WoSAR Workshop Keynotes	liv

Industry Track

A Global Operational Readiness Review Process: Improving Cloud Availability	1
<i>James J. Cusick (Ritsumeikan University, Japan) and Lija Basil (HCL Tech, India)</i>	
A Language-Guided Acceleration Method for Smoke Testing of Game Quests	7
<i>Jie Hu (Southwest University, China), Mingyue Zhang (Southwest University, China), Bo Liu (Southwest University, China), Yuechen Wu (NetEase Fuxi AI Lab, China), and Yingfeng Chen (NetEase Fuxi AI Lab, China)</i>	
A Systematic Methodology for Specifying the Operational Design Domain of Automated Vehicles	13
<i>Frank Eichenseer (SETLabs Research GmbH, Germany), Shinjini Sarkar (SETLabs Research GmbH, Germany), and Ali Shakeri (German Aerospace Center (DLR), Germany)</i>	
An Exploration of Fuzzing for Discovering Use-After-Free Vulnerabilities	19
<i>Zeyu Chen (University of Delaware, USA), Jidong Xiao (Rensselaer Polytechnic Institute, USA), Angelos Stavrou (Kryptowire, USA; Virginia Tech, USA), and Haining Wang (Virginia Tech, USA)</i>	
Auto-PIP: Real-Time Identification of Critical Performance Inflection Points in Software Stress Testing	25
<i>Shenglin Zhang (Nankai University; Haihe Laboratory of Information Technology Application Innovation), Xiao Xiong (Nankai University), Mengyao Li (Nankai University), Yongqian Sun (Nankai University; Tianjin Key Laboratory of Software Experience and Human Computer Interaction), Yongxin Zhao (Nankai University), Xia Chen (Huawei Cloud), Bowen Deng (Huawei Cloud), and Dan Pei (Tsinghua University)</i>	
CCBPS: A Hardware-Based Data Loss Prevention Approach	31
<i>Panshi Jin (China Construction Bank Corporation, China), Lei Xing (China Construction Bank FinTech Corporation, China), Yufei Yang (China Construction Bank Corporation, China), and Zhaojun Hao (Huawei Technologies Co., Ltd., China)</i>	
CrashChecker: A Fusion Method for Clustering Duplicate Crash Failures in SAP HANA Delivery... ..	37
<i>Yang Xu (SAP Labs China, China), Yong Li (SAP Labs China, China), Qiaoluan Xie (SAP Labs China, China), Xiaoxiao Zhang (SAP Labs China, China), Chao Liu (SAP Labs China, China), Thomas Bach (SAP, Germany), Sunghun Kim (SAP Labs Korea, Republic of Korea), and Sanghun Kang (SAP Labs Korea, Republic of Korea)</i>	
Dependability Modeling in an Industrial Environment	43
<i>Alberto Avritzer (EsulabSolutions Inc., USA), James J. Cusick (Ritsumeikan University, Japan), Andrea Janes (Free University of Bozen-Bolzano, Italy), Matteo Camilli (Politecnico di Milano, Italy), Barbara Russo (Free University of Bozen-Bolzano, Italy), Catia Trubiani (Gran Sasso Science Institute, Italy), and André van Hoorn (Universitat Hamburg, Germany)</i>	

