Volume 13496

Proceedings of SPIE 0277-786X, V. 13496

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *AOPC 2024: Optical Sensing, Imaging Technology, and Applications*, edited by Yadong Jiang, Bin Xue, Proc. of SPIE 13496, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

OPTICAL SENSING, IMAGING TECHNOLOGY, AND APPLICATIONS

13496 02 **Research on in-orbit refocusing strategy of space camera based on the design of front mirror tube made of resin matrix composite** [13496-1]

13496 03 **Comparison of different registration algorithms for infrared polarization image** [13496-4]

13496 04 **Method of enhancement and coloring for underwater image based on multichannel image feature fusion** [13496-5]

13496 05 **Development of 3D imaging technology and key technology research** [13496-6]

13496 06 **High image quality and light-small commercial remote sensing camera design** [13496-7]

13496 07 **Research on electron dispersion mechanism and resolution characteristics of EBAPS** [13496-8]

13496 08 **Development and consideration on low-light-level real-time color imaging technology** [13496-9]

13496 09 **Development of a beam-guided laser detection module for absolute ranging** [13496-10]

13496 0A **A design and demonstration of target simulator for Lidar** [13496-11]

13496 0B **Recent progress on multiple frequency shift spacing Brillouin fiber lasers in optical communication band** [13496-14]

13496 0C **$MoSe_2$/$NbSe_2$ Van der Waals heterostructure with efficiently gate-tunable optoelectronic properties** [13496-15]

13496 0D **Research on calibration method of multispectral radiation temperature measurement system based on fully connected network** [13496-16]

13496 0E **All-fiber temperature and strain simultaneous measurement sensor based on reflective Lyot filter cascaded with fiber Bragg grating** [13496-18]

13496 0F **Pseudo-hyperdimensional optical remote sensing: assessment and challenge** [13496-19]

13496 0G **Research on echo signal processing in the marine particulate organic carbon detection system** [13496-20]

13496 0H **3D measurement based on omnidirectional vision using hexagonal pyramid mirrors** [13496-21]

13496 0I **Analysis of the distance and influential factors of glare effect caused by incoherent intense light** [13496-22]

13496 0J **Research on panoramic camera system for geotechnical borehole monitoring** [13496-23]

13496 0K **Design method of off-axis infrared television composite optical system for seekers** [13496-24]

13496 0L **Microstructure and optical properties of PbSeTe thin films prepared by magnetron sputtering** [13496-25]

13496 0M **Research on real-time registration method for snapshot-based multispectral imaging system** [13496-27]

13496 0N **High-precision matching of multisource remote sensing images considering geometric constraints** [13496-28]

13496 0O **Research on intelligent heaters based on PTC materials** [13496-29]

13496 0P **A super-resolution reconstruction method based on foreground-background separation and deblurring** [13496-30]

13496 0Q **Acquisition of spectral reflectance of the ocean surface based on multispectral imaging** [13496-31]

13496 0R **Study on the microstructure and optical properties of PbTe films prepared by magnetron sputtering** [13496-32]

13496 0S **Imaging quality comparison system and method of image intensifiers** [13496-34]

13496 0T **Stokes parametric error analysis of rotating waveplate polarimeter in fully polarized state** [13496-35]

13496 0U **Electronic design of a high frame rate video camera** [13496-36]

13496 0V **Image clarification research based on underwater multichannel active polarization image fusion** [13496-37]

13496 0W **Analysis of photon heterodyne detection performance based on GM-APD pixel unit multiplexing** [13496-38]

13496 0X **High performance graphene/C_{60}/Sb composite film phototransistor with broadband and tunable bidirectional photoresponse** [13496-40]

13496 0Y **Research on echo waveform identification algorithm of hyperspectral LiDAR** [13496-42]

13496 0Z **Research and implementation of EBCMOS non-uniform correction algorithm based on FPGA** [13496-43]

13496 10 **Research on adaptive control method based on EBAPS camera** [13496-44]

13496 11 **Infrared ship target detection method under complex sea background conditions** [13496-45]

13496 12 **Flexible Bi_2Te_3 photothermoelectric thin film detector with broadband response at room temperature** [13496-48]

13496 13 **Model driven-based extended target piston sensing for optical synthesis aperture imaging system** [13496-49]

13496 14 **Dataset coverage evaluation for aircraft detection in SAR images using angle classification method** [13496-50]

13496 15 **High accuracy target point classification through dark-field detection of large-aperture optics surface based on machine vision** [13496-51]

13496 16 **Research on size calibration algorithm of dark-field flaw on optics surface based on convolutional neural network** [13496-52]

13496 17 **CFF-Net: cross-frequency fusion network for aero-degraded image restoration** [13496-53]

13496 18 **Optical design of transmission/reflection common aperture infrared/laser composite seeker** [13496-57]

13496 19 **Multiaperture electro-optical detection technology and influencing factor analysis of detection capability** [13496-59]

13496 1A **Ultrabroadband platinum ditelluride photodetector from visible to terahertz** [13496-62]

13496 1B **Study on the influence of vibration on phase-shifting interferometry and the suppression methods** [13496-63]

13496 1C **Research on a device for fluorescence imaging detection of nucleic acid** [13496-67]

13496 1D **Influence of preparation process of liquid scintillation capillary array on the opening area ratio** [13496-69]

QUANTUM OPTICS

13496 1E **Free space B92 quantum key distribution analysis under different atmospheric conditions** [13496-12]

13496 1F **Compensation of motion-induced atom-laser misalignment errors in an atom-interferometry gravimeter** [13496-17]

ELECTROMAGNETIC COMPATIBILITY AND ELECTROMAGNETIC ENVIRONMENTAL EFFECT

13496 1G **Comparative analysis of electromagnetic field coupling to airborne cables in a reverberation chamber** [13496-26]

13496 1H **A transformer-embedded learning method for solving full-wave inverse scattering problems** [13496-33]

DISPLAY AND OPTICAL STORAGE

13496 1I **Reflective full-color structural colors with high brightness and high purity based on phase-change materials with high refractive index and high extinction coefficient** [13496-39]

13496 1J **Freeform liquid-crystal polarization imaging optics with aberration correction and efficiency control** [13496-41]

13496 1K **Design of high-resolution integral imaging 3D display with compact directional backlight module** [13496-47]

MARINE AND POLAR OPTICAL DETECTION TECHNOLOGY

13496 1L **Fault diagnosis method of redundant marine single-axis rotational inertial navigation systems with ring laser gyro** [13496-54]

OPTICAL COMMUNICATION

13496 1M **An algorithm for eliminating phase-encoded Lidar end face reflection** [13496-2]

13496 1N **Smart runway management system based on large-scale ultra-weak FBG sensing array and its application** [13496-3]

13496 1O **Research on space-time-frequency coding method based on MIMO-OFDM system** [13496-55]

13496 1P **Broadband, high-reflectivity, and low-stress optical thin film with a composite of metallic film and DBR for MEMS FSM** [13496-56]

13496 1Q **State-of-the-art for high-speed visible light laser communication** [13496-60]

13496 1R **Underwater wireless optical-magnetic hybrid communication** [13496-61]
