

PROCEEDINGS OF SPIE

Seventh International Conference on Mechanical Manufacturing and Industrial Engineering (MMIE 2024)

Hideaki Tsukamoto
Editor

21–24 August 2024
Tokyo, Japan

Sponsored by
Hosei University (Japan)

Published by
SPIE

Volume 13290

Proceedings of SPIE 0277-786X, V. 13290

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Seventh International Conference on Mechanical Manufacturing and Industrial Engineering (MMIE 2024)*, edited by Hideaki Tsukamoto, Proc. of SPIE 13290, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	Conference Committee
vii	Introduction

MATERIAL DESIGN AND MECHANICAL MANUFACTURING

13290 02	The influence of the reverse modelling method on the resulting accuracy of the CAD model of the cutting insert [13290-3]
13290 03	Deformation compensation of long thick-walled welded plates by elastic pre-bending method [13290-4]
13290 04	Improving automotive tire defect in the vulcanization process by leakage bladders issues [13290-16]
13290 05	Integrative analysis and verification of pressure vessels under multiple nozzle loads: a combined AD2000 and beam analysis approach [13290-19]
13290 06	Investigation of laser-assisted high-speed precise blanking of metal bars [13290-25]
13290 07	Development, fabrication, and assessment of durian dehusking machine's gripper by direct metal laser sintering-powder bed fusion using AISi10Mg [13290-27]

ROBOTIC MOTION CONTROL AND POWER MACHINERY

13290 08	Investigation of torque variation under tandem drive during acceleration and deceleration in three-shaft differential planetary gear mechanism [13290-9]
13290 09	Experimental study on vibration displacement for coaxial counter-rotating rotors [13290-10]
13290 0A	Method for determining motion paths satisfying placement method and singularity avoidance in cooperative motion using multiple cooperative robots [13290-12]
13290 0B	Investigation of two operation method for grasplless handling motion with a 3D printed polymeric humanoid robot by ROS control system [13290-14]
13290 0C	Experimental study on aerodynamic effects of different blade types with PIV-method for coaxial counter-rotating rotors [13290-17]
13290 0D	Determining ball trajectory on a work plate held by a dual-arm SCARA robot using IMU sensor data [13290-26]

GENERAL MECHANICAL THEORY AND SYSTEM DESIGN

- 13290 OE **Numerical sensitivity analysis and design optimization of structural dynamics for a 5-axis milling machine** [13290-2]
- 13290 OF **Influence of end-mill tool motion on the quality of machining center-extracted fine bamboo fibers** [13290-7]
- 13290 OG **A novel method of tool modeling via revolving generatrix for milling geometry simulation** [13290-13]
- 13290 OH **Experimental investigation of microstructure, tool wear, and burr formation of micro-milling of selective laser melting Ti6Al4V** [13290-20]
- 13290 OI **Tuning motion of linear and rotary axes at cutting approach point under a constant feed speed vector at end milling point on machined workpiece with a five-axis controlled machine tool** [13290-21]

MECHANICAL AND ELECTRONIC TECHNOLOGY

- 13290 OJ **Supply chain resilience and artificial intelligence-based techniques: a survey study** [13290-6]
- 13290 OK **Hole-quality inspection using machine learning based on temperature images obtained using two-color high-speed video for Cu direct laser processes of a printed wiring board** [13290-11]
- 13290 OL **Lathe process diagnosis by integrating turret vibration monitoring and servo information using wireless acceleration sensor** [13290-15]
- 13290 OM **Production scheduling heuristic for mass customization with partial rescheduling** [13290-18]
- 13290 ON **Design, fabrication, and performance evaluation of an exercise mat utilizing kinetic energy from humans' footsteps to generate power** [13290-24]
