# TABLE OF CONTENTS

|                                                                                                                                                                                                                           |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Graphene Quantum Dots with Excitation-Wavelength-Independent-Photoluminescence Under<br>Multiphoton Excitation: Nitrogen Functionalities in Dual-Modality Near Infrared-I/II Bioimaging<br>and Photodynamic Therapy ..... | 1  |
| <i>Wen-Shuo Kuo</i>                                                                                                                                                                                                       |    |
| Stable PEG-Silver Nanoparticles Biomaterial for Medical Applications .....                                                                                                                                                | 6  |
| <i>Alexandra Nicolae-Maranciuc, Dan Chicea</i>                                                                                                                                                                            |    |
| Diagnosis of Neoplasms in Veterinary Medicine Samples Using Artificial Intelligence.....                                                                                                                                  | 11 |
| <i>Greta Rupšyte, Renaldas Raišutis, Martynas Maciulevicius, Ilze Matise-Van Houtana,<br/>Mindaugas Tamošiunas</i>                                                                                                        |    |
| Automated Classification of Pollens Relevant to Veterinary Medicine.....                                                                                                                                                  | 19 |
| <i>Blaž Cugmas, Eva Štruc, Inese Berzina, Mindaugas Tamosiunas, Laura Goldberga, Thierry<br/>Olivry, Karlis Gustavs Zviedris, Roberts Kadikis, Maksims Ivanovs, Miran Bürmen, Peter<br/>Naglic</i>                        |    |
| Macroporous Filtration PTFE Membranes Modified with Polymer-Based Nanocomposite<br>Containing Zirconium Hydrophosphate and Silver Nanoparticles .....                                                                     | 23 |
| <i>Liudmyla Rozhdesvenska, Kateryna Kudelko, Alexey Palchik, Lilia Vygovska, Valerii<br/>Ushkalov, Mariia Chaban, Liudmyla Ponomarova</i>                                                                                 |    |
| Effect of TiO <sub>2</sub> Nanoparticles Defect Structure on Their ROS Scavenging Ability.....                                                                                                                            | 28 |
| <i>Svetlana Yefimova, Viktor Kireev, Iryna Besspalova, Nataliya Kavok, Volodymyr Prokopiuk,<br/>Anton Tkachenko, Lesya Demchenko, Oleksandr Tomchuk</i>                                                                   |    |
| Effect of Hydrogen Peroxide Decomposition on Luminescence and Microstructure of GdVO <sub>4</sub> :Eu <sup>3+</sup><br>Redox-Active Nanocrystals.....                                                                     | 33 |
| <i>Kateryna Hubenko, Pavel Maksimchuk, Andrey Onishchenko, Vladimir Klochkov, Svetlana<br/>Yefimova</i>                                                                                                                   |    |
| Enhancement of Thiol Oxidation by Redox Cyclers in the Presence of Nanoparticles in Model<br>System .....                                                                                                                 | 38 |
| <i>Vladimir Klochkov, Yuri Nikitchenko, Nataliya Kavok, Galyna Dudetskaya, Olga Sedyh</i>                                                                                                                                 |    |
| The Antitumor Efficacy of Redox-Active Inorganic Nanoparticles/Menadione Complexes in 2D<br>and 3D Models of L929 Fibrosarcoma Cells.....                                                                                 | 42 |
| <i>Nataliya Kavok, Vladimir Klochkov, Galyna Dudetskaya, Olga Sidorenko, Olga Sedyh</i>                                                                                                                                   |    |
| Design and Research of Thermo-Responsive Gelatin-Alginate-Humic Nanocomposite Hydrogels<br>for Controlled Drug Delivery .....                                                                                             | 46 |
| <i>Katerina Lebedeva, Natalia Klochko, Denis Miroshnichenko, Anna Cherkashina, Olena<br/>Bogoyavlenska, Volodimir Lebedev</i>                                                                                             |    |
| The Antimicrobial Effectiveness of the Hydroxyapatite Matrix Loaded with Metal Nanoparticles .....                                                                                                                        | 52 |
| <i>Viktoriia Holubnycha, Roman Pshenychnyi, Svitlana Bolshanina, Tamara Derevianko, Hanna<br/>Antonova, Paulina Skwarek, Anna Yanovska</i>                                                                                |    |
| Delayed Reactive Oxygen Species Production by UV Pre-Irradiated Orthovanadate Nanocrystals.....                                                                                                                           | 57 |
| <i>Pavel Maksimchuk, Kateryna Hubenko, Vladyslav Seminko, Andrey Onishchenko, Svetlana<br/>Yefimova, Nataliya Kavok, Galyna Dudetskaya</i>                                                                                |    |

