**Volume 13264**

Proceedings of SPIE 0277-786X, V. 13264

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Active and Passive Remote Sensing of Oceans, Seas, and Lakes*, edited by Robert J. Frouin, Hiroshi Murakami, Jong-Kuk Choi, Kuo-Hsin Tseng, Proc. of SPIE 13264, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

- v *Symposium Committee*
- vii *Conference Committee*

---

## ALGORITHM DEVELOPMENT AND CALIBRATION TECHNIQUES

---

- 13264 02 **PCA-based atmospheric correction of PACE OCI ocean color imagery** [13264-1]
- 13264 03 **Local optimization of satellite ocean color algorithm using AERONET-OC in Ariake Bay** [13264-2]
- 13264 04 **Estimating diurnal variability of photosynthetically available radiation at the ocean surface from EPIC observations** [13264-3]

---

## EMERGING TECHNOLOGIES AND PRODUCT INNOVATIONS

---

- 13264 07 **Satellite on-board processing of synthetic aperture radar data for rapid delivery of latency sensitive maritime information products** [13264-5]
- 13264 08 **Improving online data QC of VHF coastal radar for ocean current mapping** [13264-7]

---

## COASTAL AND INLAND WATER APPLICATIONS

---

- 13264 0A **Mapping the benthic habitats of Boracay and Santa Cruz Islands, Philippines using Sentinel-2 imagery and random forest classification in Google Earth Engine** [13264-10]
- 13264 0B **Comparison of corrected surface reflectance, principal component analysis, and kernel principal component analysis for seagrass percent cover mapping using Sentinel-2 based on various regression models** [13264-11]

---

## ENVIRONMENTAL CHANGE AND CLIMATE IMPACT ASSESSMENTS

---

- 13264 0E **High-resolution monitoring and modelling of thermal plumes from nuclear power plants in the Arabian Gulf** [13264-14]
- 13264 0G **A near real-time automated oil spill monitoring system using SAR imagery from the European Copernicus mission** [13264-17]

- 13264 OH **Evaluating the applicability of ocean color algorithms in the Fiji region from in situ bio-optical data** [13264-18]
- 13264 OI **High-frequency radar observations of meteotsunami currents in the northern region of Taiwan** [13264-19]

---

**POSTER SESSION**

- 13264 OJ **Spatiotemporal variability of sea surface temperature, sea surface height, and water quality along the northwestern coast of Taiwan** [13264-20]
- 13264 OK **Performance of a portable fluorescence lidar system with regional Chl-a derivation algorithms: a case study of Chiba, Japan** [13264-21]
- 13264 OQ **Evaluating the spatial suitability for seaweed aquaculture through ocean color remote sensing in Lombok, Indonesia** [13264-28]
- 13264 OS **Satellite-based mapping of mackerel habitat suitability in the exclusive economic zone of South Korea** [13264-30]
- 13264 OT **Water column correction for coral reef habitat mapping using high-spatial resolution remote sensing image technology** [13264-31]
