# 2024 The 9th International Conference on Integrated Circuits and Microsystems ICICM 2024

## Table of Contents

|                                                                                                                                         |            |
|-----------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Preface.....</b>                                                                                                                     | <b>xiv</b> |
| <b>Committee.....</b>                                                                                                                   | <b>xv</b>  |
| <hr/>                                                                                                                                   |            |
| ❖ <b>Electronic Materials and Components</b>                                                                                            |            |
| Effect of Sc Concentration on the Memory Window in $Al_{1-x}Sc_xN$ /Two-Dimensional Channel Ferroelectric Field-Effect Transistors..... | 1          |
| <i>Zexin Ding, Yuxi Liu, Xin Liu, Guoming Zhang, Nan Wang, Qinghua Ren</i>                                                              |            |
| Formal Verification and Verilog Code Generation for Coq-based Carry-Lookahead Adder Algorithm.....                                      | 6          |
| <i>Kexin Chen, Gang Chen</i>                                                                                                            |            |
| A Low-noise Energy-efficient Double-Tail Dynamic Latch Comparator.....                                                                  | 15         |
| <i>Hejiu Zhang, Xinrui Yao, Ningmei Yu, Nan Lv</i>                                                                                      |            |
| A Low-Complexity, Conflict-Free Memory Access Scheme for Flexible NTT/INTT Architecture.....                                            | 20         |
| <i>Chiayi Kuo, Jingwen Huang, Yuqiao Huang, Tao Su</i>                                                                                  |            |
| A 16-bit Low-Power DAC Based on Hybrid Structure.....                                                                                   | 26         |
| <i>Qunxiang Sun, Danyu Wu, Heping Ma, Hanbo Jia, Kai Sun, Xuan Guo</i>                                                                  |            |
| Package Design and Reliability Verification of Spaceborne SiP.....                                                                      | 31         |
| <i>Zheng Yang, Jiemei Liang, Shenglong Li, Yingke Gao</i>                                                                               |            |
| Determination of Lead and Cadmium Ions Using Gold Nanoparticles Modified Screen-Printed Graphene Electrode.....                         | 37         |
| <i>Huajin Tao, Nan Wang, Yitian Ma, Ahua Xu, Baoyu Huang, Xiaogan Li</i>                                                                |            |
| An Active Gate Driver with Controllable Gate Current for SiC MOSFETs.....                                                               | 41         |
| <i>Zhengfei Jiang, Jiafei Yao, Yuxuan Dai, Ziwei Hu, Man Li, Yi Zhang, Zixuan Wang, Zhikuang Cai, Yufeng Guo</i>                        |            |
| High-Voltage Silicon PIN Radiation Detectors with Trenched Field Limiting Ring.....                                                     | 47         |
| <i>Haoyang Pang, Xin He, Tao Jin, Hao Huang, Zhiyuan Zhu, Yiqun Wei, Min Yu</i>                                                         |            |
| Design and Simulation of a New Type of Electrothermal Micro-flat Lens Unit Structure.....                                               | 52         |
| <i>Wuxiong Yang, Yifan Chai, Wenlong Hu</i>                                                                                             |            |
| Hardware Design and Security Analysis for SHA-256 in PQC SPHINCS+.....                                                                  | 57         |
| <i>Laiquan Li, Liji Wu, Jing Hu, Yifan Yang, Xiangmin Zhang</i>                                                                         |            |
| A Low Power, Wide Band Robust Startup Class C DCO with High Resolution.....                                                             | 62         |
| <i>Jiaxu Liu, Qin Li</i>                                                                                                                |            |

