Table of Contents

Message from the General Chairs	v
Message from the Program Chairs	liv
Organizing Committee	lv
Program Committee	lvi

Regular Full Papers

Systems and Architectures (I)

A Hybrid Feature Selection Method Based on Imbalanced Learning for Wave Prediction	1
<i>Qinjie Lin (National University of Defense Technology, China), Xiaoli Ren (National University of Defense Technology, China), Hao Sun (National University of Defense Technology, China), Jiaming Tan (National University of Defense Technology, China), Xiaoyong Li (National University of Defense Technology, China), and Jingze Lu (National University of Defense Technology, China)</i>	
Low-Latency State Management for Real-Time Tasks in Edge Serverless	10
<i>Yanyan Wen (Tianjin University of Technology, China), Guangping Xu (Tianjin University of Technology, China), Jianshe Wang (Tianjin University of Technology, China), and Wei Hao (Tianjin University of Technology, China)</i>	
Adaptive Cost Weight-Enabled Federated Distillation for Network Intrusion Detection	18
<i>ZiDong Chen (University of Electronic Science and Technology of China, China), Yan Wang (University of Electronic Science and Technology of China, China), Sheng Cao (University of Electronic Science and Technology of China, China), and Xiaosong Zhang (University of Electronic Science and Technology of China, China)</i>	
HEGD-FL: A Privacy-Preserving Decentralized Federated Learning Framework Based on Homomorphic Encryption	26
<i>Pengyu Yao (Beijing Jiaotong University, China), Di Zhang (Beijing Jiaotong University, China), Min Guo (Beijing Jiaotong University, China), and Xun Shao (Toyohashi University of Technology, Japan)</i>	

Think Before Acting: The Necessity of Endowing Robot Terminals With the Ability to Fine-Tune Reinforcement Learning Policies	34
<i>Dawei Feng (National University of Defense Technology, China; State Key Laboratory of Complex & Critical Software Environment, China), Xudong Gong (National University of Defense Technology, China; State Key Laboratory of Complex & Critical Software Environment, China), Xunhui Zhang (National University of Defense Technology, China; State Key Laboratory of Complex & Critical Software Environment, China), and Jun Fu (National University of Defense Technology, China)</i>	
Parallel Assembly Sequence Planning Based on Sparrow Search Algorithms	42
<i>Haichen He (Beijing Jiaotong University, China), Weibin Liu (Beijing Jiaotong University, China), Yinan Zhang (CRRC Information Technology Co. Ltd., China), Shasha Song (CRRC Information Technology Co. Ltd., China), Yue Cheng (Beijing Jiaotong University, China), Ziheng Liu (Beijing Jiaotong University, China), and Weiwei Xing (Beijing Jiaotong University, China)</i>	

Systems and Architectures (II)

A Contrastive Collaborative Filtering Method for Personalized Recommendation With Self-Attention	50
<i>Cheng Chen (Nanjing University, China), Hao Tian (Nanjing University, China), Hang Zhang (Nanjing University, China), and Wanchun Dou (Nanjing University, China)</i>	
A Blockchain-Assisted Federated Learning Method for Recommendation Systems	58
<i>Hang Zhang (Nanjing University, China), Hao Tian (Nanjing University, China), Cheng Chen (Nanjing University, China), Chen Tian (Nanjing University, China), and Wanchun Dou (Nanjing University, China)</i>	
Multi-Class Task Offloading Optimization in Mobile Edge Computing	66
<i>Songkang Ma (Yunnan University, China), Zhenli He (Yunnan University, China), Libo Feng (Yunnan University, China), Xiaolong Zhai (Yunnan University, China), and Yiyan Tong (Yunnan University, China)</i>	
Advanced Virtualization in Automotive Operating System: Technology Overview and Scheme Design	74
<i>Yi Liu (FAW Besturn Automotive Co., Ltd., China), Mengyun Yao (China Automotive Innovation Co., Ltd., China), Xinglong Yang (FAW Besturn Automotive Co., Ltd., China), Min Qin (China Automotive Innovation Co., Ltd., China), Liang Ma (FAW Besturn Automotive Co., Ltd., China), and Haolong Xiang (Nanjing University of Information Science and Technology, China)</i>	
A Crowdsensing Service Pricing Method in Vehicular Edge Computing	82
<i>Zheng Li (Nanjing University, China), Sizhe Tang (Nanjing University of Information Science and Technology, China), Hao Tian (Nanjing University, China), Haolong Xiang (Nanjing University of Information Science and Technology, China), Xiaolong Xu (Nanjing University of Information Science and Technology, China), and Wanchun Dou (Nanjing University, China)</i>	

Mining Relational Similarity in Social Networks for Enhanced Recommendations	90
<i>Pengcheng Guo (Nanjing University of Information Science and Technology, China), Qingyang Wang (Nanjing University of Information Science and Technology, China), Jielin Jiang (Nanjing University of Information Science and Technology, China), Siyu Wu (Nanjing University of Information Science and Technology, China), Haolong Xiang (Nanjing University of Information Science and Technology, China; Jiangsu Province Engineering Research Center of Advanced Computing and Intelligent Services, China), Xinyue Ji (Nanjing University of Information Science and Technology, China), and Shengjun Xue (Silicon Lake College, China)</i>	

Systems and Architectures (III)

AQMFL: An Adaptive Quantization Framework for Multi-Modal Federated Learning in Heterogeneous Edge Devices	98
<i>Haoyong Tang (Tianjin University, China), Kaixuan Zhang (Tianjin University, China), Jiuwu Zhang (Tianjin University, China), Xin Xie (Tianjin University, China), Xinyu Tong (Tianjin University, China), and Xiulong Liu (Tianjin University, China)</i>	
DeRAG: Decentralized Multi-Source RAG System With Optimized Pyth Network	106
<i>Junwei Yu (The University of Tokyo, Japan) and Hiroyuki Sato (The University of Tokyo, Japan)</i>	
HSDP: Accelerating Large-Scale Model Training via Efficient Sharded Data Parallelism	116
<i>Yanqi Hao (National University of Defense Technology, China), Zhiquan Lai (National University of Defense Technology, China), Wei Wang (National University of Defense Technology, China), Shengwei Li (National University of Defense Technology, China), Weijie Liu (National University of Defense Technology, China), Keshi Ge (National University of Defense Technology, China), and Dongsheng Li (National University of Defense Technology, China)</i>	
Enhanced Log Anomaly Detection With Contrastive Learning and BERT Embeddings	126
<i>Mengmeng Cui (Nanjing University of Information Science and Technology, China), Tong Gao (Nanjing University of Information Science and Technology, China), Haolong Xiang (Nanjing University of Information Science and Technology, China; Jiangsu Province Engineering Research Center of Advanced Computing and Intelligent Services, China), Xiaolong Xu (Nanjing University of Information Science and Technology, China), Changyan Lu (China Automotive Innovation Corporation, China), Junqun Xiong (China Automotive Innovation Corporation, China), and Shengjun Xue (Silicon Lake College, China)</i>	

A Knowledge Graph Based Technology of Operating System Software Repository Evolution Analysis	133
<i>Jun Ma (National University of Defense Technology Changsha, China), Chuang Zhang (National University of Defense Technology, China), Jing Wang (National University of Defense Technology, China), Xiaoling Li (National University of Defense Technology, China), Xueyan Zhang (National University of Defense Technology, China), Xinran Hong (National University of Defense Technology, China), Yu Jie (National University of Defense Technology, China), and Shasha Li (National University of Defense Technology, China)</i>	
MPLNet: Industrial Anomaly Detection With Memory Bank and Prompt Learning	143
<i>Hao Zhou (Nanjing University of Information Science and Technology, China), Xuanru Guo (Nanjing University of Information Science and Technology, China), Mingcheng Ji (University of Science and Technology Beijing, China), Jielin Jiang (Nanjing University of Information Science and Technology, China), Haolong Xiang (Nanjing University of Information Science and Technology; Jiangsu Province Engineering Research Center of Advanced Computing and Intelligent Services, China), and Shengjun Xue (Silicon Lake College, China)</i>	
Systems and Architectures (IV)	
Multimodal Interaction Fusion Network for Cloth-Changing Person Re-Identification	151
<i>Caihong Yuan (Henan University, China), Yuanchen Xu (Henan University, China), Zhijie Guan (Henan University, China), Xiaopan Chen (Henan University, China), Xiaopan Chen (Henan University, China), and Wenjuan Liang (Henan University, China)</i>	
DAR: Deadline-Aware Rerouting for Mix-Flows in Datacenter Networks	159
<i>Jinbin Hu (Changsha University of Science and Technology, China), Rui Zhi (Changsha University of Science and Technology, China), Shuying Rao (Changsha University of Science and Technology, China), Ying Liu (Changsha University of Science and Technology, China), and Jin Wang (Changsha University of Science and Technology, China; Hunan University of Science and Technology, China)</i>	
Enhanced Multi-Intent Recognition With BERT Embeddings and Graph-Based Decoding	165
<i>Mengmeng Cui (Nanjing University of Information Science and Technology, China; Jiangsu Province Engineering Research Center of Advanced Computing and Intelligent Services, China), Rui Zhang (Nanjing University of Information Science and Technology, China), Haolong Xiang (Nanjing University of Information Science and Technology, China; Jiangsu Province Engineering Research Center of Advanced Computing and Intelligent Services, China), and Shengjun Xue (Silicon Lake College, China)</i>	
Leveraging SmartNIC for Ring AllReduce Offloading	173
<i>Lihuan Hui (Central South University), Wang Yang (Central South University), and Yanbo Yanbo (Central South University)</i>	

SE-LeNet: A Data Reconstruction Method for Dissolved Oxygen in Tropical Pacific With Deep Learning	181
<i>Ruixin Cao (National University of Defense Technology, China), Shuchang Wang (National University of Defense Technology, China), Senliang Bao (National University of Defense Technology, China), Xiaoyong Li (National University of Defense Technology, China), Jiaming Tan (National University of Defense Technology, China), and Chengcheng Shao (National University of Defense Technology, China)</i>	
Pose Convolutional Routing Towards Lightweight Capsule Networks	190
<i>Chengxin Lv (Changzhou University, China), Guangqi Jiang (Changzhou University, China), Shoukun Xu (Changzhou University, China), and Yi Liu (Changzhou University, China)</i>	

Systems and Architectures (V)

ProtoFedLA: Prototype Guided Personalized Federated Learning Based on Localized Aggregation Across Heterogeneous Clients	196
<i>Peiyan Jia (Henan University, China), Delong Zhang (Henan University, China), Lei Zhang (Henan University, China), Daojun Han (Henan University, China), Juntao Zhang (Henan University, China), and Yulong Sang (Henan University, China)</i>	
Coverage Probability of Distributed CoMP UAV-Assisted Cellular Networks	204
<i>Yan Li (Changsha University of Science and Technology, China; National University of Defense Technology, China), Qingmin Long (Changsha University of Science and Technology, China), Qiang Tang (Changsha University of Science and Technology, China), Shiming He (Changsha University of Science and Technology, China), and Bing Xiong (Changsha University of Science and Technology, China)</i>	
A Hybrid Memory Data Placement Strategy for Edge Computing	211
<i>Binghui Lin (Tianjin University of Technology and Education, China), Jianxun Zhang (Tianjin University of Technology and Education, China), and Xinyu Qiao (Tianjin University of Technology and Education, China)</i>	
SparkTH: NUMA-Aware and I/O-Efficient Spark for ARM-Based Many-Core Supercomputing System	219
<i>Nan Hu (Sun Yat-sen University, China), Minguang Xiao (Sun Yat-sen University, China), Zhiguang Chen (Sun Yat-sen University, China), and Yutong Lu (Sun Yat-sen University, China)</i>	
Revisiting the Underlying Causes of RDMA Scalability Issues	227
<i>Junye Zhang (Beijing University of Posts and Telecommunications, China; Huawei Technologies Co., Ltd., China), Hui Yuan (Huawei Technologies Co., Ltd., China), Zhe Wang (Shanghai Jiao Tong University, China), Peng Yu (Beijing University of Posts and Telecommunications, China), Hexiang Song (Huawei Technologies Co., Ltd., China), Di Qu (Huawei Technologies Co., Ltd., China), Siyu Yan (Huawei Technologies Co., Ltd., China), and Xiaolong Zheng (Huawei Technologies Co., Ltd., China)</i>	

DCF: A Dynamic Caching Framework for Compute Nodes on Disaggregated Memory	236
<i>Qinzhen Cao (University of Electronic Science and Technology of China, China), Jibo Liu (University of Electronic Science and Technology of China, China), Xiaowen Nie (University of Electronic Science and Technology of China, China), and Rui Xi (University of Electronic Science and Technology of China, China)</i>	

Systems and Architectures (VI)

Learning-Based Variable Neighborhood Search Algorithm for Cloud Service Deployment Problem With Time Windows	246
<i>Fanchao Meng (Harbin Institute of Technology at Weihai, China), Yang Lu (Harbin Institute of Technology at Weihai, China), Weigong Lv (Harbin Institute of Technology at Weihai, China), and Dianhui Chu (Harbin Institute of Technology at Weihai, China)</i>	
DualLight: Intelligent Traffic Signal Control Method Based on Deep Reinforcement Learning	254
<i>Huanqiang Tang (Wuhan University of Technology, China), Fan He (Wuhan University of Technology, China), Yanfen Cheng (Wuhan University of Technology, China), and Xun Shao (Toyohashi University of Technology, China)</i>	
Learning-Based Hierarchical Adaptive Congestion Control with Low Training Overhead	262
<i>Jinbin Hu (Changsha University of Science and Technology, China), Zikai Zhou (Changsha University of Science and Technology, China), Shuying Rao (Changsha University of Science and Technology, China), Yujie Peng (Changsha University of Science and Technology, China), Bowen Bao (Changsha University of Science and Technology, China), and Chang Ruan (Changsha University of Science and Technology, China)</i>	
Hybrid Deadlock Recovery Algorithm for Irregular NoC in Multi-Chiplet Systems	268
<i>Zhiqiang Chen (National University of Defense Technology, China; Key Laboratory of Advanced Microprocessor Chips and Systems, Changsha, China), Yongwen Wang (National University of Defense Technology, China; Key Laboratory of Advanced Microprocessor Chips and Systems, Changsha, China), and Hongwei Zhou (National University of Defense Technology, China; Key Laboratory of Advanced Microprocessor Chips and Systems, Changsha, China)</i>	
DcKE: A Dual Encoder-decoder Knowledge Embedding Model for Link Prediction	278
<i>Jiarun Lin (National University of Defense Technology, China), Xiaoli Ren (National University of Defense Technology, China), Xiaoyong Li (National University of Defense Technology, China), Qing Xu (National University of Defense Technology, China), Xiang Zhu (National University of Defense Technology, China), and Xinyu Chen (National University of Defense Technology, China)</i>	

Technologies and Tools (I)

Implementation and Evaluation of Octuple-Precision Fast Fourier Transform on GPU	287
<i>Shota Kawakami (University of Tsukuba, Japan) and Daisuke Takahashi (University of Tsukuba, Japan)</i>	

A DDoS Detection Model Based on Feature Construction and Deep Forest	295
<i>Shuangquan Zhang (Nanjing University of Science and Technology, China), Yunpeng Sun (Nanjing University of Science and Technology, China), Jiahui Fei (Nanjing University of Science and Technology, China), Rui Zhang (Nanjing University of Science and Technology, China), Peng Gao (Nanjing University of Science and Technology, China), and Zhichao Lian (Nanjing University of Science and Technology, China)</i>	
Budget-aware Scheduling Algorithm Using Negative Offset Mechanism for Snake Optimization in Heterogeneous Cloud	302
<i>Longxin Zhang (Hunan University of Technology, China), Yanfen Zhang (Hunan University of Technology, China), Xiaotong Lu (Hunan University of Technology, China), Runti Tan (Hunan University of Technology, China), Xianming Huang (Hunan University of Technology, China), and Jianguo Chen (Sun YatSen University, China)</i>	
Hybrid Scheduling Executor and Chain-Aware Thread Mapping Strategy for ROS 2	310
<i>Zhengda Wu (Academy of Military Science, China), Haining Hu (Academy of Military Science, China), Sining Yang (Academy of Military Science, China), and Bo Zhang (Academy of Military Science, China)</i>	
OpenCML: An Open Customizable Modeling Language for Directed Acyclic Graphs	319
<i>Zhenjie Wei (Beijing Jiaotong University, China), Weiwei Xing (Beijing Jiaotong University, China), Weibin Liu (Beijing Jiaotong University, China), Zhiyuan Zou (Beijing Information Science and Technology University, China), and Genxiang Chen (Minzu University of China, China)</i>	
DDBO: Discrete Dung Beetle Optimizer for Optical Communication Simulation Task Allocation ...	327
<i>Zheng Wang (Beijing Jiaotong University, China), Weiwei Xing (Beijing Jiaotong University, China), Yue Cheng (Beijing Jiaotong University, China), Weibin Liu (Institute of Information Science Beijing Jiaotong University, China), Zhiyuan Zou (Computer School Beijing Information Science and Technology University, China), Zhi Wang (Beijing Jiaotong University, China), Genxiang Chen (University of China, China), and Wei Lu (Beijing Jiaotong University, China)</i>	