Early Bird: Ensuring Reliability of Cloud Systems Through Early Failure Prediction	49
<i>Yudong Liu (Microsoft, China), Minghua Ma (Microsoft, USA), Pu Zhao (Microsoft, China), Tianci Li (Microsoft, China), Bo Qiao (Microsoft, China), Shuo Li (Carnegie Mellon University, USA), Ze Li (Microsoft, USA), Murali Chintalapati (Microsoft, USA), Yingnong Dang (Microsoft, USA), Chetan Bansal (Microsoft, USA), Saravan Rajmohan (Microsoft, USA), Qingwei Lin (Microsoft, China), and Dongmei Zhang (Microsoft, China)</i>	
Engineer Insights: The Challenges of Implementing Agile at Scale in Software Development	55
<i>Yichi Zhang (Nanjing University, China; Peking University, China), Yang Feng (Nanjing University, China), and Jianxun Ju (Trip.com Group Ltd, China)</i>	
Enhanced Fine-Tuning of Lightweight Domain-Specific Q&A Model Based on Large Language Models	61
<i>Shenglin Zhang (Nankai University; Haihe Laboratory of Information Technology Application Innovation), Pengtian Zhu (Nankai University), Minghua Ma (Microsoft), Jiagang Wang (Tsinghua University), Yongqian Sun (Nankai University; Tianjin Key Laboratory of Software Experience and Human Computer Interaction), Dongwen Li (Nankai University), Jingyu Wang (Nankai University), Qianying Guo (China Mobile Research Institute), Xiaolei Hua (China Mobile Research Institute), Lin Zhu (China Mobile Research Institute), and Dan Pei (Tsinghua University; Beijing National Research Center for Information Science and Technology)</i>	
Fast and Precise Interval Analysis on Industry Code	67
<i>Bharti Chimdyalwar (TCS Research, India)</i>	
Multivariate Time Series Anomaly Detection based on Pre-Trained Models with Dual-Attention Mechanism	73
<i>Yongqian Sun (Nankai University; Tianjin Key Laboratory of Software Experience and Human Computer Interaction), Yang Guo (Nankai University), Minghan Liang (Nankai University), Xidao Wen (BizSeer), Junhua Kuang (Nankai University), Shenglin Zhang (Nankai University; Haihe Laboratory of Information Technology Application Innovation), Hongbo Li (Tencent), Kaixu Xia (Tencent), and Dan Pei (Tsinghua University; Beijing National Research Center for Information Science and Technology)</i>	
NICSDBG: A Non-Intrusive Approach to Constructing Concise Service Dependency Graphs for Microservice Systems	79
<i>Weijie Hong (Peking University, China), Yong Yang (Peking University, China), Junqi Wu (Peking University, China), Dongdong Shangguan (Huawei, China), Yuanhao Lai (Huawei, China), Qiang Bai (Huawei, China), and Ying Li (Peking University, China)</i>	
On Enhancing Root Cause Analysis with SQL Summaries for Failures in Database Workload Replays at SAP HANA	85
<i>Neetha Jambigi (University of Cologne, Germany), Joshua Hammesfahr (SAP, Germany), Moritz Mueller (SAP, Germany), Thomas Bach (SAP, Germany), and Michael Felderer (University of Cologne, Germany)</i>	

Doctoral Symposium

Automated Interpretation of Fleet Incidents to Enable System Level Runtime Assurance	91
<i>Tihomir Rohlinger (University of Stuttgart and Cariad SE, Germany)</i>	
Search-Based White-Box Fuzzing of Web Frontend Applications	95
<i>Iva Kertusha (Kristiania University College, Norway)</i>	
Reliable Online Log Parsing Using Large Language Models with Retrieval-Augmented Generation	99
<i>Hansae Ju (Hanyang University, Republic of Korea)</i>	

Fast Abstracts

How Maintainable is Proficient Code? A Case Study of Three PyPI Libraries	103
<i>Indira Febriyanti (Nara Institute of Science and Technology, Japan), Youmei Fan (Nara Institute of Science and Technology, Japan), Kazumasa Shimari (Nara Institute of Science and Technology, Japan), Kenichi Matsumoto (Nara Institute of Science and Technology, Japan), and Raula Gaikovina Kula (Osaka University, Japan)</i>	
Coding Pitfalls: Demystifying the Potential API Compatibility Risk of Variadic Parameters in Python	105
<i>Shuai Zhang (Nanjing University of Aeronautics and Astronautics, China), Gangqiang He (Nanjing University of Aeronautics and Astronautics, China), and Guanping Xiao (Nanjing University of Aeronautics and Astronautics, China)</i>	
Linking Code and Documentation Churn: Preliminary Analysis	107
<i>Ani Hovhannisyan (NAIST, Japan), Youmei Fan (NAIST, Japan), Gema Rodríguez-Pérez (UBC, Canada), and Raula Gaikovina Kula (Osaka University, Japan)</i>	
Initial Investigation of Behavioral Changes of Obfuscated Programs Caused by Code Optimization	109
<i>Tetsuya Kitaoka (Nara Institute of Science and Technology, Japan), Yuichiro Kanzaki (National Institute of Technology, Kumamoto College, Japan), Takashi Ishio (Future University Hakodate, Japan), Kazumasa Shimari (Nara Institute of Science and Technology, Japan), and Kenichi Matsumoto (Nara Institute of Science and Technology, Japan)</i>	
On Applying Bandit Algorithm to Fault Localization Techniques	111
<i>Masato Nakao (Kindai University, Japan), Kensei Hamamoto (Kindai University, Japan), Masateru Tsunoda (Kindai University, Japan), Amjed Tahir (Massey University, New Zealand), Koji Toda (Fukuoka Institute of Technology, Japan), Akito Monden (Okayama University, Japan), Keitaro Nakasai (OMU College of Technology, Japan), and Kenichi Matsumoto (NAIST, Japan)</i>	

