# TABLE OF CONTENTS

|                                                                                                                                    |    |
|------------------------------------------------------------------------------------------------------------------------------------|----|
| Global and Local Fusion Method for Path Planning and Formation Control of Multiple Unmanned Systems.....                           | 1  |
| <i>Xiaohan Ma, Tao Wang, Chen Gao, Zihao Rao</i>                                                                                   |    |
| Color Image Segmentation of Dental Caries using U-Net Enhanced with Residual Blocks and Attention Mechanisms.....                  | 7  |
| <i>Amirreza Rouhbakhshmeghraz, Bo Li, Wajid Iqbal</i>                                                                              |    |
| IoT-Based Leftover Food Segmentation System for Healthcare .....                                                                   | 13 |
| <i>Shunsuke Hayashi, Ryuto Ishibashi, Lin Meng, Mingcong Deng</i>                                                                  |    |
| An Improved Algorithm for Spiking Neural Networks with Multi-Scale Attention Coding.....                                           | 19 |
| <i>Sisi Chen, Xiaofeng Chen, Weikai Li</i>                                                                                         |    |
| Improved Domain-Adversarial Neural Networks with Mixup and Pseudo-Labeling .....                                                   | 25 |
| <i>Xiongtao Xiao, Xiaofeng Chen, Weikai Li</i>                                                                                     |    |
| Multi-Strategy Hybrid Grey Wolf Optimizer .....                                                                                    | 31 |
| <i>Yufan Wang, Yiming Sun, Jinliang Li, Jingsong Zheng, Xiaowei Fu</i>                                                             |    |
| Incremental Image Captioning with Attention to Transient via Kolmogorov-Arnold Network.....                                        | 37 |
| <i>Kexin Li, Hua Li, Xiaofeng Chen, Xiongtao Xiao</i>                                                                              |    |
| Topology-Enhanced Multi-Modal Residual Graph Convolutional Network for Autism Spectrum Disorder Identification.....                | 43 |
| <i>Jipeng Deng, Lihe Guan, Weikai Li</i>                                                                                           |    |
| Synthesizing A $\beta$ -PET Based on Multi-Modal Neuroimaging Fusion for Pathological Diagnosis of Alzheimer's Disease .....       | 49 |
| <i>Yueteng Yang, Bing Li, Weikai Li, Haifeng Chen, Wenming Cao</i>                                                                 |    |
| Research on Manned/Unmanned Aircraft Formation Cooperative Task Allocation Based on Hierarchical Hybrid Auction Algorithm .....    | 55 |
| <i>Wu Yunhui, Wan Kaifang, Wu Zhilin, Qiang Haozhi, Gao Xiaoguang</i>                                                              |    |
| Dynamic Graph Contrastive Learning for Neuro Disease Identification using Resting-State fMRI.....                                  | 61 |
| <i>Yulang Jiang, Weikai Li, Xiaofeng Chen</i>                                                                                      |    |
| Universum Inspired Graph Contrast Learning for Autism Spectrum Disorder Identification .....                                       | 67 |
| <i>Hao Qin, Xiaowen Xu, Weikai Li</i>                                                                                              |    |
| Multi-View Comparative Self-Supervised Graph Learning for Neuro-Disease Diagnosis using Functional Brain Networks.....             | 73 |
| <i>Nan Tian, Xiaowen Xu, Weikai Li</i>                                                                                             |    |
| Enhancing Functional Brain Network Construction for Neurological Disorder Diagnosis Through Modularity-Driven Regularization ..... | 79 |
| <i>Danjie Sun, Xiaofeng Chen, Weikai Li</i>                                                                                        |    |
| A Comparative Study on Semi-Supervised Medical Image Segmentation Methods.....                                                     | 85 |
| <i>Tong He, Jinjia Liu, Juan Cao</i>                                                                                               |    |