Technologies and Tools (II)

Improved Bat Algorithms for Solving Flowtime Minimization Task Scheduling Problems in D2D-Enabled MEC	336
<i>Linhua Ma (Nanjing University of Science and Technology, China), Qingran Yan (Nanjing University of Science and Technology, China), and Yi Zhang (Nanjing University of Science and Technology, China)</i>	
Dynamic Checkpointing for Heterogeneous IoT Devices Through Self-Referencing	343
<i>Nan Wang (East China University of Science and Technology, China), Ziyi Wang (East China University of Science and Technology, China), Lijun Lu (East China University of Science and Technology, China), Zhiyuan Ma (University of Shanghai for Science and Technology, China), and Qun Chao (Shanghai Jiao Tong University, China)</i>	

Cost-Effective Reliability-Constrained Multi-Domain Service Function Chain Orchestration: A Metaheuristic Approach	351
<i>Qian Zhang (Nanjing University of Science and Technology, China), Jin Sun (Nanjing University of Science and Technology, China), and Yi Zhang (Nanjing University of Science and Technology, China)</i>	
QGIP: A Framework Bridging Quantum Grayscale Image Processing and Applications	359
<i>Xilong Che (Jilin University, China), Jiale Zhang (Jilin University, China), Shuo Chen (Jilin University, China), Shun Peng (Jilin University, China), and Juncheng Hu (Jilin University, China)</i>	
FCTNet: A CNN-Transformer Hybrid for Single Remote Sensing Image Super-Resolution	368
<i>Ning Shi (Hainan University, China), Hui Zhou (Hainan University, China), Chunyang Ye (Hainan University, China), Biyuan Yao (Hainan University, China), Yilin Wu (Hainan University, China), and Bo Li (Hainan University, China)</i>	
TollHelper: A Safe and Efficient Traffic Control Approach on Toll Plaza via Constrained Load Balancing	378
<i>Mengbing Zhou (Shenzhen Institute of Advanced Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Bocong Zhao (Shenzhen Institute of Advanced Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Minxian Xu (Shenzhen Institute of Advanced Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Hao Dai (Shenzhen Institute of Advanced Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Yang Wang (Shenzhen Institute of Advanced Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China; Shenzhen University of Advanced Technology, China; The SIAT-Suntang Big Data&AI Joint Innovation Laboratory, China)</i>	

Technologies and Tools (III)

A Composite Method for Joint Optimization of Computation Offloading, Power Assignment, and Resource Allocation in Mobile Edge Computing	386
<i>Huayu Qin (Nanjing University of Science and Technology, China), Yi Zhang (Nanjing University of Science and Technology, China), and Jin Sun (Nanjing University of Science and Technology, China)</i>	
Low-bit CUTLASS GEMM Template Auto-tuning using Neural Network	394
<i>Hong Guo (University of Potsdam, Germany), Nianhui Guo (University of Potsdam, Germany), Christoph Meinel (University of Potsdam, Germany), and Haojin Yang (University of Potsdam, Germany)</i>	
ViTa: Optimizing Vision Transformer Operators on Domain-Specific Accelerators	402
<i>PengYu Mu (Beihang University, China), Yi Liu (Beihang University, China), Yue Zhou (Beihang University, China), and Rui Wang (Beihang University, China)</i>	

FedGAC: Graph Federated Learning with Gradients Aggregation Calibration for Non-IID and Long-Tailed Data	410
<i>Jie Li (Guangxi Normal University, China), Jinyan Wang (Guangxi Normal University, China), Rongbin Deng (Guangxi Normal University, China), Dongqi Yan (Guangxi Normal University, China), and Qiyu Li (Guangxi Normal University, China)</i>	
SSG-FLIM: Federated Learning Incentive Mechanism for Privacy Protection and Data Trading in IoT	418
<i>Siqin Zeng (Huzhou University, China), Xiaohong Wu (Huzhou University, China), Yonggen Gu (Huzhou University, China), and Jie Tao (Huzhou University, China)</i>	
Optimizing Batched Small Matrix Multiplication on Multi-core DSP Architecture	426
<i>Xiaohan Zuo (Chongqing University, China; Key Laboratory of Dependable Service Computing in Cyber Physical Society, Ministry of Education, China), Chunhua Xiao (Chongqing University, China; Key Laboratory of Dependable Service Computing in Cyber Physical Society, Ministry of Education, China), Qinglin Wang (National University of Defense Technology, China; Laboratory of Digitizing Software for Frontier Equipment, National University of Defense Technology, China), and Chen Shi (Chongqing University, China; Key Laboratory of Dependable Service Computing in Cyber Physical Society, Ministry of Education, China)</i>	

Technologies and Tools (IV)

ESNet: An Efficient Real-time Semantic Segmentation Network	436
<i>Renping Xie (Dongguan University of Technology, China), Cong He (Dongguan University of Technology, China), Ming Tao (Dongguan University of Technology, China), and Kai Ding (Dongguan University of Technology, China)</i>	
A Semi-Supervised GCN-Based Community Detection Algorithm	444
<i>Shu-han Shi (Jiangsu University, China), Le-ilei Shi (Jiangsu University, China), Lu Liu (University of Exeter, UK), Zi-xuan Han (Jiangsu University, China), Liang Jiang (Jiangsu University of Science and Technology, China), and Fu-xiang Chen (University of Leicester, UK)</i>	
Energy-Efficient and Load-Balanced Digital Twin Deployment in DITEN-Empowered IIoT	452
<i>Lingfeng Su (Dongguan University of Technology, China), Ming Tao (Dongguan University of Technology, China), Shuyue Chen (Dongguan University of Technology, China), Renping Xie (Dongguan University of Technology, China), Xueqiang Li (Dongguan University of Technology, China), and Kai Ding (Dongguan University of Technology, China)</i>	
GALA-GNN: Optimization for Training GNNs of Large-scale Graphs on Heterogeneous Platforms	460
<i>Junfeng Hu (South China University of Technology, China), Yi Zou (South China University of Technology, China), Xianfeng Song (South China University of Technology, China), and Yiqiu Liu (South China University of Technology, China)</i>	

An Efficient Sampling-Based SpMM Kernel for Balancing Accuracy and Speed in GNN Inference .	468
<i>Yingchen Song (Southwest University of Science and Technology, China), Yaobin Wang (Southwest University of Science and Technology, China), Chaoyu Xiong (Southwest University of Science and Technology, China), Tianhai Wang (Southwest University of Science and Technology, China), and Pingping Tang (Southwest University of Science and Technology, China)</i>	
Efficient Federated Learning Mechanism Based on Layer-Wise Model Pruning	476
<i>Zhijie Jiang (Nanjing University of Aeronautics and Astronautics, China; Collaborative Innovation Center of Novel Software Technology and Industrialization, China), Zhe Zhang (Nanjing University of Aeronautics and Astronautics, China; Collaborative Innovation Center of Novel Software Technology and Industrialization, China), and Yanchao Zhao (Nanjing University of Aeronautics and Astronautics, China; Collaborative Innovation Center of Novel Software Technology and Industrialization, China)</i>	
Technologies and Tools (V)	
On-the-Fly Data Layout Conversion for GEMM on AI Accelerators	484
<i>Fang Gao (Huawei Canada Research Centre, Canada), Xingyu Yue (Huawei Canada Research Centre, Canada), Chenchen Tang (Huawei Canada Research Centre, Canada), Hongyi Chen (Huawei Canada Research Centre, Canada), Kai-Ting Amy Wang (Huawei Canada Research Centre, Canada), and Tarek Abdelrahman (University of Toronto, Canada)</i>	
Research on Incentive Mechanisms and Resource Allocation of Edge Intelligence Networks for Multiple Federated Learning Services	494
<i>Xin Jin (Shanxi University, China), Fang Fu (Shanxi University, China; Hainan University, China), and Zhicai Zhang (Shanxi University, China; Hainan University, China)</i>	
STRec: Social-Augmented Time-Aware Cross-Domain Sequential Recommendation	502
<i>Xiangyun Gao (Anhui Polytechnic University, China), Dan Meng (OPPO Research Institute, China), Xianlan Sun (Anhui Polytechnic University, China), Wei Wang (Anhui Polytechnic University, China), Haibei Zhu (Georgia Institute of Technology, USA), and Chao Kong (Anhui Polytechnic University, China)</i>	
An Online Mechanism for Market-Oriented Service Provisioning in Cloud Environments	510
<i>Bingbing Zheng (QiLu Aerospace Information Research Institute, China), Li Pan (Shandong University, China), Shijun Liu (Shandong University, China), Kexian Sun (QiLu Aerospace Information Research Institute, China), and Xiao Zhou (QiLu Aerospace Information Research Institute, China)</i>	
Large-Scale Multi-Load AGVs Conflict-Free Scheduling Based on Intelligent e-Commerce Warehouse	518
<i>Fanchao Meng (Harbin Institute of Technology at Weihai, China), Fanhao Meng (Harbin Institute of Technology at Weihai, China), Weigong Lv (Harbin Institute of Technology at Weihai, China), and Dianhui Chu (Harbin Institute of Technology at Weihai, China)</i>	

LCOC: A Low-Cost Optimizing Compiler for Large Scale Quantum Programs Towards Realistic Hardware	526
--	-----

Yu Zhu (Laboratory for Advanced Computing and Intelligence Engineering, China), Jinchen Xu (Laboratory for Advanced Computing and Intelligence Engineering, China), Qing Mu (Laboratory for Advanced Computing and Intelligence Engineering, China), Hongru Yang (Laboratory for Advanced Computing and Intelligence Engineering, China), Xiaodong Ding (Laboratory for Advanced Computing and Intelligence Engineering, China), Qiming Du (Laboratory for Advanced Computing and Intelligence Engineering, China), and Zheng Shan (Laboratory for Advanced Computing and Intelligence Engineering, China)

Applications and Services (I)

CTIFuser: Cyber Threat Intelligence Fusion via Unsupervised Learning Model	534
--	-----

Chunyan Ma (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Zhengwei Jiang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Jun Jiang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Peian Yang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Mengjiao Cui (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Fangming Dong (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Huamin Feng (Beijing Electronic Science and Technology Institute, China)

A Novel Maize Futures Price Prediction Model based on EEMD-CNN-IGRU	544
---	-----

Jingyang Wang (Hebei University of Science and Technology, China), Jingyu Han (Hebei University of Science and Technology, China), Wei Liu (Hebei University of Science and Technology, China), Ying Li (Hebei University of Science and Technology, China), QiuHong Sun (Hebei University of Science and Technology, China), and Xiaokang Zhou (Kansai University, Japan)

Dual-view Traffic Identification for Open Source Proxy Software through Early Flows	551
---	-----

Yuwei Xu (Southeast University, China; Purple Mountain Laboratories for Network and Communication Security, China), Yunpeng Bai (Southeast University, China), Yuquan Zhang (Southeast University, China), Yige Song (Southeast University, China), Qiao Xiang (Xiamen University, China), and Guang Cheng (Southeast University, China; Purple Mountain Laboratories for Network and Communication Security, China)

Turbo Table: A Semantic-Aware Cache Acceleration System	559
---	-----

Hao Yuan (Shanghai Jiao Tong University, China), Chentao Wu (Shanghai Jiao Tong University, China), Jie Li (Shanghai Jiao Tong University, China), and Minyi Guo (Shanghai Jiao Tong University, China)

Multi-domain Resources Scheduling in Edge Computing Power Network for IIoT	567
<i>Jiarun Zhuang (Dongguan University of Technology, China), Ming Tao (Dongguan University of Technology, China), Shuyue Chen (Dongguan University of Technology, China), and Xueqiang Li (Dongguan University of Technology, China)</i>	
Dynamic VNF Deployment and Resource Allocation in Mobile Edge Computing	573
<i>Xiaolong Zhai (Yunnan University, China), Zhenli He (Yunnan University, China), Yuanfei Xiao (Yunnan University, China), Junjie Wu (Yunnan University, China), and Xuejie Yu (Yunnan University, China)</i>	

Applications and Services (II)

Structural Embedding Contrastive Graph Clustering	582
<i>Linlin Zhang (Henan University, China), Yaliang Zhao (Henan University, China), and Jinke Wang (Henan University, China)</i>	
MSARS: A Meta-Learning and Reinforcement Learning Framework for SLO Resource Allocation and Adaptive Scaling for Microservices	590
<i>Kan Hu (Shenzhen Institute of Advanced Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Lingfeng Wen (Shenzhen Institute of Advanced Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Minxian Xu (Shenzhen Institute of Advanced Technology, Chinese Academy of Sciences, China), and Kejiang Ye (Shenzhen Institute of Advanced Technology, Chinese Academy of Sciences, China)</i>	
RTSRT: Accelerating Monte Carlo Particle Transport with Ray Tracing Shared Cache Architecture	600
<i>Cunhao Cui (National University of Defense Technology, China), Tiejun Li (National University of Defense Technology, China), Jianmin Zhang (National University of Defense Technology, China), Hanqing Li (National University of Defense Technology, China), Changsong Jin (National University of Defense Technology, China), and Ruixuan Ren (National University of Defense Technology, China)</i>	
Adaptive Task Offloading in High-Speed Vehicular Networks Using Enhanced D3QN Algorithm .	607
<i>Panyang Zhou (Guangzhou University, China), Xiaofei Xing (Guangzhou University, China), Xiao Wang (Guangzhou University, China), Tian Wang (Beijing Normal University, China), and Guojun Wang (Guangzhou University, China)</i>	
ST-GAIN: Generative Dynamic Style Transfer Structure for Missing Traffic Speed Data Imputation	615
<i>Xin-Wei Yao (Zhejiang University of Technology, China), Jiacheng Wu (Zhejiang University of Technology, China), Qiang Li (Zhejiang University of Technology, China), Zhong-Hua Yao (Zhejiang Institute of Communications, China), and Zhenzhu Wang (Zhejiang Hikailink Technology CO. LTD., China)</i>	
Container-Aware Service Function Chains Placement and Optimization in Vehicular Edge Computing	623
<i>Kaixin Zhang (Hohai University), Shihong Hu (Hohai University), Zhihao Qu (Hohai University), and Baoliu Ye (Nanjing University)</i>	

Applications and Services (III)