Dynamic Testing for Mobile Privacy Compliance	113
<i>Jingyi Lei (Xi'an Jiaotong University, China), Yi Wu (China Academy of Information and Communications Technology, China; Key Laboratory of Mobile Application Innovation and Governance Technology, Ministry of Industry and Information Technology), Nan Hu (Xi'an Jiaotong University), Junjie Tao (Xi'an Jiaotong University), Yin Wang (Xi'an Jiaotong University), Haijun Wang (Xi'an Jiaotong University), and Ming Fan (Xi'an Jiaotong University)</i>	
Assuring Data Integrity on Commercial Gamification Software Considering Productivity: an Industrial Case Study	115
<i>Masateru Tsunoda (Kindai University, Japan), Shohei Sinto (Nissho Elektron Co., LTD., Japan), Takeshi Yamada (Kindai University, Japan), and Hidetsugu Suto (Kindai University, Japan)</i>	
n-Pipeline Log Anomaly Detection Drift Mitigation	117
<i>Scott Lupton (Waseda University, Japan; Nomura Securities Co., Ltd., Japan), Hironori Washizaki (Waseda University, Japan), Naoyasu Ubayashi (Waseda University, Japan), and Nobukazu Yoshioka (Waseda University, Japan; QAML, Inc., Japan)</i>	
Towards N-Version Quantum Software Systems for Reliable Classical-Quantum Computing	119
<i>Shinobu Saito (NTT Computer and Data Science Laboratories, Japan), Suguru Endo (NTT Computer and Data Science Laboratories, Japan), and Yasunari Suzuki (NTT Computer and Data Science Laboratories, Japan)</i>	

AI-Pattern 2024 Workshop

Toward Pattern-Oriented Machine Learning Reliability Argumentation	121
<i>Takumi Ayukawa (Waseda University, Japan), Jati H. Husen (Waseda University, Japan), Nobukazu Yoshioka (Waseda University, Japan), Hironori Washizaki (Waseda University, Japan), and Naoyasu Ubayashi (Waseda University, Japan)</i>	
A Process Pattern for Cybersecurity Assessment Automation: Experience and Futures	123
<i>James J. Cusick (Ritsumeikan University, Japan)</i>	
Toward Extracting Learning Pattern: A Comparative Study of GPT-4o-Mini and BERT Models in Predicting CVSS Base Vectors	127
<i>Sho Isogai (Shinshu University, Japan), Shinpei Ogata (Shinshu University, Japan), Yutaro Kashiwa (Nara Institute of Science and Technology, Japan), Satoshi Yazawa (Voice Research, Inc., Japan), Kozo Okano (Shinshu University, Japan), Takao Okubo (Institute of Information Security, Japan), and Hironori Washizaki (Waseda University, Japan)</i>	

