Volume 13268

Proceedings of SPIE 0277-786X, V. 13268

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advancement on GNSS-based Measurements and Applications*, edited by Chen-Tsung Lin, Tzu-Pang Tseng, Shu-Chih Yang, Chien-Hung Lin, Proc. of SPIE 13268, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- v *Symposium Committee*
- vii *Conference Committee*

SURFACE, ATMOSPHERE, AND IONOSPHERE

- 13268 07 **Characterizing ionospheric delay gradients for GNSS ground-based augmentation system (Invited Paper)** [13268-9]
- 13268 08 **Applications of deep-learning on TRITON data: results and findings** [13268-7]

IONOSPHERE AND WEATHER

- 13268 0D **GNSS application for space weather operation in Taiwan** [13268-13]

GNSS-RO

- 13268 0I **Atmospheric and ionospheric remote sensing using GNSS: FORMOSAT-7 system performance and lessons learned after five years mission life in orbit** [13268-18]
- 13268 0K **Determination of the marine boundary layer height from the GNSS RO data by using a multivariate statistical method** [13268-20]

POSTER SESSION

- 13268 0L **Validation of equatorial plasma bubbles position around Taiwan Region: using FORMOSAT-7/COSMIC-2 and GNSS ground receivers** [13268-21]
- 13268 0M **Determination on precipitable water vapor from ground-based GNSS and COSMIC-2 radio occultation over Taiwan** [13268-22]