- Data-Driven Smoke Segmentation and Removal for Visible Image 631
Renping Xie (Dongguan University of Technology, China), Hengye Xu (Dongguan University of Technology, China), Ming Tao (Dongguan University of Technology, China), Cong He (Dongguan University of Technology, China), and Mengyao Chen (Dongguan University of Technology, China)
- Multi-View Hypergraph-based Self-Supervised Learning Model for Web API Recommendation ... 637
Jiexun Shen (Hunan University of Science and Technology, China), Dongfan Li (Hunan University of Science and Technology, China), Wanjun Chen (Hunan University of Science and Technology, China), Yong Xiao (Hunan University of Science and Technology, China), Guosheng Kang (Hunan University of Science and Technology, China), Jianxun Liu (Hunan University of Science and Technology, China), and Zhenlian Peng (Hunan University of Science and Technology, China)
- Community Hiding Algorithm Based on Likelihood Analysis Method in Link Prediction 645
Ya-si Wang (Jiangsu University, China), Lei-lei Shi (Jiangsu University, China), Zi-xuan Han (Jiangsu University, China), Lu Liu (University of Leicester, UK), Siyang Song (University of Leicester, UK), and Liming Chen (Dalian University of Technology, China)
- A-MADDPG Based Partial Offloading in Digital Twin Edge Network (DITEN) Empowered IIoT ... 653
Lingling Liao (Dongguan University of Technology, China), Ming Tao (Dongguan University of Technology, China), Renping Xie (Dongguan University of Technology, China), and Chengxian Zhuang (Dongguan University of Technology, China)
- A Latency-Predictable Cloud-Native Network Architecture Based on XDP 661
Jifei Wen (University of Chinese Academy of Sciences, China; Institute of Information Engineering, Chinese Academy of Sciences, China), Jingguo Ge (University of Chinese Academy of Sciences, China; Institute of Information Engineering, Chinese Academy of Sciences, China), Zheyuan Zhang (University of Chinese Academy of Sciences, China; Institute of Information Engineering, Chinese Academy of Sciences, China), Yuepeng E (Institute of Information Engineering, Chinese Academy of Sciences, China), and Bingzhen Wu (Institute of Information Engineering, Chinese Academy of Sciences, China)
- Contract-Based Service Fairness Guarantee in Vehicular Fog Networks 669
Weinan Liu (Guangdong University of Technology, China), Long Chen (Guangdong University of Technology, China), Jigang Wu (Guangdong University of Technology, China), and Ming Tao (Dongguan University of Technology, China)

Applications and Services (IV)

- A Multimodal Fusion Framework for Fake News Detection via Multi-Attention Mechanism 677
Yongxin Yu (University of Jinan, China), Yanqiang Li (University of Jinan, China), Ke Ji (University of Jinan, China), Zhenxiang Chen (University of Jinan, China), Kun Ma (University of Jinan, China), and Xiaofan Zhao (University of Jinan, China)

Efficient 2-Segment Routing Based on Local Search With Failure Recovery	685
<i>Jingjing Chen (Beijing University of Posts and Telecommunications, China), Xueyun Ling (Beijing University of Posts and Telecommunications, China), Ying Wang (Beijing University of Posts and Telecommunications, China), and Xuesong Qiu (Beijing University of Posts and Telecommunications, China)</i>	
TS-EoH: An Edge Server Task Scheduling Algorithm Based on Evolution of Heuristic	693
<i>Yatong Wang (Central China Normal University, China), Yuchen Pei (Central China Normal University, China), and Yuqi Zhao (Central China Normal University, China)</i>	
Hand Gesture Classification Using Nearest Centroid with Soft-DTW Loss on sEMG Signals	701
<i>Lingfeng Zhang (The University of Tokyo, Japan), Zunian Wan (The University of Tokyo, Japan), Yepeng Ding (Hiroshima University, Japan), Junwei Yu (The University of Tokyo, Japan), Takefumi Ogawa (The University of Tokyo, Japan), and Hiroyuki Sato (National Institute of Informatics, Japan)</i>	
Graph Anomaly Detection via Cross-Layer Integration	710
<i>Zheyuan Zhang (University of Chinese Academy of Sciences, China; Institute of Information Engineering, Chinese Academy of Sciences, China), Song Wang (University of Virginia, USA), Jingguo Ge (University of Chinese Academy of Sciences, China; Institute of Information Engineering, Chinese Academy of Sciences, China), Yiming Xu (Xi'an Jiaotong University, China), Yulei Wu (University of Bristol, UK), and Jifei Wen (University of Chinese Academy of Sciences, China; Institute of Information Engineering, Chinese Academy of Sciences, China)</i>	

Security and Blockchain (I)

TIPCC: TEE-Based Integrity Protection of Consortium Blockchain Contracts	718
<i>Zihao Guan (National University of Defense Technology, China), Yan Ding (National University of Defense Technology, China), Wei Wang (National University of Defense Technology, China), Chuang Wang (National University of Defense Technology, China), Yufeng Guo (Phytium Technology Co., Ltd., China), Yongpeng Liu (Phytium Technology Co., Ltd., China), and Liaoliao Feng (National University of Defense Technology, China)</i>	
Heterogeneous Performs Better: High Throughput Implementations of Falcon in Multi-Client Scenarios	727
<i>Quan Yang (Nanjing University of Science and Technology, China), Yiwen Gao (Nanjing University of Science and Technology, China), Yuejun Liu (Nanjing University of Science and Technology, China), Jiabei Wang (Nanjing University of Science and Technology, China), and Yongbin Zhou (Nanjing University of Science and Technology, China; Institute of Information Engineering, Chinese Academy of Sciences, China)</i>	

AcVerifier: Cross-Domain Access Control Verification via Hybrid Static and Dynamic Analysis	736
<i>Jie Zhang (Huazhong University of Science and Technology, China), Yuanyuan He (Huazhong University of Science and Technology, China), Miao Hu (Huazhong University of Science and Technology, China), Xinwei Yu (Huazhong University of Science and Technology, China), Tingting Guo (Wuhan Kedao Geographic Information Engineering Co., China), Xiangyu Gao (Huazhong University of Science and Technology, China), and Jiaqi Ma (Wuhan Research Institute of Posts and Telecommunications, China)</i>	
Ethereum Phishing Detection Using Hyperbolic Neural Networks and Temporal Information	743
<i>Rong Xu (Inner Mongolia University, China; Zhejiang University, China), Jun Zhang (Inner Mongolia University, China; Zhejiang University, China), Xiaoyue Zhu (Inner Mongolia University, China), Zhaoxiong Song (Chinese Academy of Sciences, China), and Zhi Yu (Zhejiang University, China)</i>	
FFGDetector: Vulnerability Detection in Cross-Contract Feature Flow Graph Using GCN	751
<i>Zhifei Liu (Beijing Information Science and Technology University, China) and Jian Jiao (Beijing Information Science and Technology University, China)</i>	
Secure Range Queries on Semantic Trajectories in Fog-based Cloud Computing	758
<i>Yiping Teng (Shenyang Aerospace University, China), Shiqing Wang (Shenyang Aerospace University, China), Miao Li (Shenyang Aerospace University, China), Yuyao Tang (Shenyang Aerospace University, China), Bingfeng Yu (Shenyang Aerospace University, China), and Chunlong Fan (Shenyang Aerospace University, China)</i>	

Security and Blockchain (II)

Collecting Clustering Coefficient of Distributed Graph Data with Shuffled Differential Privacy	766
<i>Hongfa Ding (Guizhou University of Finance and Economics, China; Data Security Certification (Guizhou) Co., Ltd, China), Peiwan Fu (Guizhou University of Fiance and Economics, China; Jiangxi Datang International Fuzhou Power Generation Co., Ltd, China), Yingxuan Luo (Guizhou University of Fiance and Economics, China), Heling Jiang (Guizhou University of Fiance and Economics, China), and Hai Liu (Guizhou University of Fiance and Economics, China)</i>	
MoonCross: Efficient and Secure Blockchain Sharding Scheme for Satellite-based IoT	774
<i>Ruizhong Du (Hebei University, China), Tianyang Chen (Hebei University, China), Jin Tian (Hebei University, China), and Yan Gao (Tianjin University, China)</i>	

GPSSE: A GPU-Accelerated Dynamic SSE Scheme With Efficient Batch Updating	782
<i>Jiancong Zhou (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Xiaojie Zhu (King Abdullah University of Science and Technology, Saudi Arabia), Yong Li (Institute of Information Engineering, Chinese Academy of Sciences, China), Shuguang Yuan (Institute of Information Engineering, Chinese Academy of Sciences, China; Key Laboratory of Cyberspace Security Defense, China), and Chi Chen (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China; Key Laboratory of Cyberspace Security Defense, China)</i>	
QDL: Quantitative Dynamic Latency Model in Permissioned Blockchain System	792
<i>Jiacheng Wei (Beihang University, Beijing), Qingmei Wang (University of Science and Technology Beijing, Beijing), and Zheng Wang (Shanghai Jiao Tong University, Shanghai; Shanghai Key Laboratory of Integrated Administration Technologies for Information Security, Shanghai)</i>	
C-Fuzz: Fuzzing with Forced Program Control Flow Jumps	800
<i>Zhe Pan (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Xu Chen (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Liwei Chen (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Gang Shi (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)</i>	
Customized adversarial training enhances the performance of knowledge tracing tasks	808
<i>Huitao Zhang (Tianjin University of Science and Technology, China), Xiankun Zhang (Tianjin University of Science and Technology, China), Yuhu Shang (Beijing University of Posts and Telecommunications, China), Luo Xin (Tianjin University of Science and Technology, China), and Yiying Zhang (Tianjin University of Science and Technology, China)</i>	
Adversarial Attack Against Intrusion Detectors in Cyber-Physical Systems with Minimal Perturbations	816
<i>Mingqiang Bai (Chinese Academy of Sciences, China), Puzhuo Liu (Ant Group, China), Fei Lv (Chinese Academy of Science, China), Dongliang Fang (Chinese Academy of Sciences, China), Shichao Lv (Chinese Academy of Sciences, China), Weidong Zhang (Chinese Academy of Sciences, China), and Limin Sun (Chinese Academy of Sciences, China)</i>	

Intelligence Computing for Big Data (I)

Dependency-Aware Task Offloading and Resource Pricing in Vehicular Edge Computing: A Stackelberg Game Approach	826
<i>Liang Zhao (China Three Gorges University, China), Shuai Huang (China Three Gorges University, China), Yuxiang Cao (China Three Gorges University, China), Huan Zhou (Northwestern Polytechnical University, China), and Victor C. M. Leung (The University of British Columbia, Canada)</i>	

Implementation and Optimization of 8×8 Block Discrete Cosine Transform on MGPUSim	832
<i>Shuang Yang (Southwest University of Science and Technology, China), Yaobin Wang (Southwest University of Science and Technology, China), Ling Li (Southwest University of Science and Technology, China), Jiawei Qin (Southwest University of Science and Technology, China), and Guotang Bi (Southwest University of Science and Technology, China)</i>	
Energy Balanced Cooperative Edge-AI Services for Service Quality Guarantee	840
<i>Kongyang Li (Guangdong University of Technology, China), Long Chen (Guangdong University of Technology, China), Tianwen Peng (Guangdong University of Technology, China), and Jigang Wu (Guangdong University of Technology, China)</i>	
Collaborative Recommendation with Knowledge Graph Enhancement and Contrastive Learning ..	848
<i>Huiyi Zhong (GuangDong University of Technology, China), Pinghua Chen (GuangDong University of Technology, China), Yunhua Chen (GuangDong University of Technology, China), and Honghong Zhou (Innovation Monitoring and Research Center, China)</i>	
Having Energy Depletion in Mind to Make Service Fairness Practical	856
<i>Tianwen Peng (Guangdong University of Technology, China), Long Chen (Guangdong University of Technology, China), Jiale Huang (Guangdong University of Technology, China), and Jigang Wu (Guangdong University of Technology, China)</i>	
A Continuous Verification Mechanism for Clients in Federated Unlearning to Defend the Right to be Forgotten	864
<i>Shanshan Chen (Hubei University, China), Jun Liu (Hubei University, China), Yuying Li (Hubei University, China), Yamin Li (Hubei University, China), Yang Yang (Hubei University, China), Gaoyang Liu (Huazhong University of Science and Technology, China), and Chen Wang (Huazhong University of Science and Technology, China)</i>	

Intelligence Computing for Big Data (II)

A Contribution Assessment Method Based on Model Performance Gains in Federated Learning	872
<i>Zixuan Zhao (Hubei University, China), Jun Liu (Hubei University, China), Yuying Li (Hubei University, China), Gaoyang Liu (Huazhong University of Science and Technology, China), Yamin Li (Hubei University, China), and Yang Yang (Hubei University, China)</i>	
CNN-LSTM based Multimodal Models for Music Generation	880
<i>Man Zhang (South China University of Technology, China) and Dongning Liu (Guangdong University of Technology Guangzhou, China)</i>	
Reinforcement Learning-Based Adaptive Search Strategy Combination Algorithm	887
<i>Xiaotong Liu (Wuyi University, China; Jiangmen Key Laboratory of Kejie Semiconductor Bonding Technology and Control System, China), Zhiqiang Zeng (Wuyi University, China), Sicheng Wan (Wuyi University, China), Jiajie Tian (Guangdong Kejie Technology Co., Ltd., China; Jiangmen Key Laboratory of Kejie Semiconductor Bonding Technology and Control System, China), Tianlei Wang (Wuyi University, China; Jiangmen Key Laboratory of Kejie Semiconductor Bonding Technology and Control System, China), and Zhiyong Hong (Wuyi University, China)</i>	

Deep Reinforcement Learning Helps: Making Loading Cost-aware Joint Cooperative Edge-AI Service Deployment and Request Routing Practical	895
<i>Yulin Huang (Guangdong University of Technology, China), Long Chen (Guangdong University of Technology, China), Jiale Huang (Guangdong University of Technology, China), and Jigang Wu (Guangdong University of Technology, China)</i>	
Envision: Application Level Fairness for Cooperative Edge-AI Services with Deep Reinforcement Learning	903
<i>Jiale Huang (Guangdong University of Technology, China), Long Chen (Guangdong University of Technology, China), Shaojie Zheng (Guangdong University of Technology, China), and Jigang Wu (Guangdong University of Technology, China)</i>	
Heterogeneity Modeling With Flexibility-Based Graph Neural Networks	911
<i>Jisheng Qin (Chuzhou University, China), Tao Tao (Anhui University of Technology, China), Zijie Liu (Chuzhou University, China), Haibo Chen (Chuzhou University, China), and Shenghui Zhao (Chuzhou University, China)</i>	

Intelligence Computing for Big Data (III)

ProgressiveGlassNet:Glass Detection with Progressive Decoder	917
<i>Qingling Chang (Wuyi University, China), Xiaofei Meng (Wuyi University, China), Zhiyong Hong (Wuyi University, China), and Yan Cui (Wuyi University, China)</i>	
Ensemble Graph and Device Clustering Method based on Attention Mechanism for Decomposing Monolithic to Microservices	926
<i>Qingyong Deng (Guangxi Normal University, China), Qiuming Li (Guangxi Normal University, China), Qinghua Zuo (Guangxi Normal University, China), Shujuan Tian (Xiangtan University, China), and Saiqin Long (Jinan University, China)</i>	
Solving the Short Video Assignment Problem via Federated Learning and Group Multi-Role Assignment	934
<i>Kaizhe Zeng (Guangdong University of Technology Guangzhou, China), Weijian Liu (Guangdong University of Technology Guangzhou, China), and Dongning Liu (Guangdong University of Technology Guangzhou, China)</i>	

Dynamic Task Scheduling for Coordinated Truck-Drone Parcel Delivery: A Hybrid Genetic Tabu Algorithm Approach	940
<i>Ruitai Li (South-Central Minzu University, China; Key Laboratory of Cyber-Physical Fusion Intelligent Computing, State Ethnic Affairs Commission), Quan Yuan (South-Central Minzu University, China; Key Laboratory of Cyber-Physical Fusion Intelligent Computing, State Ethnic Affairs Commission), Tongxin Liao (Huazhong University of Science and Technology, China; Hubei Key Laboratory of Smart Internet Technology), Lijun Luo (Huazhong University of Science and Technology, China; Hubei Key Laboratory of Smart Internet Technology), Menglan Hu (Huazhong University of Science and Technology, China; Hubei Key Laboratory of Smart Internet Technology), Pan Lai (South-Central Minzu University, China; Key Laboratory of Cyber-Physical Fusion Intelligent Computing, State Ethnic Affairs Commission), and Xiao Zhang (South-Central Minzu University, China; Key Laboratory of Cyber-Physical Fusion Intelligent Computing, State Ethnic Affairs Commission)</i>	
Online Dynamic Scaling of Microservices with Fair Probabilistic Routing	948
<i>Yang Chen (South-Central Minzu University, China; Key Laboratory of Cyber-Physical Fusion Intelligent Computing, State Ethnic Affairs Commission), Shisheng Lin (South-Central Minzu University, China; Key Laboratory of Cyber-Physical Fusion Intelligent Computing, State Ethnic Affairs Commission), Yi Hu (Huazhong University of Science and Technology, China; Hubei Key Laboratory of Smart Internet Technology), Liangyuan Wang (Huazhong University of Science and Technology, China; Hubei Key Laboratory of Smart Internet Technology), Menglan Hu (Huazhong University of Science and Technology, China; Hubei Key Laboratory of Smart Internet Technology), Pan Lai (South-Central Minzu University, China; Key Laboratory of Cyber-Physical Fusion Intelligent Computing, State Ethnic Affairs Commission), and Yuanai Xie (South-Central Minzu University, China; Key Laboratory of Cyber-Physical Fusion Intelligent Computing, State Ethnic Affairs Commission)</i>	
InviINS: Invisible Instruction Backdoor Attacks on Peer-to-Peer Semantic Networks	956
<i>Xiao Yang (Shanghai Jiao Tong University), Gaolei Li (Shanghai Jiao Tong University), Mianxiong Dong (Muroran Institute of Technology), Kaoru Ota (Muroran Institute of Technology), Jun Wu (Shanghai Jiao Tong University), and Jianhua Li (Shanghai Jiao Tong University)</i>	

