Hard X-Ray, Gamma-Ray, and Neutron Detector Physics XXVI

Nerine J. Cherepy Michael Fiederle Ralph B. James Editors

19–21 August 2024 San Diego, California, United States

Sponsored and Published by SPIE

Volume 13151

Proceedings of SPIE 0277-786X, V. 13151

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in Hard X-Ray, Gamma-Ray, and Neutron Detector Physics XXVI, edited by Nerine J. Cherepy, Michael Fiederle, Ralph B. James, Proc. of SPIE 13151, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510679627 ISBN: 9781510679634 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

SCINTILLATORS I

Developments of advanced crystal growth techniques and novel scintillators (Invited Paper) [13151-5]
Versatile Hg2Br2 scintillation detector for wearable, real-time detection of alpha-particles in drinking water, as well as other forms of nuclear radiations with excellent radiation hardness (Invited Paper) [13151-8]
Characterization of elpasolite (Cs,TI)2LiLaBr6:Ce (CTLLB) crystal performance after sequential gamma irradiation exposure (Invited Paper) [13151-9]
SCINTILLATORS II
Luminescence and scintillation of Cs ₃ Cu ₂ I ₅ :Tl and Cs ₃ Cu ₂ I ₅ :Ag scintillators [13151-10]
The characterization of a perovskite Cs ₃ Cu ₂ I ₅ scintillator for the gamma-ray detection [13151-13]
APPLICATIONS I
The design of the lunar-VISE gamma ray neutron spectrometer [13151-14]
On-orbit performance of Glowbug, a telescope on the ISS for gamma-ray transients (Invited Paper) [13151-16]
PEROVSKITES AND WIDEBAND GAP SEMICONDUCTORS

13151 09 Advances on radiation-tolerant Geiger photodiodes [13151-19]

APPLICATIONS II

- 13151 0A Autonomous ground-based robotic system for preparatory consequence management radiation mapping and forensic studies (Invited Paper) [13151-21]
- 13151 OB Backscatter slant function analysis of suspected explosive component materials [13151-23]
- 13151 0C Development of a novel optical calibration system for nuclear imaging [13151-24]

SEMICONDUCTORS

- 13151 0D Determining the quantum detection efficiency of a soft x-ray micro-channel plate detector for the lunar mission, LEXI [13151-29]
- 13151 OE Development of semiconductor radiation detectors using GaN [13151-30]

APPLICATIONS III

- 13151 OF Modeling and testing of high-temperature 4H-SiC Schottky diode radiation detectors using thermionic and field emission models [13151-32]
- 13151 0G Defect characterization by electron paramagnetic resonance in 4H-SiC irradiated by low fluence rate alpha particles [13151-33]
- 13151 OH Quantum sensing using a qubit for the detection of ionizing radiation [13151-34]
- 13151 01 Display and manipulation of x-ray CT tomograms according to the position of the practitioner's viewpoint using mixed reality [13151-35]
- 13151 0J XFI: recent applications and detector requirements [13151-36]

POSTER SESSION

- 13151 OK Spectrometric properties of single and series-connected Cr/CdTe/Au Schottky-diode detectors [13151-4]
 13151 OL Ionic and electronic conduction in TIBr and CsPbBr₃ semiconductor gamma-ray detectors [13151-37]
 13151 OM Electro-physical properties of surface-barrier diodes on low-resistance n-Cd_{0.96}Mn_{0.04}Te_{0.96}Se_{0.04} crystals [13151-38]
- 13151 0N Peculiarities of CsPbBr₃ perovskites melting in quasi-equilibrium conditions [13151-39]
