2024 IEEE International Performance, Computing, and Communications Conference (IPCCC 2024)

Orlando, Florida, USA
22-24 November 2024

Additional Copies of This Publication Are Available From:

Program

2024 IEEE International Performance, Computing, and Communications Conference (IPCCC)

SV1A (*Virtual Session V1A*)

- CART: Concurrent Asynchronous Ratchet Tree for Group Messaging

  Xinyue Xu (National University of Defense Technology, China), Baosheng Wang (National University of Defense Technology, China), Qianqian Xing (National University of Defense Technology, China), Xiaofeng Wang (National University of Defense Technology, China) 1

- PIB Sketch: Accurately Tracking Persistent and Infrequent Flows with Bursty Characteristic

  Xuetao Liu (Central South University, China), Jing Shao (Central South University, China), Sitan Li (Central South University, China), Yilin Zhao (Central South University, China), Jiawei Huang (Central South University, China) 10

- Correlation Analysis for Exploring Large-Scale Latency Variability in WANs

  Zhou Ying (Beijing Jiaotong University, China), Mingzhen Wu (Beijing Jiaotong University, China), Fei Song (Beijing Jiaotong University, China) 18

- AST-Trans: Detecting Web Tracking using Transformer-based Deep Learning with Abstract Syntax Tree

  Yong Yuan (National University of Defense Technology, China), Ziling Wei (National University of Defense Technology, China), Lin Liu (National University of Defense Technology, China), Shuhui Chen (National University of Defense Technology, China), Jinshu Su (National University of Defence Technology, China) 24

SV1B (*Virtual Session V1B*)

- A Dexterous Hybrid Attention Transformer for MRI super-resolution of brain tumors

  Mingxuan Li (Qilu University of Technology (Shandong Academy of Sciences), China), Yingchun Cui (Heilongjiang University, China), Jinbao Li (Shandong Artificial Intelligence Institute, Qilu University of Technology, China) 31

- CAUDA: Cloud-Assisted Active Unsupervised Domain Adaptation for On-Device Learning

  Zefu Wang (Shanghai Jiao Tong University, China), Zhenzhe Zheng (Shanghai Jiao Tong University, China), Fan Wu (Shanghai Jiao Tong University, China) 39

- DP-Prune: Global Optimal Strategy for Retraining-Free Pruning of Transformer Models

  Guangzhen Yao (Northeast Normal University, China), Long Zhang (Northeast Normal University, China), Sandong Zhu (Northeast Normal University, China), Miao Qi (Northeast Normal University, China) 46

- Large Language Model guided State Selection Approach for Fuzzing Network Protocol

  Bo Yu (National University of Defense Technology, China), Qihong Song (National University of Defense Technology, China), Chengnuo Cai (School of Computer, National University of Defense Technology, China) 52

SV2A (*Virtual Session V2A*)

- Spreading Computations for Loop-Free Multipath Routing in Computer Networks

  Jj Garcia-Luna-Aceves (University of Toronto, Canada), Morteza Moghaddassian (University of Toronto, Canada), Charles Hsieh (University of Toronto, Canada) 58

- TYLE: Tile-based Dynamic Quality Enhancement for 360-degree Video Streaming

  Sonali Keshava Murthy Naik (University of Calgary, Canada), Mea Wang (University of Calgary, Canada), Diwakar Krishnamurthy (University of Calgary, Canada) 68

- P2Sketch: Finding Persistent Items in Data Streams Based on Periodic Arrival

  Jiawei Huang (Central South University, China), Qi Liang (Central South University, China), Jing Shao (Central South University, China), Qile Wang (Central South University, China), Yilin Zhao (Central South University, China), Hui Li (Central South University, China), Sitan Li (Central South University, China), Shu Lin (Central South University, China) 76

- Stochastic Network Calculus Based Quality of Service Guarantee for Multi-class Traffic

  Yunlan Wang (Northwestern Polytechnical University, China), Qing Wang (Northwestern Polytechnical University, China), Zhao TianHai (Northwestern Polytechnical University, China) 84

SV2B (*Virtual Session V2B*)

- StreamDP: Continual Observation of Real-world Data Streams with Differential Privacy

