# TABLE OF CONTENTS

|                                                                                                                  |    |
|------------------------------------------------------------------------------------------------------------------|----|
| Smart City Digital Twins: A Modular and Adaptive Architecture for Real-Time Data-Driven Urban Management .....   | 1  |
| <i>Manoj Herath, Maira Alvi, Roberto Minerva, Hrishikesh Dutta, Noel Crespi, Syed Mohsan Raza</i>                |    |
| ThreatFinderAI: Automated Threat Modeling Applied to LLM System Integration.....                                 | 8  |
| <i>Jan Von Der Assen, Alberto Huertas, Jamo Sharif, Chao Feng, G r me Bovet, Burkhard Stiller</i>                |    |
| Real Time Reconstruction of Radio Environment Maps in Indoor Millimeter-Wave Beamforming with Beam Changes ..... | 11 |
| <i>Takumi Bushi, Toshiro Nakahira, Shoko Shinohara, Yusuke Asai, Kenji Ohira, Hideyuki Shimonishi</i>            |    |
| Impact of Time-Varying Traffic Type on the Performance of Multilayer Networks .....                              | 18 |
| <i>Aleksandra Knapinska, Piotr Lechowicz, Krzysztof Walkowiak</i>                                                |    |
| WIF: Efficient Library for Network Traffic Analysis .....                                                        | 23 |
| <i>Richard Pln , Karel Hynek, Pavel  i ka</i>                                                                    |    |
| Synchronization Control-Plane Protocol for Quantum Link Layer .....                                              | 28 |
| <i>Brandon Ru, Winston K. G. Seah, Alvin C. Valera</i>                                                           |    |
| In-Network Real-time Flow Classification Using Hierarchical Decision Trees .....                                 | 37 |
| <i>Teodor Karkashina, Awais Aziz Shah, Dimitrios P. Pezaros</i>                                                  |    |
| Is a Name Enough? A First Look into Detecting Clouds Using DNS Pointer Records .....                             | 42 |
| <i>Sousan Tarahomi, Raffaele Sommese, Pieter-Tjerk De Boer, Jeroen Linssen, Ralph Holz, Anna Sperotto</i>        |    |
| Finding Key Nodes in Complex Networks Via Deep Reinforcement Learning and Multi Attention Node Connectivity..... | 47 |
| <i>Wang Kaili, Wu Muqing, Zhao Min</i>                                                                           |    |
| EdgeVerse: Multi-User Virtual Reality Via Edge Computing and eBPF .....                                          | 52 |
| <i>Okwudilichukwu Okafor, Flavio Esposito, Tommaso Pecorella</i>                                                 |    |
| Automating Network Perimeter Threat Prevention for Decentralized Network Administration.....                     | 56 |
| <i>Nikolas Wintering, Eric Lanfer, Nils Aschenbruck</i>                                                          |    |
| Uncovering Secrets of Microbursts in Datacenter Network Traffic .....                                            | 63 |
| <i>Mohammad Hosseini, Sina Darabi, Mohammad Nakhjiri, Patrick Eugster</i>                                        |    |
| Impact of DANE on Webpage Load Time.....                                                                         | 68 |
| <i>Kota Yagi, Katsuki Isobe, Daishi Kondo, Hideki Tode</i>                                                       |    |
| T-MAW: Online Network Traffic Monitoring and Analysis Using Weighted Stochastic Block Models .....               | 77 |
| <i>Maximilian Stephan, Johannes Zerwas, Wolfgang Kellerer</i>                                                    |    |
| IoT Device and State Identification Based on Usage Patterns.....                                                 | 86 |
| <i>Jeffrey A. Adjei, Nur Zincir Heywood, Biswajit Nandy, Nabil Seddigh</i>                                       |    |

