Volume 13242

Proceedings of SPIE 0277-786X, V. 13242

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Optics in Health Care and Biomedical Optics XIV*, edited by Qingming Luo, Xingde Li, Ying Gu, Dan Zhu, Proc. of SPIE 13242, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Symposium Committees*
xi *Conference Committee*

TRANSLATIONAL OPTICAL TECHNIQUES I

13242 05 **Evaluation of scan protocols for optical coherence tomography angiography** [13242-3]

13242 06 **Airway 3D reconstruction with respiratory motion correction using endoscopic OCT images** [13242-4]

13242 07 **A subcutaneous fingerprint recognition system based on Zynq and OCT technology** [13242-5]

13242 08 **A Python-based study of data processing in OCT system** [13242-6]

13242 09 **Evaluation of superconducting strip single photon detector-based system for singlet oxygen luminescence detection** [13242-7]

TRANSLATIONAL OPTICAL TECHNIQUES II

13242 0B **Measurements of retinal viscoelasticity using acoustic radiation force optical coherence elastography** [13242-9]

13242 0C **Evaluation of the illumination system of a high-end handheld dermatoscope** [13242-10]

13242 0E **A visual tracking-based algorithm for real-time probe localization and 3D reconstruction in optical coherence tomography** [13242-13]

13242 0G **Tumor-associated collagen signatures and their clinical stage correlations in breast cancer as revealed by multiphoton microscopy** [13242-15]

AI IN BIOMEDICAL IMAGING AND DIAGNOSTICS

13242 0L **Frequency space mamba enhanced bidirectional generative network for dual-source CBCT** [13242-20]

13242 0M **DPD-Net: a dual-domain progressive diffusion network for joint limited-angle and metal artifact removal** [13242-21]

13242 0N **Deep learning-based ring artifact removal algorithm with inter-slice complementarity** [13242-22]

13242 0O **CycleGAN-driven data augmentation for improved neural network disease detection** [13242-23]

PHOTON THERAPEUTICS I: PHOTOBIOMODULATION

13242 0Q **Sleep-wake transitions studied in terms of brain wave coordination: effects of healthy aging (Invited Paper)** [13242-25]

13242 0U **Exploring the effect of phototherapy of Alzheimer disease by advanced optical imaging in Alzheimer's disease mice model** [13242-29]

PHOTON THERAPEUTICS II: PHOTODYNAMIC THERAPY

13242 0X **Analysis of cellular response to photodynamic treatment using digital holographic microscopy, SLIM, and FLIM** [13242-32]

MULTIMODAL BIOMEDICAL IMAGING I

13242 13 **Design and implementation of an advanced high-speed data acquisition system for photoacoustic tomography** [13242-39]

MULTIMODAL BIOMEDICAL IMAGING II

13242 14 **NREM3 sleep disrupts the brain-periphery hemodynamic coupling (Invited Paper)** [13242-40]

13242 16 **Magnetic resonance-driven deep learning of electromagnetic metamaterials** [13242-42]

NANOBIOPHOTONICS

13242 19 **Spectral biomarkers of antiplatelet therapy effectiveness revealed by SERS** [13242-45]

SPECTRAL IMAGING

13242 1C **Innovative near-infrared detector and wearable solution for stable noninvasive blood glucose monitoring** [13242-48]

13242 1E **Vitamin A imaging in mammalian cells by hyperspectral stimulated Raman scattering microscopy** [13242-50]

13242 1F **Detection of methotrexate molecules in human plasma by SERS method** [13242-51]

13242 1H **Design and validation of a combined system for in situ measurement of photosensitizer fluorescence and tissue diffuse reflectance** [13242-53]

POSTER SESSION

13242 1I **Accurate and rapid molecular cytology with transformer-based stimulated Raman microscopy** [13242-54]

13242 1J **Corneal elasticity measurement by compressive optical coherence elastography system** [13242-55]

13242 1K **Application of photoacoustic tomography in monitoring oxygen metabolism status of local tissues during surgical operation** [13242-56]

13242 1M **Skull transmittance of transcranial laser in mouse models** [13242-58]

13242 1N **Study on the space domain contrast optimization algorithm in laser speckle contrast imaging** [13242-59]

13242 1O **The method research on blood flow imaging by laser speckle contrast** [13242-60]

13242 1Q **Speed up implicit neural representation for parallel MRI reconstruction** [13242-62]

13242 1R **Research on acupuncture treatment effect prediction for migraine based on stacking** [13242-63]

13242 1S **Effective super-resolution reconstruction for multiprotocol low-field MRI** [13242-64]

13242 1T **An improved YOLOv5 algorithm for automatic scleral plaque and pigmentation detection** [13242-65]

13242 1V **Effects of HS and HSP70 function inhibition on mitochondria and proliferation of triple-negative breast cancer cells** [13242-68]

13242 1W **Study on segmentation and prediction of intracerebral hemorrhage based on deep learning** [13242-69]

13242 1X **Multimodal detection system for lymphoma integrating 2D light scattering and electrochemical techniques** [13242-70]

13242 1Z **Portable SERS device for antiplatelet therapy effectiveness investigation** [13242-72]

13242 20 **Attention-based multiple instance learning for lung neoplasm detection using scleral images** [13242-73]

13242 21 **Simultaneous elastography and angiography using optical coherence tomography** [13242-75]

13242 23 **Analysis of melanocytic nevus based on photoacoustic microscopy** [13242-77]

13242 24 **Elasticity measurement of the crystalline lens using acoustic radiation force optical coherence elastography** [13242-78]

13242 25 **Optical coherence tomography with enhanced depth of focus using metalens** [13242-79]

13242 26 **Effect of mouse skin autofluorescence on the measurement of photosensitizer fluorescence** [13242-80]

13242 27 **Simulation of phase modulation using optical metalens for optical coherence tomography** [13242-81]

13242 2A **A robust vessel-labeling pipeline with high tissue clearing compatibility for 3D mapping of vascular networks** [13242-84]

13242 2B **A versatile vessel casting method for fine mapping of vascular networks using a hydrogel-based lipophilic dye solution** [13242-85]

13242 2C **Design of sub-micro line spacing shape based on phosphorescence carbon dots** [13242-86]
