

18th International Conference on Stability, Handling and Use of Liquid Fuels (IASH 2024)

Stability, Handling and Use of Liquid Fuels

Louisville, Kentucky, USA
8-12 September 2024

Editor:

Robert E. Morris

ISBN: 979-8-3313-0830-8

TABLE OF CONTENTS

<u>Keynote Address: Rapid Transportation Decarbonization with Biomass Derived Liquid Fuels</u>	1
<i>John Pendray, Senior Technical Advisor-Technology, Development, Cummins, Inc.</i>	
 <u>Chevron Award of Excellence in Honor of John D. Bacha</u>	
Characterization of Oxygen-Containing Compounds in Stable and Thermally Unstable Jet Fuels by Using High-Resolution Mass Spectrometry: Insights into Composition-Thermal Instability Relationships	2
<i>Mark Romanczyk, US Naval Research Laboratory</i>	
 SESSION 1: FUEL PRODUCTION, OPTIMIZATION AND CERTIFICATION	
Zainab Al-Saihati and Krege Christison, Session Co-Chairs	
 Utilizing Hydroisomerization of Normal Paraffins to Improve Cold Flow Properties of Sustainable Aviation Fuel	33
<i>Victoria Kompanijec, Air Company</i>	
 Improving the Quality of Advanced Recycled Oils	46
<i>Joseph L. Stark, Innospec Fuels Specialties</i>	
 Unique Organic Carbonate based Solvents derived from CO₂ for Sulfur Removal Technology	47
<i>Sankaran Murugesan, Baker Hughes</i>	
 Storage, Handling and Combustion of a Novel Heating Fuel: EL	48
<i>Ryan Kerr, NORA</i>	

SESSION 2: ANALYTICAL TECHNIQUE DEVELOPMENT

Melanie Thom and Georg Eckel, Session Co-Chairs

- Using GC×GC-TOFMS and Comparative Data Analysis Software to Gain a Deeper Understanding of Chemical Composition Changes in Fuel Studies** 64
Robert E. Synovec, University of Washington

- Challenges and Insights in Applying Aviation Fuel Advanced Compositional Methods to Diesel Fuels** 65
N. Scott Bergey, U.S. Navy

- Rapid Screening Technique for Qualitative Molecular Characterization of Polar Analytes in Fuels Using GCxGC/(+CI)MS** 66
Grace E. Greene, Purdue University

- Water and Compositional Analysis in Liquid Petroleum Gases (LPGs) with the New VUV LUMA GC Detector** 67
Dan Wispinski, VUV Analytics

SESSION 3: FUEL SUPPLY CHAIN, STORAGE, HANDLING AND LOGISTICS

Jordan Metz and Joseph L. Stark, Session Co-Chairs

- Technology Development of Motor Gasoline Storage in Salt Caverns with Aspects of Quality Prediction, Storage and End-Use** 68
Arkadiusz Majoch, Orlen S. A.

- Navigating Fuel Integrity Challenges in Bulk Storage Facilities** 69
David Evans, Defence Science and Technology Group

- Re-Evaluation Of ASTM D5304: Detailed Comparison of Storage Stability Methods Through the Analysis of Liquid-Phase Chemistry** 70
Thomas Loegel, Naval Research Laboratory

- SAF blending and distribution – Supplier Sharing** 71
Clarisse Doucet, Total Energies

SESSION 4: FUEL QUALITY CONTROL
Victoria Kompanijec and Paul P. Wells, Session Co-Chairs

- Demonstrable QA Standards in the Specification, Procurement, Delivery and Storage of Liquid Fuels for Use in Emergency Generators and Other Plant** 72
Carl M Atkinson, EDF Energy
- Linking Sustainable Aviation Fuel Specifications to Operational or Durability Concerns** 73
Randall C. Boehm, Washington State University
- Measurement of Jet Fuel Interfacial Tension and its Relation to Micro-Separometer Data** 74
Shane Kosir, University of Dayton Research Institute
- Insight into Sampling Processes of Aviation Fuel** 75
Moshe Rabaev, Independent Consultant
- Advanced Membrane Separations for Carbon Circularity: From Lube Oil Purification to Chemical Recycling of Plastics** 76
Pieter Vandezande, Flemish Institute for Technological Research

SESSION 5: FUEL PROPERTIES AND EFFECTS
Robert Parker and Jack Burgazli, Session Co-Chairs

