

PROCEEDINGS OF SPIE

# ***AOPC 2024: Atmospheric and Environmental Optics***

**Tao Luo**  
*Editor*

**23–26 July 2024**  
**Beijing, China**

*Sponsored and Organized by*  
Chinese Society for Optical Engineering (CSOE) (China)

*Technical Cosponsor*  
SPIE

*Published by*  
SPIE

**Volume 13504**

Proceedings of SPIE 0277-786X, V. 13504

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *AOPC 2024: Atmospheric and Environmental Optics*, edited by Tao Luo, Proc. of SPIE 13504, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510687974

ISBN: 9781510687981 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## ATMOSPHERIC AND ENVIRONMENTAL OPTICS

---

- 13504 02 **Polarization retention characteristics of linearly polarized light through concentric spherical particles on forward transmission** [13504-1]
- 13504 03 **Microphysical and optical properties of coastal aerosol in the South China Sea** [13504-2]
- 13504 04 **Aerosol detection experiment of Lidar system based on Scheimpflug imaging principle** [13504-3]
- 13504 05 **Method for simultaneous measurement of multiple aerosol particles based on optical tweezers** [13504-4]
- 13504 06 **Research on the construction method of sample set in CO<sub>2</sub> retrieval based on statistical analysis method** [13504-5]
- 13504 07 **An overview of optical schemes for spaceborne greenhouse gas passive remote sensing payload** [13504-6]
- 13504 08 **Analysis of mixed aerosol environment and optical characteristics based on OPAC** [13504-10]
- 13504 09 **Characterization of atmospheric turbulence profiles at Wuming Mountain site** [13504-12]
- 13504 0A **Research of calibration method based on blackbody radiation spectral matrix at different temperatures** [13504-13]
- 13504 0B **Laser-induced breakdown spectroscopy (LIBS) combined with PCA-RBF for the classification of different types of coal** [13504-14]
- 13504 0C **Measurement and inversion of water vapor in Dalian by high resolution non-modulated laser heterodyne radiometer** [13504-15]
