**Volume 13131**

Proceedings of SPIE 0277-786X, V. 13131

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Current Developments in Lens Design and Optical Engineering XXV*, edited by Virendra N. Mahajan, Simon Thibault, Ching-Cherng Sun, Proc. of SPIE 13131, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## DEVELOPMENTS OF OPTICAL TECHNIQUES (DESIGN, ANALYSIS, AND EXPERIMENTS)

---

- 13131 02 **Differential high accuracy refraction measuring apparatus: DHARMA – a new source of cryogenic refractive index measurements** [13131-1]
- 13131 03 **Integration of optical waveguide technology with multichannel color sensors for enhanced urine test strip analysis system (Invited Paper)** [13131-5]

---

## 25 YEARS OF DEVELOPMENTS IN LENS DESIGN AND OPTICAL ENGINEERING: JOINT SESSION WITH 13131 AND 13130

---

- 13131 04 **25 years of current developments in lens design and optical engineering: a review** [13131-6]
- 13131 05 **25 years of progress in lithographic optics design methods (Invited Paper)** [13131-8]
- 13131 06 **25 years of simulation: the bridge between dreams and reality (Invited Paper)** [13131-9]

---

## AI AND DEEP LEARNING IN OPTICAL ENGINEERING

---

- 13131 07 **Restoration of encoded images by a trefoil phase mask using deep learning** [13131-10]
- 13131 08 **Hand vein pattern classification using wavelet moments and convolutional neural networks** [13131-13]

---

## NEW LENS AND SYSTEM DESIGN

---

- 13131 09 **New active large liquid primary mirror for space applications** [13131-16]
- 13131 0A **Athermalizing mounted doublets with ALLVAR alloys** [13131-18]
- 13131 0B **Using off-the-shelf components in the design of curved compound eye camera systems** [13131-17]

#### OPTICAL MATERIAL AND METASURFACES

---

- 13131 0C **UV-replicated monolithic polymer optics for high-volume imaging and sensing applications (Invited Paper)** [13131-19]
- 13131 0D **Recent progress on raytracing through metasurfaces** [13131-20]
- 13131 0E **Silicon metalens toward a fully silicon integrated SWIR sensing** [13131-21]
- 13131 0F **Thermal, spectral, and operational upgrades to CHARMS and temperature dependent refractive index measurements of Si and Ge from 35 to 310 K** [13131-22]

#### POSTER SESSION

---

- 13131 0G **Power allocation schemes in optical wireless communication** [13131-24]
- 13131 0H **Development of transmission and receiving optical antenna for free space laser communication** [13131-26]
- 13131 0I **Design of ophthalmic contact lens using Q-type aspheres with reduced error budget for high visual acuity** [13131-30]
- 13131 0J **Optical simulation of the white light display color change of the bulk scattering diffuser used in the mini-LED backlight module** [13131-31]
- 13131 0K **Optical design of a single freeform lens for both counter-beam and pro-beam in LED tunnel lighting** [13131-32]