## ❖ Semiconductor Devices and Optoelectronic Devices

|                                                                                                                                    |     |
|------------------------------------------------------------------------------------------------------------------------------------|-----|
| Research Review of Organic Semiconductor Devices .....                                                                             | 66  |
| <i>Fangyi Li, Jiayi Zhou, Jun Zhang, Jiang Zhao</i>                                                                                |     |
| The MBIST Implementation of SoC Chip .....                                                                                         | 73  |
| <i>Shaozhen Zhang, Zijun Wang, Yufeng Wang</i>                                                                                     |     |
| Review of TSVs Testing between Chiplets .....                                                                                      | 78  |
| <i>Mengfan Wei, Suning Ji, Dazhi Yang</i>                                                                                          |     |
| Leakage Study of Ferroelectric AlScN Capacitors Prepared on Different Bottom Electrodes .....                                      | 82  |
| <i>Jiahao Zhang, Bochang Li, Jiuren Zhou, Yan Liu, Yue Hao, Genquan Han</i>                                                        |     |
| Repair of H <sup>+</sup> Implantation Induced Defects in SiC Single Crystal Film Fabricated by Crystal-Ion-Slicing Technique ..... | 87  |
| <i>Dailei Zhu, Wenbo Luo, Sijie Yang, Yao Shuai, Chuangui Wu, Wanli Zhang</i>                                                      |     |
| A Scalable Model for On-chip Interdigital Capacitor Based on Space-mapping Neural Network .....                                    | 93  |
| <i>Yuqing Xiong, Siqing Guo, Shanwen Hu, Yan Gu, Yuming Fang, Yufeng Guo</i>                                                       |     |
| The Investigation of AlGaIn Grown by MBE by PL and Time-resolved PL .....                                                          | 98  |
| <i>Pan Dai, Dengshan Cai, Wenxian Yang, Jianjun Zhu, Shulong Lu</i>                                                                |     |
| Study on Laser Lift-Off of GaN HEMTs Grown on Fe-doped and Unintentional Doped Buffer Layer.....                                   | 103 |
| <i>Fen Guo, Rengang Li, Tuo Li, Xiaofeng Zou, Yongzheng Zhan, Changhong Wang, Feng Ren</i>                                         |     |
| Comparative Study on the SRAMs Based on III-V Homojunction and Heterojunction TFETs.....                                           | 109 |
| <i>Yunhe Guan, Jiachen Lu, Zhen Dou, Ruoyun Dang, Weihai Sun, Haifeng Chen, Feng Liang</i>                                         |     |
| A Study on Semiconductor Device Training Using Digital-twins and Solid-edge .....                                                  | 114 |
| <i>Eugene Jeon, Yeon Hee Kim, Gyeong Min Lee</i>                                                                                   |     |
| <b>❖ Amplifier Design Principles and Electrical Performance Analysis</b>                                                           |     |
| A 12nm CMOS Rail-to-Rail Auto-Zero Operational Amplifier .....                                                                     | 119 |
| <i>Jun-an Zhang, Yuan Feng, Chuandao Zhang</i>                                                                                     |     |
| A 3-GS/s 12-bit Time-interleaved Wideband Pipeline ADC Using Sample-and-hold Amplifiers .....                                      | 124 |
| <i>Shuangbao Jia, Danyu Wu, Zilin Jiang, Hanbo Jia, Eryou Ji, Xuan Guo</i>                                                         |     |
| Measurement-driven Automated Design of High-Efficiency Power Amplifiers .....                                                      | 129 |
| <i>Yuxiu Tong, Jiahao Wang, Tangyu Fu, Jiangtao Su, Jun Liu</i>                                                                    |     |
| An Improved Cascoded Ring Amplifier Based Pipelined-SAR ADC with a Continuous Time Second Stage .....                              | 134 |
| <i>Yunchu Li, Rongqiu Yan</i>                                                                                                      |     |
| A High Voltage Driver Amplifier with Wide Output Swing, High Linearity, High Output Accuracy and Compact Size .....                | 139 |
| <i>Dan Jian, Qin Li</i>                                                                                                            |     |
| A High-Octave UWB LNA with a Positive Slope Gain by Using Current Reuse Technique .....                                            | 144 |
| <i>Zhehui Yang, Geliang Yang, Di Wu, Chunlian Liao</i>                                                                             |     |
| A Pipelined SAR ADC with Single-ended CDS in Fully Differential Residue Amplifier .....                                            | 149 |
| <i>Yuchen Lu, Jiyuan Huo, Jie Zhang, Xiaochao Li</i>                                                                               |     |
| X-Band GaN Internal Matching Power Amplifier .....                                                                                 | 155 |
| <i>Minglong Qiu, Feng Xu</i>                                                                                                       |     |

