

PROCEEDINGS OF SPIE

Fourth International Conference on Green Communication, Network, and Internet of Things (CNIoT 2024)

**Cheng Siong Chin
Xiangjie Kong**
Editors

**30 August– 1 September 2024
Guiyang, China**

Organized by
Zhejiang University of Technology (China)
Nanjing Tech University (China)

Sponsored by
CCF Internet of Things (CCF TCIoT) (China)
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 13397

Proceedings of SPIE 0277-786X, V. 13397

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fourth International Conference on Green Communication, Network, and Internet of Things (CNIoT 2024)*, edited by Cheng Siong Chin, Xiangjie Kong, Proc. of SPIE 13397, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

MOBILE COMMUNICATION AND TARGET RECOGNITION TECHNOLOGY

- 13397 02 **Design and application of 5G NTN communication terminal for power grid** [13397-13]
- 13397 03 **Research on large-scale container networks in OVN** [13397-32]
- 13397 04 **Research on internet of vessels composite communication network equipment on Ad Hoc Networks** [13397-17]
- 13397 05 **Development and validation of an intelligent remote heating system for heating magnetic stirrers in chemistry laboratories** [13397-23]
- 13397 06 **Research on a fast-sharing solution for real-time traffic conditions based on federated learning** [13397-40]
- 13397 07 **Cloud-Edge collaborative task offloading model using improved biogeography-based optimization algorithm** [13397-24]
- 13397 08 **Research on vehicle CAN communication cybersecurity** [13397-3]
- 13397 09 **Improved AES algorithm based on dynamic row displacement and SHA-256 key extension** [13397-5]
- 13397 0A **Research on sensor networks optimization based on edge computing** [13397-28]
- 13397 0B **Variational Bayesian-based multiextended target tracking** [13397-18]
- 13397 0C **Research on multihop network time synchronization algorithm based on 5G co-band signals** [13397-25]
- 13397 0D **Multi-objective resource optimization simulation of multifunctional phased array radar** [13397-11]
- 13397 0E **Sensation-free intelligent supervision technology of high-altitude workers based on adaptive adjustment algorithm of UAV gimbal** [13397-52]
- 13397 0F **Constructions of air transportation super network and characteristics analysis** [13397-26]
- 13397 0G **Dynamic multi-objective differential evolution based on improved strategies** [13397-30]

- 13397 OH **Data source automatic switching software for servo system of shipboard satellite communication station design and implementation** [13397-45]
- 13397 OI **Channel estimation for mMIMO LEO satellite Internet-of-Things uplink transmission** [13397-22]
- 13397 OJ **Innovative deep learning and signal processing methods for ECG abnormality detection and diagnosis** [13397-15]
- 13397 OK **Object recognition based on combinatorial neural network** [13397-42]
- 13397 OL **Particle swarm optimization-based partial transmission sequence technique to reduce PAPR of OFDM signals** [13397-8]
- 13397 OM **Optimisation research and analysis of aeronautical satellite navigation based on the background of big data algorithms** [13397-56]
- 13397 ON **Performance analysis of compensation techniques for dispersion and phase noise in chipset network communications** [13397-37]

IOT SYSTEM MODELING AND IMAGE PROCESSING

- 13397 OO **Research on automatic classification of image resources based on deep learning algorithms** [13397-43]
- 13397 OP **A packet priority-aware active queue management** [13397-51]
- 13397 OQ **Double verifiable privacy-preserving federated learning under multiple keys** [13397-4]
- 13397 OR **Vulnerability detection of IoT information cloud interaction process under penetration testing** [13397-38]
- 13397 OS **Design and implementation of time-sensitive network data transmission system** [13397-12]
- 13397 OT **Intelligent energy monitoring platform design and application research** [13397-54]
- 13397 OU **Hyperspectral image anomaly detection based on minimum noise fraction and tensor low-rank theory** [13397-33]
- 13397 OV **Intrusion detection for internet of things security: a hidden Markov model based on fuzzy rough set** [13397-31]
- 13397 OW **Enhancing CT image resolution with a hybrid transformer-based generative adversarial network** [13397-1]
- 13397 OX **A remote sensing image super-resolution model using SRGAN** [13397-34]

- 13397 0Y **Multimodel fusion sentiment analysis based on adversarial training and contrastive learning** [13397-19]
- 13397 0Z **Design and simulation of energy consumption model for IoT perception layer network** [13397-20]
- 13397 10 **Research on DDoS attack detection technology in SDN environment** [13397-7]
- 13397 11 **Research on vehicle autonomous driving based on convolutional neural network and embedded system in computer vision** [13397-53]
- 13397 12 **Improving the efficiency of coastal clean power consumption using Bayesian networks** [13397-48]
- 13397 13 **Enhancing BGP security based on decentralized authentication** [13397-10]
- 13397 14 **Multidimensional daily sleep monitoring system based on IoT technology** [13397-14]
- 13397 15 **A method for concrete crack detection based on improved YOLOv8s** [13397-46]
- 13397 16 **Research on an adaptive preset performance control algorithm for multi degree of freedom robotic arms based on model uncertainty** [13397-27]
- 13397 17 **Long-text classification in Chinese via fasttext and multihead attention with bigram and trigram** [13397-39]
- 13397 18 **Research on energy efficiency diagnosis of integrated energy intelligent platform** [13397-55]