- Synthetic Blend Component Study: The Effects of Hydrocarbon Composition on Aviation Fuel Dielectric Constant** 77
Shane Kosir, University of Dayton Research Institute
- Low Temperature Behavior of Renewable Diesel and Blends with Petroleum Diesel** 78
Suzanne Golisz, Innospec Fuel Specialties
- Low Temperature Dielectric Constant Measurement of Jet Fuel Constituents to Enable 100% SAF** 79
Harrison Yang, Washington State University

Engine Performance and Emissions: A Model-Based Assessment of Added Values of Sustainable Aviation Fuels (SAF)	80
<i>Stephan Ruoff, German Aerospace Center</i>	
Exploring Low-Sooting Compositions for Potential 'Drop-in' Sustainable Aviation Fuel	81
<i>Conor Faulhaber, Washington State University Tri-Cities</i>	
Assessment of the Impact of Alternative Fuels on the Cetane Values and Proposed Models for Calculating it	82
<i>Nathalie Brassart, IFPEN and Mickaël Sicard, ONERA</i>	
Azeotropic Fuels: Elucidating the Influence of Structural Classes on Azeotropic Behavior in Oxygenated Fuels	83
<i>Jordan N. Metz, ExxonMobil Technology and Engineering</i>	

SESSION 6: PANEL DISCUSSION TOWARDS 100% SUSTAINABLE FUELS

Moderator: *Joanna Bauldrey*

Panelists:

- *Gurhan Andac (GE Aerospace)* 100
- *Patrick Bosmans (CEPS - Central Europe Pipeline System)*
- *Amy Carico (Airlines for America)*
- *Rick Kamin (Naval Air Systems Command)*

SESSION 7: THERMAL STABILITY Mark Romanczyk and Zach West, Session Co-Chairs

An Innovative Microfluidic Reactor for Testing the Oxidation Stability of Fuels: Application to a SAF Surrogate and Comparison with the PetroOxy Test	115
<i>Ryma Benrabah, Université de Lorraine</i>	
Unravelling Sustainable Aviation Fuel Interactions: A Stability Perspective, but with a touch of renewable diesel	136
<i>David Evans, Defence Science and Technology Group</i>	

**Study of Molecular Interactions in the Later Stage of Jet Fuel Surface Deposition:
Combining Ab-initio Density Functional Theory with Experimental Analysis** 137
Rahimakhanim Babayeva, University of Sheffield

**Oxidation Mechanism of Sulfur-Containing Compounds and Antioxidant Depletion
Dynamics: Insights into Interactions** 138
Jinxia Fu, University of Hawaii at Manoa

**Further Studies of Jet Fuel Oxidative Deposit Formation in Quartz Crystal Microbalance
Experiments** 139
Krege M. Christison, Chevron

SESSION 8: FUEL CHEMISTRY, RESEARCH AND DEVELOPMENT

Amanda Mae Arts and David Evans, Session Co-Chairs

Impact of SBCs on the Behaviour of Polymer Materials and Effect of Fuel Cycling 140
Mickaël Sicard, Office National d'Études et de Recherches Aéronautiques

**Digital Transformation of Fuel Property and Composition Data for the Rapid Assessment
of Conventional and Synthetic Fuels** 141
Terrence W. Dickerson, Naval Air Systems Command

SESSION 9: MICROBIOLOGICAL CONTAMINATION / MONITORING

Danika Nicoletti and Graham Hill, Session Co-Chairs

**Implementation of Genomics and Transcriptomics Analysis Unveil Conserved Fungal
Adaptive Mechanisms Essential for Thriving and Proliferating in Toxic Hydrocarbon
Environments** 142
Osman Radwan, University of Dayton Research Institute

**Correlation Between Microbial Biomass in Aircraft Fuel Tanks and Aviation Fuel Samples
with CFU Counts Obtained by Culture Methods** 143
Gareth Williams, ECHA Microbiology Ltd.