|                                                                                                                                       |     |
|---------------------------------------------------------------------------------------------------------------------------------------|-----|
| A Self-Biased Triggered DDSCR Device for Low Supply Voltage Amplifier ASICs ESD Protection .....                                      | 160 |
| <i>Jie Pan, Fanyang Li, Liguu Wen, Jiazhen Jin, Xiaolong Huang, Jiaxun Han</i>                                                        |     |
| An 18.6-to-27.6GHz High-Linear Wideband Low-Noise Amplifier Based on Gate-Source and Gate-Drain Magnetically Coupled Resonators ..... | 166 |
| <i>Qi Wu, Gengzhen Qi</i>                                                                                                             |     |
| <b>❖ RF Electronics and Component Design</b>                                                                                          |     |
| A 760uW 1.83GHz PLL Using a Single-Ring Oscillator-Based Integrator with Background Frequency Calibration .....                       | 171 |
| <i>Shijie Zheng, Jiwei Huang</i>                                                                                                      |     |
| 32Gb/s Low-power NRZ Signal SerDes Receiver .....                                                                                     | 177 |
| <i>Xuan Zhang, Chunming Zhang, Yidi Song, Ruxue Song</i>                                                                              |     |
| A Harmonic-Rejection Radio Frequency Transmitter Employing 33%-Duty-Cycle LO Waveforms .....                                          | 182 |
| <i>Haonan Guo, Gengzhen Qi</i>                                                                                                        |     |
| An Antenna Tuning Switch with Novel Resistor Chain Bias Network to Enhance Power Handling Capability .....                            | 186 |
| <i>Ruofan Dai, Zhangli Liu, Fei Meng</i>                                                                                              |     |
| A Low Power BLE-Compatible Wake-Up Receiver Achieving -85-dBm Sensitivity .....                                                       | 191 |
| <i>Huiting Chen, Jiwei Huang</i>                                                                                                      |     |
| An 8×8-Pixel LiDAR Receiver with Multi-Echo Recording TDC for Background Light Interference Mitigation .....                          | 196 |
| <i>Zichen Wei, Dongsheng Liu, Yu Yu</i>                                                                                               |     |
| A Low-power 50 Gb/s PAM4 High-speed SerDes Transmitter .....                                                                          | 201 |
| <i>Baoming Tao, Chunming Zhang, Yifan Ren, Wentian Qin</i>                                                                            |     |
| A Low Energy BFSK Receiver with Adaptive Clock-less Digital Demodulation .....                                                        | 208 |
| <i>Yiming Zheng, Shiwei Li, Zequan Zhang, Tao Lan, Jiwei Huang</i>                                                                    |     |
| Performance Optimization of Inverted-T SSOI FinFET for RF Applications .....                                                          | 213 |
| <i>Bo Zhang, Siying Zheng, Jiuren Zhou, Jie Liang</i>                                                                                 |     |
| <b>❖ Digital High-power Amplifier Design and Signal Analysis</b>                                                                      |     |
| A Reactively Matched High-Power Amplifier for Ku-Band in 0.25- $\mu$ m GaN Technology .....                                           | 218 |
| <i>Anshi Zhu, Zhihao Wan, Ye Liu, Zihan Yang, Tongde Huang, Wen Wu</i>                                                                |     |
| A Digital Power Amplifier Based on Voltage-Control Linearization Technique .....                                                      | 223 |
| <i>Hao Heng, Lanxin Jia, Qian Xie, Zheng Wang</i>                                                                                     |     |
| An Enhanced Bandwidth and Low-Distortion Two-Stage Cascode Amplifier Based on 22-nm CMOS Process .....                                | 228 |
| <i>Jincheng Li, Qin Wang, Nan Li, Zihan Luo, Jing Tian</i>                                                                            |     |
| Design of Ultra-Wideband Low Noise Amplifier with Excellent Port Matching and Gain Flatness .....                                     | 233 |
| <i>Ran Zhang, Hangbiao Li</i>                                                                                                         |     |
| A Ka-Band LNA Base on 65nm CMOS for Communication System .....                                                                        | 238 |
| <i>Yixin Zhou, Bingfei Dou, Jinzhong Sun, Jing Liu, Wenxuan Sheng, Dexin Zhang</i>                                                    |     |
| A 12b 400MS/s 4-Time Interleaved Pipelined-SAR ADC with Fully Differential Bias-enhanced Ring Amplifier .....                         | 242 |
| <i>Mingchao Jian, Xiangjian Kong, Jiwei Zheng, Huanlin Xie, Chunbing Guo</i>                                                          |     |

