

PROCEEDINGS OF SPIE

# ***High-Power Lasers and Technologies for Optical Countermeasures II***

**Willy L. Bohn  
Marc Eichhorn  
Gareth D. Lewis**  
*Editors*

**16–18 September 2024  
Edinburgh, United Kingdom**

*Sponsored by*  
SPIE

*Event Sponsor*  
Leonardo MW Ltd. (United Kingdom)

*General Sponsors*  
HGH Infrared Systems (France) • Photon Lines Ltd. (United Kingdom) • Pro-Lite Technology Ltd. (United Kingdom) •  
Thales (United Kingdom)

*Cooperating Organisations*  
Cranfield University (United Kingdom) • Quantum Security and Defense Working Group (United Kingdom) • CENSIS  
(United Kingdom) • Innovate UK (United Kingdom) • Optoelectronics Research Centre (United Kingdom) • Photonics21  
(Germany) • Technology Scotland (United Kingdom) • Science and Technology Facilities Council (United Kingdom) •  
UKQuantum (United Kingdom) • Visit Britain (United Kingdom)

*Published by*  
SPIE

**Volume 13201**

Proceedings of SPIE 0277-786X, V. 13201

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power Lasers and Technologies for Optical Countermeasures II*, edited by Willy L. Bohn, Marc Eichhorn, Gareth D. Lewis, Proc. of SPIE 13201, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## LASER AND BEAM COMBINATION

- 13201 02 **Advanced concepts of Ho<sup>3+</sup>:YAG and ZGP OPO sources (Invited Paper)** [13201-1]
- 13201 03 **Numerical modelling of far-field intensity patterns in coherent beam combining (Best Paper Award)** [13201-6]
- 13201 04 **Cavity free optical parametric oscillators** [13201-7]

---

## LASER EFFECTS AND SIMULATIONS I

- 13201 05 **Space laser engagement to defeat satellites (Invited Paper)** [13201-8]
- 13201 06 **Decomposition and vulnerability of CFRP under laser impact with powers of up to 120 kW** [13201-16]
- 13201 07 **Measuring and modelling laser heating of metals, coatings, and other construction materials** [13201-17]
- 13201 08 **Modelling the complete DTIN killchain: a comparative study of laser and kinetic effectors with RADAR detection against small drones in counter-UAS scenarios** [13201-19]
- 13201 09 **Evaluation of directed energy laser weapon impacts on satellites through thermal simulation with MuSES** [13201-20]

---

## LASER EFFECTS AND SIMULATIONS II

- 13201 0A **Assessing laser dazzling effects on UAV cameras and collision avoidance in laboratory and field settings** [13201-21]
- 13201 0B **Simulation of the reflection of a high energy laser beam at the sea surface for laser safety assessments** [13201-22]
- 13201 0C **Non-linear laser dazzling an off-band filtered mid-infrared imager** [13201-25]
-

## **LASER APPLICATIONS**

---

- 13201 0D **Considerations on thermal blooming in relation to modern HEL systems** [13201-27]
- 13201 0E **High-energy lasers for C-UAS applications** [13201-23]
- 13201 0F **The influence of optical turbulence on closed-loop DIRCM identification performance**  
[13201-28]
- 13201 0G **High energy lasers as an anti-satellite capability (Invited Paper)** [13201-29]
