PROCEEDINGS OF SPIE

Photomask Technology 2024

Seong-Sue Kim Lawrence S. Melvin III Editors

30 September–3 October 2024 Monterey, California, United States

Sponsored by

Cosponsored by EUV Technology (United States) Photronics Inc. (United States)

Published by SPIE

Volume 13216

Proceedings of SPIE 0277-786X, V. 13216

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in *Photomask Technology 2024*, edited by Seong-Sue Kim, Lawrence S. Melvin III, Proc. of SPIE 13216, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510681576 ISBN: 9781510681583 (electronic)

Published by **SPIE** P.O. Box 10, Bellingham, Washington 98227-0010 USA Telephone +1 360 676 3290 (Pacific Time) SPIE.org Copyright © 2024 Society of Photo-Optical Instrumentation Engineers (SPIE).

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix Conference Committee

WEDNESDAY ALL-SYMPOSIUM PLENARY

13216 03 EUV mask technologies: evolution and ecosystem for devices (Plenary Paper) [13216-504]

JOINT SESSION WITH PHOTOMASK AND EUVL: PROSPECTS OF CURRENT AND FUTURE EUVL

- 13216 04 Logic and memory patterning breakthrough using High-NA lithography (Invited Paper) [13216-119]
- 13216 06 Towards a 1000W-compatible EUV pellicle (Invited Paper) [13216-3]

BLANK AND ETCH

- 13216 07 Etching approaches for next generation EUV photomask materials (Invited Paper) [13216-4]
- 13216 08 Atomic layer etching process application to TaO hard-mask etching for next-generation EUV (Extreme-Ultraviolet) photomask fabrication [13216-6]
- 13216 0A Effective medium approximation for EUV multilayer intermixing (BACUS Best Presentation Award) [13216-7]
- 13216 OC Low-n absorber EUV masks: mask manufacturing assessment through process characterization and optimization with early look at EUV Low-NA and High-NA imaging performance [13216-9]

MASK PATTERNING

- 13216 OE Requirements and strategies of High-NA EUV mask using MBMW [13216-11]
- 13216 OF New applications on multi-beam mask writers to enable mask-making in 3nm and beyond [13216-12]
- 13216 0G Comparative study of bulk-sleeve dose split for curvilinear mask shapes [13216-13]
- 13216 OH Mask performance improvement by pixel level dose correction [13216-15]

13216 01	Unfolding the curves: novel designs and metrology methods for curvilinear masks qualification [13216-16]
13216 OJ	Translating e-beam lithography performance to optical specifications [13216-40]
13216 OK	PEC parameter optimization for EUV short-range effect utilizing MPC model calibration techniques [13216-17]
13216 OL	Evaluating high-throughput mask systems for mainstream technology applications [13216-18]
	INSPECTION, REPAIR, AND CLEANING
13216 OM	Actinic patterned mask die-to-database inspection for High-NA EUV lithography (Invited Paper) [13216-1]
13216 ON	Adoption of darkfield blank inspector to enhance yield of optical reticles [13216-21]
13216 00	Realize 193nm inspection for EUV mask [13216-22]
13216 OP	Advanced EUV printability simulation study of photomask repair solutions [13216-23]
13216 0Q	Repair processes on next generation EUV materials [13216-19]
13216 OR	Advanced absorber and compensation repair for EUV reticles utilizing a novel e-beam- based repair technique [13216-20]
13216 OT	Rapid freeze-cleaning method [13216-24]

MASK METROLOGY

- 13216 OW AFM nano-IR for photomask in-line defect characterization [13216-28]
- 13216 0Y Novel metrology for mask degradation: IR-AFM, XPS depth profiling and HAXPES [13216-30]

DEFECT, PRINTABILITY, HANDLING, AND PELLICLE

13216 OZ	A study on programmed defect propagation from design to mask to wafer using SEM metrology [13216-31]
1201/11	Productive methods with a measure and of FUN measured of a che [1201/ 70]

1321611 Predictive printability assessment of EUV mask defects [13216-72]

- 1321613 Enhancing fab yield with the high-reliability automation application Reticle Analyzer (RA) [13216-34]
- 1321614 Characteristics of CNT pellicle membrane under hydrogen plasma torture test via TEM and SEM images [13216-35]

