Fourth International Conference on Intelligent Traffic Systems and Smart City (ITSSC 2024)

Hao Chen Wei Shangguan Editors

23–25 August 2024 Xi'an, China

Organized by Chang'an University (China)

Published by SPIE

Volume 13422

Proceedings of SPIE 0277-786X, V. 13422

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in Fourth International Conference on Intelligent Traffic Systems and Smart City (ITSSC 2024), edited by Hao Chen, Wei Shangguan, Proc. of SPIE 13422, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510686304 ISBN: 9781510686311 (electronic)

Published by **SPIE** P.O. Box 10, Bellingham, Washington 98227-0010 USA Telephone +1 360 676 3290 (Pacific Time) SPIE.org Copyright © 2025 Society of Photo-Optical Instrumentation Engineers (SPIE).

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- ix Conference Committee
- xi Introduction

INTELLIGENT LOGISTICS SYSTEM AND ROAD SAFETY EVALUATION

13422 02	Research on virtual collaborative emergency response to road emergencies based on multiagent [13422-5]
13422 03	Intelligent emergency-response resilience assessment and recovery scheduling of transportation networks [13422-52]
13422 04	A case study on ship maritime risk cost control based on benefit-system correlation model [13422-88]
13422 05	Evaluation system construction of highway traffic safety facilities based on design objectives [13422-16]
13422 06	Construction of a transportation safety evaluation system for rural highways [13422-28]
13422 07	Vehicle global localization based on V2I collaboration in GNSS-denied environments [13422-60]
13422 08	Research on the effects of driving fatigue on multilane motorways [13422-6]
13422 09	The applicability evaluation of BRT in China [13422-115]
13422 0A	Eco-driving model for wireless charging scenario of connected and automated electric freight vehicles based on differentiated driving strategies at multi-intersections [13422-63]
13422 OB	Research on methods for data acquisition and visualization of subway network passenger flow big data [13422-62]
13422 OC	Research on intelligent scheduling optimization of unmanned tower based on genetic algorithm [13422-126]
13422 OD	Research on kinetic energy recovery technology of intelligent control system in new energy vehicle field [13422-82]
13422 OE	Auto drive system based on Internet of Vehicles and digital twin technology [13422-48]
13422 OF	A modeling method for metro train braking system requirements [13422-46]
13422 0G	Flight delay causes determination based on adversarial defense of TSVM [13422-18]

13422 0H Research on vehicle-cargo matching algorithm considering price heterogeneity [13422-119] 13422 01 Energy management strategy for tracked vehicles considering battery loss and heat dissipation [13422-80] 13422 0J Development of a differentiated tolling scheme based on PT3 for mountainous resource transport sections [13422-30] 13422 0K A path planning algorithm based on multifactor cost pruning optimization [13422-22] 13422 OL Quality evaluation analysis of highway alignment design based on driving simulation technology [13422-37] 13422 0M Comparative study on green logistics based on neural network word embedding [13422-58] 13422 ON Research on logistics demand portfolio forecasting in Shandong Province based on GM(1,N) model [13422-29] 13422 00 Research on propulsion paths to reduce cost and increase efficiency of logistics industry promoted by high quality development of transportation in Shandong Province [13422-77] 13422 OP Potential field-based path planning research in complex traffic scenarios [13422-21] 13422 0Q Research on collision avoidance strategies and testing for intelligent vehicles based on the RSS model [13422-59] Research on demand forecasting of cold chain logistics of fresh agricultural products 13422 OR based on ISSA-BP neural network [13422-56] 13422 08 Research on air vehicles and urban air mobility technologies and standards [13422-97] 13422 0T **Research on path planning of intelligent vehicles** [13422-67] 13422 OU Applying choice preference to passenger flow guidance for urban rail transit under emergencies [13422-102] Simulation study on traffic organization optimization for parallel divided road sections 13422 OV [13422-116] 13422 OW Analysis of the high-quality development in port rail-water intermodal transportation characteristics [13422-64] A parallel improved variable neighborhood search algorithm for multidepot 13422 OX multicompartment simultaneous pickup and delivery problem with time windows and split demands [13422-127]

13422 OY	Research on distribution path optimization of fresh fruit cold chain logistics based on
	genetic algorithm [13422-128]

- 13422 0Z Optimization analysis of the distribution path for hybrid vehicle-drone emergency medical supplies in the event of natural disaster [13422-68]
- 13422 10 Research on the logistics volume forecast and functional area layout optimization of Langfang international commercial trade logistics port [13422-70]

INTELLIGENT TRAFFIC DETECTION AND RISK PREDICTION

- 13422 11 Multitasking autonomous driving scheme design based on YOLOv5 [13422-11]
- 13422 12 Evaluation of traffic measurement methods in the context of dynamic transport development [13422-89]
- 13422 13 Energy consumption monitoring of traction transformer end in rail transit under dual carbon targets [13422-85]
- 13422 14 **Positional-encoding-based general obstacle detection method for autonomous driving** [13422-123]
- 13422 15 A review of deep learning for traffic flow prediction [13422-8]
- 13422 16 Target recognition technology for unmanned ships based on improved YOLOv5 [13422-122]
- 13422 17 Traffic flow prediction based on graph convolutional networks: a survey [13422-93]
- 13422 18 Cut-in scenarios generation on highways for autonomous driving tests [13422-109]
- 13422 19 Signal timing analysis and optimization of urban combined traffic intersections [13422-86]
- 13422 1A Traffic sign detection based on ResNet and transfer learning [13422-57]
- 13422 18 Short term OD prediction of urban rail transit based on vector autoregression [13422-83]
- 13422 1C Spatio-temporal characterization of port road transport based on big data [13422-98]
- 13422 1D Adaptive spindle fusion clustering algorithm for millimeter wave radar traffic targets [13422-49]
- 13422 1E Air traffic complexity assessment based on multiscale spatio-temporal data [13422-2]
- 13422 1F Research on testing integrated driver assistance system based on test scenes of cut-in and cut-out [13422-94]