Intelligence Computing for Big Data (IV)

ActIPP: Active Intellectual Property Protection of Edge-Level Graph Learning for Distributed Vehicular Networks	965
<i>Xiao Yang (Shanghai Jiao Tong University), Gaolei Li (Shanghai Jiao Tong University), Mianxiong Dong (Muroran Institute of Technology), Kaoru Ota (Muroran Institute of Technology), Chaofeng Zhang (Advanced Institute of Industrial Technology), Xiting Peng (Shenyang University of Technology), and Jianhua Li (Shanghai Jiao Tong University)</i>	

On Non-Invasive Fall Detection Based on Multimodal Fusion	974
<i>Huabei Nie (DongGuan City College; XIDIAN UNIV, China), Dan He (DongGuan City College, China), Jianqiao Shen (DongGuan City College, China), Songchun Wang (Zhuhai College Beijing Institute of Technology, China), and Ani Dong (DongGuan City College, China)</i>	
Diverse Recommendations With Maximum Entropy Neighbor Selection and Graph Contrast Learning	981
<i>Jinhao Zhou (Guangdong University of Technology, China), Pinghua Chen (Guangdong University of Technology, China), Yunhua Chen (Guangdong University of Technology, China), and Honghong Zhou (Guangdong Science & Technology Innovation Monitoring and Research Center, China)</i>	
Predicting Inference Time and Energy Consumption in Deep Learning Using MLPs	990
<i>Chengjin Lyu (Ghent University – IMEC, Belgium), Mohsen Nourazar (Ghent University – IMEC, Belgium), and Bart Goossens (Ghent University – IMEC, Belgium)</i>	
Improved Motor Imagery Classification Using Elastic Net-Based Feature Optimization and a Heterogeneous Ensemble Classifier	997
<i>Shimiao Chen (Fujian Agriculture and Forestry University, China), Xiangzeng Kong (Fujian Agriculture and Forestry University, China), Junfeng Han (Fujian Agriculture and Forestry University, China), Cailin Wu (Fujian Agriculture and Forestry University, China), and Tingting Zhang (Fujian Agriculture and Forestry University, China)</i>	

AI for Internet of Autonomous Things (I)

ST-GCN: A Spatiotemporal Graph Convolution Neural Network for EEG Motor Imagery Signal Decoding	1007
<i>Jingzhou Xu (Xi'an Jiaotong-Liverpool University, China), Jun Qi (Xi'an Jiaotong-Liverpool University, China), Junqing Zhang (University of Liverpool, China), Yong Yue (Xi'an Jiaotong-Liverpool University, China), Tingting Zhang (Fujian Agriculture and Forestry University, China), and Jianjun Chen (Xi'an Jiaotong-Liverpool University, China)</i>	
GANs-Based Signal Quality Assessment for Heart Rate Estimation with Ballistocardiograph	1014
<i>Ruilin Cai (Xi'an JiaoTong-Liverpool University, China), Jun Qi (Xi'an JiaoTong-Liverpool University, China), Jiayi Li (Xi'an JiaoTong-Liverpool University, China), Jianjun Chen (Xi'an JiaoTong-Liverpool University, China), Wei Wang (Xi'an JiaoTong-Liverpool University, China), and Haiyang Zhang (Xi'an JiaoTong-Liverpool University, China)</i>	
A Multi-Agent Framework for Penetration Testing: Modelling and Analysing Using Abstract State Machines	1021
<i>Farah Al-Shareefi (University of Babylon, Iraq), Ge Chu (Runjian Co., Ltd., China), and Alexei Lisitsa (University of Liverpool, United Kingdom)</i>	

Depression Detection with EEG Based on Mutual Information Regularization	1029
<i>Haoyu Lin (University of New South Wales, Australia), Tianyuan Ma (Fujian Agriculture and Forestry University, China), Chen Zhao (Fujian Agriculture and Forestry University, China), Jun Qi (Xi'an Jiaotong-Liverpool University, China), Tingting Zhang (Fujian Agriculture and Forestry University, China), and Xiangzeng Kong (Fujian Agriculture and Forestry University)</i>	
LB-UNet: Multi-Scale Fusion Lightweight Network with Boundary Enhancement for Water Segmentation	1036
<i>Ning Li (Changzhou University, China), Libo Wang (Changzhou University, China), Gaochao Yang (Changzhou University, China), Baohua Yuan (Changzhou University, China), and Bo Li (Changzhou University, China)</i>	
LF-DETR: Lightweight Detection Network for Floating Surface Garbage Based on Adaptive Channel Shuffling	1044
<i>ShouKun Xu (Changzhou University, China), Yan Gong (Changzhou University, China), Gaochao Yang (Changzhou University, China), and Ning Li (Changzhou University, China)</i>	

Full Papers

Systems and Architectures (VII)

Leveraging Packet Cloning to Achieve Fast Flow-Transmission for Data Center Load Balancing...	1050
<i>Yuchen Wang (Changsha University, China), Zhenbo Li (Changsha University, China), Haotian Jing (Changsha University, China), Tao Zhang (Changsha University, China; Hunan Province Key Laboratory of Industrial Internet Technology and Security, China), Shaojun Zou (Hainan University, China), Xidao Luan (Changsha University, China), Hui Yin (Changsha University, China; Hunan Province Key Laboratory of Industrial Internet Technology and Security, China), and Fangmin Li (Changsha University, China; Hunan Province Key Laboratory of Industrial Internet Technology and Security, China)</i>	
Elastic and Energy-Efficient Virtual Machine Allocation on Edge Servers for Internet of Vehicles	1058
<i>Xianger Li (Guangdong University of Technology, China), Aiwen Huang (Guangdong University of Technology, China), Yiqi Fan (Guangdong University of Technology, China), Zhihai Tang (Guangdong University of Technology, China), Le Chang (Guangdong University of Technology, China), and Tian Wang (Beijing Normal University, China)</i>	
RL-MR: Multipath Routing Based on Multi-Agent Reinforcement Learning for SDN-Based Data Center Networks	1065
<i>Peixin Liu (Inner Mongolia University, China), Xiangyu Bai (Inner Mongolia University, China), Haoran Cheng (Inner Mongolia University, China), Xiaochen Gao (Inner Mongolia University, China), and Jingwen Su (Inner Mongolia University, China)</i>	
Edge Caching Node Selection in Short Video Social Network	1073
<i>Qiansheng Yang (Beijing Information Science and Technology University, China) and Zhuo Li (Beijing Information Science and Technology University, China)</i>	

Automatic Implementation of Large-Scale CNNs on FPGA Cluster Based on HLS4ML	1080
<i>Yihang Lu (National University of Defense Technology, China), Xingyun Qi (National University of Defense Technology, China), Yuan Li (National University of Defense Technology, China), Mingche Lai (National University of Defense Technology, China), Yankang Zhao (National University of Defense Technology, China), Zhenqi Li (National University of Defense Technology, China), Hanyuan Li (National University of Defense Technology, China), and Qiang Wang (National University of Defense Technology, China)</i>	
Privacy-Enhanced Federated Learning Through Homomorphic Encryption With Cloud Federation	1088
<i>Qiqi Xie (Hebei University, China), Hong Zhang (Hebei University, China), Miao Wang (Hebei University, China), Wanqing Wu (Hebei University, China), and Zhibo Sun (Drexel University, USA)</i>	

Systems and Architectures (VIII)

DiffSenseNet: Intergrating Hierarchical Features and Angular Diffusion for Remote Sensing Object Detection	1096
<i>Songwen Pei (University of Shanghai for Science and Technology, China; Key Laboratory of Fire Detection and Early Warning Technology of Shanghai Emergency Management Bureau, China), Hongli Ma (University of Shanghai for Science and Technology, China), Xinyun Qiu (University of Shanghai for Science and Technology, China), and Libo Huang (National University of Defense Technology, China)</i>	
Modeling and Analyzing the Shared Receive Queue of RDMA	1102
<i>Zhuang Tian (Central South University, China), Kai Wang (Central South University, China), and Wanchun Jiang (Central South University, China)</i>	
CMAE-MTC: A Contextual Masked AutoEncoder Based Multi-Level Traffic Classifier	1108
<i>Zecheng Yuan (Wuhan University, China), Min Luo (Wuhan University, China), Cong Peng (Wuhan University, China), and Qin Liu (Wuhan University, China)</i>	
Approximation Algorithms and Simulated Annealing Heuristics for Row-and-Column Pruning of Deep Neural Networks	1116
<i>Ping-Han Tu (National Taiwan University, Taiwan), Yu-Che Cheng (National Taiwan University, Taiwan), Ding-Yong Hong (Institute of Information Science, Academia Sinica, Taiwan), Pangfeng Liu (National Taiwan University, Taiwan), and Jan-Jan Wu (Academia Sinica, Taiwan)</i>	
Improving Availability and Scalability for RDMA Load Balancing with In-Network Reordering ..	1123
<i>Jinbin Hu (Changsha University of Science and Technology, China), Ruiqian Li (Changsha University of Science and Technology, China), Shuying Rao (Changsha University of Science and Technology, China), and Jin Wang (Changsha University of Science and Technology, China; Hunan University of Science and Technology, China)</i>	

Using KVM Events to Detect VM Memory-Sharing Lateral Movement Attacks in a Virtualized Environment	1129
<i>Kun Zhang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Junchao Ma (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Chen Li (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)</i>	

Systems and Architectures (IX)

Federated Multi-Agent Reinforcement Learning for AoI Minimization in UAV-Enabled IoV-MEC Systems	1137
<i>Shoukun Xu (Academy of Computer Science and Artificial Intelligence, Changzhou University, China), Yu Zhang (Academy of Computer Science and Artificial Intelligence, Changzhou University, China), Xueyuan Wang (Academy of Computer Science and Artificial Intelligence, Changzhou University, China), and M. Cenk Gursoy (Syracuse University, USA)</i>	
Efficient Erasure-Coded Multi-Data Block Update Methods for Heterogeneous Storage Environments	1145
<i>Hengyu Wang (Hainan University, China), Bing Wei (Hainan University, China), Ning Luo (Hainan University, China), Qian Chen (Hainan University, China), Yi Wu (Hainan University, China), Shudong Zhang (Hainan University, China), and Lijuan Zhou (Hainan University, China)</i>	
Efficient Erasure-Coded Data Recovery Based on Machine Learning With a Low Level of Storage Overhead	1151
<i>Xiaobo Zhao (Hainan University, China), Bing Wei (Hainan University, China), Ning Luo (Hainan University, China), Qian Chen (Hainan University, China), Yi Wu (Hainan University, China), Shudong Zhang (Hainan University, China), and Lijuan Zhou (Hainan University, China)</i>	
GeoNDN: Naming the localized data with the Geohash-based Scheme for NDN optimization	1157
<i>Yingwen Chen (National University of Defense Technology, China), Xiaolong Liang (National University of Defense Technology, China), Huan Zhou (National University of Defense Technology, China), Xiangrui Yang (National University of Defense Technology, China), Lin Wu (National University of Defense Technology, China), and Gaofeng Lv (National University of Defense Technology, China)</i>	
Integrity Audit Scheme Based on Collaborative Cache in Industrial Internet of Things Environment	1163
<i>Ruizhong Du (Hebei University, China), Ziyuan Wang (Hebei University, China), Yiwei Wang (Hebei University, China), and Jiawei Shen (Hebei University, China)</i>	
FedHPM: Online Federated Learning via Heterogeneous Prediction Model	1169
<i>Zhi Zhang (Hunan University of Science and Technology, China), Shiwen Zhang (Hunan University of Science and Technology, China), Shuang Chen (Hunan University of Science and Technology, China), and Wei Liang (Hunan University of Science and Technology, China)</i>	

Systems and Architectures (X)

Deterministic Data Center Network Calculus	1177
<i>Hao Wang (Dalian University of Technology, China) and Yizhao Zhang (Alibaba Group, China)</i>	
A LLM Checkpointing System of the Hybrid Memory Architecture	1183
<i>Gengbin Chen (South China Normal University, China), Yuan Zhu (South China Normal University, China), Dingding Li (South China Normal University, China), and Yong Tang (South China Normal University, China)</i>	
Joint Location Deployment, Offloading and Resource Allocation in Multi-UAV Collaborative Edge Computing Networks	1189
<i>Mingyang Xu (Beijing Information Science & Technology University, China), Xin Chen (Beijing Information Science & Technology University, China, China), Libo Jiao (Beijing Information Science & Technology University, China), Long Zhao (Beijing Information Science & Technology University, China), and Xiaoya Fan (Beijing Information Science and Technology University, China)</i>	
Hybrid Explainable Network Intrusion Detection Framework Based on Shapley Additive Explanations	1197
<i>Sijin Chen (Wuhan University of Science and Technology, China), Jing Liu (Wuhan University of Science and Technology, China), Cen Chen (South China University of Technology, China), Songyu Xie (Wuhan University of Science and Technology, China), and Zhongyao Cheng (Institute for Infocomm Research (I2R) Agency for Science, Technology and Reseach (A*STAR), Singapore)</i>	
Robot Vision-Based Autonomous Navigation Method Using Sim2Real Domain Adaptation	1203
<i>Mengjiao Zhang (University of Science and Technology Beijing, China), Shihong Duan (University of Science and Technology Beijing, China), and Cheng Xu (University of Science and Technology Beijing, China)</i>	
A Sorted and Dynamic Graph Storage System of the Hybrid Memory Architecture	1210
<i>Yang Ao (South China Normal University, China), Yutong Deng (South China Normal University, China), Dingding Li (South China Normal University, China), and Yong Tang (South China Normal University, China)</i>	

Systems and Architectures (XI)

DAUSK: A Transactional Graph Structure for Skewed Dynamic Graph Storage	1216
<i>Anna Ding (University of Electronic Science and Technology of China, China), Yujun Li (University of Electronic Science and Technology of China, China), Yuening Feng (University of Electronic Science and Technology of China, China), Sicong Hu (University of Electronic Science and Technology of China, China), Mengshu Hou (University of Electronic Science and Technology of China, China), and Yueyang Zhan (University of Electronic Science and Technology of China, China)</i>	

