Volume 13245

Proceedings of SPIE 0277-786X, V. 13245

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Plasmonics VIII*, edited by Zheyu Fang, Takuo Tanaka, Proc. of SPIE 13245, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Symposium Committee*
ix *Conference Committee*

PLASMONICS IV

13245 0L **Biosensing applications based on metallic nanostructures (Invited Paper)** [13245-20]

13245 0N **Superquenching of aromatic amino acids in the presence of rhodium nanoparticles**
[13245-22]

POSTER SESSION

13245 0U **Spin-orbit-engineered plasmonic nanocircuits** [13245-29]

13245 0V **Compact generation of surface plasmon polariton Bessel-like beams** [13245-30]

13245 0X **Laser-induced periodic structures-assisted surface plasmon resonance refractive index sensor** [13245-32]