- 13422 1G A multichannel image-based method for flight delay prediction in terminal area [13422-47]
- 13422 1H A method for extracting road markings based on vehicle-mounted LiDAR point clouds [13422-3]
- 13422 11 Bike-sharing demand prediction based on a multilevel model integrating macro and micro information [13422-111]
- 13422 1J Prediction and analysis of the severity of road traffic accidents at traffic signs under rainstorm conditions [13422-121]
- 13422 1K Lane detection based on enhanced YOLOv8 [13422-4]
- 13422 1L LAA-YOLO: a traffic sign detection method in foggy weather based on asymptotic feature fusion and attention [13422-34]
- 13422 1M Short-term traffic flow prediction of freeway based on improved graph convolutional network [13422-110]
- 13422 1N K-shape-based spatio-temporal graph attention network for traffic flow prediction [13422-31]
- 13422 10 A dynamic monolithization method based on oblique photogrammetry real-scene 3D model [13422-106]
- 13422 1P Research on road object detection algorithms based on YOLOv8-RC [13422-23]
- 13422 1Q Research on countermeasure of taxi driver's aggressive driving behavior based on text features extraction [13422-95]
- 13422 1R Research on the mechanism of the impact of traffic environment on near-collision behavior of hazardous goods vehicle drivers based on EEG [13422-125]
- 13422 15 Predicting lane change risk for intelligent driving vehicles considering driving style [13422-15]
- 13422 17 Research on vehicle trajectory prediction combining LSTM and safety interaction area [13422-33]
- 13422 10 Vehicle target detection under adverse weather conditions based on improved YOLOv8 [13422-38]
- 13422 1V A method for predicting accident risks based on edge networks [13422-17]

SMART CITY AND TRANSPORTATION SYSTEM MODELING

13422 1W Exploration and analysis of digital design of urban path guidance system from the perspective of artificial intelligence development [13422-114]

- 13422 1X Venue crowd recognition in dense smoke environment: a recognition method based on attention mechanism fusion segmentation instances [13422-7]
- 13422 1Y Construction of evaluation system of urban slow traffic supply level [13422-25]
- 13422 17 Evaluation system for port development within port clusters [13422-42]
- 13422 20 Utilizing 6G technology for vehicle-to-everything (V2X) communication using 6G C-V2X with MIMO antenna technology [13422-27]
- 13422 21 Analysis of pedestrian motion and trajectory across different urban environments [13422-78]
- 13422 22 Development and utilization of urban underground space [13422-44]
- 13422 23 Research on appliance recycling strategy based on evolutionary game [13422-50]
- 13422 24 The effectiveness of using plants as sound barriers in reducing traffic noise [13422-39]
- 13422 25 A flight slots allocation method for single airport based on Q-learning algorithm [13422-40]
- 13422 26 Implementing traffic agent based on LangGraph [13422-10]
- 13422 27 Electronic consumption vouchers fraud detection of city Y based on improved LSTM-AE structure [13422-107]
- 13422 28 Research on knowledge graph construction for high-definition navigation electronic map specification [13422-99]
- 13422 29 Vulnerability assessment of integrated manned and unmanned airspace networks [13422-14]
- 13422 2A Fire risk analysis and control in urban rail transit operations based on fault tree analysis [13422-19]
- 13422 2B Intelligent design and manufacturing of ethnic building components based on BIM technology: a case study of Guangxi region [13422-13]
- 13422 2C Research on ride-sharing user equilibrium problem based on low-carbon travel orientation [13422-26]
- 13422 2D Design and implementation of intelligent debugging platform software for standard EMU [13422-9]
- 13422 2E Research on cross-domain collaborative monitoring technology based on multinetwork integration [13422-79]

- 13422 2F Smart grid integration in super high-rise intelligent buildings: identifying barriers [13422-113]
- 13422 2G Leveraging AI and IoT for energy efficiency and power quality management in prefabricated smart buildings [13422-84]
- 13422 2H Research on a brake pressure control device [13422-96]
- 13422 21 Research on comprehensive evaluation methods and strategies of public transportation service quality based on passenger perception [13422-105]
- 13422 2J Comprehensive evaluation and application of energy efficiency and CO₂ emission levels at container terminals [13422-91]
- 13422 2K Mesh simplification algorithm considering model features and vertex distribution [13422-51]
- 13422 2L Research and implementation of multilevel visualization of urban traffic flow based on unreal engine [13422-43]
- 13422 2M Construction of the proprietary model of metro intelligent customer service based on open source large language model [13422-65]
- 13422 2N Theoretical methodology for precision diagnosis of urban area fire risks based on big data [13422-103]
- 13422 20 Development of a comprehensive evaluation method in energy efficiency and CO₂ emission levels for dry bulk terminals [13422-92]
- 13422 2P Formulation of diagnostic strategies for CAN communication under the UDS protocol [13422-41]
- 13422 2Q Design and implementation of intelligent driving simulation platform based on Unity3D [13422-20]
- 13422 2R The design and implementation of a maintenance platform for rail vehicle air conditioning systems [13422-45]
- 13422 28 Urban future prediction based on genetic algorithm-back propagation neural network [13422-73]
- 13422 2T Research on fault diagnosis of photovoltaic inverter grid circuit based on VMD wavelet energy algorithm [13422-87]
- 13422 2U Research on architecture and key technologies of urban traffic digital twin system [13422-71]
- 13422 2V Research on key technologies for block data governance in smart cities [13422-66]