  Shuailou Li (Institute of Information Engineering, Chinese Academy of Sciences, China), Yu Wen (Institute of Information Engineering, China), Zhaoyang Wang (Institute of Information Engineering, China), Wenbo Wang (Institute of Information Engineering, China), Lisong Zhang (Institute of Information Engineering, China), Dan Meng (Institute of Information Engineering, China) 93

- Smart Contract Vulnerability Detection Based on AST-Augmented Heterogeneous Graphs

Haikuo Li (Institute of Information Engineering, Chinese Academy of Sciences, China), Gang Xiong (Institute of Information Engineering, Chinese Academy of Sciences, China), Chengshang Hou (Schools of of Cyber Security, University of Chinese Academy of Sciences & Institute of Information Engineering, Chinese Academy of Sciences, China), Gaopeng Gou (Institute of Information Engineering，Chinese Academy of Sciences, China), Ziqian Chen (Institute of Information Engineering, Chinese Academy of Sciences, China), Zhen Li (Chinese Academy of Sciences, China) 103

- FingerMamba: Mamba-based Efficient Multi-tab Website Fingerprinting

  Lin Liu (National University of Defense Technology, China), Ziling Wei (National University of Defense Technology, China), Shuhui Chen (National University of Defense Technology, China), Zixuan Dong (National University of Defense Technology, China), Jinshu Su (National University of Defence Technology, China) 113

- RecoSelector: Cost-Sensitive Feature Selection for Network Intrusion Detection in Resource-Constrained Internet of Things

  Ziqian Chen (Institute of Information Engineering, Chinese Academy of Sciences, China), Wei Xia (Chinese Academy of Sciences, China), Gang Xiong (Institute of Information Engineering, Chinese Academy of Sciences, China), Zhen Li (Chinese Academy of Sciences, China), Gaopeng Gou (Institute of Information Engineering，Chinese Academy of Sciences, China) 122

SV3A (*Virtual Session V3A*)

IPCCC 2024 Workshop: 2024 IEEE 43rd International Performance Computing and Communications Conference (IPCCC) Workshop

- Failed Yet Stored: A First Look at DNS Negative Caching

  Meng Zeng (University of Chinese Academy of Sciences & Institute of Information Engineering, Chinese Academy of Sciences, China), Yujia Zhu (Chinese Academy of Sciences, China), Baiyang Li (Institute of Information Engineering, Chinese Academy of Sciences, China), Yuedong Zhang (CNCERT, China), Qingyun Liu (Institute of Information Engineering, Chinese Academy of Sciences, China), Binxing Fang (Harbin Institute of Technology, China) 132

- P4-FILB: Stateless Load Balancing Mechanism in Firewall and IPv6 Environment with P4

  Haizhang Zhu (Institute of Information Engineering, China), Zhongyi Zhang (Chinese Academy of Sciences, China), Zhou Zhou (Institute of Information Engineering, Chinese Academy of Sciences, China), Chengwei Peng (National Computer Network Emergency Response Technical Team, China), Hongfei Zhang (Institute of Information Engineering, Chinese Academy of Sciences, China), Shu Li (Chinese Academy of Sciences, China), Rong Yang (Chinese Academy of Sciences, China), Qingyun Liu (Institute of Information Engineering, Chinese

Academy of Sciences, China) 142

- ZBanner: Fast Stateless Scanning Capable of Obtaining Responses over TCP

  Chiyu Chen (National University of Defense Technology, China), Yuliang Lu (National University of Defense Technology, China), Guozheng Yang (National University of Defense Technology, China), Yi Xie (National University of Defense Technology, China), Shasha Guo (National University of Defense Technology, China) 150

- Locating the Root Cause of Large-scale BGP Anomaly with Routing Dependence

  Zhao Shiqi (Beijing University of Posts and Telecommunications, China) 156

- Learning-Empowered Resource Allocation in UxNB-Enabled Sliced HetECNs

  Wei Xingchen (Army Engineering University of PLA, China), Peng Laixian (Institute of Communication Engineering, China), Renhui Xu (Nanjing Institute of Communication Engineering, China), Wang Hai (Institute of Communication Engineering, China) 163

IEEE IPCCC 2024: 2024 IEEE International Performance, Computing, and Communications Conference (IPCCC)