AISQ 2024 Workshop

Session I: Testing and Debugging

TLFL: Token-Level Fault Localization for Novice Programs via Graph Representation Learning.....	135
<i>Yong Liu (Beijing University of Chemical Technology, China), Ruishi Huang (Beijing University of Chemical Technology, China), Jizhe Yang (Beijing University of Chemical Technology, China), Binbin Yang (Beijing University of Chemical Technology, China), and ShuMei Wu (Beijing University of Chemical Technology, China)</i>	
Towards Mutation Testing of Embedded Software: A Framework and Case Study	143
<i>Wei Jiang (Information Science Academy, China Electronics Technology Group Corporation, China), Sijin Dong (University of Science and Technology Beijing, China), Jiaming Zhang (University of Science and Technology Beijing, China), Jin Tang (University of Science and Technology Beijing, China), Zichao Zhang (Information Science Academy, China Electronics Technology Group Corporation, China), Chang-ai Sun (University of Science and Technology Beijing, China), and Xiaoyi Zhang (University of Science and Technology Beijing, China)</i>	
Impact of V2V Communication on Robustness of Autonomous Driving Systems	151
<i>Lejin Li (Kyushu University, Japan), Xiao-Yi Zhang (University of Science and Technology Beijing, China), Shuncheng Tang (University of Science and Technology of China, China), Zhenya Zhang (Kyushu University, Japan), and Jianjun Zhao (Kyushu University, Japan)</i>	

Session II: Reliability and Dependability

A Web-Based Tool for Predicting Software Development Effort	155
<i>Xiao Xiao (Tokyo Metropolitan University, Japan), Tomoya Tanahashi (Tokyo Metropolitan University, Japan), and Tadashi Dohi (Hiroshima University, Japan)</i>	
Data Augmentation for Vulnerability Detection Based on Code Refactoring and Mixup	161
<i>Ying Xing (Beijing University of Posts and Telecommunications, China), Jiaqi Huang (Beijing University of Posts and Telecommunications, China), Guilong Wang (Yunnan Key Laboratory of Software Engineering, China), Yehao You (Beijing University of Posts and Telecommunications, China), Bin Yang (China Unicom Research Institute, China), Xiaofeng Li (Beijing Institute of Control Engineering, China), and Yixing Luo (Beijing Institute of Control Engineering, China)</i>	
DynTrackr: A Robust Two-Stage Framework with Attribute Enhancement for KPI Anomaly Detection	169
<i>Meixian Zhang (Baidu Group, China), Xue Shi (Baidu Group, China), Jiixin Huang (Baidu Group, China), Lide Su (Baidu Group, China), and Yanan Zhang (Baidu Group, China)</i>	

AISTA 2024 Workshop

Business Compliance Detection of Smart Contracts in Electricity and Carbon Trading Scenarios	177
<i>Yin Wu (Xi'an Jiaotong University, China), Haijun Wang (Xi'an Jiaotong University, China), Yuanhui Zhang (Xi'an Jiaotong University, China), Xitao Li (Xi'an Jiaotong University, China), Hao Wu (Xi'an Jiaotong University, China), Ming Fan (Xi'an Jiaotong University, China), and Ting Liu (Xi'an Jiaotong University, China)</i>	
HyWE: A Hybrid Word Embedding Method for Smart Contract Vulnerability Detection	179
<i>Jinfu Chen (Jiangsu University, China), Zhehao Li (Jiangsu University, China), and Dongjie Wang (Jiangsu University, China)</i>	
EMI Testing of Large Language Model (LLM) Compilers	187
<i>Xiangzhong Yu (University of Science and Technology of China), Wai Kin Wong (The Hong Kong University of Science and Technology), and Shuai Wang (The Hong Kong University of Science and Technology)</i>	

ASSURE 2024 Workshop

Session I: Assurance and Dependability Standards

The SOTIF Meta-Algorithm: Quantitative Analyses of the Safety of Autonomous Behaviors	191
<i>Carmen Cărlan (Edge Case Research GmbH, Germany), Noah Carlson (Edge Case Research Inc, US), Chris Dwyer (Edge Case Research Inc, US), Manoja Hirannaiah (Edge Case Research GmbH, Germany), and Michael Wagner (Edge Case Research Inc, US)</i>	

Session II: Assurance of Artificial Intelligence (AI) and Machine Learning (ML) – 1