Optimizing Response Time of Multi-factor Authentication Service in EV Charging System: A DRL-based Algorithm	1224
<i>Bing Xiang (State Grid Smart Internet Of Vehicles Co., Ltd, P.R. China), Tianlin Yang (State Grid Smart Internet Of Vehicles Co., Ltd, P.R. China), Qingwen Han (State Grid Smart Internet Of Vehicles Co., Ltd, Beijing, P.R. China), Yao Li (State Grid Smart Internet Of Vehicles Co., Ltd, P.R. China), Ting Yu (State Grid Smart Internet Of Vehicles Co., Ltd, P.R. China), Yongsheng Zhao (State Grid Information & Telecommunication Group Co., Ltd., P.R. China), Shuai Zhang (State Grid Information & Telecommunication Group Co., Ltd., P.R. China), and Xueming Zhao (State Grid Tianjin Electric Power Co., Ltd, P.R. China)</i>	
Dynamic Priority-Based Ordered Transmission for Mixed Flows in Data Center Networks	1230
<i>Shaojun Zou (Hainan University, China), Yi Jiang (Hainan University, China), Laurence T. Yang (Zhengzhou University, China), and Jiacheng Qu (Hainan University, China)</i>	
A Lightweight Privacy Preserving Asynchronous Federated Learning Scheme in Internet of Vehicles	1237
<i>Xin Liu (School of Cyberspace Science and Technology, Beijing Institute of Technology, China), Xiaodong Shen (School of Cyberspace Science and Technology, Beijing Institute of Technology, China), Chang Xu (Beijing Institute of Technology, China), Liehuang Zhu (School of Cyberspace Science and Technology, Beijing Institute of Technology, China), and Kashif Sharif (School of Computer Science and Technology, Beijing Institute of Technology, China)</i>	
LBCB: One-sided RDMA-based Distributed B+ tree Index with Low Bandwidth Consumption	1245
<i>Jibo Liu (University of Electronic Science and Technology of China, China), Rui Xi (University of Electronic Science and Technology of China, China), Qinzhen Cao (University of Electronic Science and Technology of China, China), Xiaowen Nie (University of Electronic Science and Technology of China, China), and Zhuohan Hou (University of Electronic Science and Technology of China, China)</i>	
Research on Trust Management Mechanism in Vehicular Named Data Networking	1252
<i>Rula Sa (Inner Mongolia University, China), Haotian Wang (Inner Mongolia University, China), Zhen Liu (Inner Mongolia University, China), Meiju Yu (Inner Mongolia University, China), and Jin Zhang (Inner Mongolia University, China)</i>	

Systems and Architectures (XII)

Spatial-Frequency Integration Network with Dual Prompt Learning for Few-Shot Image Classification	1258
<i>Yi Liu (Changzhou University, China), Jie He (Changzhou University, China), Shoukun Xu (Changzhou University, China), and Guangqi Jiang (Changzhou University, China)</i>	
RSCache: A Tail Latency Friendly Cache Based on NVMe SSDs	1265
<i>Jincheng Lu (Hohai University, China), Miao Cai (Nanjing University of Aeronautics and Astronautics, China), and Baoliu Ye (Nanjing University, China)</i>	

MonkeyGPT: Generative AI in Network Anomaly Detection of Video Conference Applications ...	1273
<i>Junhao Xu (Shenzhen University), Dongbiao He (Sangfor Technologies Inc), Chen Zhang (Sangfor Technologies Inc), Xu Zhou (Sangfor Technologies Inc), Zhongxing Ming (Guangdong Laboratory of Artificial Intelligence and Digital Economy (SZ)), and Laizhong Cui (Shenzhen University)</i>	
High-Precision Encrypted Image Retrieval Scheme Using Dual-Stream Convolution Feature Fusion in Cloud Computing	1281
<i>Mingyue Li (Hebei University, China), Liudong Zheng (Hebei University, China), Jiahui Liu (Hebei University, China), Ruizhong Du (Hebei University, China), and Chunfu Jia (Nankai University, China)</i>	
SORA: Rapid Software Pipelining Optimization after Register Allocation for Vector-DSPs	1287
<i>Anxing Xie (Hunan University of Science and Technology, China), Yonghua Hu (Hunan University of Science and Technology, China), Zhe Li (National University of Defense Technology, China), and Yaohua Wang (National University of Defense Technology, China)</i>	
Collective Communication Acceleration Architecture for Reduce Operation with Long Operands Based on Efficient Data Access and Reconfigurable On-Chip Buffer	1295
<i>Jinbo Xu (National University of Defense Technology, P. R. China), Zhengbin Pang (National University of Defense Technology, P. R. China), and Yi Dai (National University of Defense Technology, P. R. China)</i>	

Systems and Architectures (XIII)

Morph: A Dynamically Optimized Scheduler for Large Model Training	1303
<i>Wenna Ruan (Anhui University, China), Futian Wang (Anhui University, China), Bing Niu (Independent Researcher, China), Jin He (Independent Researcher, China), and Xinwei Zheng (University of Science and Technology of China, China)</i>	
Funnel: An Efficient Sparse Attention Accelerator with Multi-Dataflow Fusion	1311
<i>Shenghong Ma (National University of Defense Technology, China), Jinwei Xu (National University of Defense Technology, China), Jingfei Jiang (National University of Defense Technology, China), Yaohua Wang (National University of Defense Technology, China), and Dongsheng Li (National University of Defense Technology, China)</i>	
RLPS: Reinforcement Learning Based Periodic Strategy for 40/100Gbps Energy Efficient Ethernet	1319
<i>Wanchun Jiang (Central South University, China), Zhuang Tian (Central South University, China), Renfu Yao (Central South University, China), Xunyong Tan (Central South University, China), Kai Wang (Central South University, China), Jiawei Huang (Central South University, China), and Jianxin Wang (Central South University, China)</i>	

Optimizing In-network Caching for Key-Value Stores under Write-Intensive Workloads	1325
<i>Yuanhang Gao (National University of Defense Technology, China), Yingwen Chen (National University of Defense Technology, China), Xiangrui Yang (National University of Defense Technology, China), Huan Zhou (National University of Defense Technology, China), Shihua Tang (National University of Defense Technology, China), Yuanfeng Chen (National University of Defense Technology, China), and Ming Xu (National University of Defense Technology, China)</i>	
MLP-LightGBM Hard Drive Failure Prediction with Transfer Learning Performance	1333
<i>Jianli Ding (Civil Aviation University of China, China), Hongjie Li (Civil Aviation University of China, China), and Jing Li (Civil Aviation University of China, China)</i>	
Adaptive Hybrid FFT: A Novel Pipeline and Memory-Based Architecture for Radix-2 ^k FFT in Large Size Processing	1341
<i>Fangyu Zhao (Chongqing University, China; Ministry of Education, China), Chunhua Xia (Chongqing University, China; Ministry of Education, China), Zhiguo Wang (Sichuan Huacun Zhigu Technology Co., Ltd., China), Xiaohua Du (Sichuan Huacun Zhigu Technology Co., Ltd., China), and Bo Dong (Sichuan Huacun Zhigu Technology Co., Ltd., China)</i>	

Systems and Architectures (XIV)

Multi-Hop D2D Cluster Formation and Resource Allocation for Scalable Video Multicast	1349
<i>Hao Nie (Huazhong University of Science and Technology, China), Wei Wang (Huazhong University of Science and Technology, China), Rui Dai (University of Cincinnati, USA), Chenyan Liu (Huazhong University of Science and Technology, China), Zhixing Wang (Centrin Data Vally Technology Co. Ltd, China), and Peng Xu (Huazhong University of Science and Technology, China)</i>	
Improving INT Inference Resilience of CNNs by Vulnerability-Aware Mixed-Precision Quantization	1355
<i>Xiaohui Wei (Jilin University, China), Pei Liu (Jilin University, China), Chenyang Wang (Jilin University, China), Zeyu Guan (Jilin University, China), Qi Wu (Jilin University, China), and Hengshan Yue (Jilin University, China)</i>	
A Fault Tolerance Mechanism for UAV-Assisted Vehicular Network in Disaster Rescue	1363
<i>Kaiqi Zhang (Dalian University of Technology, China), Jing Zhao (Dalian University of Technology, China), and Rui Chen (Dalian University of Technology, China)</i>	
A High-performance Hardware Accelerator for Genome Alignment	1371
<i>Haoyu Liao (National University of Defense Technology, China), Yuan Li (National University of Defense Technology, China), Qiang Wang (National University of Defense Technology, China), Mingche Lai (National University of Defense Technology, China), Hui Su (National University of Defense Technology, China), Ziwen Li (National University of Defense Technology, China), and Xingyun Qi (National University of Defense Technology, China)</i>	

Optimize Metadata Operations of Key-Value Store via A Flat Indexing LSM-Tree	1379
<i>Yuchen Liu (ShanghaiTech University, China), Chen Chen (ShanghaiTech University, China), and Shu Yin (ShanghaiTech University, China)</i>	
Enhanced YOLOv7 Model for Aerial Drone Detection in Complex Environments	1385
<i>Changlong Fu (Yunnan University, China), Yasu Wu (Northwestern Polytechnical University, China), Xin Jin (Yunnan University, China), Puming Wang (Yunnan University, China), and Qian Jiang (Yunnan University, China)</i>	

Systems and Architectures (XV)

vLFS: Learning-based Scheduling for AI Chip Virtualization	1393
<i>Mengjuan Gao (Capital Normal University, China; State Key Lab of Processors, ICT, CAS, China), Yida Wang (Capital Normal University, China; State Key Lab of Processors, ICT, CAS, China), Qinwen Shi (Capital Normal University, China; State Key Lab of Processors, ICT, CAS, China), Bojun Cao (Capital Normal University, China; State Key Lab of Processors, ICT, CAS, China), and Yuanchao Xu (Capital Normal University, China; State Key Lab of Processors, ICT, CAS, China)</i>	
A Task Dependency-Based Deduplicated Task Offloading Mechanism in Vehicular Edge Computing..	1400
<i>Zhenyi Shao (Changsha University of Science and Technology, China), Zhuofan Liao (Changsha University of Science and Technology, China), and Xiaoyong Tang (Changsha University of Science and Technology, China)</i>	
An Efficient Cooperative Active Caching Strategy in Vehicular Edge Network Based on Asynchronous Federated Learning	1406
<i>Pang Liu (Changsha University of Science and Technology, China), Zhuofan Liao (Changsha University of Science and Technology, China), and Xiaoyong Tang (Changsha University of Science and Technology, China)</i>	
A Task Admission Scheduling Strategy Based on Adaptive Time Slicing in Mobile Edge Computing	1412
<i>Yanpu Tang (Changsha University of Science and Technology, China), Zhuofan Liao (Changsha University of Science and Technology, China), and Xiaoyong Tang (Changsha University of Science and Technology, China)</i>	
GLA-ViT: A Global Contextual Attention Based for Remote Sensing Image Scene Classification....	1418
<i>Hao Yuan (University of Jinan, China), Kun Liu (University of Jinan, China; China High-resolution Earth Observation System Shandong Center of Data and Application, China), Qinghao Peng (University of Jinan, China), Benli Zou (University of Jinan, China), Can Wang (University of Jinan, China), and Meishu Li (University of Jinan, China)</i>	

Systems and Architectures (XVI)

Performance Analysis and Optimization of Nvidia H100 Confidential Computing for AI Workloads	1426
<i>Yifan Tan (Shanghai Jiao Tong University) and Zeyu Mi (Shanghai Jiao Tong University)</i>	
Distributed Energy Management for Carbon Neutral Data Centers	1433
<i>Chuyi Liu (Inner Mongolia University of Technology; Inner Mongolia Autonomous Region Engineering & Technology Research Center of Big Data Based Software Service, China), Jianxiong Wan (Inner Mongolia University of Technology; Inner Mongolia Autonomous Region Engineering & Technology Research Center of Big Data Based Software Service, China), Leixiao Li (Inner Mongolia University of Technology; Inner Mongolia Autonomous Region Engineering & Technology Research Center of Big Data Based Software Service, China), Guanyu Ren (Inner Mongolia University of Technology), and Xiaolei Wang (Inner Mongolia University of Technology; Research Center of Large-Scale Energy Storage Technologies, China)</i>	
Achieving Ultra-Low Latency for Timeout-Less Congestion Control in Data Center Networks	1439
<i>Shaojun Zou (Hainan University, China), Yi Jiang (Hainan University, China), Jiacheng Qu (Hainan University, China), Tao Zhang (Changsha University, China), Yuanzhen Hu (Changsha University, China), and Yujie Peng (Changsha University, China)</i>	
SAT-GAV: A Electricity-Costs Aware Resources Placement Strategy for Data Centers	1445
<i>Hao Feng (Hainan University, China), Xinren Xu (Hainan University, China), Lin Chen (Hainan University, China), and Jie Li (South China Normal University, China)</i>	
DNZ-LSM-Tree for Hybrid Storage Systems	1453
<i>Tao Cai (JiangSu University, China), Zeyu Huang (JiangSu University, China), Dejian Niu (JiangSu University, China), Qiangqiang Ni (JiangSu University, China), Zihao Yinyi (JiangSu University, China), and Danping Zou (JiangSu University, China)</i>	

Technologies and Tools (VI)

A Communication-efficient Collaborative Task Offloading Method Based on Distributed Computing Cloud	1459
<i>Ke Zhang (Hunan University, China), Ruixing Zong (Hunan University, China), Yingjie Song (Hunan University, China), Yong Zhou (Hunan University, China), and Xiong Xiao (Hunan University, China)</i>	
MICVIF: an automatic Unsupervised Feature Selection Method for Software Defect Prediction	1465
<i>Wenzhi Zhu (Shaanxi Normal University, China), Zhiqiang Li (Shaanxi Normal University, China), and Haiyang Liu (Shaanxi Normal University, China)</i>	

HTKT: Knowledge Tracing Based on Hypergraph Transformer	1472
<i>Xiaojin Guo (Tianjin University of Science and Technology, China), Xilong Chang (Tianjin University of Science and Technology, China), Xiankun Zhang (Tianjin University of Science and Technology, China), Kun Liang (Tianjin University of Science and Technology, China), Yuhu Shang (Beijing University of Posts and Telecommunications, China), and Yiying Zhang (Tianjin University of Science and Technology, China)</i>	
Unveiling the Dynamics of Video Out-of-Focus Blur: A Paradigm of Realistic Simulation and Novel Evaluation	1478
<i>Jing Chen (Hainan University, China), Zhao Qiu (Hainan University, China), and Zhiwei Zheng (China University of Labor Relations, China)</i>	
Competitive Swarm Optimizer with Momentum for Numerical Optimization	1484
<i>Shuxian Zheng (Dongguan University of Technology, China), Yuhui Zhang (Dongguan University of Technology, China), and Wenhong Wei (Dongguan University of Technology, China)</i>	
PG-YOLO: A Lightweight Vehicle Detection Method for Drones	1492
<i>Yang Liu (Henan University, China), Tengyu Fan (Henan University, China), Kun Mei (Henan University, China), and Liming Zhou (Henan University, China)</i>	

Technologies and Tools (VII)

NFAERCOM: A Near-Far Area Experience Replay-based Computation Offloading Method	1498
<i>Wenxuan Wang (Guizhou University, China), Yi Huang (Guizhou University, China), Yunhe Cui (Guizhou University, China), Chun Guo (Guizhou University, China), Yi Chen (Guizhou University, China), and Guowei Shen (Guizhou University, China)</i>	
Genetic Algorithm Using Deep Learning Model for Priority Scheduling in Cloud-Fog Environment	1506
<i>Zhan Zeng (Xiamen University, China), Xin Li (Xiamen University, China), Yue Hong (Xiamen University, China), and Wei Zheng (Xiamen University, China)</i>	
GPTLTS: Utilizing Multi-Scale Convolution to Enhance the Long-Term Time Series Forecasting With Pre-Trained Model	1512
<i>Dehua Chen (Technology Donghua University, China), Zijian Shen (Technology Donghua University, China), and Mei Wang (Technology Donghua University, China)</i>	
Qualitative QoS-Aware Scheduling of Moldable Parallel Jobs on HPC Clusters	1519
<i>Zhengxiong Hou (Northwestern Polytechnical University, China), Yubing Liu (Northwestern Polytechnical University, China), Hong Shen (Northwestern Polytechnical University, China), Jiyuan Liu (Northwestern Polytechnical University, China), and Jianhua Gu (Northwestern Polytechnical University, China)</i>	
SSFuzz: State Sensitive Fuzzing for Network Protocol Implementations	1527
<i>Chengnuo Cai (National University of Defense Technology, China), Lei Zhou (National University of Defense Technology, China), and Bo Yu (National University of Defense Technology, China)</i>	

Conflict-Free Navigation Optimization at Unsignalized Intersections Using Mixed-Integer Linear Programming for Connected and Autonomous Vehicles	1535
<i>Shuanglong Chu (Chang'an University, China), Jinfeng Guo (Chang'an University, China), and Chen Mu (Chang'an University, China)</i>	

Technologies and Tools (VIII)