SV3B (*Virtual Session V3B*)

- Adaptive Cache Optimization Integrating Spatiotemporal Analysis and Sliding Modules

  Xinxuan Hang (University of Science and Technology of China, China), Quan Zheng (University of Science and Technology of China, China), Wenjing Jing (University of Science and Technology of China, China), Qisheng Su (University of Science and Technology of China, China), Feng Yang (University of Science and Technology of China, China), Xiaobin Tan (University of Science and Technology of China, China) 169

- DASIV: Directional Acoustic Sensing based Intelligent Vehicle Interaction System

  Dinghua Zhao (Shanghaijiaotong University, China), Juntao Zhou (Shanghai Jiao Tong University, China), Dian Ding (Shanghai Jiao Tong University, China), Yu Lu (Shanghai Jiao Tong University, China), Yijie Li (National University of Singapore, Singapore), Hang Yang (Shanghai Jiao Tong University, China), Yi-Chao Chen (Shanghai Jiao Tong University, China), Guangtao Xue (Shanghai Jiao Tong University, China) 177

- RESD: High-Performance RDMA-enabled Control Plane for NVMe Shared-Disk Cluster

  Chenming Chang (China Telecom eSurfing Cloud, China), Jiawei Li (China Telecom eSurfing Cloud, China), Yucheng Kang (China Telecom eSurfing Cloud, China), Yupeng Chen (China Telecom eSurfing Cloud, China), Yi Zhang (China Telecom eSurfing Cloud, China) 185

- SndGLM-SA: A Social Network Debate Text Generation Model Based on Sentiment Analysis

Tao Tian (University of Electronic Science and Technology of China, China) 192

- SARP: Service-aware Routing Protocol in Task-Oriented FANET

  Tao Yang (Central South University, China), Wang Yang (Central South University, China), Yanbo Wang (Central South University, China), Lihuan Hui (Central South University, China), Jianwei Yao (Central South University, China) 198

S1A (*Session 1A*)

- Combining Dynamic Deterministic Latency Bounds and Networked Control Systems

  Robin Laidig (University of Stuttgart, Germany), Jona Herrmann (University of Stuttgart, Germany), David Augustat (University of Stuttgart, Germany), Frank Dürr (University of Stuttgart, Germany), Kurt Rothermel (University of Stuttgart, Germany) 206

- Optimized Deliverer Selection in Blockchain-Based P2P Content Delivery Network

  Zhenchao Yan (Southwest Jiaotong University, China), Songlin He (Southwest Jiaotong University, China), Chase Q. Wu (New Jersey Institute of Technology & Oak Ridge National Laboratory, USA), Aiqin Hou (Northwest University, China) 215

- Algorithms for the Generalized Network Construction Problem

  Fei Li (George Mason University, USA) 223

S1B (*Session 1B*)

- Statistical and Shapelet Analysis of HPC Application Performance Using Time-Series Heartbeat Data

  Mohammad Tahat (New Mexico State University, USA), Strahinja Trecakov (New Mexico State University, USA), Jonathan Cook (New Mexico State University, Afghanistan) 229

- Dynamic Task Offloading in Connected Vehicles: Leveraging a Graph Neural Networks Approach for Multi-hop Search

  Asad W Malik (Mississippi State University, USA), Samee U. Khan (Mississippi State University, USA) 238

- Fat-B+Tree: Fast B+tree Indexing with In-Network Memory

  Yikai Zhao (Peking University, China), Yuanpeng Li (Peking University, China), Zicang Xu (Peking University, China), Tong Yang (Peking University, China), Kaicheng Yang (Peking University, China), Li Chen (Huawei, Hong Kong), Xin Yao (Huawei Technologies Co., Ltd., China), Gong Zhang (Huawei Technologies Co., Ltd., China) 246

S2A (*Session 2A*)

- HEJet: A Framework for Efficient Machine Learning Inference with Homomorphic Encryption

  David Monschein (Karlsruhe University of Applied Sciences, Germany), Oliver P. Waldhorst (Karlsruhe University of Applied Sciences & Distributed Software Systems (DSS) Research Group at the Insitute of Applied Research (IAF), Germany) 256