Microbial Contamination Comparison Between Sustainable Aviation Fuel (SAF) and Jet A-1 Fuel	145
<i>Danika Nicoletti, LuminUltra Technologies Ltd</i>	

SESSION 10: GROUND FUELS (GASOLINE, DIESEL AND BIODIESEL) AND MARINE FUELS

Nathalie Brassart and Joanna Bauldreay, Session Co-Chairs

Formula 1 Racing Fuel Evolution Inferred from Regulation Changes	154
<i>David Abdallah, ExxonMobil Technology and Engineering</i>	
Reduced Emissions Using Diesel Detergent Additives	172
<i>Mary Dery, Innospec Fuel Specialties</i>	
Fundamental Understanding of Gasoline PIONA in Relation with Key Properties	173
<i>Zainab Al-Saihati, Saudi Aramco</i>	
Sustainability in the Marine Market	174
<i>Joseph L. Stark, Innospec Fuel Specialties</i>	

SESSION 11: FUEL TESTING AND TEST METHODS

Ryma Benrabah and Dietmar Posselt, Session Co-Chairs

Comparison of Derived and Indicated Cetane Number for Aviation Turbine Fuels and Correlation with Lean Blow Out	175
<i>Jon Luecke, National Renewable Energy Laboratory</i>	
An HLPC-ESI-Q-TOF Method to Analyze Heteroatomic Species in Turbine Aviation Fuel via Hydrophilic Interaction Chromatography through Statistical Analysis of Mass Spectral Data	176
<i>Amanda M. Arts, US Air Force/University of Dayton Research Institute</i>	
Increasing the Level of Detail of Compositional Analyses with GCxGC-FID/ qMS for Prescreening of Sustainable Aviation Fuels	196
<i>Hannes Lüdtke, Institute of Combustion Technology</i>	

SGMM - Enhancing Fuel Property Prediction with Compositional Subgroup Information 197
Florian Pütz, DLR

Development and Evaluation of Rugged Portable Sensor for In-Field Measurement of Corrosion Inhibitor/Lubricity Improver Additive 198
Scott Bergey, U. S. Navy

Predictive Modelling of Liquid Density and Surface Tension for Synthetic Aviation Fuels Using Nuclear Magnetic Resonance Atom Types 199
Robert Parker, Trinity College Dublin

SESSION 12: POSTER SESSION

Matt Fielder, Session Chair

Performance and Storage stability of Renewable fuels with Static Dissipative Additive 217
Sankaran Murugesan, Baker Hughes

Effect of Chemical Composition on Freeze Point of Hydrocarbon Mixtures 218
David Bell, Washington State University

Defining Qualification Requirements for Renewable Diesel Fuels 219
David Evans, Defence Science & Technology Group

Insights into scaling up HEFA-SPK production 220
Jesse Vilja

Update to the Development of A Shipboard Test Kit for Dissolved Copper in a Jet Fuel Prototype Field Test Kit 225
Kristina Myers, Nova Research, Inc.

Cetane improver effectiveness in semi-synthetic jet fuels and relevance of cetane number in aeronautical combustion 226
Mickael Sicard, ONERA

Handling, Maintenance and Safety use of Aviation Fuel - Informative Bulletins	227
<i>Maor Saban, Israeli Air Force</i>	
Experimental quantification of the hydroperoxide content in surrogate jet-fuels on HPLC device	228
<i>Ryma Benrabah, CNRS-LRGP</i>	
Prediction of Hydrocarbons Ignition Performances Using Machine Learning Modeling	248
<i>Giacomo Flora, University of Dayton Research Institute</i>	
Investigating the Survival and Growth of Microorganisms in Microcosms Simulating Temperature Cycling in Aircraft Fuel Tanks	250
<i>Gareth Williams, ECHA Microbiology, Ltd.</i>	
Mobile Desulfurization of High Sulfur Jet Fuels	251
<i>Lindsay Davis, University of Dayton Research Institute</i>	
Determination of Trace Metals in Aviation Turbine Fuel via ICP-MS	253
<i>Amanda Arts, University of Dayton Research Institute</i>	
Reducing Emissions with Diesel Detergent Additives: Insights from ISO8178 Test Cycles	254
<i>James Rumford-Warr, Fuelcare Limited</i>	
Development of Biocides for Mitigation of Microbial Fuel Contamination using bacteria <i>Pseudomonas protegens</i> and <i>Bacillus subtilis</i>	257
<i>Amanda Schroeder, University of Dayton Research Institute</i>	
Use of Sheep Myeloid Antimicrobial Peptide (SMAP-18) and Siderophore Pyochelin for Mitigation of Aerospace Fuel-Degrading Microbes	259
<i>Amanda Schroeder, University of Dayton Research Institute</i>	
World Jet Fuel Survey (Preliminary Results)	260
<i>Zachary West, University of Dayton Research Institute</i>