AIO: Automating I/O Optimization Pipeline for Data-Intensive Applications in HPC	1541
<i>Wanxin Wang (Changsha University of Science and Technology), Huijun Wu (National University of Defense Technology), Lihua Yang (National University of Defense Technology), Zhangyu Liu (National University of Defense Technology), and Bin Zheng (Changsha University of Science and Technology)</i>	
SymbTQL: A Symbolic Temporal Logic Framework for Enhancing LLM-Based TKGQA	1549
<i>ShuaiChen Zhu (Changzhou University), Yang Yuan (Changzhou University), Lin Shi (Changzhou University), and Shoukun Xu (Changzhou University)</i>	
AFTP: An Adaptive High Cost-Effectiveness Fault-Tolerant NoC Design Based on Prediction	1557
<i>Xiaowen Chen (National University of Defense Technology, China), Ta Tan (National University of Defense Technology, China), Chen Li (National University of Defense Technology, China), Jianzhuang Lu (National University of Defense Technology, China), and Qijin Zhu (National University of Defense Technology, China)</i>	
AMQGaussian: Efficient 3D Gaussian Representation with Asymmetric Mixed-precision Quantization	1563
<i>Yong Kou (Sichuan University, China), Qing Ye (Sichuan University, China), Yanci Zhang (Sichuan University, China), Xia Yuan (Sichuan University, China), and Jinlong He (Sichuan University, China)</i>	
Knowledge Tracing Based on Semantic Enhancement of Exercise Relevance	1571
<i>Yueyang Huang (Tianjin University of Science and Technology, China), Kun Liang (Tianjin University of Science and Technology, China), Huitao Zhang (Tianjin University of Science and Technology, China), Xilong Chang (Tianjin University of Science and Technology, China), Chao Wang (Tianjin University of Science and Technology, China), and Xiankun Zhang (Tianjin University of Science and Technology, China)</i>	
A Workflow Scheduling Algorithm Based on Linear Evaluation for Dynamic Distributed Computing Environments	1578
<i>Xin Li (Xiamen University, China), Zhan Zeng (Xiamen University, China), Yuxin Chen (Xiamen University, China), Jinglong Deng (Xiamen University, China), Yue Hong (Xiamen University, China), and Wei Zheng (Xiamen University, China)</i>	

Technologies and Tools (IX)

Joint Entity and Relation Extraction Based on Prompt Learning and Multi-Channel Heterogeneous Graph Enhancement	1584
<i>Haiqing Lv (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), Xiaohui Han (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), Quan Cheng Laboratory, China), Peipei Wang (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), Wenbo Zuo (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), Jing Guo (Qilu University of Technology (Shandong Academy of Sciences), China), and Lijuan Xu (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China)</i>	
PFedSKD: Personalized Federated Learning via Self-Knowledge Distillation	1591
<i>Meiguang Zheng (Central South University, China), Zhengjie Liu (Central South University, China), Bo Chen (Central South University, China), and Zijie Hu (Central South University, China)</i>	
AutoMP: A Tool to Automate Performance Testing for Model Placement on GPUs	1599
<i>Zhe Yang (Shandong University, China), Wei He (Shandong University, China), Fenglong Cai (Shandong University, China), Yonghui Xu (Shandong University, China), Wei Guo (Shandong University, China), and Lizhen Cui (Shandong University, China)</i>	
Maximizing Influence of Nodes with Rapid Global Spread in Social Media Data Strea	1607
<i>Ze-peng Tian (Jiangsu University, China), Lei-lei Shi (Jiangsu University, China), Lu Liu (University of Exeter, UK), Zi-xuan Han (Jiangsu University, China), Zhou Daniel Hao (University of Leicester, UK), and Nick Antonopoulos (Edinburgh Napier University, UK)</i>	
FHNTT: a flexible Number Theoretic Transform design based on hybrid-radix butterfly	1615
<i>Li Li (IEIT SYSTEMS Co., Ltd, China), Rengang Li (Inspur (Beijing) Electronic Information Industry Co., Ltd, China), Yaqian Zhao (Inspur (Beijing) Electronic Information Industry Co., Ltd, China), Ruyang Li (Inspur (Beijing) Electronic Information Industry Co., Ltd, China), Zhiyuan Su (IEIT SYSTEMS Co., Ltd, China), and Xuelei Li (Inspur (Beijing) Electronic Information Industry Co., Ltd, China)</i>	
Towards Generalizable Forgery Detection Model via Alignment and Fine-Tuning	1623
<i>Xuekang Peng (Nanjing University of Science and Technology, China), Yisheng Li (Nanjing University of Science and Technology, China), and Zhichao Lian (Nanjing University of Science and Technology, China)</i>	
Deepfake Video Detection Based on the Decomposition of Spatial-Temporal Attention Mechanism in ViViT	1629
<i>Guoqing Sun (Nanjing University of Science and Technology, China) and Zhichao Lian (Nanjing University of Science and Technology, China)</i>	

Applications and Services (V)

- Reinforcement Learning based Edge-Assisted Inference for Maritime UAV Networks 1635
Chuxuan Wang (Xiamen University, China), Jiuling Li (Xiamen University, China), Liqing Ye (Xiamen University, China), Yu Liu (Xiamen University, China), and Liang Xiao (Xiamen University, China)
- Privacy-Preserving and Robust Federated Learning Based on Secret Sharing 1643
Jiajia Mei (Beijing Institute of Technology, China), Xiaodong Shen (Beijing Institute of Technology, China), Chang Xu (Beijing Institute of Technology, China), Liehuang Zhu (Beijing Institute of Technology, China), Guoxie Jin (Beijing Institute of Technology, China), and Kashif Sharif (Beijing Institute of Technology, China)
- Education From Short Video: A Novel Educational Pattern Inspired by Entertainment Videos 1651
Jiale Yu (Hainan University, China), Jing Chen (Hainan University, China), Zhao Qiu (Hainan University, China), and Zhiwei Zheng (China University of Labor Relations, China)
- Multimodal Identity Recognition of Spiking Neural Network Based on Brain-Inspired Reward Propagation 1657
Yang Liu (Henan University, China; Huaihe Hospital of Henan University, China), Hongxia Zhang (Henan University, China), Yahui Li (Henan University, China), Quanqiang Wang (Henan University, China), and Cheng Liu (Henan University, China)
- SF-SNF: A Small-File Sniffer System for Hadoop Clusters 1663
Miao Wang (Postal Savings Bank of China, China), Yanming Zhang (Postal Savings Bank of China, China), and Hualei Wang (Postal Savings Bank of China, China)
- A Hybrid Blockchain Scheme for Tracing Manufacturing Processes and Trading Transactions 1670
Ye Yuan (HuBei Land Resources Vocational College, China; China University of Geosciences, China), Mingxing Yang (China University of Geosciences, China), Ruoting Xiong (University of East Anglia, UK), Yani Sun (Yunnan Innovation Institute of Beihang University, Yunnan Key Laboratory of Blockchain Application Technology, China), Xianchao Zhang (Jiaxing University, China), and Wei Ren (State Key Laboratory of Geo-Information Engineering and Key Laboratory of Surveying and Mapping Science and Geospatial Information Technology of MNR, Beijing, China; Sichuan University, Ministry of Education, China; China University of Geosciences, China)

Applications and Services (VI)

- MTRP: A High-Performance Cost-Efficient Buffering Scheme for Multi-Tenant Cloud Services 1677
Zekai Zhu (University of Science and Technology of China, China), Peiquan Jin (University of Science and Technology of China, China), Guorui Huang (Unit 31002, the Chinese People's Liberation Army, China), Xiaoliang Wang (University of Science and Technology of China, China), and Yigui Yuan (University of Science and Technology of China, China)

A General Parallel Framework for Material Point Method Based on the p4est Library	1683
<i>Shaobo Tian (Computer Network Information Center, Chinese Academy of Sciences; University of Chinese Academy of Sciences), Jiaheng Wang (Renmin University of China), Jialin Li (Computer Network Information Center, Chinese Academy of Sciences; University of Chinese Academy of Sciences), Huang Ye (Computer Network Information Center, Chinese Academy of Sciences), and Jian Zhang (Computer Network Information Center, Chinese Academy of Sciences)</i>	
A Rotating Target Detection Algorithm for Ships in SAR Images Based on LAOBB-YOLOv8n	1691
<i>Min Huang (Hebei University of Science and Technology, China), Shuaihui Wang (Hebei University of Science and Technology, China), Shuaili Luo (Hebei University of Science and Technology, China), QiuHong Sun (Hebei University of Science and Technology, China), and Xiaokang Zhou (Kansai University, Japan)</i>	
AdaptTrack: Multi-Object Tracking by Adaptive Correlation	1697
<i>KunPeng Li (Zhengzhou University, China), Lei Wang (Hanwei Electronics GroupCorporation, China), Hongjun Ren (Hanwei Electronics GroupCorporation, China), and Yangjie Cao (Zhengzhou University, China)</i>	
Data-Driven Vehicle Positioning with Smartphone Raw GNSS Data in Urban Areas	1704
<i>Mengling Ou (Tianjin University, China), Zenghua Zhao (Tianjin University, China), Jianyu Yang (Tianjin University, China), Jiankun Wang (Tianjin University, China), and Jiafan Lu (Tianjin University, China)</i>	
Online Public Opinion Time Series Prediction based on Improved N-Beat and Multimodal Hybrid Fusion	1710
<i>Yuling Tian (Engineering Research Center of Cyberspace Yunnan University, Yunnan University, China), Shengfa Miao (Engineering Research Center of Cyberspace Yunnan University, Yunnan University, China), Shaowen Yao (Engineering Research Center of Cyberspace Yunnan University, Yunnan University, China), Puming Wang (Engineering Research Center of Cyberspace Yunnan University, Yunnan University, China), Xin Jin (Engineering Research Center of Cyberspace Yunnan University, Yunnan University, China), and Shichao Ma (Engineering Research Center of Cyberspace Yunnan University, Yunnan University, China)</i>	

Applications and Services (VII)

QoS-Aware Dynamic Service Caching and Updating in Cost-Efficient Multi-Access Edge Computing	1718
<i>Shuaibing Lu (Beijing University of Technology, China), Xin Jin (Beijing University of Technology, China), Jie Wu (Temple University, USA), Shuyang Zhou (Beijing Jiaotong University, China), Shen Wu (Beijing University of Technology, China), Jackson Yang (Beijing Jiaotong University, China), and Ran Yan (Beijing University of Technology, China)</i>	

HLIHP: An Efficient Hierarchical Learned Index with High-Precision Correction	1726
<i>Kunting Huang (Southwest University of Science and Technology, China), Xujian Zhao (Southwest University of Science and Technology, China), Peiquan Jin (University of Science and Technology of China), Bo Li (Southwest University of Science and Technology, China), Yin Long (Southwest University of Science and Technology, China), and Tao Liu (Southwest University of Science and Technology, China)</i>	
INToSR: Building A Novel In-Band Network Telemetry over SRv6	1732
<i>Xie Yi (Xiamen University, China), Yeyu Zhu (Xiamen University, China), Jiahao Feng (Xiamen University, China), Xiaochou Chen (Xiamen University, China), Xinxin Xiong (Xiamen University, China), and Shaojie Zheng (Xiamen University, China)</i>	
Data-Driven Multi-Stage Vehicle Trajectory Prediction for Complex Scenarios	1740
<i>Jian Zhang (Beijing Jiaotong Univerisity, China), Mengyuan Wang (Beijing Jiaotong Univerisity, China), Zikun Feng (Beijing Jiaotong Univerisity, China), and Shunli Zhang (Beijing Jiaotong Univerisity, China)</i>	
STIFormer: Enhancing Multivariate Time Series Classification Through Multi-Process Spatial-Temporal Interaction	1746
<i>Zhiyuan Zhang (Civil Aviation University of China, China) and Yuankun Li (Civil Aviation University of China, China)</i>	
Explaining Graph-Based Decision Learning for Autonomous Exploration in Unknown Environments	1754
<i>Liping Chen (University of Science and Technology Beijing (USTB), China), Shihong Duan (University of Science and Technology Beijing (USTB), China), Cheng Xu (USTB, China), Heng Zhang (USTB, China), and Ran Wang (USTB, China)</i>	

Applications and Services (VIII)

Towards Reliability Enhancement of Multi-Factor Authentication Service in EV Charging System Under Budget Constraint	1762
<i>Yao Li (State Grid Smart Internet of Vehicles Co., Ltd., Beijing, P.R. China), Tianlin Yang (State Grid Smart Internet of Vehicles Co., Ltd., Beijing, P.R. China), Qingwen Han (State Grid Smart Internet of Vehicles Co., Ltd., Beijing, P.R. China), Sha Li (State Grid Smart Internet of Vehicles Co., Ltd., Beijing, P.R. China), Yongsheng Zhao (State Grid Information & Telecommunication Group Co., Ltd., Beijing, P.R. China), Hongyue Ma (State Grid Information & Telecommunication Group Co., Ltd., Beijing, P.R. China), and Gang Si (State Grid Tianjin Electric Power Co., Ltd., Tianjin, P.R. China)</i>	
Power Microservices Troubleshooting by Pretrained Language Model with Multi-source Data	1768
<i>Shuai Ding (University of Chinese Academy of Sciences, China), Yifei Xu (University of Chinese Academy of Sciences, China), Zhuang Lu (University of Chinese Academy of Sciences, China), Fan Tang (Aier Eye Hospital, China), Tong Li (Chinese Academy of Sciences, China), and Jingguo Ge (Chinese Academy of Sciences, China)</i>	

Protein Function Prediction Based on the Pretrained Language Model ESM2 and Graph Convolutional Networks	1776
<i>Lijuan Hou (Tianjin University of Science and Technology, China), Hanyan Qin (Tianjin University of Science and Technology, China), Xiankun Zhang (Tianjin University of Science and Technology, China), and Yiyang Zhang (Tianjin University of Science and Technology, China)</i>	
A Mixed Augmentations Method for Multivariate Time Series Contrastive Learning	1782
<i>Weigang Huo (Civil Aviation University of China, China), Yuting Wang (Civil Aviation University of China, China), and Lishuo Ye (Civil Aviation University of China, China)</i>	
PSC Sketch: Finding Periodic Spread Changers in High-Speed Data Streams	1790
<i>Ang Hu (Soochow University, China), Guojun Gao (Soochow University, China), Yu-E Sun (Soochow University, China), He Huang (Soochow University, China), Yihuai Wang (Soochow University, China), Yang Du (Soochow University, China), and Xiaoyu Wang (Soochow University, China)</i>	
CK-Index: A Distribution-Aware Learned Index for Composite Keys	1798
<i>Zhengyang Wei (Hohai University, China), Baoliu Ye (Nanjing University, China), and Miao Cai (Nanjing University of Aeronautics and Astronautics, China)</i>	

Applications and Services (IX)

Breast Cancer Classification Using DDPM and Holographic Guidance Diffusion Framework	1805
<i>Yuxin You (Xi'an Jiaotong – Liverpool University, China), Hong-Seng Gan (Xi'an Jiaotong – Liverpool University, China), Akinobu Shimizu (Tokyo University of Agriculture and Technology, Japan), Muhammad Hanif Ramlee (Universiti Teknologi Malaysia, Malaysia), Hafiz Basarudin (Universiti Tunku Abdul Rahman, Malaysia), and Viet-Vu Vu (CMC University, Vietnam)</i>	
An Approach to Dynamic Satellite Service Substitution in Satellite Constellations	1811
<i>Yucheng Tao (Shanghai Jiao Tong University, China), Haopeng Chen (Shanghai Jiao Tong University, China), Zihong Lin (Shanghai Jiao Tong University, China), Chang Liu (Shanghai Jiao Tong University, China), Shengyang Liu (Shanghai Institute of Spaceflight Control Technology, China), and Fei Han (Shanghai Institute of Spaceflight Control Technology, China)</i>	
SimV: A Self-Extension Similarity Viterbi Algorithm for Service Function Chain Deployment for Multi-Access Edge Computing	1819
<i>Wenqiang Deng (Guangzhou College of Applied Science and Technology, China)</i>	
A SFC Placement Strategy in Low-Visibility Multi-Domains Networks for Low Resource Usage Cost	1827
<i>Qingli Xiong (Changsha University of Science and Technology, China), Zhuofan Liao (Changsha University of Science and Technology, China), and Xiaoyong Tang (Changsha University of Science and Technology, China)</i>	