- Revolutionizing Wireless Modeling and Simulation with Network-Oriented LLMs

  Jiewen Liu (North Carolina State University, USA), Zhiyuan Peng (North Carolina State University, USA), Dongkuan Xu (North Carolina State University, USA), Yuchen Liu (North Carolina State University, USA) 266

- Computation Caching in Mobile Convolutional Neural Network Inference

  James M Mariani (Michigan State University, USA), Li Xiao (Michigan State University, USA) 274

- A Multimodal Method for Semi-Biometric Information Based User Identification Approach In AR And VR Application

  Han Li (John Hopkins University, USA), Ke Lyu (Miami University, USA), Owen Dossett (Miami University, USA), Xianglong Feng (Miami University, USA) 282

S2B (*Session 2B*)

- Differentially Private Selection using Smooth Sensitivity

  Akito Yamamoto (The University of Tokyo, Japan), Tetsuo Shibuya (The University of Tokyo, Japan) 289

- Curse to Blessing: Leveraging Model Inversion Attacks to Detect Backdoor Attacks in Federated Learning

  Zhaowen Chen (Miami University, USA), Mingze Zhang (Miami University, USA), Caleb Mostyn (Miami University, USA), Honglu Jiang (Miami University, USA), Xianglong Feng (Miami University, USA) 299

- Cluster-BPI: Efficient Fine-Grain Blind Power Identification for Defending against Hardware Thermal Trojans in Multicore SoCs

  Mohamed R. Elshamy (New Mexico State University, USA), Mehdi Elahi (North Carolina A&T University, USA), Ahmad Patooghy (North Carolina A& T University, USA), Abdel-Hameed A Badawy (New Mexico State University, USA) 308

- Overlooked Backdoors: Investigating 6to4 Tunnel Nodes and Their Exploitation in the Wild

  Jiaxing Guo (Tsinghua University, China), Lin He (Tsinghua University, China), Ying Liu

(Tsinghua University, China) 314

Reception and Poster Session

- A Review on Quantum Machine Learning in Different Computer Vision Fields

  Md Majedul Islam (Kennesaw State University, USA), Jing (Selena) He (Kennesaw State University, USA) 322

- Analyzing Ground-lightning Dataset Using the Density Based Spatial Clustering of Applications with Noise (DBSCAN)

  Zhuojun Duan (James Madison University, USA), James Agresto (James Madison University, USA), Mace Bentley (James Madison University, USA), Tobias Gerken (James Madison University, USA), Dudley Bonsal (James Madison University, USA) 324

- Analysis of Intermediate Mean Opinion Score (MOS) and QoS in a High Definition Voice Call Conference in Mobile Networks

  Jussif Junior Abularach Arnez (Sidia Institute of Science and Technology, Brazil), Lucas B. C. Tribuzy (Sidia Institute of Science and Technology, Brazil), Fabricio De Souza Oliveira (Sidia Institute of Science and Technology, Brazil), Isaac Barros Gomes (Sidia Institute of Science and Technology, Brazil), Jéssica Da Silva Gomes (UEA, Brazil), Caio Pedrosa Galvao (Brazil) 326

- Optimization of Heterogeneous Coded Distributed Computing with Nonuniform Input File Sizes

  Jiasheng Liang (Binghamton University, USA), Siyu Zhang (Lakehead University, Canada), Yong Deng (Lakehead University, Canada) 328

- Bad Neighbors? On the Impact of IEEE 802.11p and Cellular 5G on Vehicular Neighbor Sets

  Simon Welzel (TU Ilmenau, Germany), Florian Klingler (TU Ilmenau, Germany) 330

- FlexMRS: Multi-Objective Optimization for Diverse Application Requirements in MPTCP Scheduling

  Zekun Zhang (Capital Normal University, China), Zhong Lujie (Capital Normal University, China), Xiang Ji (Beijing University of Post and Telecommunications, China) 332

- Policy Enforcement for IoT: Complexities and Emerging Solutions

  Shuo Zhang (Columbia University, USA), Luoyao Hao (Columbia University, USA), Henning Schulzrinne (Columbia University, USA) 334

