Contents

Contributors	ix
Acknowledgments.....	xi
Preface.....	xiii
Executive Summary.....	xv
Chapter 1 Introduction.....	1
1.1 SE 2050 Database	2
References	2
Chapter 2 Goals	5
2.1 Determine Methodologies	5
2.2 Analyze and Interpret Data to Inform Design Recommendations.....	5
2.3 Recommend Future Improvements to Data Collection	6
Chapter 3 Definitions.....	7
3.1 Sustainability Terms.....	7
3.2 Data Analysis and Statistical Terms	8
References	10
Chapter 4 Methodology	11
4.1 Preparing the Data for Analysis.....	11
4.1.1 Defining the Performance Objective	11
4.1.2 Defining Additional Data Features.....	11
4.1.3 Removing Out-of-Scope Data.....	12
4.1.4 High-Level Filtering	13
4.2 Defining Feature Filters	15
4.3 Exploratory Data Analysis	15
4.4 Regression and Feature Importance	16
4.4.1 Linear Regression and Kruskal–Wallis: Measuring the Relationship between Each Variable and the Objective	16
4.4.2 Feature Importance and Machine Learning: Measuring the Relative Importance of Multiple Select Variables on Performance	17
References	20

Chapter 5 Results	21
5.1 Upfront Carbon: Exploratory Data Analysis.....	23
5.1.1 Summary Results.....	23
5.1.2 Global Warming Potential (GWP) Intensity by High-Priority Features.....	25
5.1.3 Global Warming Potential (GWP) Intensity by Secondary-Priority Features.....	26
5.2 Regressions and Feature Importance on Global Warming Potential Intensity	29
5.2.1 Continuous Variables with a Statistically Significant Linear Relationship with Global Warming Potential Intensity	29
5.2.2 Discrete Variables with Statistically Significant Differences in Global Warming Potential Intensity	31
5.2.3 Feature Importance from Random Forest Regression.....	33
Chapter 6 Limitations	43
Chapter 7 Discussion and Recommendations	45
Chapter 8 Conclusion.....	49
Appendix A About the Data Features in the Database.....	51
Reference	54
Appendix B Side-by-Side Exploratory Data Analysis: Upfront Carbon and A to C Data Sets	55
B.1 Summary Results	56
B.1.1 Global Warming Potential (GWP) versus Gross Floor Area (High Priority).....	56
B.1.2 Project Counts by State	58
B.1.3 Distribution of GWP Intensity	59
B.1.4 Descriptive Statistics for the Upfront Carbon Dataset.....	60
B.2 Project Data Features.....	62
B.2.1 Construction Year Completed (or Anticipated)	62
B.2.2 Gross Floor Area (High Priority)	63
B.2.3 Floor-to-Floor Height (Calculated Value)	65
B.2.4 Life-Cycle Assessment (LCA) Completion Date	66
B.2.5 Region (Secondary Priority)	67
B.2.6 State	68
B.2.7 Biogenic Carbon Included?.....	69
B.2.8 Country	70
B.2.9 Expected Building Life (Years)	71
B.2.10 LCA Tool (Secondary Priority, Statistically Significant in Both Datasets).....	72
B.2.11 Project Phase at LCA (Secondary Priority)	73

B.3	Project Constraints.....	74
B.3.1	Building Use Type (High Priority, Statistically Significant in Both Datasets).....	74
B.3.2	Typical Snow Load	75
B.3.3	Allowable Soil Bearing Pressure.....	76
B.3.4	Typical Floor Live Load (Statistically Significant in the A to C Dataset).....	78
B.3.5	Typical Floor Live Load, Binned (Statistically Significant in the A to C Dataset)	79
B.3.6	Ultimate Wind Speed	80
B.3.7	Seismic Design Category (Secondary Priority)	81
B.3.8	Seismic Site Class	82
B.4	Project Decisions	83
B.4.1	Mean Roof Height (High Priority)	83
B.4.2	Primary Horizontal Gravity System (High Priority, Statistically Significant in Both Datasets).....	85
B.4.3	Primary Lateral System (Secondary Priority, Statistically Significant in Both Datasets)	86
B.4.4	Primary Vertical Gravity System (Statistically Significant in Both Datasets).....	87
B.4.5	Stories Above Grade (High Priority).....	88
B.4.6	Stories Below Grade, Binned (Secondary Priority, Statistically Significant in the A to C Dataset)	90
B.4.7	Typical Column Grid, Long.....	91
B.4.8	Typical Column Grid, Short.....	92
B.4.9	Foundation Type.....	93
B.4.10	Podium (Statistically Significant in the Upfront Carbon Dataset)	94
Appendix C Relationships across Variables.....		95
C.1	Correlation between Continuous Variables.....	95
C.2	Relationships among Continuous and Discrete Variables.....	96
Appendix D Feature Importance from Machine Learning Training.....		101
D.1	Unordered Plots	101
D.2	Ordered Plots.....	103
Index.....		107
