# TABLE OF CONTENTS

|                                                                                                                                                         |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Exploring Energy Culture and Efficiency Awareness: Insights from Private and Public Sectors in Romania .....                                            | 1  |
| <i>Claudia Muresan, Denisa Stet, Stefan Cirstea, Levente Czumbil, Alexis Polycarpou, Dan D. Micu</i>                                                    |    |
| Next-Day Solar Irradiance Forecasting: A Preliminary Study in Limassol .....                                                                            | 8  |
| <i>Konstantinos Fragkos, Georgia Charalampous, Ilias Fountoulakis, Kyriakoula Papachristopoulou, Diofantos Hadjimitsis, Stelios Kazadzis</i>            |    |
| Innovation Management in Research Infrastructure Services for Renewable Energy .....                                                                    | 13 |
| <i>Elizabeth Xenophondos, Venizelos Efthymiou</i>                                                                                                       |    |
| Power Quality Analysis of Railway Traction Power Substation Using Eighteen-Pulse Rectifier Phase-shifting Transformer System .....                      | 18 |
| <i>Michele De Santis, Luigi Rubino, Emanuele Prandi</i>                                                                                                 |    |
| Enhancing Management and Control of Renewable Energy Communities: A Practical Implementation .....                                                      | 23 |
| <i>A. R. Di Fazio, F. Conte, G. Natrella</i>                                                                                                            |    |
| Techno-Economic Evaluation of Energy Community Configurations Based on the Individual Economic Benefit of the Members: The Case of Cyprus .....         | 28 |
| <i>Georgios Yiasoumas, Andreas V. Olympios, George E. Georghiou</i>                                                                                     |    |
| The Study of Urban Heat Island Effect in Limassol, Cyprus Using Sentinel-3 Data .....                                                                   | 33 |
| <i>Kyriacos Themistocleous, Christodoulos Demetriou, Diofantos Hadjimitsis, Kyriacos Themistocleous, Christodoulos Demetriou, Diofantos Hadjimitsis</i> |    |
| Deep Reinforcement Learning Based Energy Management System for Controlling Storage Systems in a Cluster of Buildings: Cypriot Use Case .....            | 37 |
| <i>Parisa Hajialigol, Panayiotis Papadopoulos, Ioanna Kyprianou, Mohammadreza Aghaei</i>                                                                |    |
| The CONCERTI Project: from Magliano Alpi's Energy Community to an Innovative Integrated Inter-Municipal Energy Sharing Paradigm .....                   | 42 |
| <i>Riccardo Trevisan, Emilio Ghiani, Sergio Olivero, Marco Bailo, Francesco Meneghetti</i>                                                              |    |
| Introduction of Hydrogen Technologies to Mitigate the Impact of Thermal Consumption in a University Campus .....                                        | 48 |
| <i>Jorge Bracho, Chrysanthos Charalambous, Venizelos Efthymiou, Dimitrios Lagos, Tomasz Samotyjak, Magnus Askeland, George E. Georghiou</i>             |    |
| Optimization of Residential Net Load Using Demand Response and Battery Storage .....                                                                    | 53 |
| <i>Jorge Bracho, Neofytos Ilia, George Makrides, Alex R. Tseng, Panagiotis Herodotou, George E. Georgiou</i>                                            |    |
| Enhancing the Smart Readiness Indicator Scheme: Methodology Assessment Through 20 Use Cases .....                                                       | 58 |
| <i>Afroditi Zamanidou, Despoina Kothona, Paris Fokaides, Georgios C. Christoforidis</i>                                                                 |    |
| The Nexus Between Design and Control: A Data-Driven Approach for Leveraging Flexibility Potential of Micro-grids .....                                  | 63 |
| <i>A. Maturo, B. Delcroix, A. Buonomano, A. Athienitis</i>                                                                                              |    |