|                                                                                                                                                                                       |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Nanoparticle Delivery in a Human Pancreatic Ductal Adenocarcinoma-On-a-Chip Model .....                                                                                               | 63  |
| <i>Karina Goluba, Vadims Parfejevs, Kaspars Jekabsons, Evita Rostoka, Ilze Blake, Liga Kunrade, Anastasija Neimane, Roberts Rimša, Andrejs Pcolkins, Una Riekstina</i>                |     |
| The Structure of Nanocrystalline Apatite from the Non-Small Cell Lung Cancer .....                                                                                                    | 67  |
| <i>Alina Baryschok, Yuliia Moskalenko, Andriy Stepanenko, Roman Moskalenko</i>                                                                                                        |     |
| Locking the SUMO Switch: Inhibiting Rhes and mHTT Interactions Using De Novo Design to Prevent the Spread of Huntington's Disease .....                                               | 72  |
| <i>Bhavyahshree Navaneetha Krishnan</i>                                                                                                                                               |     |
| Effect of PEG 400 Nanocrystal Sizes on Thermal and Spectral Properties.....                                                                                                           | 79  |
| <i>Viktoria Shevchenko, Andrii Sobchuk, Olexandr Alekseev, Sergei Alekseev, Eduard Lysenkov, Roman Dinzhos, Tetyana Budnyak, Oleg Tkachenko, Maksym Lazarenko</i>                     |     |
| Copper Nanoparticles in Ch/PLA Dressing Material Promotes Wound Healing.....                                                                                                          | 84  |
| <i>Anna Butsyk, Yevhen Samokhin, Anastasiia Denysenko, Yuliia Varava, Valeriia Korniienko, Viktoriia Korniienko, Artem Piddubnyi, Roman Moskalenko</i>                                |     |
| Machine Learning-Guided Production of a Self-Nanoemulsifying System for Delivery of Anacardic Acid .....                                                                              | 89  |
| <i>Cassandra Prieto-Medrano, Rebeca Garcia-Varela, Gildardo Sánchez-Ante, Araceli Zavala-Martinez, Angélica Sánchez-López, Adriana Cavazos-Garduño, Yocanxóchitl Perfecto-Avalos</i>  |     |
| Theoretical Analysis of Magnetic Levitation Technique and in Vivo Validation on Oral Cancer Diagnosis.....                                                                            | 95  |
| <i>Samed Gumus, Maryam Sabour-Takanlou, Gaye Bölükbası, Leila Sabour-Takanlou, Yavuz Ozturk, Aslı Tetik Vardarli, Pelin Güneri, Baris Oguz Gürses, Betül Karaca, Hayal Boyacıoglu</i> |     |
| Smart Phone Correlation Analysis of HRV Between PPG and ECG in a Person's Supine, Sitting and Standing Position.....                                                                  | 100 |
| <i>Matti Huotari</i>                                                                                                                                                                  |     |
| Spectral and Spatial Characteristics of TPPS <sub>3</sub> and TPPS <sub>4</sub> Aggregates .....                                                                                      | 104 |
| <i>Skaiste Talanovaite, Vilius Poderys, Ricardas Rotomskis</i>                                                                                                                        |     |
| Neural Network-Based Feature Prediction Using Remote Photoplethysmogram Waveform Analysis.....                                                                                        | 109 |
| <i>Uldis Rubins, Zbignevs Marcinkevics, Andris Grabovskis</i>                                                                                                                         |     |
| Impact of Bilateral Thigh Occlusion on the Remote Photoplethysmography Signal Recorded from the Palm.....                                                                             | 113 |
| <i>Zbignevs Marcinkevics, Uldis Rubins, Una Undine Zelca, Davids Obuhovskis, Andris Grabovskis</i>                                                                                    |     |
| Mid Infrared Label Free Interferometric Detectorless Imaging Photonic Circuit .....                                                                                                   | 118 |
| <i>Maurizio Dabbicco, Lorenzo Columbo, Basak Ersoz, Massimo Brambilla, Paolo Bardella</i>                                                                                             |     |
| Effect of Magnetic Field on Resonant Properties of Plasmon-Polariton Photodetectors.....                                                                                              | 123 |
| <i>Roman Redko, Sergii Mamykin, Olga Kondratenko, Yelizaveta Savchuk</i>                                                                                                              |     |
| Luminescence-Based Determination of Mefenamic Acid Using Sorption by Transcarpathian Clinoptilolite.....                                                                              | 127 |
| <i>Volodymyr Vasylechko, Liubomyr Shevchuk, Galyna Gryshchuk, Oksana Kostiv, Yaroslav Kalychak, Anatoliy Voloshinovskii</i>                                                           |     |

|                                                                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Investigation of Pulsed Mode Operation in Low-Temperature Arsenic Plasma Light Sources.....                                                                               | 133 |