- Wital: A Whitelist-Based IoT Firewall for Mitigating Device Exploitation

  Heeyun Kim (Columbia University, USA), Wei Xiong Toh (Columbia University, USA), Luoyao Hao (Columbia University, USA), Henning Schulzrinne (Columbia University, USA)

S3A (*Session 3A*)

- Integrating Post-Quantum TLS into the Control Plane of 5G Networks

  Yacoub Hanna (Florida International University, USA), Diana S Pineda Andrade (Florida International University, USA), Maryna Veksler (Florida International University, USA), Manish Paudel (Florida International University, USA), Kemal Akkaya (Florida International University, USA), Mila Anastasova (Florida Atlantic University, USA), Reza Azarderakhsh (Florida Atlantic University, USA) 338

- Adaptive Mitigation of Blackhole Attacks in Blockchain-Enhanced Software Defined Networks

  Mehmed K Uludag (University of Michigan, USA), Murat Karakus (Ankara University, Turkey), Evrim Guler (Bartin University, Turkey), Suleyman Uludag (The University of Michigan - Flint, USA) 346

- Lightweight Secure Communication Scheme Based on PUF for In-vehicle Controller Area Networks

  Haoran Jiang (Hunan Normal University, China), Yehua Wei (Hunan Normal University, China), Wenjia Li (New York Institute of Technology, USA), Jiangwei Li (Hunan Normal University, USA) 354

- DecMEN: Scalable Measurement and Impairment Framework for Network Characterization in 5G(+)

  Niladri Mondal (TU Ilmenau, Germany), Mario Niggemeyer (TU Ilmenau, Germany), Simon Welzel (TU Ilmenau, Germany), Florian Klingler (TU Ilmenau, Germany) 362

S3B (*Session 3B*)

- Optimal Sequencing for a Class of Task Offloading Problems in Edge-Cloud Computing

  Ye Xia (University of Florida, USA) 368

- An Extension of Pathfinding Algorithms for Randomly Determined Speeds

  Visvam K. Rajesh (Hunterdon Central Regional High School, USA), Chase Q. Wu (New Jersey Institute of Technology & Oak Ridge National Laboratory, USA) 376

- Less is More: Exploring Sampled Twitter Data Steams for Pandemic Surveillance and Monitoring

  Kuai Xu (Arizona State University, USA), Feng Wang (Arizona State University, USA), Mitchell Hoikka (Arizona State University, USA) 384

- LSAFE: a Lightweight Static Analysis Framework for binary Executables

Xiao Yue (Oakland University, USA), Guangzhi Qu (Oakland University, USA) 390

S4A (*Session 4A*)

- Activation Sparsity Opportunities for Compressing General Large Language Models

  Nobel Dhar (Kennesaw State University, USA), Bobin Deng (Kennesaw State University, USA), Md Romyull Islam (Kennesaw State University, USA), Kazi Fahim Ahmad Nasif (Kennesaw State University, USA), Liang Zhao (Kennesaw State University, USA), Kun Suo (Kennesaw State University, USA) 396

- Characterizing and Understanding the Performance of Small Language Models on Edge Devices

  Md Romyull Islam (Kennesaw State University, USA), Nobel Dhar (Kennesaw State University, USA), Bobin Deng (Kennesaw State University, USA), Tu N. Nguyen (Kennesaw State University, USA), Jing (Selena) He (Kennesaw State University, USA), Kun Suo (Kennesaw State University, USA) 405

- HANNA: Harvesting-Aware Neural Network Architecture Search for Batteryless Intermittent Devices

  Rohit Sahu (Iowa State University, USA), Vishal Deep (Iowa State University, USA), Henry Duwe (Iowa State University, USA) 415

- The Robustness of Spiking Neural Networks in Communication and its Application towards Network Efficiency in Federated Learning

  Manh V Nguyen (Kennesaw State University, USA), Liang Zhao (Kennesaw State University, USA, USA), Bobin Deng (Kennesaw State University, USA), William M Severa (Sandia National Laboratories, USA), Honghui Xu (Kennesaw State University, USA), Shaoen Wu (Kennesaw State University, USA) 425

S4B (*Session 4B*)

- The Seeker's Dilemma: Realistic Formulation and Benchmarking for Hardware Trojan Detection