|                                                                                                                                                                                                                       |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Towards Dynamic Pricing Algorithm for Residential Buildings: A Model Predictive Control Framework for Load Aggregation .....                                                                                          | 68  |
| <i>A. Petrucci, C. Vallianos, J. Candanedo, B. Delcroix, A. Buonomano, A. Athienitis</i>                                                                                                                              |     |
| Classifying Tomorrow's Currents: A Probabilistic Neural Network Approach to Forecasting Electricity Prices.....                                                                                                       | 73  |
| <i>Stylianios Loizidis, Andreas Livera, Andreas Kyprianou, George E. Georghiou</i>                                                                                                                                    |     |
| Study on the Development of an Underground Fiber Optic Network Alongside Electrical Distribution Systems in Greece .....                                                                                              | 78  |
| <i>Theofano Kollatou, Alexandra Karamouza, Dimitrios Stimoniaris, Nikolaos Lettas, Dimitrios Tsiamitros, Evangelos Boutsiadis, Stefanos Beis</i>                                                                      |     |
| Data-Driven Predictive Maintenance Alerting Routine for Utility-scale Photovoltaic Systems .....                                                                                                                      | 83  |
| <i>Demetris Marangis, Andreas Livera, George Makrides, George E. Georgiou</i>                                                                                                                                         |     |
| Towards Detecting Non-Technical Losses in Electrical Power Systems with Machine Learning.....                                                                                                                         | 88  |
| <i>Vasilis Perifanis, Christos L. Athanasiadis, Nikolaos Pavlidis, Pavlos S. Efrimidis, Theofilos A. Papadopoulos</i>                                                                                                 |     |
| Insights into Household Energy Consumption: Disaggregating Cooling and Heating Profiles Using Principal Component Analysis .....                                                                                      | 93  |
| <i>Stylianios Loizidis, Fanourios Kourougianni, Andreas V. Olympios, Andreas Kyprianou, George E. Georghiou</i>                                                                                                       |     |
| Synthetic Data for Non-Intrusive Load Monitoring: A Markov Chain Based Approach.....                                                                                                                                  | 98  |
| <i>Burak Cem Sayilar, Gamze Mihçi, Oguzhan Ceylan</i>                                                                                                                                                                 |     |
| Power Oscillations Damping Controller for a M-SSSC FACTS Device: The SmartValve™ Case.....                                                                                                                            | 103 |
| <i>Dimitrios Zografos, Panagiotis Eleftheriadis, Juan Botero, Camilo Ordonez</i>                                                                                                                                      |     |
| Considering Li-Ion Battery Cell Ageing in Energy Storage Solutions .....                                                                                                                                              | 108 |
| <i>Richard Stocker, Asim Mumtaz, Neophytos Lophitis</i>                                                                                                                                                               |     |
| Evaluation of Low Frequency Characteristics of Li-Ion Cells Using Laplace Transformation.....                                                                                                                         | 113 |
| <i>Richard Stocker, Asim Mumtaz, Neophytos Lophitis</i>                                                                                                                                                               |     |
| Design and Modeling of a Proton Exchange Membrane Electrolyzer-Compressed Hydrogen Storage-Proton Exchange Membrane Fuel Cell Green Hydrogen Subsystem for Integration to a Solar Photovoltaic-Battery Nanogrid ..... | 118 |
| <i>Alexandros Arsalis, Fanourios Kourougianni, Andreas V. Olympios, Panos Papanastasiou, George E. Georghiou, Charalampos Konstantinou</i>                                                                            |     |
| Mathematical Modeling of an Anion Exchange Membrane Electrolyzer for Integration in a Novel Solar Photovoltaic-Battery-Green Hydrogen Nanogrid.....                                                                   | 123 |
| <i>Alexandros Arsalis, Panos Papanastasiou, George E. Georghiou</i>                                                                                                                                                   |     |
| Droop-Control-Aided State Estimation in Active Distribution Systems .....                                                                                                                                             | 128 |
| <i>Stelios C. Dimoulas, Georgios C. Kryonidis, Kyriaki-Nefeli D. Malamaki, Eleftherios O. Kontis, Fotios P. Fotellis, Apostolos N. Milioudis, Esther Romero-Ramos</i>                                                 |     |
| A Framework for Evaluating Contributions of Inverter Based Resources to Grid Performance.....                                                                                                                         | 133 |
| <i>Andreas Hadjileonidas, Timothy C. Green</i>                                                                                                                                                                        |     |
| Attaining Reactive Power Capability Requirements for Offshore Wind Power Systems.....                                                                                                                                 | 138 |
| <i>Gioacchino Tricarico, Maria Dicorato, Giuseppe Forte, Francesca Marasciuolo</i>                                                                                                                                    |     |

|                                                                                                                                                                   |     |