A Task Transmission Path Selection Algorithm Based Object Identification and Intent-Driven in Uncertain Environments	1833
<i>Lei Hu (Soochow University, China), Yang Zhang (Soochow University, China), Shukui Zhang (Soochow University, China), Wubing Pan (Suzhou Global Institute, China), and Yingying Wang (Suzhou Global Institute, China)</i>	
ATM: Area-based Partition and Topology-aware Mapping for Large-scale SNN Simulation	1841
<i>Yangle Zeng (Sun Yat-Sen University, China), Guangnan Feng (Sun Yat-Sen University, China), Yutong Lu (Sun Yat-Sen University, China), Zhiguang Chen (Sun Yat-Sen University, China), and Nong Xiao (Sun Yat-Sen University, China)</i>	

Applications and Services (X)

NFVDC: A Flexible and Efficient NFV Platform for Dynamic Service Chaining	1849
<i>Qiuwen Lu (Institute of Information Engineering, Chinese Academy of Sciences, China; National Engineering Research Center of Information Security, China; University of Chinese Academy of Sciences, China), Qingyun Liu (Institute of Information Engineering, Chinese Academy of Sciences, China; National Engineering Research Center of Information Security, China; University of Chinese Academy of Sciences, China), and Binxing Fang (Harbin Institute of Technology, China)</i>	
A Knowledge Graph Automatic Construction Approach for Intelligent Operation of Cloud-Network Environment	1856
<i>Zhengchen Gai (Wuhan Research Institute of Posts and Telecommunications, China), Liwei Kuang (Network Business Unit, Fiberhome Company, China), Lingfeng Tian (Wuhan Research Institute of Posts and Telecommunications, China), and Keke Zhou (Wuhan Research Institute of Posts and Telecommunications, China)</i>	
CODC-pyParaQC: A design and implementation of parallel quality control for ocean observation big data	1863
<i>Huifeng Yuan (University of Chinese Academy of Sciences, China), Tanyan Li (Computer Internet Information Center, Chinese Academy of Sciences, China), Zhong Jin (Computer Internet Information Center, Chinese Academy of Sciences, China), Lijing Cheng (Institute of Atmospheric Physics, Chinese Academy of Sciences, China), Zhetao Tan (Institute of Atmospheric Physics, Chinese Academy of Sciences, China), Bin Zhang (Institute of Oceanography, Chinese Academy of Sciences, China), and Yanjun Wang (Institute of Oceanography, Chinese Academy of Sciences, China)</i>	
Task Scheduling and Computation Offloading in Space Edge Computing	1871
<i>Zihong Lin (Shanghai Jiao Tong University, China), Haopeng Chen (Shanghai Jiao Tong University, China), Yucheng Tao (Shanghai Jiao Tong University, China), Chang Liu (Shanghai Jiao Tong University, China), Shengyang Liu (Shanghai Institute of Spaceflight Control Technology, China), and Fei Han (Shanghai Institute of Spaceflight Control Technology, China)</i>	

RLGNN: Robust Graph Neural Networks with Noisy Label Learning	1879
<i>Haodong Qian (Guangxi Normal University, China), De Li (Guangxi Normal University, China), Qiyu Li (Guangxi Normal University, China), and Jinyan Wang (Guangxi Normal University, China)</i>	
Reconciling the Accuracy-Speed in Traffic Field's Time Series Forecasting	1887
<i>Peinan Zhao (Beijing Jiaotong University, China), Jin Yan (Beijing Jiaotong University, China), Yumeng A (Beijing Information Science and Technology University, China), Yichen Yang (Beihang University, China), Yidong Li (Beijing Jiaotong University, China), and Hongwei Zhao (Beijing Jiaotong University, China)</i>	

Applications and Services (XI)

An Efficient Flow Rule Conflict Comprehensive Detection Scheme for SDN Networks	1895
<i>Bo Han (Nanjing University of Science and Technology, China), Yuan Liu (Nanjing University of Science and Technology, China), Yongbin Zhou (Nanjing University of Science and Technology, China), and Yinwen Gao (Nanjing University of Science and Technology, China)</i>	
DPSFC: A Distributed Delay-Aware Approach for Improving Parallelized Service Function Chains Placement	1903
<i>MingXin Zhang (Inner Mongolia University, China), Yintan Ai (Inner Mongolia University, China), and Hua Li (Inner Mongolia University, China)</i>	
Pricing-Based Task Offloading Considering User Energy Consumption in MEC System	1911
<i>Xiyu Han (Changsha University of Science and Technology, China), Zhuofan Liao (Changsha University of Science and Technology, China), and Xiaoyong Tang (Changsha University of Science and Technology, China)</i>	
LogESP: Enhancing Log Semantic Representation With Word Position for Anomaly Detection	1917
<i>Zhengping Ni (Changchun University of Science and Technology, China), Xiaoqiang Di (Changchun University of Science and Technology, China), Xu Liu (Changchun University of Science and Technology, China), Lianjie Chang (Changchun University of Science and Technology, China), Jinqing Li (Changchun University of Science and Technology, China), and Qiyue Tang (Changchun University of Science and Technology, China)</i>	
Fast detection method for pedestrian video abnormal behavior based on keyframe extraction and multi-task mixed model	1925
<i>Huiyu Mu (Henan University, China), Jiangwei Li (Henan University, China), Jiashuai Su (Henan University, China), Luhui Wang (Henan University, China), Junfeng Tian (Henan University, China), and Lanxue Dang (Henan University, China)</i>	

Applications and Services (XII)

- Multilevel Load Balancing Algorithm for Domestic Heterogeneous Manycore Architecture 1931
Yi Ma (Tsinghua University, China), Xin Chen (Tsinghua University, China), Heng Guo (National Research Center of Parallel, Computer Engineering and Technology, China), Fang Li (National Research Center of Parallel, Computer Engineering and Technology, China), and Xin Liu (National Research Center of Parallel, Computer Engineering and Technology, China)
- Fast Adapting Few-Shot Federated Learning System for Human Activity Recognition 1937
Ziyan Zhang (Nanjing University of Aeronautics and Astronautics, China; Collaborative Innovation Center of Novel Software Technology and Industrialization, China) and Yanchao Zhao (Nanjing University of Aeronautics and Astronautics, China; Collaborative Innovation Center of Novel Software Technology and Industrialization, China)
- CATC: A task scheduling based on computing-aware and task classification in Pervasive Edge Computing 1946
JiaHui Yang (Soochow University, China), Yang Zhang (Soochow University, China), ShuKui Zhang (Soochow University, China), Mingyu Zhu (Global Institute of Software Technology, China), and YingYing Wang (Global Institute of Software Technology, China)
- MLF: Multi-level forwarding based on EdgeMesh in edge computing environment 1954
Xin Wei (Nanjing University of Aeronautics and Astronautics, China) and Xin Li (Nanjing University of Aeronautics and Astronautics, China)
- Dif-GAN: A Generative Adversarial Network with Multi-Scale Attention and Diffusion Models for Infrared-Visible Image Fusion 1960
Chengyi Pan (Yunnan University, China), Xiuliang Xi (Yunnan University, China), Xin Jin (Yunnan University, China), Huangqimei Zheng (Yunnan University, China), Puming Wang (Yunnan University, China), and Qian Jiang (Yunnan University, China)

Security and Blockchain (III)

- Correlation and Workload-Based Transaction Allocation Algorithm for Blockchain Sharding 1968
Guixia Xiao (Universiti Putra Malaysia, Malaysia), Normalia Samian (Universiti Putra Malaysia, Malaysia), Winston K.G. Seah (Victoria University of Wellington, New Zealand), Mohd Izuan Hafez Ninggal (Universiti Putra Malaysia, Malaysia), Masnida Hussin (Universiti Putra Malaysia, Malaysia), and Jyoti Sahni (Victoria University of Wellington, New Zealand)
- Reinforcement Learning-powered Effectiveness and Efficiency Few-shot Jailbreaking Attack LLMs 1974
Xuehai Tang (Institute of Information Engineering, Chinese Academy of Sciences; University of Chinese Academy of Sciences, China), Zhongjiang Yao (Institute of Information Engineering, Chinese Academy of Sciences, China), Jie Wen (Institute of Information Engineering, Chinese Academy of Sciences, China), Yangchen Dong (Institute of Information Engineering, Chinese Academy of Sciences, China), Jizhong Han (Institute of Information Engineering, Chinese Academy of Sciences, China), and Songlin Hu (Institute of Information Engineering, Chinese Academy of Sciences, China)

Detecting Smart Contract Vulnerabilities based on Fusing Semantic and Syntax Structure Information	1982
<i>Xiguo Gu (Beijing Information Science and Technology University, China), Xinhong Duan (Beijing Information Science and Technology University, China), Senlin Ren (Beijing Information Science and Technology University, China), Jiale Zhang (Beijing Information Science and Technology University, China), and Zhanqi Cui (Beijing Information Science and Technology University, China)</i>	
P-AES: Advanced Encryption Standard Parallel Optimization on MGPUSim	1988
<i>Jiawei Qin (Southwest University of Science and Technology, China), Yaobin Wang (Southwest University of Science and Technology, China), Ling Li (Southwest University of Science and Technology, China), Shuang Yang (Southwest University of Science and Technology, China), and Xiaorong Zhang (Southwest University of Science and Technology, China)</i>	
KR-PBFT: A Secure and Efficient Consensus Mechanism for Web 3.0	1994
<i>Yi Zhao (Inner Mongolia University, China), Qi An (Inner Mongolia University, China), Meiju Yu (Inner Mongolia University, China), Rula Sa (Inner Mongolia University, China), and Jin Zhang (Inner Mongolia University, China)</i>	
RBBC: Reputation-Based Blockchain for IoT Identity Resolution System	2000
<i>Jie Ji (Inner Mongolia University of Technology, China), Pengfei Yue (Inner Mongolia University of Technology, China), Leixiao Li (Inner Mongolia University of Technology, China), Haoyu Gao (Hainan University, China), Jinze Du (Tianjin University of Technology, China), Hao Lin (Tianjin University of Technology, China), Xiaodong Zhang (Inner Mongolia University of Technology, China), and Qing Li (Education Examinations Authority of Inner Mongolia Autonomous Region, China)</i>	

Security and Blockchain (IV)

Hierarchical Access Control for Bilateral Security in Medical Privacy Data Retrieval	2008
<i>Jianshe Wang (Tianjin University of Technology, China), Guangping Xu (Tianjin University of Technology, China), Yanyan Wen (Tianjin University of Technology, China), and Wei Hao (Tianjin University of Technology, China)</i>	
A Distributed Stealth Address Generation Protocol for Threshold Signatures	2014
<i>Yujue Wang (Hangzhou Innovation Institute of Beihang University, China), Lin Zhong (Sinohope Technology Holdings Limited, China), Jun Du (Sinohope Technology Holdings Limited, China), Yudi Zou (Bitlayer Labs Ltd, Vistra Corporate Service Centre, British Virgin Islands), Kevin He (Bitlayer Labs Ltd, Vistra Corporate Service Centre, British Virgin Islands), and Andrew Zhang (Sinohope Technology Holdings Limited, China)</i>	

SSIDB: Secure Sharing of IoT Data on Blockchain with CP-ABE and Trusted Environment Assistance	2022
<i>Sixiang Wang (Institute of Information Engineering, University of Chinese Academy of Sciences, China), Dongdong Huo (Institute of Information Engineering, Chinese Academy of Sciences, China), Hailong Zhang (Institute of Information Engineering, Chinese Academy of Sciences, China), Yu Wang (Institute of Information Engineering, University of Chinese Academy of Sciences, China), Chuang Li (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Yu Wang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Fei Shao (Institute of Information Engineering, Chinese Academy of Sciences, China)</i>	
TabSec: A Collaborative Framework for Novel Insider Threat Detection	2030
<i>Zilin Huang (Hainan University, China), Xiangyan Tang (Hainan University, China), Hongyu Li (Hainan University, China), Xinyi Cao (Hainan University, China), Jieren Cheng (Hainan University, China), Wenxuan Tu (Hainan University, China), and Logan Bo-Yee Liu (Hainan Shuyi Technology Co., Ltd., China)</i>	
Robust Malicious Domain Detection Based on Spatio-Temporal Hypergraph Networks	2038
<i>Liangyi Gong (Computer Network Information Center, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Kunxian Lv (Computer Network Information Center, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Chun Long (Computer Network Information Center, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Hao Fu (Computer Network Information Center, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Huanran Wang (Harbin Engineering University, China), Wei Wan (Computer Network Information Center, Chinese Academy of Sciences, China, University of Chinese Academy of Sciences, China), and Wu Yang (Harbin Engineering University, China)</i>	
MAD-LLM: A Novel Approach for Alert-Based Multi-stage Attack Detection via LLM	2046
<i>Dan Du (University of Chinese Academy of Sciences, China), Xingmao Guan (University of Chinese Academy of Sciences, China), Yuling Liu (University of Chinese Academy of Sciences, China), Bo Jiang (University of Chinese Academy of Sciences, China), Song Liu (University of Chinese Academy of Sciences, China), Huamin Feng (Beijing Electronic Science and Technology Institute, China), and Junrong Liu (University of Chinese Academy of Sciences, China)</i>	

Security and Blockchain (V)

Model-Based Throughput Optimization for Blockchain Sharding System	2054
<i>Yifan Li (Inner Mongolia University of Technology, China), Jianxiong Wan (Inner Mongolia University of Technology, China; Inner Mongolia Key Laboratory of Beijiang Cyberspace Security, China; Research Center of Large-Scale Energy Storage Technologies, Ministry of Education of the People's Republic of China), Chuyi Liu (Inner Mongolia University of Technology, China; Inner Mongolia Key Laboratory of Beijiang Cyberspace Security, China; Research Center of Large-Scale Energy Storage Technologies, Ministry of Education of the People's Republic of China), and Leixiao Li (Inner Mongolia University of Technology, China; Inner Mongolia Key Laboratory of Beijiang Cyberspace Security, China; Research Center of Large-Scale Energy Storage Technologies, Ministry of Education of the People's Republic of China)</i>	
Enhancing Few-Shot Malware Classification Through Joint Learning of Malware Images and Opcode Sequences	2060
<i>Hanjun Li (Guangzhou University, China), Shuhong Chen (Guangzhou University, China), Guojun Wang (Guangzhou University, China), Cheng Liu (Guangzhou University, China), Haojie Yin (Guangzhou University, China), and Zhenkun Luo (Guangzhou University, China)</i>	
A Model for Vulnerability Classification based on Res-CNN-BiTLSTM	2069
<i>Jiazheng Li (Yanshan University, China), Jiadong Ren (Yanshan University, China), Shuailin Yang (Yanshan University, China), Chenghao Zhi (Yanshan University, China), and Chunjiao Bao (Yanshan University, China)</i>	
Blockchain-Assisted Secure Multi-Party Computation With Verification and Auditing	2076
<i>Lei Zhang (Henan University, China), Yixin Jiang (Henan University, China), Hongjian Yin (Henan University, China), Yakun Niu (Henan University, China), Lei Tan (Henan University, China), and Yinfeng Hao (Henan University, China)</i>	
DNS Covert Channel Attack Detection Based on Spatio-Temporal Feature Fusion	2082
<i>Wei You (Tianjin University of Technology, China), Chunlei Zhao (Tianjin University of Technology, China), Chao Shan (Hubei Branch of National Computer Network Emergency Response Technical Team Coordination Center of China, China), Guozhong Dong (Department of New Networks Pengcheng Laboratory, China), Jie Yu (Tianjin University of Technology, China), and Yong Guan (Tianjin University of Technology, China)</i>	
A Reputation Layered Coding Based Storage Strategy for Consortium Blockchain	2089
<i>Ziqian Li (Sun Yat-Sen University, China), Maolin Pan (Sun Yat-Sen University, China), and Yang Yu (Sun Yat-Sen University, China)</i>	

Security and Blockchain (VI)

