

PROCEEDINGS OF SPIE

# ***AOPC 2024: Optical Devices and Integration***

**Linjie Zhou**  
*Editor*

**23–26 July 2024**  
**Beijing, China**

*Sponsored and Organized by*  
Chinese Society for Optical Engineering (CSOE) (China)

*Technical Cosponsor*  
SPIE

*Published by*  
SPIE

**Volume 13499**

Proceedings of SPIE 0277-786X, V. 13499

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *AOPC 2024: Optical Devices and Integration*, edited by Linjie Zhou, Proc. of SPIE 13499, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510687875

ISBN: 9781510687882 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Conference Committee*

## OPTICAL DEVICES AND INTEGRATION

---

- 13499 02 **An equivalent circuit model of thin film lithium niobate Mach-Zehnder modulators with T-rail travelling wave electrodes** [13499-1]
- 13499 03 **Study on InP-based DFB semiconductor laser with dual-transverse mode hybrid resonance** [13499-2]
- 13499 04 **A digital SiPM-based dTOF sensor with PDP optimization using configurable on-chip charge pump** [13499-4]
- 13499 05 **STM32-based three-wavelength smoke detection** [13499-5]
- 13499 06 **Design and simulation of a waveguide-integrated GeSi modulator based on the Franz-Keldysh effect with a high-efficiency butt-coupling structure** [13499-6]
- 13499 07 **High-power InP-based uni-travelling-carrier photodetectors** [13499-7]
- 13499 08 **Scalable programmable silicon photonic processor for solving differential equations** [13499-8]
- 13499 09 **Broadband silicon nitride arbitrary ratio power splitters** [13499-9]
- 13499 0A **Study of optoelectronic synaptic devices and image memory based on BaSrTiO<sub>3</sub> (BST) thin film** [13499-11]
- 13499 0B **High-directionality grating coupler-based optical antenna for chip-level LiDAR applications** [13499-12]
- 13499 0C **Scalable fabrication techniques for high-performance chalcogenide integrated photonic devices** [13499-13]
- 13499 0D **Dual-drop microring weight banks with linear configuration** [13499-15]
- 13499 0E **A near-field positioning method based on a novel FBG sensor** [13499-18]
- 13499 0F **Non-volatile silicon-GSST multilevel optical switch** [13499-21]
- 13499 0G **Research on pixel SNR of low light image sensor** [13499-22]

- 13499 OH **E-beam lithography fabricated optical 90-degree hybrid on InP platform** [13499-24]
- 13499 OI **Design of high-efficiency and broadband SiN-on-SOI grating couplers based on CUMEC's process platform** [13499-25]
- 13499 OJ **4-channel optical circulator based on traveling-wave electro-optic modulation** [13499-26]
- 13499 OK **Transferring of thick active optical components via the method of tetherless micro-transfer printing** [13499-27]
- 13499 OL **Theoretical and simulated analysis of a  $6 \times 6$  MZI-based optical neural network** [13499-29]
- 13499 OM **Design and performance analysis of strain-compensated quantum wells for 1654nm VCSELs** [13499-30]
- 13499 ON **A big data storage technology based on domestic autonomous controllable characteristics** [13499-32]
- 13499 OO **An on-chip quantum splitter of degenerate photon pairs using a spiral waveguide** [13499-33]
- 13499 OP **Lidar scene projector (LSP) for the mass production testing of automotive lidars** [13499-34]
- 13499 OQ **Intelligent-searching-based inverse design algorithm for integrated photonics** [13499-35]
- 13499 OR **Research on dual-objective directional coupler based on a two-step inverse design method** [13499-36]
- 13499 OS **A new adiabatic coupling design between the III-V gain section and SOI waveguide for the heterogeneously integrated SOA with high coupling efficiency and large process tolerance** [13499-37]
- 13499 OT **Trident structure achieves direct and efficient facet coupling between silicon waveguides and lasers** [13499-38]
- 13499 OU **High performance room temperature mid-infrared linear array utilizing semimetal ZrTe<sub>3</sub>** [13499-40]
- 13499 OV **Integrated spatially multiplexed single-photon sources in a bidirectionally pumped spiral waveguide** [13499-41]
- 13499 OW **Design of an integrated optical transceiver module for interferometric fiber optic gyroscope** [13499-42]
- 13499 OX **Design and optimization of four-wave mixing in elliptical hole waveguides for enhanced nonlinear optical performance** [13499-44]

- 13499 0Y **Design of ultraviolet photon detector acquisition system based on FPGA** [13499-45]
- 13499 0Z **Design of an on-chip optical full-adder for optical directed logic using microring resonators** [13499-46]
- 13499 10 **Simulation design and experimental study of low-loss couplers for integrated optical gyroscopes based on Si<sub>3</sub>N<sub>4</sub> waveguides** [13499-47]
- 13499 11 **Application of silicon nitride feedback waveguide optical sensing based on Fano resonance** [13499-48]
- 13499 12 **Bifurcation diagrams of the integrated mutual-injection semiconductor laser** [13499-49]
- 13499 13 **Design and verification of a miniaturized high density WDM array device** [13499-50]