MASK WRITERS AND E-BEAM RESIST

1321617 Recent advancement and future plans on electron multi-beam mask writers (Invited Paper) [13216-38]

JOINT SESSION WITH PHOTOMASK AND EUVL: PROSPECTS OF EUV BLANKS

132161C The influence of reflectivity on EUV lithography performance of low-n and binary masks for random logic via implementation [13216-46]

AR/VR, MASK FOR PHOTONICS, AND NANO-IMPRINT

- 13216 1F Metalens response to process variation [13216-48]
- 13216 1G 3-dimensional, high-resolution patterning of quartz mask substrates [13216-49]
- 13216 1H Scalable and adaptable structural metrology for AR/VR device images based on deep learning [13216-50]
- 13216 11 Nanoimprint lithography performance and applications [13216-51]
- 132161J Development of repairing technology for nanoimprint templates by multiple patterning technology [13216-52]

CURVILINEAR MASK TECHNOLOGIES AND MDP

- 13216 1K Curvilinear masks: motivations and metrology (Invited Paper) [13216-113]
- 13216 1L CATS SmartFracture: a new fracture engine for curvilinear and multigon mask data input [13216-53]
- 13216 1M Manhattan and curvilinear mask error correction [13216-55]
- 13216 1N 34nm pitch orthogonal pillar patterning enabled by different mask geometries [13216-56]

- 1321610 Multigon-based curvilinear mask rule checks for advanced mask data preparation applications [13216-57]
- 13216 1Q Assessing need and methodology for mask constraints in ILT applications [13216-117]

MASK DESIGN AND CORRECTIONS

- 13216 11 A method to study the curvature limits of a mask process using a calibrated MPC model [13216-58]
- 13216 10 Design and process-friendly High-NA EUV stitching options [13216-61]
- 13216 1W Integrated mask process modeling for better yield predictions [13216-63]
- 13216 1Y Development of laser-assisted CD correction system in EUV masks [13216-65]

POSTER SESSION

13216 1Z	Contour-based mask quantization methodology for curvilinear ILT mask and on wafer performance analysis [13216-68]
13216 20	Accurate ILT model calibration using curvilinear mask and all-angle gauges [13216-70]
13216 21	Practical challenges of Bézier curves in mask data preparation [13216-71]
13216 22	Enhancing mask process correction on curvilinear data with Bézier curve representation [13216-172]
13216 24	Reducing mask process correction time with hybrid rule-based and model-based solution [13216-74]
13216 25	Optimization of lithography performance at different Manhattan levels of ILT and electron beam shot size [13216-75]
13216 26	Quantitative analysis of field intensity distribution effects on patterning results in laser direct writing lithography [13216-76]
13216 29	Process matching and mask error characterization of standard mask processes using electron beam (EB) mask simulation [13216-79]
13216 2A	Innovative Cr shrinking to improve tritone mask process and inspectability [13216-80]
13216 2B	Productivity-enhanced mask inspection application for mature node coverage [13216-81]

- 13216 2C **Testing plan of NA 0.8 deep UV objective system for semiconductor defect inspection** [13216-82]
- 13216 2D Non-chemical electrolyzed ion waters for EUV mask cleaning [13216-83]
- 13216 2E In-situ acoustic characterization of a MegPie megasonic transducer for photomask cleaning using a wireless sensor array [13216-84]
- 13216 2G First demonstration of MEMS Fabry-Perot pixel arrays for reprogrammable photomasks [13216-86]
- 13216 2H Overlay results on halftone FPD photomasks with an advanced high-productivity lithography system [13216-87]
- 13216 21 Automatic classification of EUV mask defects inspected using DUV inspection optics [13216-88]
- 13216 2J Application of KrF PSM in ArF photolithography processing [13216-89]
- 13216 2L Through pitch line width difference minimization by pixel source optimization [13216-192]
- 13216 2M Improving process window and resolution through source polarization in High-NA EUV [13216-93]
- 13216 20 Next-generation DPP EUV light source to support the HVM lithography ecosystem [13216-95]
- 13216 2P Critical dimension advanced statistical process control closed-loop system in photomask manufacturing [13216-96]
- 13216 2R Sufficient machine learning-based pattern classification for curvilinear layouts [13216-54]