  Amin Sarihi (MIPS & New Mexico State University, USA), Ahmad Patooghy (North Carolina A& T University, USA), Abdel-Hameed A Badawy (New Mexico State University, USA), Peter A Jamieson (Miami University, USA) 432

- Content Security Policy Deployment Issues Related to Third-party Scripts among Builder-generated Websites and Other Websites

  Mengxia Ren (Colorado School of Mines, USA), Chuan Yue (Colorado School of Mines, USA) 440

- Enhanced Outsourced and Secure Inference for Tall Sparse Decision Trees

Andrew Quijano (New York University & Amazon, USA), Spyros T. Halkidis (University of Macedonia, Greece), Kevin Gallagher (NOVA LINCS, NOVA School of Science and Technology, Portugal, Portugal), Nikolaos Samaras (University of Macedonia, Greece), Kemal Akkaya (Florida International University, USA) 450

- Cryptocurrency Price Forecasting Using XGBoost Regressor and Technical Indicators

  Abdelatif Hafid (Université de Montréal, Canada), Maad M A Ebrahim (Ericsson, Canada), Mohamed Rahouti (Fordham University, USA), Diogo Oliveira (Penn State University, USA) 456

S5A (*Session 5A*)

- Precision Tracking in Geofencing Systems using Deep Reinforcement Learning

  Alireza Famili (Virginia Tech, USA), Shihua Sun (Virginia Tech, USA), Tolga O Atalay (Virginia Tech, USA), Angelos Stavrou (Virginia Tech & Kryptowire, USA) 462

- Experimental Analysis of LoRaWAN for Optimizing Water Quality Monitoring with Reinforcement Learning-Driven Scheduling

  Jui Mhatre (Kennesaw State University, USA), Minh Hung Nguyen (Kennesaw State University, USA), Ahyoung Lee (Kennesaw State University, USA), Hoseon Lee (Kennesaw State University, USA) 472

- Towards A Computational Model for Learning Affective Empathy Responses

  Mark Allison (The University of Michigan-Flint, USA) 478

IPCCC 2024 Workshop: 2024 IEEE 43rd International Performance Computing and Communications Conference (IPCCC) Workshop

S5B (*Session 5B*)

- Dynamic Traffic Load Rebalancing for Hardware-accelerated 6G UPF Resilient Architecture

  DongJin Lee (SK Telecom, Korea (South)), Seongsu Park (Rexordium Co., Ltd., Korea (South)), BumJun Lee (Newgens, Korea (South)) 485

- An Analytical Study on the Evolution and Impact of Chatbots in Tourism Over the Past Decade

  Lamya Benaddi (GL-ISI Team, FST Errachida, UMI-Meknes, Morocco), Charaf Ouaddi (GL-ISI Team, FST Errachida, UMI-Meknes, Morocco), Jakimi Abdeslam (GLISI Teams & Moulay Ismail University, Morocco), Saadane Rachid (EHTP, Canada & SIRC LaGeS EHTP, Morocco), Brahim Ouchao (FST of Errachidia, Morocco), Mohamed Rahouti (Fordham University, USA), Abdelatif Hafid (Université de Montréal, Canada), Diogo Oliveira (Penn

State University, USA) 492

- Formulating a Comprehensive Cybersecurity Framework for Uncrewed Aerial Vehicles

  Anice K Thompson (Troy University, USA), Dev D Patel (Embry-Riddle Aeronautical University, USA), Mustafa I Akbaş (Embry-Riddle Aeronautical University, USA) 498

- Formal Modeling of Road Network-Based Autonomous Vehicle Validation Scenarios With Intersections and Pedestrians

  Ilke Kutlu (Istanbul Technical University, Turkey), Quentin Goss (Embry-Riddle Aeronautical University, USA), Tahir Cetin Akinci (University of California Riverside, USA), Mustafa I Akbaş (Embry-Riddle Aeronautical University, USA) 504

- Digital-Twin Architecture of a Spiking Neuron using Carbon Nanotube Field Effect Transistors

  Shelby Williams (University of Louisiana at Lafayette, USA), Prosen Kirtonia (University of Louisiana at Lafayette, USA), Kasem Khalil (University of Mississippi, USA), Magdy Bayoumi (University of Louisiana Lafayette, USA) 510
