**Volume 13239**

Proceedings of SPIE 0277-786X, V. 13239

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optoelectronic Imaging and Multimedia Technology XI*, edited by Jinli Suo, Zhenrong Zheng, Proc. of SPIE 13239, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510682061

ISBN: 9781510682078 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

- ix *Symposium Committees*
- xiii *Conference Committee*

---

## HIGH-DIMENSIONAL OPTICAL IMAGING

---

- 13239 02 **Single-pixel spectral imaging technology based on sorting coding and depth learning**  
[13239-1]
- 13239 03 **High-resolution spectral imaging with quasi bound states in the continuum** [13239-2]
- 13239 04 **Light field stitching using light field feature points** [13239-3]
- 13239 05 **Neural light field reconstruction from hybrid cameras** [13239-4]
- 13239 06 **An image-crosstalk correction method for infrared focal plane array detector based on RC model** [13239-12]

---

## DEEP LEARNING AND INTELLIGENT IMAGING

---

- 13239 07 **A novel learning-based keypoint matching framework for toric intraocular lens navigation during cataract surgery** [13239-5]
- 13239 08 **Implicit neural representation based on adaptive learnable filters** [13239-6]
- 13239 09 **Deep-learning-based photoacoustic finger vein image recognition** [13239-7]
- 13239 0A **An algorithm for enhancing low-light remote-sensing images based on zero-reference deep curve estimation (Zero-DCE)** [13239-8]
- 13239 0B **MSAN: mask semantic attention network for single-frame structured light 3D reconstruction**  
[13239-9]

---

## ADAPTIVE OPTICS

---

- 13239 0C **Diffraction waveguides of prohibited light leakage based on surface relief gratings for augmented reality display** [13239-10]
- 13239 0E **An improved RL-IBD restoration algorithm for wavefront coded imaging system** [13239-13]

---

### 3D IMAGING

---

- 13239 OG **A parameter-free method for laser point cloud denoising based on texture information** [13239-15]
- 13239 OH **Two-step method for geometry reconstruction using differentiable rendering** [13239-16]
- 13239 OI **High-efficiency 3D Gaussian splatting rendering assisted by event signal sampling** [13239-17]
- 13239 OJ **3D visualization techniques based on Three.js and Quasar framework for digital twin systems** [13239-18]

---

### INTELLIGENT IMAGING

---

- 13239 OK **High-resolution rotating pupil optical imaging for satellite remote sensing** [13239-19]
- 13239 OL **Neural processor microarchitecture design for CNN processing acceleration** [13239-20]
- 13239 OM **Design and virtual prototyping of a compact augmented reality system with 2D diffraction grating** [13239-21]
- 13239 ON **Fall detection in low-illumination environment with adaptive image enhancement** [13239-22]

---

### POSTER SESSION

---

- 13239 OP **Single-frame structured light depth map reconstruction with absolute phase-aided supervision** [13239-24]
- 13239 OQ **An end-to-end structured light depth prediction approach using Mamba networks** [13239-25]
- 13239 OT **A high-speed structured light vision imaging and storage system based on Zynq SoC for 3D measurement** [13239-28]
- 13239 OV **Research of the effect of the room's illumination conditions on the facial detection and recognition algorithms** [13239-30]
- 13239 OW **Light-field depth estimation powers salient object detection** [13239-31]
- 13239 OX **Point cloud processing for mixed reality: semantic understanding, mesh generation, and completion** [13239-32]
- 13239 OY **Attention-based matching cost for disparity estimation from light fields** [13239-33]

- 13239 0Z **Deformable attention-guided network for multitask learning** [13239-34]
- 13239 10 **Vehicle detection based on Yolov5 in typical complex weather conditions** [13239-35]
- 13239 11 **High-fidelity single-pixel imaging using multihead attention mechanism** [13239-36]
- 13239 12 **Multimodal near-space surveillance system** [13239-37]
- 13239 13 **Computing method for extreme ultraviolet lithography imaging with aberration consideration** [13239-38]
- 13239 14 **Deep residual skip connection neural network for single image deraining** [13239-39]
- 13239 15 **Deep learned virtual staining for highly accurate tissue examination** [13239-40]
- 13239 16 **Electrically tunable multifunctional polarization and space-dependent metasurface integrated with liquid crystal** [13239-41]
- 13239 17 **Disparity optimization using improved denoising diffusion probabilistic model** [13239-42]
- 13239 18 **Single-frame grating pattern phase recovery for high dynamic range 3D measurement based on deep learning** [13239-43]
- 13239 19 **Optimized single-layer planar optics for wide field-of-view imaging** [13239-44]
- 13239 1A **Correction of grating patterns for high dynamic range 3D measurement based on deep learning** [13239-45]
- 13239 1B **A novel wavefront modulation approach in the extreme ultraviolet** [13239-46]
- 13239 1E **HTViT: an efficient CNN-Transformer hybrid model with high throughput** [13239-49]
- 13239 1F **Complex-domain multistage channel attention network for Fourier ptychography reconstruction** [13239-50]
- 13239 1G **An efficient exposure fusion method for 3D measurement with high-reflective objects** [13239-51]
- 13239 1H **Plug-and-play illumination correction for illumination variant optical flow estimation** [13239-52]
- 13239 1I **A video archive management method based on blockchain technology** [13239-53]
- 13239 1J **Restoration of the optical properties of the scene by means of differentiable rendering** [13239-54]

- 13239 1K **High-level design of neuromorphic processors based on explicit decoupling of computations and transaction flow control** [13239-55]
- 13239 1L **CU-DETR: a monocular 3D detection enhanced by local-global feature fusion and position embedding perturbation** [13239-56]
- 13239 1M **Super-resolution reconstruction for low-light imaging using intensified CMOS camera: SNR analysis and algorithm improvement** [13239-57]
- 13239 1O **High-definition dynamic multilayer 3D display based on OpenGL and CUDA** [13239-59]
- 13239 1P **Rotation correction-based neural radiance fields for multiview satellite images** [13239-60]
- 13239 1Q **Hybrid bundle-adjusting 3D Gaussians for view consistent rendering with pose optimization** [13239-61]
- 13239 1R **Multicamera wide-field-of-view compound eye imaging system** [13239-62]
- 13239 1T **A high-precision system for processing images of the physical model of the impeller obtained by the optical system in transmitted and reflected light** [13239-64]
- 13239 1U **A new method for identifying the key indicators and dependencies in the processing of images of helical surfaces of conical cutters obtained with the optical measuring machine** [13239-65]
- 13239 1V **Paired data synthesis for image restoration** [13239-66]
- 13239 1X **Image inpainting by anisotropic gradient estimation** [13239-68]
- 13239 1Y **Image enhancement via multiscale-exposure image fusion** [13239-69]
- 13239 1Z **Real-time cognitive algorithm for adapting the actions of multipurpose robotic systems** [13239-70]
- 13239 20 **Depth maps inpainting based on adaptive generative models** [13239-71]
- 13239 21 **Method for recognizing grape disease in bushes from images using neural network technologies** [13239-72]
- 13239 22 **Video stream processing using steganographic information concealing method** [13239-73]
- 13239 23 **Development of a system for positioning semiconductor chips using video data during installation** [13239-74]
- 13239 24 **Payload stabilization system of manipulator with flexible links based on RISC-V microprocessor and stereo camera system** [13239-75]

- 13239 25 **Technical vision system for installation of semiconductor crystals with direct recording of the moment of installation** [13239-76]
- 13239 26 **Preprocessing and improving the quality of thermal images** [13239-77]
- 13239 27 **Leveraging zero-shot models for enhanced mixed reality systems** [13239-79]
