (University of Bath),	
Rajiv Jain (Adobe Research), Christopher Tensmeyer (Adobe Research),	
Varun Manjunatha (Adobe Research), Wolfgang Stuerzlinger (Simon Fraser	
University), and Vlad I. Morariu (Adobe Research)	

Session 6: End User Programming

Thematic Analysis of Self-Regulation Narratives in Textual Posts by Informal Programming Learners on Social Media	.223
Jigsaw: A Tool for Decomposing and Planning Programming Problems Heidi Reichert (North Carolina State University, USA), Benyamin T. Tabarsi (North Carolina State University, USA), Thomas Price (North Carolina State University, USA), and Tiffany Barnes (North Carolina State University, USA)	236
Generating Function Names to Improve Comprehension of Synthesized Programs Amirmohammad Nazari (University of Southern California), Swabha Swayamdipta (University of Southern California), Souti Chattopadhyay (University of Southern California), and Mukund Raghothaman (University of Southern California)	248
Beyond TAP: Piggybacking on IFTTT to Connect Triggers and Actions with JavaScript Daniel Manesh (Virginia Tech), Marx Wang (University of Washington), Ruipu Hu (University of Maryland), and Sang Won Lee (Virginia Tech)	260

Session 7: Evaluation

RULER: Prebugging with Proxy-Based Programming Alexander Repenning (FHNW Switzerland) and Ashok Basawapatna (SUNY Old Westbury)	275
Where Are We and Where Can We Go on the Road to Reliance-Aware Explainable User	
Interfaces?	282
José Cezar de Souza Filho (Univ. Polytechnique Hauts-de-France, LAMIH	
UMR CNRS 8201, France), Rafik Belloum (Univ. Polytechnique	
Hauts-de-France, LAMIH UMR CNRS 8201, France), and Káthia Marçal de	
Oliveira (Univ. Polytechnique Hauts-de-France, LAMIH UMR CNRS 8201,	
France)	

Session 8: Human-centered Coding

Age-Inclusive Integrated Development Environments for End-Users Katharine Kerr (University of British Columbia) and Reid Holmes (University of British Columbia)	289
ScrapeViz: Hierarchical Representations for Web Scraping Macros Rebecca Krosnick (University of Michigan, USA) and Steve Oney (University of Michigan, USA)	300
Unfold: Enabling Live Programming for Debugging GUI Applications Ruanqianqian Huang (University of California, San Diego), Philip J. Guo (University of California, San Diego), and Sorin Lerner (University of California, San Diego)	306

Session 9: Human-centric Computing

Knotation: Supporting Exploration in Macrame Textile Crafting Through Parametric Motif	
Design	317
Yanchen Lu (University of California, Santa Barbara), Tobias Höllerer	
(University of California, Santa Barbara), and Jennifer Jacobs	
(University of California, Santa Barbara)	
Considering Visualization Example Galleries	329
Line (III) and Line (IA) and the control of the Andrew Market (III) in and the	02)
Junran Yang (University of Washington), Anarew McNutt (University of	

Washington), and Leilani Battle (University of Washington)

Posters and Showpieces

Development of an Adaptive User Support System Based on Multimodal Large Language Models 3 Wei Wang (Monash University), Lin Li (RMIT University), Shavindra Wickramathilaka (Monash University), John Grundy (Monash University), Hourieh Khalajzadeh (Deakin University), Humphrey O. Obie (Monash University), and Anuradha Madugalla (Monash University)	344
 Exploring consequences of statutory law through lightweight modeling	348
FlowPilot: A Generative AI-Driven Visual Language for Computational Thinking Education 3 Tommaso Turchi (Department of Computer Science, University of Pisa)	353
Postman Flows: A Visual Programming Tool for Building API-Powered Apps and Workflows3 Rebecca Krosnick (Postman, Inc.)	356
Understanding the Performance of Large Language Model to Generate SQL Queries	359
VEX CTE: Design an Educational Industrial Robotic Arm	362

Graduate Consortium

Conversational Agents for Teaching Computing-Related Conversational Skills Jinyoung Hur (University of Illinois Urbana-Champaign)	366
Towards Effective Validation and Integration of LLM-Generated Code Ningzhi Tang (University of Notre Dame, USA)	369
Towards a Conversational User Interface for Aiding Researchers with Reproducibility Lázaro Costa (HASLab / INESC TEC, Faculdade de Engenharia, Universidade do Porto, Portugal)	371
Effective Integration and Use of Non-Development LLMs in Software Development Fairuz Nawer Meem (George Mason University)	. 374
A Comprehensive Approach to Supporting Blockchain Developers	. 376
Text Editing, with Structure Tom Beckmann (Hasso Plattner Institute, University of Potsdam, Germany)	378
Empowering Diversity: Leveraging Cognitive Styles to Support Newcomers in Open Source Projects	. 380
The Effect of Progressive Disclosure in the Transparency of Explainable Artificial Intelligence Systems Deepa Muralidhar (Georgia State University)	. 382
Interfaces to Support Exploration and Control of Generative Models Gregory Croisdale (University of Michigan, United States)	. 384
Supporting Spreadsheet Users in Knowledge Sharing Qing Nancy Xia (University College London)	. 386
Daniel Manesh: Supporting Code Performances Daniel Manesh (Virginia Tech)	. 389
An Explorable and Visual Formal Specification Daniel Stachnik (Hasso Plattner Institute, University of Potsdam, Germany)	. 392

Workshops

Diversity in Study Participants and a Critique of the "Representative Sample" in Human-Computer Interaction Research	. 394
Advait Sarkar (Microsoft Research)	
End-Users vs Software Practitioners: Recruitment Challenges and Strategies in Software	
Engineering Research	400
Wei Wang (Monash University), Dulaji Hidellaarachchi (Monash	
University), John Grundy (Monash University), Hourieh Khalajzadeh	
(Deakin University), Humphrey O. Obie (Monash University), and	
Anuradha Madugalla (Monash University)	

 Evaluating LLM-Generated Topics from Survey Responses: Identifying Challenges in Recruiting Participants through Crowdsourcing
The Struggle is Real! The Agony of Recruiting Participants for Empirical Software Engineering Studies 412 Kashumi Madampe (Monash University), John Grundy (Monash University), 412 Rashina Hoda (Monash University), and Humphrey Obie (Telstra Helath) 412
Challenges and Opportunities for Survey Research in the Age of Generative AI: An Experience Report
Diversity Challenges in Recruiting for Human-Centered Explainable AI Studies
Exploring Stakeholder Challenges in Recruitment for Human-Centric Computing Research
 Recruiting Participants in Digital Health: Lessons from a Palliative Care Telehealth Project