Models are Central to AI Assurance	199
<i>Robin Bloomfield (University of London, UK) and John Rushby (SRI International, USA)</i>	
Supporting Change Impact Assessment with LLMs	203
<i>Torin Viger (University of Toronto, Canada), Logan Murphy (University of Toronto, Canada), Simon Diemert (Critical Systems Labs, Inc., Canada), Claudio Menghi (University of Bergamo, Italy), and Marsha Chechik (University of Toronto, Canada)</i>	
Removing the Big Red Button: Uncrewed Ground Vehicles in Complex Military Environments	205
<i>Alec Banks (Defence Science and Technology Laboratory, U.K.), Prathyush P Menon (University of Exeter, U.K.), and Steve Austen (SC Group Ltd, U.K.)</i>	
Developing Assurance Cases for Adversarial Robustness and Regulatory Compliance in LLMs	209
<i>Tomas Bueno Momcilovic (Fortiss Research Institute, Germany), Dian Balta (Fortiss Research Institute, Germany), Beat Buesser (IBM Research Europe, Switzerland), Giulio Zizzo (IBM Research Europe, Ireland), and Mark Purcell (IBM Research Europe, Ireland)</i>	

Session III: Assurance Cases and Processes

SynBioTrace: Integrating Safety and Security Artifacts to Build Assurance Cases for Synthetic Biology Applications	216
<i>Justin Firestone (University of Nebraska-Lincoln, NE), Myra B. Cohen (Iowa State University, IA), and Robyn R. Lutz (Iowa State University, IA)</i>	
Using Boundary Objects for Continuous Compliance in Automotive Development	224
<i>Anthony Shenouda (McMaster University, Canada), Tiziano Santilli (Gran Sasso Science Institute, Italy), Faezeh Siavashi (McMaster University, Canada), Thomas Chiang (McMaster University, Canada), Nicholas Annable (McMaster University, Canada), Horacio Hoyos Rodriguez (McMaster University, Canada), Richard Paige (McMaster University, Canada), Patrizio Pelliccione (Gran Sasso Science Institute, Italy), Mark Lawford (McMaster University, Canada), Alan Wassying (McMaster University, Canada), and Vera Pantelic (McMaster University, Canada)</i>	
A Digital Assurance Framework	232
<i>Mauricio Castillo-Effen (Lockheed Martin Advanced Technology Laboratories, USA), Carter E. Veldhuizen (Lockheed Martin Advanced Technology Laboratories, USA), and Charles D. Lutz (Lockheed Martin Advanced Technology Laboratories, USA)</i>	
Generating Understandable and Reusable Safety Assurance Cases using Workflow+	236
<i>Nicholas Annable (McMaster University, Canada), Mark Lawford (McMaster University, Canada), Richard F. Paige (McMaster University, Canada), and Alan Wassying (McMaster University, Canada)</i>	

Session IV: Assurance of Artificial Intelligence (AI) and Machine Learning (ML) – 2

Towards the Certification of an Evacuation Assistance System Utilizing AI-Based Approaches.....	240
<i>Georg Hägele (ASSA ABLOY Entrance Systems, Sweden), Abdelbaki Bouguerra (University of M'sila, Algeria), and Arezoo Sarkheyli-Hägele (Malmö University, Sweden)</i>	
Quantifying Lower Reliability Bounds of Deep Neural Networks	247
<i>Max Scheerer (FZI Research Center for Information Technology, Germany), Marius Take (FZI Research Center for Information Technology, Germany), and Jonas Klamroth (FZI Research Center for Information Technology, Germany)</i>	
Defect-Based Testing for Safety-Critical ML Components	255
<i>Amit Sahu (Edge Case Research GmbH, Germany) and Carmen Cărlan (Edge Case Research GmbH, Germany)</i>	

HFSD 2024 Workshop

Session I: Human Factors for Security

A Survey on Physical Event Verification in User Centric Smart Home Systems	263
<i>Bing Huang (Nanyang Technological University, Singapore) and Kwok-Yan Lam (Nanyang Technological University, Singapore)</i>	

Session II: Human Errors in Software Dependability

- Taking into Account Human Error when Assessing the Impact of Dependability on Usability 271
Camille Fayollas (Toulouse Capitole University, France), Célia Martinie (University Toulouse 3, France), and Philippe Palanque (University Toulouse 3, France)
- Human Error Scenario Analysis of Software Defects 279
Vivian White (Western Washington University, USA), Alyssa White (Western Washington University, USA), Jason Wild (Western Washington University, USA), and Fuqun Huang (Western Washington University, USA)