|                                                                                                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------|-----|
| Design of K-Band Low Noise Amplifier (LNA) Based on Active-Bias .....                                                                   | 247 |
| <i>Tiezhen Jiang, Qiqi Li, Qi An, Xiaona Xie, Chenyang Mi</i>                                                                           |     |
| A 24-30 GHz Image-Rejection Filtering LNA with >35-dBc Image-Rejection Ratio at <22 GHz .....                                           | 253 |
| <i>Zishen Lan, Jian Qin</i>                                                                                                             |     |
| A Broadband Compact mm-Wave series Doherty Power Amplifier Using Coupler Balun-based Active Load Modulation Network in 65-nm CMOS ..... | 257 |
| <i>Lanxin Jia, Hao Heng, Qian Xie, Zheng Wang</i>                                                                                       |     |
| A Low-Noise Weak Current Detection Amplifier for Wide Temperature Ranges .....                                                          | 262 |
| <i>Chun Zhao, Jinsheng Tang, Lin He</i>                                                                                                 |     |
| <b>❖ Digital Circuit Design and Performance Measurement</b>                                                                             |     |
| Transistor Breakdown Detection Circuit Design Based on CMOS BCD Process for High-voltage Output Stage of Neural Stimulators .....       | 267 |
| <i>Shengyuan Shi, Zeyu Lu, Xu Liu</i>                                                                                                   |     |
| A Novel Low-power High-order Compensated Voltage and Current Reference Circuit .....                                                    | 272 |
| <i>Moufu Kong, Yingzhi Luo, Xinghong Chang, Hongfei Deng</i>                                                                            |     |
| Design of a Capacitance Measurement Circuit and System with Parasitic Capacitance Elimination .....                                     | 277 |
| <i>Yaoming Lv, Hong Yang, Feng Zou, Yuhua Cheng</i>                                                                                     |     |
| Surface Plasmon-Enhanced $\beta$ -Ga <sub>2</sub> O <sub>3</sub> -Based MISIM Solar-Blind Photodetectors .....                          | 281 |
| <i>Guoming Zhang, Siming Tao, Yuxi Liu, Zexin Ding, Nan Wang, Qinghua Ren</i>                                                           |     |
| A Floating Peak Current Detection and Protection Circuit with Current Compensation, Dual Opening Mechanism and Negative Feedback .....  | 286 |
| <i>Yuxi Ma, Ying Zhang, Yujia Liang</i>                                                                                                 |     |
| A 5.8-GHz High-Efficiency Inverse Class-F Rectifier Circuit with GaN Schottky Diode .....                                               | 292 |
| <i>Yuxuan Cui, Kui Dang, Jincheng Zhang, Shudong Huo, Jiaying Weng, Ziyang Wang, Yue Hao</i>                                            |     |
| <b>❖ Microcircuit Design and Function Detection</b>                                                                                     |     |
| Secure Encryption and Decryption Circuit on 8T1C Structure-Based Charge Accumulation and Dissipation .....                              | 297 |
| <i>Shutong Zhang, Pengjun Wang, Ziyu Zhou, Yuejun Zhang</i>                                                                             |     |
| A Low-Power ADC for CIM with Non-Linear Quantisation, Max Pooling, and Configurable-Threshold ReLU .....                                | 302 |
| <i>Qiyang Lu, Junhan Zhu, Shu Zhang, Zhiguo Yu, Xiaofeng Gu</i>                                                                         |     |
| A High-speed Low-current-mismatch PFD+CP Circuit for 11.3G CPPLL Application .....                                                      | 307 |
| <i>Yongzheng Zhan, Rengang Li, Lu Zhang, Xiaofeng Zou, Qingsheng Hu, Qun Wang</i>                                                       |     |
| Reinforcement Learning based PCB Routing Using Dueling Double Deep Q Network .....                                                      | 312 |
| <i>Qilong Xiang, Xiaoyu Liang, Yuxing Xiao, Zhi Zhang</i>                                                                               |     |
| Research and Design of Hardware Circuit for Elliptic Curve Cryptographic Algorithm .....                                                | 317 |
| <i>Yuyao Liu, Sicong Zhou, Yuechi Ma, Xun Luo</i>                                                                                       |     |
| A Bandgap Reference with 3.2 ppm/ °C TC, 587.2pV Noise and 48dB PSRR at 1MHz .....                                                      | 323 |
| <i>Lingqi Min, Yanjie Wang, Mingzhi Yan, Xiaoqian Han</i>                                                                               |     |

## ❖ **Microelectronic Systems and Integrated Circuit Design**

|                                                                                                                            |     |
|----------------------------------------------------------------------------------------------------------------------------|-----|
