Volume 13267

Proceedings of SPIE 0277-786X, V. 13267

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Earth Observing Missions and Sensors: Development, Implementation, and Characterization VI*, edited by Xiaoxiong Xiong, Toshiyoshi Kimura, Po-Hsuan Huang, Proc. of SPIE 13267, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- vii *Symposium Committee*
- ix *Conference Committee*

EXISTING AND NEW MISSIONS I

- 13267 03 **Calibration and validation of NOAA-21: processes, outcomes, and lessons learned (Invited Paper)** [13267-2]
- 13267 04 **Overview: NISAR L-band SAR instrument pre-launch verification, on-orbit calibration and validation** [13267-3]

EXISTING AND NEW MISSIONS II

- 13267 06 **Overview and pre-flight tests of TANSO-3 onboard GOSAT-GW** [13267-5]
- 13267 07 **ALOS-4 launch and early orbit operation result** [13267-6]

POST-LAUNCH CALIBRATION AND VALIDATION I

- 13267 08 **Long-term on-orbit performance of the VIIRS on Suomi NPP, NOAA-20, and NOAA-21 in reference to partner missions (Invited Paper)** [13267-8]
- 13267 09 **Validation of NOAA-21 VIIRS TEB response versus scan angle determined from measurements during the spacecraft pitch maneuver** [13267-9]
- 13267 0B **Inter-comparison of NOAA-21/NOAA-20/S-NPP VIIRS solar reflective bands (RSB) with PACE OCI and JPL EMIT hyperspectral observations** [13267-11]

POST-LAUNCH CALIBRATION AND VALIDATION II

- 13267 0C **Evaluation of GPM DPR rain parameters with north Taiwan disdrometers** [13267-12]
- 13267 0D **Tracking MODIS RVS for the reflective solar bands in drifting orbits using SNO with VIIRS** [13267-13]
- 13267 0E **PACE OCI straylight and crosstalk evaluation using Moon** [13267-14]

ENABLING TECHNOLOGY AND DATA ANALYSIS

- 13267 OG **Optical metrology for wide field-of-view remote sensing systems** [13267-16]
- 13267 OI **Design and simulation of plenoptic imaging system on unmanned aerial vehicle for 3D aerial photography** [13267-17]
- 13267 OJ **Design and implementation of automatic optical surface defect inspection system of large aperture lenses** [13267-18]
- 13267 OK **Optical thermal vacuum test for the FORMOSAT-8 optical system assembly** [13267-19]
- 13267 OL **Implementation and investigation of motion simulation and compensation for airborne synthetic aperture radar** [13267-20]
- 13267 OM **Analysis of the 2-D spectral supports in SAR spotlight acquisition mode** [13267-21]

POSTER SESSION

- 13267 ON **Development of the FORMOSAT image product operation system** [13267-7]
- 13267 OP **Structural analysis of the optical payload for a remote-sensing low-Earth orbit CubeSat** [13267-23]
- 13267 OR **Utilizing satellite remote-sensing and meteorological data to evaluate potential green power sites inland and offshore of Taiwan** [13267-25]
- 13267 OS **A study of coastal waters at regional validation sites using observations from VIIRS, PACE, and EMIT** [13267-26]
- 13267 OT **Optical ground station for applications of high-precision LEO remote sensing and laser communications satellites** [13267-27]
- 13267 OV **Long short-term memory (LSTM) deep learning-based prediction of sensor performance time series for improved VIIRS reflective solar band calibration** [13267-29]
- 13267 OX **Development of the FORMOSAT-8 planning and scheduling system: system process design for tasking requirements** [13267-31]
- 13267 OY **An update to the calibration algorithm of the MODIS PV LWIR bands for Collection 7 to improve long-term records** [13267-32]
- 13267 OZ **Imager lens for star sensor in the Faraday Dragon rideshare mission** [13267-33]
- 13267 IO **Determination of the best focus position of Formosat-8** [13267-34]

- 13267 11 **Absolute radiometric calibration and time-series analysis using Sentinel-1A** [13267-35]
- 13267 12 **Implementation of the design for manufacturability of spaceborne telescope for remote sensing instruments in the FORMOSA-8 satellite program** [13267-36]
- 13267 13 **Enhanced stray light suppression black treatments process for observational remote sensing telescopes** [13267-37]
