

# PROCEEDINGS OF SPIE

## ***Infrared, Millimeter-Wave, and Terahertz Technologies XI***

**Cunlin Zhang  
Masahiko Tani**  
*Editors*

**13–14 October 2024  
Nantong, China**

*Sponsored by*  
SPIE  
COS—Chinese Optical Society

*Cooperating Organizations*  
Tsinghua University (China) • Peking University (China) • University of Science and Technology of China (China) • Zhejiang University (China) • Tianjin University (China) • Beijing Institute of Technology (China) • Beijing University of Posts and Telecommunications (China) • Nankai University (China) • Changchun University of Science and Technology (China) • University of Shanghai for Science and Technology (China) • Capital Normal University (China) • Huazhong University of Science and Technology (China) • Beijing Jiaotong University (China) • China Jiliang University (China) • Shanghai Institute of Optics and Fine Mechanics, CAS (China) • Changchun Institute of Optics, Fine Mechanics and Physics, CAS (China) • Institute of Semiconductors, CAS (China) • Institute of Optics and Electronics, CAS (China) • Institute of Physics, CAS (China) • Shanghai Institute of Technical Physics, CAS (China) • China Instrument and Control Society (China) • Optical Society of Japan (Japan) • Optical Society of Korea (Republic of Korea) • Australian and New Zealand Optical Society • Optics and Photonics Society of Singapore (Singapore) • European Optical Society

*Supporting Organizations*  
China Association for Science and Technology (CAST) (China)  
Department of Information of National Nature Science Foundation, China (NSFC) (China)

*Published by*  
SPIE

**Volume 13247**

Proceedings of SPIE 0277-786X, V. 13247

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Infrared, Millimeter-Wave, and Terahertz Technologies XI*, edited by Cunlin Zhang, Masahiko Tani, Proc. of SPIE 13247, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v	<i>Symposium Committees</i>
ix	<i>Conference Committee</i>

---

## THZ SCIENCE AND TECHNOLOGIES

13247 02	<b>Simulation study on terahertz modulation with single-walled carbon nanotube array</b> [13247-1]
13247 03	<b>Simulation of terahertz whispering gallery mode resonator</b> [13247-2]
13247 04	<b>Finding stability conditions of a soliton-like mode of optical-terahertz radiation</b> [13247-3]
13247 05	<b>All-optical terahertz-driven ultrafast photogun</b> [13247-4]

---

## THZ SPECTROSCOPY, SENSING, AND IMAGING

13247 06	<b>Super-resolution imaging of terahertz rotating coherent scattering microscopy based on deep-learning method</b> [13247-6]
13247 08	<b>Analysis for modulation depth of light pumped THz-SLM based on continuous THz waves</b> [13247-8]

---

## THZ AND IR SOURCES AND DETECTORS

13247 09	<b>Design of timing control circuit for infrared detector based on JESD204B</b> [13247-10]
13247 0A	<b>Research on SNR testing of point target imaging infrared remote sensing systems</b> [13247-11]
13247 0B	<b>Photoelectric characteristics of mid-infrared nBn photodetector based on InAs/InAsSb superlattice</b> [13247-12]

---

## POSTER SESSION

13247 0C	<b>A scheme for generating high-frequency millimeter wave based on external modulation and four-wave mixing</b> [13247-9]
----------	---

- 13247 OD **Design of high-performance terahertz photoconductive detectors based on MSM metasurfaces** [13247-13]
- 13247 OE **Realization of circular-polarized asymmetric transmission and wavefront modulation with terahertz metasurfaces based on composite phases** [13247-14]
- 13247 OF **Design and simulation of a wideband on-chip terahertz spectrometer** [13247-15]
- 13247 OG **Design and analysis of 230 GHz all-NbN superconductor-insulator-superconductor mixer** [13247-16]
- 13247 OJ **Metasurface-inspired polarization-sensitive all-dielectric terahertz biosensor based on quasi-bound state in the continuum** [13247-24]
- 13247 OL **Nondestructive testing of murals in situ by infrared thermal imaging** [13247-26]
- 13247 OM **Airplane detection in high-resolution synthetic aperture radar images based on optical training dataset** [13247-27]
- 13247 ON **Non-destructive testing high-pressure wall-penetrating sleeve based on terahertz frequency modulated continuous wave** [13247-28]
- 13247 OQ **Uncooled infrared multispectral imaging technology based on microlens array and zonal filter** [13247-31]
- 13247 OS **Checkerboard calibration method for an IR imaging alarm system with a large FOV** [13247-33]
- 13247 OT **Ibuprofen-nicotinamide cocrystal polymorphs: terahertz spectroscopy and DFT calculations** [13247-34]
- 13247 OU **Specific detection of tartaric acid chiral isomers based on centrosymmetric terahertz metamaterial sensors** [13247-35]
- 13247 OV **Aerogel defect detection using terahertz waves** [13247-36]
- 13247 OW **Application of photonic crystals for microwave and terahertz radiation generation** [13247-37]
- 13247 OX **Terahertz 3D detection imaging of ceramic pen holder** [13247-39]
- 13247 OY **Nondestructive testing of wood based on 120GHz FMCW terahertz radar** [13247-40]