|                                                                                                                                                               |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Adaptive Optimization Multi-Layer Perceptron for Emotion Recognition from EEG Brain Maps .....                                                                | 91  |
| <i>Qiao Lan, Bingrui Geng, Yaling Deng, Ye Wang, Huihong Lin</i>                                                                                              |     |
| An Improved Algorithm for Flight Maneuver Recognition and Evaluation Based on Support Vector<br>Machines .....                                                | 97  |
| <i>Xiaokang Li, Tianyi Zhu, Zimu Bian, Zhuxin Yu, Xiaoguang Gao, Kaifang Wan</i>                                                                              |     |
| Enhancing Image Clustering with CLIP .....                                                                                                                    | 103 |
| <i>Mengjuan Li, Wenming Cao, Lei Zhang, Man Li, Mingming Yang</i>                                                                                             |     |
| A Multi-Granular Group Decision-Making Approach Integrating Sentiment Analysis for Clustering<br>According to Positivity .....                                | 109 |
| <i>José Ramón Trillo, Santiago Carbó-García, Ignacio Javier Pérez, Juan Antonio Morente-<br/>Molinera, Francisco Javier Cabrerizo, Enrique Herrera-Viedma</i> |     |
| An Attention-Based Dual-Evaluation Learning Architecture for Collaborative Target Encirclement.....                                                           | 115 |
| <i>Wen Xing, Wei Dong, Ze Liu, Jiaming Dong, Tao Chen</i>                                                                                                     |     |
| Survey of Malware Detection Through Use of Neural Network Models .....                                                                                        | 121 |
| <i>Joshua Bean, Stephen A. Torri</i>                                                                                                                          |     |
| Research on Informative Path Planning using Deep Reinforcement Learning.....                                                                                  | 128 |
| <i>Wajid Iqbal, Bo Li, Amirreza Rouhbakhshmeghraz</i>                                                                                                         |     |
| GPNN: Grouped Point-NN for More Efficient Point Cloud Classification.....                                                                                     | 134 |
| <i>Yuga Ono, Ryuto Ishibashi, Lin Meng</i>                                                                                                                    |     |
| Multi-Scale Variable Window Attention Network for Continuous Sign Language Recognition.....                                                                   | 140 |
| <i>Nan Zhang, Chao Wei, Leming Guo, Zeyu Cheng, Zhao Zhao, Yangcan Wu, Wanli Xue</i>                                                                          |     |
| Multi-Stage Dynamic Dual-Channel Supply Chain with Sales Efforts .....                                                                                        | 146 |
| <i>Hongyu Ren, Limin Wang, Shuoyang Gao</i>                                                                                                                   |     |
| Exploring the Crowdsourced Emergency Information Collaborative Management Model using<br>Constructing Grounded Theory .....                                   | 152 |
| <i>Hongzhou Shen, Pupu Liu, Qirui Chen</i>                                                                                                                    |     |
| Fault-Tolerant Trajectory Tracking Control for Underactuated UUV Based on Fast Terminal Sliding<br>Mode.....                                                  | 158 |
| <i>Haomiao Yu, Yue Wang, Sihan Ren</i>                                                                                                                        |     |
| Underwater Target Encirclement by multi-UUV Based on Finite-Time Event-Triggered Time-<br>Varying Formation.....                                              | 164 |
| <i>Lu Xu, Di Wu, Qiuyu Chen, Zhe Zhang, Chuanlong Zhang, Lichao Hao</i>                                                                                       |     |
| PCB Defect Detection Method Based on G-YOLOv8 .....                                                                                                           | 170 |
| <i>Chao Gao, Mengting Bai, Xiaoqin Lian, Xiangyu Hu, Shuangshuang Han, Shichao Chen</i>                                                                       |     |
| Nighttime Object Detection with Denoising Diffusion-Probabilistic Models .....                                                                                | 176 |
| <i>Samuel Akwasi Agyemang, Haobin Shi, Xuan Nie, Nana Yaw Asabere, Bo Li</i>                                                                                  |     |
| Two-Stage Stains Reduction with Diffusion Models for Ancient Japanese Manuscripts .....                                                                       | 182 |
| <i>Yuya Yoshizu, Hayata Kaneko, Ryuto Ishibashi, Lin Meng, Mingcong Deng</i>                                                                                  |     |
| Research on the Development and Application of High-Precision 5G Timing Terminal .....                                                                        | 188 |
| <i>Longyang Wang, Zhenyu Liu, Wensa Wang, Xin Luo, Tao Wang</i>                                                                                               |     |

|                                                                                                                                        |     |
|----------------------------------------------------------------------------------------------------------------------------------------|-----|
| Super-Resolution Reconstruction of UAV Images with GANs: Achievements and Challenges .....                                             | 194 |
| <i>Amirreza Rouhbakhshmeghraz, Bo Li, Wajid Iqbal, Ghazal Alizadeh</i>                                                                 |     |
| Energy-Saving Path Planning Method for Unmanned Surface Vehicles Based on Curiosity-Driven Reinforcement Learning .....                | 200 |
| <i>Mengmeng Lou, Xiaofei Yang, Jiabao Hu, Qi Wang</i>                                                                                  |     |
| Enhancing Efficiency of Automated Medication Delivery via Reinforcement Learning in Hospital Settings .....                            | 206 |
| <i>Anna A. Nardelli, Luke Shao, Brandon Hu, Jiacun Wang</i>                                                                            |     |
| MCMS-Net: An Underwater Target Detection Network Based on Multi-Conv Multi-Scale Feature Fusion .....                                  | 212 |
| <i>Jiajia Zhou, Danmi Xu, Qingnan Han, Yang Wu, Shangze Li, Chunyu Tan</i>                                                             |     |
| Microscope Autofocus Based on Difference of Gaussians and Triplet Loss .....                                                           | 218 |
| <i>Wujie Chen, Xuehao Shen, Zhengxia Wang</i>                                                                                          |     |
| Multi-Modal Guidance for 3D Driver Pose Estimation with Diffusion .....                                                                | 224 |
| <i>Rui Wang, Xiaoyang Yu, Huihui Huang, Zhuang Miao, Chunxiao Ren, Muwei Jian, Hui Yu</i>                                              |     |
| A Channel Fusion Convolutional Neural Network for Lung Nodule Detection.....                                                           | 229 |