Session III: Human Factors for Software Reliability and Safety

- State Diagram Extension and Test Case Generation Based on Large Language Models for Improving Test Engineers' Efficiency in Safety Testing 287
Qingran Su (Beihang University, China), Xingze Li (Beihang University, China), Yuming Ren (Beihang University, China), Xulang Ouyang (Beihang University, China), Chunming Hu (Beihang University, China), and Yongfeng Yin (Beihang University, China)
- Failing and Learning: A Study of What is Learned About Reliability From Software Incidents..... 295
Jonathan Sillito (Brigham Young University) and Matt Pope (Brigham Young University)

IWSF-SHIFT 2024 Workshop

Session I

- Toward CPS Security Monitoring: Employing Multi-Agent Systems and Digital Twins 303
Zoé Lagache (Univ. Grenoble Alpes, France), Annabelle Mercier (Univ. Grenoble Alpes, France), Oum-El-Kheir Aktouf (Univ. Grenoble Alpes, France), and Arthur Baudet (Univ. Grenoble Alpes, France)
- An Empirical Study on Predicting Software Development Bugs Using Dynamic Bayesian Networks.... 307
Kiyoshi Honda (Osaka Institute of Technology, Japan), Hironori Washizaki (Waseda University, Japan), Yoshiaki Fukazawa (Waseda University, Japan), Masahiro Taga (e-Seikatsu Co., Ltd., Japan), Akira Matsuzaki (e-Seikatsu Co., Ltd., Japan), Kazuyuki Nakagawa (e-Seikatsu Co., Ltd., Japan), and Yusuke Sakai (e-Seikatsu Co., Ltd., Japan)
- A Novel Fuzzing Mutation Scheduling Method based on Evolutionary Strategy 311
Leyang Xu (Jiangsu University, China) and Xinghao Yang (Jiangsu University, China)

Session II

Energy Bugs in Object Detection Software on Battery-Powered Devices	313
<i>Ippo Hiroi (University of Tsukuba, Japan), Fumio Machida (University of Tsukuba, Japan), and Ermeson Andrade (Federal Rural University of Pernambuco, Brazil)</i>	
C Source Code Generation from IR Towards Making Bug Samples to Fluctuate for Machine Learning	321
<i>Yuto Sugawa (Nihon University, Japan), Chisato Murakami (Nihon University, Japan), and Mamoru Ohara (Tokyo Metropolitan Industrial Technology Research Institute, Japan)</i>	

ReSAISE 2024 Workshop

Session I: Safety and Reliability of Autonomous Systems

Better and Safer Autonomous Driving with Predicted Object Relevance	329
<i>Andrea Ceccarelli (University of Florence, Italy) and Leonardo Montecchi (NTNU, Norway)</i>	
Safety-Aware Weighted Voting for N-Version Traffic Sign Recognition System	337
<i>Linyun Gao (University of Tsukuba, Japan), Qiang Wen (University of Tsukuba, Japan), and Fumio Machida (University of Tsukuba, Japan)</i>	
Towards Improved Perception System's Generalization Through Generative Artificial Intelligence	345
<i>Jiawei Wang (University of Coimbra, Portugal), João R. Campos (University of Coimbra, Portugal), and Henrique Madeira (University of Coimbra, Portugal)</i>	

Session II: Testing and Security of AI and Robotic Systems

Enhancing Neuron Coverage of DNN Models for Adversarial Testing	353
<i>Zimu Tang (Beihang University, China), Jun Ai (Beihang University, China), and Jie Wang (Beihang University, China)</i>	
A Study on Prompt Injection Attack Against LLM-Integrated Mobile Robotic Systems	361
<i>Wenxiao Zhang (The University of Western Australia, Australia), Xiangrui Kong (The University of Western Australia, Australia), Conan Dewitt (The University of Western Australia, Australia), Thomas Braunl (The University of Western Australia, Australia), and Jin B. Hong (The University of Western Australia, Australia)</i>	

