## Table of Contents

|                                                                                                                                                            |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Thermophysical Properties Evaluation of Water Based Al<sub>2</sub>O<sub>3</sub>/TiO<sub>2</sub> Hybrid Nanofluids: Experimental and ANN predictions</b> | 1  |
| Faisal Z. Alasmari, Esam Jassim, L. Syam Sundar                                                                                                            |    |
| <b>Fabric defect detection algorithm based on improved YOLOv8s</b>                                                                                         | 8  |
| Shanshan Liu                                                                                                                                               |    |
| <b>Spatio-Temporal Graph Network-Based Traffic Forecasting Method</b>                                                                                      | 12 |
| Ning Zhang, Kaimeng Li, Xiangyue Zhang, Wenjing Wang, Chao Li, Yuyun Kang                                                                                  |    |
| <b>Steel surface defect detection algorithm based on improved YOLOv8</b>                                                                                   | 16 |
| Shuxi Guo, Yingchun Chen, Zhijun Xu, Yuheng Wang                                                                                                           |    |
| <b>YOLO-DynamicNet: A Dynamic Network for Maritime Tiny Object Detection</b>                                                                               | 22 |
| Zhennan Fei, Yingjiang Xie, Xingcheng Ming, Da Deng, Jinggong Sun, Fu Niu                                                                                  |    |
| <b>Sentence-Guided Comment Tree Fusion for Fake News Detection</b>                                                                                         | 32 |
| Shiyong Xiong, Tingting Huang, Huajian Xie, Jun Shen                                                                                                       |    |
| <b>Fault Prediction for Optical Network Based on Hybrid Neural Networks</b>                                                                                | 36 |
| Yihao Zhong, Changsheng Yin, Yuantao Yang, Ruopeng Yang                                                                                                    |    |
| <b>Adversarial Attacks: Key Challenges for Security Defense in the Age of Intelligence</b>                                                                 | 41 |
| Hailong Xi, Le Ru, Jiwei Tian, Bo Lu, Shiguang Hu, Wenfei Wang                                                                                             |    |
| <b>A LSTM-Based Trajectory Prediction Method For Aerial Target</b>                                                                                         | 47 |
| Shuang Peng, Songtao Sun, Gaopeng Zhao, Quanmin Yan                                                                                                        |    |
| <b>Machine Learning-Based Driving Style Classification Real-World Data Prediction</b>                                                                      | 53 |
| Gyeseong Lee                                                                                                                                               |    |
| <b>Deep Learning for Non-Invasive Intoxication Detection: Ocular Analysis of Drivers Using CNNs and Quaternary Models</b>                                  | 58 |
| Devang Pandey, Idhant Gode, Venkata Shaurya Mantrala, Swayam Shah                                                                                          |    |
| <b>Research on Optimization strategy of YOLOv8 target detection model based on scene adaptation</b>                                                        | 62 |
| Nan Luo, Jingxing Zhong, Yuchong Lin, Xuenan Dai, Xiongyao Lai, Jiayan Liu                                                                                 |    |
| <b>Cement concrete pavement distress detection based on sensor fusion architecture</b>                                                                     | 67 |
| Yikun Huang, Yi-Horng Lai, Cheng Shen, Zhengwei Feng, Qiyuan Dong, Wanqing Huang                                                                           |    |
| <b>Research on High-Precision Detection Scheme for Scenic Area Garbage Based on Deep Learning</b>                                                          | 71 |
| Zhuangzhuang Zhu, Yuan Sun, Yanhui Ding                                                                                                                    |    |
| <b>Research on Substation Personnel Fall Detection Method Based on Vision-Language Models</b>                                                              | 76 |
| Yongbin Chen, Zhijun Zhang, Long Yu                                                                                                                        |    |

|                                                                                                                                           |     |
|-------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Exploiting Fuzzy Classification of Time and Amplitude for Efficient QRS Complex Detection</b>                                          | 80  |
| Ziheng Zhao, Baitao Lyu, Yang Xu, Yining Sun, Xianjun Yang                                                                                |     |
| <b>Hierarchical Multi-Stage BERT Fusion Framework with Dual Attention for Enhanced Cyberbullying Detection in Social Media</b>            | 86  |
| Jiani Wang, Xiaochuan Xu, Peiyang Yu, Zeqiu Xu                                                                                            |     |
| <b>Robust forgery detection and localization research based on dynamic reinforcement and enhanced sliding window</b>                      | 90  |
| Tianju Liu, Ningyi Li, Jiaming Xie, Yuan Liu, Hui Shi                                                                                     |     |
| <b>GHP-ManagerFormer: A Transformer-Enhanced Approach for Logistics Transportation Time Prediction</b>                                    | 97  |
| Huiping Gao, Jason See Toh Seong Kuan, Yuchen Zhang, Junzhe Ma                                                                            |     |
| <b>Survey of Lightweight Object Detection Model Methods</b>                                                                               | 101 |
| Chenhong Yang, Zhengang Gao, Yijun Hao, Ruipeng Yang                                                                                      |     |
| <b>An Improved YOLOv8s Model for Small Object Detection in UAV Aerial Images</b>                                                          | 114 |
| Zefeng Wang, Pengcheng Hou, Lize Gu                                                                                                       |     |
| <b>Harnessing Large Language Models for Temporal Knowledge Graph Forecasting with Multi-view Prompting</b>                                | 120 |
| Da Zhang, Tong Xu, Fake Lin, Jiayue Chen                                                                                                  |     |
| <b>Temporal-Spatial Attention Graph Neural Network for Detecting Address Resolution Protocol Attacks in Industrial Internet of Things</b> | 126 |
| Yueqi Cheng, Zhong Li                                                                                                                     |     |
| <b>Improved YOLOv8 algorithm for student behavior detection in a smart classroom</b>                                                      | 134 |
| Long He, Peng Han                                                                                                                         |     |
| <b>Multilayer Perceptron (MLP)-based Path Loss Prediction Modeling for LoRa Signals</b>                                                   | 139 |
| Fan Jiang, Zhangqin Huang, Ling Huang, Huangyi Yan                                                                                        |     |
| <b>Corporate Carbon Emission Prediction Based on Multi-Source Data Fusion</b>                                                             | 144 |
| Jiaguan Shen, Xinyue Fu, Weiyu Guo                                                                                                        |     |
