PROCEEDINGS OF SPIE

7th Optics Young Scientist Summit (OYSS 2024)

Chao Zuo Tian Jiang Dong Liu Guangming Tao Ye Tian Lai Wang Editors

25–28 October 2024 Nanjing, China

Organized by Chinese Laser Press (China) Nanjing University of Science and Technology (China)

Published by SPIE

Volume 13520

Proceedings of SPIE 0277-786X, V. 13520

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in Seventh Optics Young Scientist Summit (OYSS 2024), edited by Chao Zuo, Tian Jiang, Dong Liu, Guangming Tao, Ye Tian, Lai Wang, Proc. of SPIE 13520, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510688360 ISBN: 9781510688377 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

SEVENTH OPTICS YOUNG SCIENTIST SUMMIT (OYSS 2024)

13520 02	High-sensitivity SERS detection via heated evaporation enrichment on superhydrophobic/hydrophilic substrates coupled with microspheres [13520-3]
13520 03	Super-resolution imaging with randomly generated liquid-immersed polymer droplet microspheres [13520-4]
13520 04	Study on the damage effects of 940nm pulsed laser on tri-junction GaAs solar cells [13520- 5]
13520 05	Biaxial zero-field atomic magnetometer with a multi-passed probe light [13520-8]
13520 06	Research on electro-optical positioning and guidance technology for monitoring the return of spacecraft [13520-9]
13520 07	Simulation study of laser ablation of C/SiC composites [13520-11]
13520 08	Theoretical evaluation of infrared window thermal degradation induced by laser: a comparative study for Ge, Si and GaAs [13520-12]
13520 09	Design of large size multiband optical windows [13520-13]
13520 0A	Wide band off-axis reflection imaging system [13520-14]
13520 OB	Research on anti-interference technology of groundwater heavy metal fluorescence detection device [13520-15]
13520 OC	Finite element analysis and experiments on the interaction between pulsed laser and capillaries in skin tissue [13520-16]
13520 OD	Design of optical films transmittance testing system [13520-17]
13520 OE	An end-to-end autoencoder-based probabilistic shaping method for optical communication [13520-18]
13520 OF	Simultaneous recording of calcium signals in mouse superficial cortex and deep brain for anesthesia studies [13520-22]
13520 0G	Research on 1050 nm high-power narrow linewidth fiber laser based on tapered ytterbium- doped fiber [13520-23]

13520 OH	Research on thermal-stress induced birefringence of large aperture neodymium glass slab solid state laser [13520-24]
13520 01	Fourier light-field microscopy study of the structural colours of lepidopteran insects [13520-25]
13520 OJ	Double-layer symmetric gratings of lithium niobate with bound states in the continuum for tunable dual-band refractive index sensing [13520-27]
13520 OK	Near-diffraction-limited wide-field achromatic metalens [13520-29]
13520 OL	The measurement and analysis of optical properties of Gaussian thin films [13520-30]
13520 OM	Optical performance monitoring of mode division multiplexing signal based on multitask convolutional neural network [13520-33]
13520 ON	Single optical frequency comb-assisted AMCW LiDAR with high precision and fast response speed [13520-34]
13520 00	Super resolution imaging based on sub-pixel scanning with beam shifter devices [13520-35]
13520 OP	Dynamic panoramic image stitching with multi-aperture compound eye array [13520-36]
13520 OQ	Non-line-of-sight imaging based on low-memory global convolutional neural network [13520-37]
13520 OR	Generation of deep ultraviolet dispersive waves in the tapered anti-resonant hollow-core fiber [13520-39]
13520 OS	Intensity noise reduction of polarization-maintaining Yb-fiber NALM oscillator by dispersion and cavity loss optimization [13520-40]
13520 OT	Resonance enhanced photoacoustic spectroscopy with thin film [13520-43]
13520 0U	The influences of mirror deflection on the surface shapes of different MEMS mirror structures [13520-44]
13520 OV	Quartz enhanced photoacoustic spectrophone employing conical acoustic resonator [13520-48]
13520 OW	Application of MiniRocket algorithm in quantitative analysis of VOCs gas concentration based on hyperspectral data [13520-50]