WDMD 2024 Workshop

World Models: The Safety Perspective	369
<i>Zifan Zeng (Huawei Technologies Duesseldorf GmbH, Germany; Technical University of Munich, Germany), Chongzhe Zhang (Huawei Technologies Duesseldorf GmbH, Germany; Technical University of Berlin, Germany), Feng Liu (Huawei Technologies Duesseldorf GmbH, Germany), Joseph Sifakis (Univ. Grenoble Alpes, CNRS, Grenoble INP, VERIMAG and SUSTECH/RITAS, France), Qunli Zhang (Huawei Technologies Duesseldorf GmbH, Germany), Shiming Liu (Huawei Technologies Co., Ltd, China), and Peng Wang (Huawei Technologies Co., Ltd, China)</i>	
Developing a Dependable Multi-Agent Rover Swarm Using cFS	377
<i>Pavlo Vlastos (NASA Ames Research Center, CA), Irfan Sljivo (NASA Ames Research Center, CA), Corey Carter (NASA Ames Research Center, CA), and Aaron Woodard (NASA Ames Research Center, CA)</i>	
Toward Deterministic Wireless Communication: Latency Prediction Using Network Measurement Data	383
<i>Lizhi Zhang (Huawei Technologies Co., Ltd., China), Jingwei Fu (Huawei Technologies Co., Ltd., China), Yan He (Huawei Technologies Co., Ltd., China), and Xiaobin Jiang (Huawei Technologies Co., Ltd., China)</i>	
Reliability Analysis of Man-Machine Systems Considering Imperfect Error Coverage Model	385
<i>Chuji Guo (Wuhan University of Technology, China), Yu Lin (China Electronic Product Reliability and Environmental Testing Research Institute, China), Ling Dong (Shenglong Electric Group Co., Ltd., China), Zhijie Feng (Wuhan University of Technology, China), Luyao Ye (Wuhan Textile University, China), Wenhua Hu (Wuhan University of Technology, China), Siwei Zhou (Guangdong Ocean University, China), and Jianwen Xiang (Wuhan University of Technology, China)</i>	
Training Overhead Ratio: A Practical Reliability Metric for Large Language Model Training Systems	391
<i>Ning Lu (TTE Lab, Huawei Technologies Co., Ltd.; Southern University of Science and Technology; Hong Kong University of Science and Technology), Qian Xie (TTE Lab, Huawei Technologies Co., Ltd.), Hao Zhang (TTE Lab, Huawei Technologies Co., Ltd.), Wenyi Fang (TTE Lab, Huawei Technologies Co., Ltd.), Yang Zheng (TTE Lab, Huawei Technologies Co., Ltd.), Zheng Hu (TTE Lab, Huawei Technologies Co., Ltd.), and Jiantao Ma (Huawei Computing, Huawei Technologies Co., Ltd.)</i>	

WoSAR 2024 Workshop

Session I

A CTMDP Modeling for Multi-Stage Software Aging and Rejuvenation	394
<i>Nianqiu Wang (University of Tsukuba, Japan) and Fumio Machida (University of Tsukuba, Japan)</i>	

Quantitative Evaluation of Software Rejuvenation of a Pool of Service Replicas	402
<i>Leonardo Scommegna (University of Florence, Italy), Marco Becattini (University of Florence, Italy), Giovanni Fontani (University of Florence, Italy), Leonardo Paroli (University of Florence, Italy), and Enrico Vicario (University of Florence, Italy)</i>	

Session II

Measurements and Models for Resiliency Assessment of VM Clusters under Aging and Rejuvenation	410
<i>Alberto Avritzer (EsulabSolutions Inc., USA), Andrea Janes (Free University of Bolzano-Bozen, Italy), Andrea Marin (Università Ca' Foscari di Venezia, Italy), Daniel S. Menasché (Universidade Federal do Rio de Janeiro, Brazil), Catia Trubiani (Gran Sasso Science Institute, Italy), André B. Bondi (Software Performance and Scalability Consulting LLC, USA), and James J. Cusick (Ritsumeikan University, Japan)</i>	
Splitting Application Input into Batches as a Countermeasure Against Software Aging	418
<i>Carlos Eduardo de Schuller Banjar (UFRJ, Brazil), Daniel Sadoc Menasche (UFRJ, Brazil), and Alberto Avritzer (eSulab Solutions, NJ)</i>	
Evaluation of Software Aging in Hyperledger Fabric	426
<i>Kojiro Soeda (Tokyo Metropolitan University) and Xiao Xiao (Tokyo Metropolitan University)</i>	

Author Index	435
---------------------------	------------