|                                                                                                                                                                       |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A First Look at User-Installed Residential Proxies from a Network Operator's Perspective .....                                                                        | 93  |
| <i>Etienne Khan, Elisa Chiapponi, Martijn Verkleij, Anna Sperotto, Roland Van Rijswijk-Deij, Jeroen Van Der Ham-De Vos</i>                                            |     |
| Signalling Load-Aware Conditional Handover in 5G Non-Terrestrial Networks.....                                                                                        | 102 |
| <i>Bohan Zhang, Mohammad A. Salahuddin, Peng Hu, Yunli Wang, Noura Limam, Bo Sun, Diogo Barradas, Raouf Boutaba</i>                                                   |     |
| Multi-Tenant Programmable Switch Virtualization Leveraging Explicit Resource Sharing .....                                                                            | 111 |
| <i>Ivan Peter Lamb, Pedro Arthur Pinheiro Rosa Duarte, Marcelo Caggiani Luizelli, Luciano Paschoal Gaspar, José Rodrigo Azambuja, Weverton Luis Da Costa Cordeiro</i> |     |
| Assessing Application-Level Network Neutrality Using Digital Twins .....                                                                                              | 120 |
| <i>Péter Orosz, Tamás Marosits, Tamás Skopkó</i>                                                                                                                      |     |
| Per-CCA Queueing .....                                                                                                                                                | 123 |
| <i>Yara Mulla, Isaac Keslassy</i>                                                                                                                                     |     |
| Lowcaf: A Low-Code Protocol Analysis Framework.....                                                                                                                   | 130 |
| <i>Alexander Frank, Michael Steinke, Wolfgang Hommel</i>                                                                                                              |     |
| Indoor Radio Dot Placement Optimization Using UE Positioning and K-Means Clustering .....                                                                             | 137 |
| <i>John Bousfield, Chung-Horng Lung, Betty Liu, Aroosh Elahi</i>                                                                                                      |     |
| On-The-fly Table Insertions on Programmable Software Data Planes .....                                                                                                | 144 |
| <i>Manuel Simon, Sebastian Gallenmüller, Georg Carle</i>                                                                                                              |     |
| Automation of Network Configuration Generation Using Large Language Models.....                                                                                       | 151 |
| <i>Supratim Chakraborty, Nithin Chitta, Rajesh Sundaresan</i>                                                                                                         |     |
| ChronosGuard: A Hierarchical Machine Learning Intrusion Detection System for Modern Clouds .....                                                                      | 158 |
| <i>Miel Verkerken, José Santos, Laurens D'Hooge, Tim Wauters, Bruno Volckaert, Filip De Turck</i>                                                                     |     |
| Throughput-Constrained Antenna Sleep Management for Saving Power .....                                                                                                | 167 |
| <i>Rie Tagyo, Hideaki Kinsho, Akihiro Shiozu, Kazuhisa Yamagishi</i>                                                                                                  |     |
| QoE Models for Virtual Reality Cloud-Based First Person Shooter Game Over Mobile Networks .....                                                                       | 176 |
| <i>Henrique Souza Rossi, Karan Mitra, Christer Åhlund, Irina Cotanis</i>                                                                                              |     |
| Applicability of Hardware-Supported Containers in Low-Latency Networking.....                                                                                         | 181 |
| <i>Alexander Daichendt, Florian Wiedner, Jonas Andre, Georg Carle</i>                                                                                                 |     |
| Minimizing Power Consumption Under SINR Constraints for Cell-Free Massive MIMO in O-RAN.....                                                                          | 188 |
| <i>Vaishnavi Kasuluru, Luis Blanco, Miguel Ángel Vázquez, Cristian J. Vaca-Rubio, Engin Zeydan</i>                                                                    |     |
| Experience Report: Using JA4+ Fingerprints for Malware Detection in Encrypted Traffic .....                                                                           | 195 |
| <i>Petr Matoušek, Ondrej Ryšavý, Ivana Burgetová</i>                                                                                                                  |     |
| Multi-Objective Scheduling and Resource Allocation of Kubernetes Replicas Across the Compute Continuum.....                                                           | 200 |
| <i>Nicola Di Cicco, Filippo Poltronieri, José Santos, Mattia Zaccarini, Mauro Tortonesi, Cesare Stefanelli, Filip De Turck</i>                                        |     |

|                                                                                                                               |     |
|-------------------------------------------------------------------------------------------------------------------------------|-----|
| Spotting the Hook: Leveraging Domain Data for Advanced Phishing Detection.....                                                | 209 |
| <i>Radek Hranický, Adam Horák, Jan Polišenský, Ondrej Ondryáš, Kamil Jerábek, Ondrej Ryšavý</i>                               |     |
| Enhancing Adversarial Robustness of Anomaly Detection-Based IDS in OT Environments .....                                      | 216 |
| <i>Andreas Flatscher, Branka Stojanovic, Ozan Özdenizci</i>                                                                   |     |
| NAPlr: Multi-Gigabit Internet Access Profiling in Web Browser .....                                                           | 223 |
| <i>Péter Orosz, Tamás Marosits, Tamás Skopkó</i>                                                                              |     |
| Real-Time Demonstration of Low-Latency Video Delivery Via Hybrid Unicast-Broadcast Networks .....                             | 226 |
| <i>Casper Haems, Jeroen Van Der Hooft, Hannes Mareen, Peter Steenkiste, Glenn Van Wallendael, Tim Wauters, Filip De Turck</i> |     |
| Using Knowledge Graphs to Automate Network Compliance of Containerized Services .....                                         | 229 |
| <i>Aleksandra Simic, David Palma</i>                                                                                          |     |
| Mitigating Measurement Failures in Throughput Performance Forecasting .....                                                   | 234 |
| <i>Maria C. Ferreira, Silvio E. Ribeiro, Francisco V. Nobre, Maria L. Linhares, Thelmo P. Araújo, Rafael L. Gomes</i>         |     |
| High Complexity and Bad Quality? Efficiency Assessment for Video QoE Prediction Approaches .....                              | 241 |
| <i>Frank Loh, Gülnaziye Bingöl, Reza Farahani, Andrea Pimpinella, Radu Prodan, Luigi Atzori, Tobias Hößfeld</i>               |     |
| Certainly Uncertain: Demystifying ML Uncertainty for Active Learning in Network Monitoring Tasks.....                         | 246 |
| <i>Katharina Dietz, Mehrdad Hajizadeh, Nikolas Wehner, Stefan Geißler, Pedro Casas, Michael Seufert, Tobias Hößfeld</i>       |     |
| Data Pipeline System Designs for In-Network Learning .....                                                                    | 253 |
| <i>Patient Ntumba, Nour-El-Houda Yellas, Salah Bin-Ruba, Fehmi Ben Abdesslem, Stefano Secci</i>                               |     |
| Quantized In-Band Network Telemetry for Low Bandwidth Overhead Monitoring.....                                                | 262 |
| <i>Chanbin Bae, Kyeongtak Lee, Heewon Kim, Seongyeon Yoon, Junkyu Hong, Sangheon Park, Dongjin Lee</i>                        |     |
| Lateral Movement Identification in Cross-Cloud Deployment .....                                                               | 267 |
| <i>Kokthay Poeng, Laurent Schumacher</i>                                                                                      |     |
| Green Network Traffic Engineering Using Segment Routing: An Experiment Report.....                                            | 271 |
| <i>Jacob Van Groningen, Chung-Horng Lung</i>                                                                                  |     |
