PROCEEDINGS OF SPIE

Advanced Optical Manufacturing Technologies and Applications 2024; and Fourth International Forum of Young Scientists on Advanced Optical Manufacturing (AOMTA and YSAOM 2024)

Lingbao Kong
Jiang Guo
Guoyan Sun
Guofeng Zhang
Editors

5–7 July 2024
Xi'an, China

Organized by
Chinese Society for Optical Engineering (China)

Sponsored by
Xi'an Institute of Optics and Precision Mechanics of CAS (China) • Xi'an Technological University (China) • University of Shanghai for Science and Technology (China) • Shanghai Engineering Research Center of Ultra-Precision Optical Manufacturing, Fudan University (China) • Advanced Optical Manufacturing Youth Expert Committee, CSOE (China)

Volume 13280

Proceedings of SPIE 0277-786X, V. 13280

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Advanced Optical Manufacturing Technologies and Applications 2024; and Fourth International Forum of Young Scientists on Advanced Optical Manufacturing (AOMTA and YSAOM 2024)*, edited by Lingbao Kong, Jiang Guo, Guoyan Sun, Guofeng Zhang, Proc. of SPIE 13280, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

AOMTA & YSAOM 2024

13280 02 **Thermomechanical simulation and experimental investigations of fused silica with microsecond-pulsed CO_2 laser cleaning** [13280-1]

13280 03 **Advances in low-damage grinding technology for hard and brittle optical materials** [13280-2]

13280 04 **A study of hybrid polarization image fusion method for accurate defect detection** [13280-3]

13280 05 **Advances in subsurface defect detection technologies for fused silica optical elements** [13280-4]

13280 06 **Design of a dual-band dual-mode optical system for visible and near-infrared spectrums** [13280-5]

13280 07 **Analysis of error source for Shack-Hartmann wavefront sensor based on physical optical propagation** [13280-6]

13280 08 **High-performance optical surfaces polishing technology and machine tools** [13280-7]

13280 09 **Optimized design of ϕ480mm light-weighted SiC primary mirror and load-bearing tower supporting structure for primary and secondary mirrors** [13280-12]

13280 0A **Research on the combined polishing technology for high-precision ZnS optical element fabrication** [13280-14]

13280 0B **A novel method for realizing multilayer diffractive optical variable devices via oblique elliptical vibration texturing** [13280-15]

13280 0C **Method for field-operation calibration of industrial robot based on 3D vision** [13280-16]

13280 0D **Research on the control technology of PSD2 index for the 3mm ultrathin large aperture optical components** [13280-17]

13280 0E **Nondestructive measurement and characterization of bi-paraboloidal x-ray refractive lenses fabricated by femtosecond laser** [13280-18]

13280 0F **Study on magnetorheological polishing processing characteristics of different crystal planes of SiC** [13280-19]

13280 0G **Extending depth of field for dark-field wafer surface inspection systems using digital holography** [13280-20]

13280 0H **Research on subsurface damages of fused quartz by different grinding methods** [13280-21]

13280 0I **Lightweight structure design of 2m large aperture primary mirror** [13280-22]

13280 0J **Ultra-precision cutting process of the diffractive mold core** [13280-23]

13280 0K **Computer-aided alignment technology for freeform off-axis four-mirror optical systems** [13280-24]

13280 0L **The nonlocal effect on FG nanobeams: an uncoupled theory and a superposition approach** [13280-25]

13280 0M **Angular disturbance coupling analysis of airborne optoelectronic damping system** [13280-26]

13280 0N **Research on the disassembly process of the primary mirror components after the deformation of the glass-ceramic primary mirror** [13280-27]

13280 0O **The effect of the height difference between the two shoulders of the Kovar bracket on the rate of change of SLD full temperature power** [13280-30]

13280 0P **A new method for studying the influence of pentaprism micromotion on steering angle** [13280-31]

13280 0Q **An aberration optimization method for concave holographic gratings in the Lyman ultraviolet band** [13280-32]

13280 0R **Research on mirror shape testing technology based on deep learning** [13280-33]

13280 0S **A high-accuracy assembling method of R-C system with flexible support structure** [13280-34]

13280 0T **Wafer defect detection based on polarization modulation** [13280-36]

13280 0U **Assembly and integration testing method for cryogenic optics infrared camera** [13280-37]

13280 0V **Large x-ray flat mirror mounting supports: impact on surface figure reproductivity** [13280-38]

13280 0W **Design of spatial infrared freeform optical system with large field of view** [13280-39]

13280 0X **Research on graphite ball surface defect detection algorithm based on YOLOv5** [13280-40]

13280 0Y **Electromagnetic shielding design and thin film preparation of large-aperture Ge infrared window** [13280-41]

13280 0Z **Infrared chalcogenide glass aspherical microlens array fabricated using glass-to-glass molding** [13280-42]

13280 10 **Large-aperture mirror testing technology** [13280-43]

13280 11 **An ultra-compact differential confocal sensor based on a system of metasurfaces** [13280-44]

13280 12 **Research on FOG matching technology of optical device** [13280-45]

13280 13 **Orbit parameter measurement method based on fiber optic gyro inertial navigation system** [13280-46]

13280 14 **Performance simulation and analysis of integrated optical gyroscope resonator structure** [13280-48]

13280 15 **Image stitching method for defect detection on optical surface based on adaptive registration and fusion** [13280-49]

13280 16 **A real-time blind pixel correction method for large array space remote sensing cameras in orbit** [13280-50]

13280 17 **A quality evaluation study for annular beams** [13280-51]

13280 18 **Effect of microprism array and its element parameters on imaging quality** [13280-52]

13280 19 **ACNet: a twin-image removal network based on CNN with attention mechanism in in-line lensless digital holographic microscopy** [13280-53]

13280 1A **Data graph classification and super-resolution reconstruction methods based on deep learning** [13280-54]

13280 1B **AG-Unet: a robust laser stripe extraction method in line-laser imaging** [13280-55]

13280 1C **Mathematical modelling and optimization of spatial optical phased array systems** [13280-56]

13280 1D **Research on three-dimensional measurement technology applied in optical alignment of aerospace remote sensors** [13280-57]

13280 1E **Vibration noise analysis and filter processing of fiber optic gyroscope** [13280-59]

13280 1F **Space observation and communication platforms with active morphing thin-shell reflectors** [13280-60]

13280 1G **Optimization design of domestic main control signal processing board for miniaturized fiber optic gyroscope** [13280-62]

13280 1H **The active alignment technology for off-axis three-mirror optical system** [13280-63]

13280 1I **Research on deterministic compliant figuring processes removal functions and algorithms for nickel-phosphorus alloy optics** [13280-65]