DeepARR: Alert Risk Rating Based on Deep Learning	2097
<i>Qiyue Tang (Changchun University of Science and Technology, China), Xiaoqiang Di (Changchun University of Science and Technology, China), Xu Liu (Changchun University of Science and Technology, China), Ligang Cong (Changchun University of Science and Technology, China), Weiwu Ren (Changchun University of Science and Technology, China), and Zhengping Ni (Changchun University of Science and Technology, China)</i>	

DMSA: Decentralized and Multi-keyword Selective Data Sharing and Acquisition	2105
<i>Moheng Lin (National University of Defense Technology, China), Peichang Shi (National University of Defense Technology, China), Xiang Fu (National University of Defense Technology, China), Feng Jiang (National University of Defense Technology, China), and Guodong Yi (Xiangjiang Lab, China)</i>	
Efficient and Verifiable Skyline Computation on Blockchain System with Merkle B+ Tree Index	2113
<i>Hao Ding (Harbin Institute of Technology, China), Xuefeng Piao (Harbin Institute of Technology, China), Huihui Song (Harbin Institute of Technology, China), Jiasi Li (Harbin Institute of Technology, China), Zhenzhou Ji (Harbin Institute of Technology, China), Meng Liu (State Grid Shandong Electric Power Research Institute, China), Jie Liu (State Grid Shandong Electric Power Company Yantai Electric Power Company, China), and Wenjie Dong (Dongfang Electronics Co., Ltd., China)</i>	
An Improved PBFT Consensus Algorithm Based on Reputation Grading and Voting in IoT Environment	2121
<i>Yanlin Ji (Chongqing University of Posts and Telecommunications, China), Yang Zou (Chongqing University of Posts and Telecommunications, China), Gang Wang (Chongqing Telecom Company Limited, China), Wanning Li (Chongqing University of Posts and Telecommunications, China), and Ruiji Xu (Chongqing University of Posts and Telecommunications, China)</i>	
PSR-Tree: A Novel Method for Personalized Trajectory Data Protection	2129
<i>Chundong Wang (Tianjin University of Technology, China), Yixuan Song (Tianjin University of Technology, China), Yongxin Zhao (Tianjin University of Technology, China), Yuhan Tian (Tianjin University of Technology, China), and Shunyao Fang (Tianjin University of Technology, China)</i>	
From n to $n + x$: A Novel Open World Traffic Classification Framework Based on Multiple Classifiers Ensemble	2137
<i>Kaixing Liu (National University of Defense Technology, China), Fei Wang (National University of Defense Technology, China), and Shuhui Chen (National University of Defense Technology, China)</i>	

AI for Internet of Autonomous Things (II)

PhantomPatch: Easy-Ignoring Attacks on Object Detectors Using Ghosting Artifacts	2145
<i>Xiaolong Guo (Xidian University, China), Qingsong Yao (Xidian University, China), Jingwei Li (Xidian University, China), Xuwen Dong (Xidian University, China), and Jianfeng Ma (Xidian University, China)</i>	
Enhancing Feature Selection in IoT Intrusion Detection Using the Ensemble Stacking	2151
<i>Zhijian Zheng (Nanjing University of Science and Technology, China), Weilin Gai (TCA, Institute of Software, CAS; CNCERT/CC; UCAS, China), Peng Zhang (Nanjing University of Science and Technology, China), and Ming Zhou (Nanjing University of Science and Technology, China)</i>	

Smart Building Management System based on Digital Twin: A Case Study on Real-Time Environmental Monitoring and Thermal Comfort Prediction	2157
<i>Qizhong Gao (Xi'an Jiaotong-Liverpool University, China), Yijie Chu (Xi'an Jiaotong-Liverpool University, China), Zitian Peng (Xi'an Jiaotong-Liverpool University, China), Yuhao Jin (Xi'an Jiaotong-Liverpool University, China), Xiang Ji (Xi'an Jiaotong-Liverpool University, China), Shuchen Ji (Xi'an Jiaotong-Liverpool University, China), Songming Ping (Xi'an Jiaotong-Liverpool University, China), Xiang Xie (Xi'an Jiaotong-Liverpool University, China), Xiaohui Zhu (Xi'an Jiaotong-Liverpool University, China), and Yong Yue (Xi'an Jiaotong-Liverpool University, China)</i>	
Sound-based Bee Colony State Analysis Using Compact MFCC patterns	2164
<i>Weihai Huang (Fujian Agriculture and Forestry University, China), Weize Yang (Fujian Agriculture and Forestry University, China), Zhicong Luo (Fujian Agriculture and Forestry University, China), Jun Qi (Xi'an Jiaotong-Liverpool University, China), Tingting Zhang (Fujian Agriculture and Forestry University, China), and Xiangzeng Kong (Fujian Agriculture and Forestry University, China)</i>	
Toward Multi-Agent Coordination in IoT via Prompt Pool-Based Continual Reinforcement Learning	2170
<i>Chenhang Xu (Xi'an Jiaotong-Liverpool University, China), Jia Wang (Xi'an Jiaotong-Liverpool University, China), Xiaohui Zhu (Xi'an Jiaotong-Liverpool University, China), Yong Yue (Xi'an Jiaotong-Liverpool University, China), Jun Qi (Xi'an Jiaotong-Liverpool University, China), and Jieming Ma (Xi'an Jiaotong-Liverpool University, China)</i>	
A Diffusion-Mamba Approach with Boundary Sampling for Imbalanced Classification	2178
<i>Quan Yuan (Henan University, China), Sheng Chang (Henan University, China), and Fan Zhang (Henan University, China; Huaihe Hospital of Henan University, China)</i>	

AI for Internet of Autonomous Things (III)

NASFLY: On-Device Split Federated Learning With Neural Architecture Search	2184
<i>Chao Huo (Soochow University, China), Juncheng Jia (Soochow University, China), Tao Deng (Soochow University, China), Mianxiong Dong (Muroran Institute of Technology, Japan), Zhanwei Yu (Uppsala University, Sweden), and Di Yuan (Uppsala University, Sweden)</i>	
Coverage Holes Recovery in Hybrid Sensor Networks Based on Key Perceptual Intersection	2191
<i>He Li (University of Nanyang Normal, China), Shixian Sun (University of Nanyang Normal, China), Chuang Dong (University of Nanyang Normal, China), Zhufeng Fu (University of Nanyang Normal, China), Cong Zhao (University of Nanyang Normal, China), and Qinglei Qi (University of Nanyang Normal, China)</i>	

Nonlinear Control of Crane Systems Based on Intelligence Computing of Disturbance Observer Under Mismatched Disturbance	2197
<i>Tianlei Wang (Wuyi University, China; Jiangmen Key Laboratory of Kejie Semiconductor Bonding Technology and Control System, Jiangmen, China), Yiyang Wang (Wuyi University, China), Meng Xu (Wuyi University, China), Jiajie Tian (Guangdong Kejie Technology Co., Ltd., China), Jingling Zhang (Wuyi University, China), and Zhiyong Hong (Wuyi University, China)</i>	
NetDS: Distributed Search Framework with Hybrid Acceleration Methods	2203
<i>Penghao Zhang (Shanxi University) and Zhiguo Hu (Shanxi University)</i>	

Poster Papers

Enhancing Edge Caching with User Preferences and Access Patterns in Wireless Networks	2211
<i>Hao Wen (Capital Normal University, China) and Lei Zhang (Capital Normal University, China)</i>	
AFCNNM: Accelerating Fully Connected Neural Network on Mesh-based Optical Network-on-Chip ..	2215
<i>Wen Yang (China Three Gorges University, China) and Yunting Liao (China Three Gorges University, China)</i>	
Optimizing MEC System Performance Through M/M/m Queueing Model Analysis	2217
<i>Jiale Liang (Yunnan University, China), Xiaowei Ma (Hongta Tobacco (Group) Co., Ltd, China), Houjian Ding (Yunnan University, China), and Zhenli He (Yunnan University, China)</i>	
Design of VLC-Enabled Hybrid Data Center Network and Routing Algorithm	2219
<i>Linyu Yang (Henan University, China), Xiaoyu Du (Henan Engineering Research Center for Industrial Internet of Things, China), Yujing Wang (Henan University, China), and Shuaiqi Liu (Henan University, China)</i>	
An Energy Prediction Algorithm for Energy Harvesting Wireless Sensors based on Energy Fluctuation Threshold	2222
<i>Yalin Wang (Ningxia University, China), Zhenbo Yuan (Ningxia University, China), Yongqi Ge (Ningxia University, China), Shuhua Yuan (Ningxia University, China), Xin Chen (Ningxia University, China), Rui Liu (Ningxia University, China), and Jintao Gao (Ningxia University, China)</i>	
An Improved Moth Flame Search for WSN Coverage Optimization	2224
<i>Jiaqi Li (University of South China, China) and Minghua Wang (University of South China, China)</i>	
OSN Rumor Control Model Based on Community Immunization	2228
<i>Ming Dong (Northeastern University, China), Zhiqiang Sun (Northeastern University, China), Zhenhua Tan (Northeastern University, China), and Bin Zhang (Northeastern University, China)</i>	
Image Stitching Tampering Detection in Social Networks	2232
<i>Jin Zhang (Inner Mongolia University, China), RuLa Sa (Inner Mongolia University, China), Qi An (Inner Mongolia University, China), QiaoMei Gao (Inner Mongolia University, China), Xiliang Pang (Inner Mongolia University, China), and Meiju Yu (Inner Mongolia University, China)</i>	

An Adaptive Hierarchical Protection Scheme for Social Relationships Based on Differential Privacy	2234
<i>Jiawei Shen (Hebei University, China), Junfeng Tian (Hebei University, China), and Ziyuan Wang (Hebei University, China)</i>	
An Energy-Efficient Ant-Based Routing Algorithm for Wireless Sensor Networks Using Compressive Sensing	2236
<i>Zheyang Shi (Zhejiang Normal University, China), Chenjun He (Zhejiang Normal University, China), Junjie Tong (Zhejiang Normal University, China), Sheng Pan (Zhejiang Normal University, China), and Hui Wang (Zhejiang normal University, China)</i>	
PIK-Convolution: Step Convolution Acceleration Based on Multi-GPU Architecture	2240
<i>Yutao Peng (Southwest University of Science and Technology, China), Yaobin Wang (Southwest University of Science and Technology, China), Tianhai Wang (Southwest University of Science and Technology, China), Mei Han (Southwest University of Science and Technology, China), Yunxin Xu (Southwest University of Science and Technology, China), and Pingping Tang (Southwest University of Science and Technology, China)</i>	
A Cross-Modal Breast Cancer Prognostic Prediction Model Based on Graph Neural Networks	2244
<i>Sheng Chang (Henan University, China), Quan Yuan (Henan University, China), and Fan Zhang (Henan University, China)</i>	
Enhancing Code Generation for Dataflow Programming: Fine-Tuning Large Language Models with the DFCPP Dataset	2246
<i>Qiuming Luo (Shenzhen University, China), Xi Ma (Shenzhen University, China), and Xuan Wei (Tianjin Yuyi Kaihong Intelligent Technology, China)</i>	
A Multipath Satellite Routing to Enhance Networking Performance for LEO Constellations	2248
<i>Chenqiang Tong (Xidian University, China), Chen Chen (Xidian University, China), Wei Han (Xi'an Beilin University-based Innovation Group Co., China), Zhiyi Wang (The State Grid JiLin Province Electric Power Company Limited Information, China), Lixin Lan (Xidian Guangzhou Institute of Technology, China), Chengbin Huang (The State Grid JiLin Province Electric Power Company, China), Fan Jin (National Key Laboratory of Science and Technology on Space Microwave, China), Quan Gan (Beijing Goldwater Information Technology Development Co., Ltd., China), and Shaohua Wan (University of Electronic Science and Technology of China, China)</i>	
STA-VAD: Video Anomaly Detection Utilizing Spatio-Temporal Memory and Adaptive Deformation..	2250
<i>Huiyu Mu (Henan University, China), Jiashuai Su (Henan University, China), Luhui Wang (Henan University, China), Jiangwei Li (Henan University, China), Yadi Wang (Henan University, China), and Xianyu Zuo (Henan University, China)</i>	
Adaptive Neighbor Guided View Reconstruction for Incomplete Multiview Clustering	2252
<i>Siyuan Chen (Guangdong University of Technology, China), Zhuojie Huang (Guangdong University of Technology, China), Shuping Zhao (Guangdong University of Technology, China), and Qintai Hu (Guangdong University of Technology, China)</i>	

A Privacy-Preserving and Efficient Data Sharing Scheme Based on Blockchain in IIoT	2254
<i>Hongyan Peng (Guangxi Normal University, China), Yipeng Yang (Guangxi Normal University, China), Dongcheng Li (Guangxi Normal University, China), Peng Wang (Guangxi Normal University, China), and Peng Liu (Guangxi Normal University, China)</i>	
Research on Machine Learning Based False Information Hybrid Detection Model in Blockchain Social Networks	2258
<i>Dan Qin (Inner Mongolia University, China), Qi Li (Industrial and Commercial Bank of China Limited Jinan Branch, China), Jin Zhang (Inner Mongolia University, China), Pantong Wang (Inner Mongolia University, China), Guiquan Zheng (Inner Mongolia University, China), and Meiju Yu (Inner Mongolia University, China)</i>	
Fast Distributed Polynomial Multiplication Algorithm for Lattice-Based Cryptographic Decryption in Blockchain Systems	2260
<i>Hongjian Zhao (Shandong University, China), Yunting Tao (Binzhou Polytechnic, China), Fanyu Kong (Shandong University, Shandong Sansec Information Technology Co., Ltd, China), Guoyan Zhang (Shandong University, China), Hanlin Zhang (Qingdao University, China), and Jia Yu (Qingdao University, China)</i>	
Privacy-Preserving Scheme of Cotton Supply Chain Based on Blockchain	2264
<i>Linlin Zhang (Xinjiang University, China), Wenwen Li (Xinjiang University, China), Jing Huo (Xinjiang University, China), Xuehua Bi (Xinjiang Medical University, China), and Kai Zhao (Xinjiang University, China)</i>	
Smart Contract Vulnerability Detection via Feature Fusion of Local Data Flow and Global Features	2268
<i>Long Wang (Liaoning University, China), Zhihua Chen (Liaoning University, China), Hua Pang (Shenyang Normal University, China), and Xiaoguang Li (Liaoning University, China)</i>	
A Two-Phase Encrypted Traffic Classification Scheme in Programmable Data Plane	2272
<i>Hao Wang (University of Science and Technology of China, China), Xiaobin Tan (University of Science and Technology of China, China; Institute of Artificial Intelligence, Hefei Comprehensive National Science Center, China), Shenzhi Yuan (University of Science and Technology of China, China), Mengxiang Li (University of Science and Technology of China, China), Jiansong Wu (University of Science and Technology of China, China), and Quan Zheng (University of Science and Technology of China, China)</i>	

Carbon-Aware Distributed Energy Management for Data Center Microgrids Based on Blockchain	2274
---	------

Xiaowei Si (Inner Mongolia University of Technology, China), Jianxiong Wan (Inner Mongolia University of Technology, China; Inner Mongolia Key Laboratory of Beijiang Cyberspace Security, China; Research Center of Large-Scale Energy Storage Technologies, Ministry of Education of the People's Republic of China), Chuyi Liu (Inner Mongolia University of Technology, China; Inner Mongolia Key Laboratory of Beijiang Cyberspace Security, China; Research Center of Large-Scale Energy Storage Technologies, Ministry of Education of the People's Republic of China), Leixiao Li (Inner Mongolia University of Technology, China; Inner Mongolia Key Laboratory of Beijiang Cyberspace Security, China; Research Center of Large-Scale Energy Storage Technologies, Ministry of Education of the People's Republic of China), Xiaolei Wang (Inner Mongolia University of Technology, China), and Xinyu Lu (Inner Mongolia University of Technology, China)

ROSE-BOX: An Approach for Intrusion Detection in Industrial Internet of Things	2276
--	------

Silin Peng (Sun Yat-sen University, China), Yu Han (Sun Yat-sen University, China), Xiaojun Liang (Peng Cheng Laboratory, China), Chunhua Yang (Central South University, China), Weihua Gui (Central South University, China), and Nan Zhou (Peng Cheng Laboratory, China)
